It is impossible to call the long roll of those fine citizens who have stood beside Senator NEELY and myself in this fight. Space simply does not permit.

But among the hundreds of communications which have come to me that I prize most highly are the following:

[National Council of Catholic Women, Department of Lay Organizations, N. C. W. C. Episcopal chairman, Most Rev. John F. Noll, D. D. National headquarters, 1312 Massachusetts Avenue NW., Washington, D. C. Agnes G. Regan, executive secretary; Margaret T. Lynch, assistant executive secretary]

JUNE 17, 1936.

The Honorable SAMUEL B. PETTENGILL, M. C.,
House Office Building, Delaware Avenue and B NE.,
Washington, D. C.

HONORABLE AND DEAR SIR: I had hoped before the adjournment of Congress to call and say a word of appreciation to you for the courtesy extended during the hearings on the Neely-Pettengill bill. I sincerely hope that the time is not far distant when this measure, which you have been instrumental in introducing, will come to a successful issue.

Very sincerely yours,

AGNES G. REGAN,
Executive Secretary.

NATIONAL CONGRESS OF PARENTS AND TEACHERS,
Washington, D. C., April 10, 1936.

Hon. SAMUEL B. PETTENGILL,
United States House of Representatives,
Washington, D. C.

DEAR MR. PETTENGILL: In behalf of the National Congress of Parents and Teachers, may I assure you of its appreciation of the invaluable service to the cause of child welfare which you are contributing in sponsoring legislation to abolish compulsory block booking and blind selling of motion pictures.

For the hearings recently held before the subcommittee of the House Committee on Interstate and Foreign Commerce, of which you are chairman, we are especially grateful. In many respects these hearings were by far the most satisfactory of any we have ever attended on the subject of motion pictures. The time given, the interest manifested by each of the members of the subcommittee, the revealing information elicited through adroit questioning and the complete fairness and courtesy to all witnesses were subjects of favorable comment, not alone by the representatives of our organization but by those of all of the civic, educational, and religious groups who testified in support of the Pettengill bill.

The effect of these hearings is already being manifested in deeper interest and wider endorsement of this measure which cannot but portend ultimate success of its passage.

With high regard, deep appreciation, and all good wishes, I am,

Very sincerely yours,

MARY T. BANNERMAN,
National Chairman, Committee on Legislation.

The struggle for better movies has just begun.

WILLIAM D. THOMAS

Mr. CROWTHER. Mr. Speaker, the passing of our estimable colleague, WILLIAM D. THOMAS, was a shock to us all, and again we realize that in the midst of life we are constantly faced with the probability of the long journey to that undiscovered country from whose bourne no traveler has returned.

During his brief life period BILLY THOMAS had earned the love and respect of that great multitude he had the honor to represent in the Congress of the United States. Though handicapped by a physical ailment, he performed his duties with a degree of care and thoughtfulness that assured his people they had chosen wisely and well in selecting their Representative.

Throughout the period of his illness he never lost courage, and his cheery greeting and pleasant smile were ever present. The host of boys and girls who paid their respect to his memory the day of his funeral service realized that they had lost a real friend, for one of his chief joys in life was to lend a helping hand to the young folks.

He had devoted a great portion of his life to fraternal work, and his brethren will regret the passing of one whose life had been dedicated to the service of stressing the fatherhood of God and the brotherhood of man. To the Members of Congress he had particularly endeared himself. He had fixed ideas as to governmental policies and held firmly to them. He had unbounded faith in the supremacy of principle over expediency, and when the choice had to be made he hewed to the line of his faith. In so doing he left us all a legacy of great worth if we but follow that policy.

To his immediate family and friends we extend our heartfelt sympathy, and we trust that the blessed hope of immortality may lighten the sorrow and assure them of joining him some day in that "house not made with hands, eternal in the heavens."

NEW W. P. A. REGULATIONS

Mr. BEITER. Mr. Speaker, the first deficiency appropriation bill recently approved by the Congress and the President of the United States carried an appropriation for continuing the Works Progress and Public Works programs and laid down certain regulations governing the wages and conditions of employment of relief workers.

As a result of these regulations, new instructions have been issued by the Works Progress Administrator relating to rates of pay, hours of labor, monthly earnings, and conditions of employment.

Under the new ruling preference in employment is given to all persons certified as being in need of relief by a public relief agency approved by the Works Progress Administration authorities, and this, therefore, removes the limitation previously imposed whereby only persons who had been receiving aid between the period from May 1 to November 1, 1935, were eligible for W. P. A. employment. This is, indeed, a great proclamation of emancipation for those who have long been denied work relief because of this restriction. I have had many cases where applicants had applied for aid the latter part of October 1935 and were ruled ineligible for work relief because actual welfare assistance was not rendered until after November 1. Only recently many persons have been suspended or dismissed altogether because a search of the records brought to light the fact that they missed out by a day or two in complying with the requirements in this connection. The new ruling will be of great assistance to the needy persons in my congressional district.

Another new ruling of the Administrator establishes hourly wage rates not less than the prevailing scale effective July 1. The regulation with regard to rates of pay reads as follows:

It shall be the responsibility of the several State Works Progress administrators to establish according to occupational titles hourly wage rates (which shall be not less than the prevailing hourly wage rates) for persons employed on projects, and to make such rates effective for all pay-roll periods beginning on or after July 1, 1936. Wage rates so established shall not be applicable to persons employed in supervisory and administrative positions and owner-operators of teams, trucks, and equipment.

Veterans who are employed on work relief projects under this new ruling will not be dismissed or suspended because of receipt of adjusted-service bonds or checks in payment of an adjusted-compensation certificate—bonus. Veterans who are eligible for work relief and have received their bonus bonds or check in payment of same will not be denied the privilege of employment under this regulation.

The new appropriation for work relief projects prohibits the Works Progress Administration from knowingly employing aliens who are in the United States illegally.

Other provisions limit the hours of work so that monthly earnings will conform to the schedule now in effect, and continues the maximum hours of work, limiting project workers to 8 hours a day, 40 hours a week, and 140 hours a month.

SUMMARY OF REPORTS ON WAR DEPARTMENT INVESTIGATION

Mr. McSWAIN. Mr. Speaker, it is appropriate and fitting that the Committee on Military Affairs summarize its extended activities under the authority of House Resolution 275 of the Seventy-third Congress and House Resolution 59 of the Seventy-fourth Congress. The investigation is not entirely complete, and during the fall season I will resume the investigation, with certain valuable assistants from the General Accounting Office and the Chief of Finance of the War Department. I cannot speak too highly of the services of the gentlemen who have heretofore been detailed to this committee to assist in carrying on this investigation.

The testimony taken in the course of this investigation during the two Congresses covers many thousands of pages of testimony and vast volumes of documentary evidence sufficient to fill many large boxes. At least two of these boxes, believed to contain valuable data, have not yet been opened.

The first preliminary report was filed on May 7, 1934, as House Report No. 1506, by the gentleman from New Hampshire, Mr. ROGERS, chairman of the subcommittee on aviation. The next report was filed on June 14, 1934, by myself, as chairman of the full committee, by House Report No. 2005, and related to the contract between the War Department and the Mercur Corporation for the operation of the Port Newark Army Supply Base. As a result of that investigation, suit has been instituted against the Mercur Corporation for an accounting, and the Congress has passed an act authorizing the sale of this Army base to the city of Newark, N. J.

The next report was filed on June 15, 1934, as House Report No. 2060, by the gentleman from New Hampshire [Mr. ROGERS], as chairman of the Subcommittee on Aviation, and related largely to facts concerning the purchase of aircraft by the War Department. The result of that particular phase of the investigation has been highly beneficial and has resulted in inducing the War Department to comply strictly with the provisions of section 10 of the act of July 2, 1926, as evidenced by the most informing letter from the Secretary of War to myself dated August 15, 1935. That letter was included in the report of the Secretary of War to the Congress for the year 1935 and has heretofore been printed in the CONGRESSIONAL RECORD.

Upon the coming in of the Seventy-fourth Congress, by authority of the committee I filed a report on January 3, 1935, as House Report No. 3, relating to the Port Newark Army supply base contract. That phase of the investigation and the two reports concerning same are epoch making and are sure to have a very great influence for a long time in the future upon any contracts that may be made by the War Department concerning real estate in its possession.

On January 3, 1935, as chairman of the committee, I also filed a report, being House Report No. 4, on behalf of Subcommittee No. 3, and reference to same is respectfully invited for information concerning a most important phase of the entire investigation.

On August 22, 1934, as chairman of the full committee, I filed House Report No. 1884, summarizing our activities to that time and forecasting the probable direction for the future investigation.

On February 25, 1936, by the authority of the committee, I filed House Report No. 2063, relating to the investigation of Breecot Co.

Again on March 31, 1936, I filed House Report No. 2289, upon another phase of the investigation, to wit, Newbury Manufacturing Co.

On May 19, 1936, I filed another report as House Report No. 2680, upon still another phase of the investigation, to wit, the cases of Lt. Col. Edward L. Hoffman and Lt. Col. William R. Gruber.

On June 17, 1936, by direction of the committee, I filed House Report No. 3010, relating to still another phase of the investigation, namely, the Brimley Corporation.

Mr. Speaker, it is no pleasure to recite the shortcomings of others. But we think that Army officers ought to be above suspicion as to corruption in financial matters, and we think that practically all of the Army officers are honorable, high-minded, and efficient gentlemen, and therefore they are vitally interested in having the dishonorable and corrupt officers exposed and expelled from the Army. We did not publish the testimony nor detailed report concerning our investigation into the conduct of Lt. Col. Edward L. Hoffman. However, we submitted that report, covering about 200 pages of typewritten matter, to the Secretary of War. It appears that an investigation was held by the War Department into the conduct of Lt. Col. Edward L. Hoffman in 1933 as a result of certain testimony introduced at the instance of the Honorable THOMAS L. BLANTON, of Texas, during the hearings before the subcommittee on the War Department appropriation bill. That investigation of the War Department concluded that there was no improper conduct on the part of Colonel Hoffman. However, as a result of our investigation and the submission of our report to the Secretary of War, another investigation was conducted by the War Department which in substance held that Colonel Hoffman was guilty of highly improper conduct and, but for the fact that the statute of limitations had run against the conduct complained of, he doubtless would have been court-martialed. The result was that he suffered a very severe reprimand. There is a way to eliminate such officers from the Army without court martial, and that is by classifying them in class B and ordering their discharge. Certainly the statute of limitations could not avail Colonel Hoffman as against class-B proceedings. The letter of the Secretary of War to me concerning the investigation and the letter of

The Adjutant General relating thereto are herewith published for the information of the country and as a warning example to all officers in the Army against the temptation to engage in business transactions, especially where the interests of the Government are so vitally concerned as buyer or contractor from the corporation in which the officer is a stockholder and for which he is an officer.

As compared with the average civilians, Army and Navy officers are well cared for economically, because they not only receive fairly good salaries, which increase with the increase of age and the increase of family responsibilities, but they also have the benefit of the best medical and hospital care, including medicine and nurses, for themselves and for the members of their families. There is no need to blink the fact that the economic situation of Army and Navy officers is relatively good. They themselves well know it, though they may not admit it. The highest proof is the fact that they wish their sons to become officers and their daughters to marry officers. Of course, the love of and pride in the service is a factor, but the economic situation and all the incidental benefits and pleasures connected with the service are the principal factors. I know the brothers and sisters of too many Army officers—and I know their economic situation, and how their fortunes rise and fall with the fluctuations of business and economic conditions—not to realize the contrast in favor of Army and Navy officers. All through the years of terrible depression, when the well-to-do suffered indescribale agony through losses of their life savings, Army and Navy officers continued to receive their monthly checks without interruption.

I call these facts to the attention of the Congress and the country because it demonstrates conclusively that there is no excuse for Army officers to try to be making money on the side out of business transactions, and especially where they seek to represent the Government as a buyer and also at the same time represent their corporations as a seller. This dual relation is bound to be corrupt. There is some legislation on the books against conduct of this kind, and more legislation will result from this investigation. I propose to go into the entire matter fully and frankly with my final report to be filed in December of this year. Army and Navy officers have lifetime offices and incomes if their conduct is such as not to bring on court martial and dishonorable discharge or discharge by the class B route. They occupy something of the status of Federal judges. As the Honorable HATTON W. SUMNERS said in his address to the United States Senate upon the trial of Judge Ritter, of Florida, "They have taken the veil." By that he means they have put the business world behind them. They have become the wards of the Government. They are insured of ample subsistence. They have no need to economize and save a considerable part of their incomes. For them there is to be no rainy day. They are a privileged and protected class. They do not suffer any economic anxieties such as afflict us civilians. In return for this protection Army and Navy officers should render most conscientious, undivided, and scrupulously honest service to the Government and the people.

Here follow the letters from the Secretary of War and The Adjutant General.

WAR DEPARTMENT,
Washington, June 8, 1936.

Hon. JOHN J. MCSWAIN,
Chairman, Committee on Military Affairs,
House of Representatives.

DEAR MR. MCSWAIN: Reference is made to letter from this office dated March 9, 1936, and your reply of March 11, concerning a reinvestigation the Inspector General had been directed to make of the alleged improper relationship between Lt. Col. Edward L. Hoffman, Air Corps, and the Triangle Parachute Co., of Cincinnati, Ohio.

This reinvestigation has been concluded and has received careful and thorough consideration by the War Department. The following conclusions and recommendations of the investigating officer, in which I concur, are quoted for your information and for the information of your committee:

"CONCLUSIONS

"a. That Lt. Col. Edward L. Hoffman, Air Corps, did, in 1927, materially assist in the promotion and organization of Safe Aircraft, Inc., of Cincinnati, Ohio, for his personal benefit financially.

"b. That during the period July 1927–July 1929, while acting in the capacity of aeronautical engineer, detailed with the Department of Commerce, and placed on duty with that Department with Safe Aircraft, Inc., he actively directed important business affairs of that company and participated in its operation.

"c. That he continued those activities with Safe Aircraft, Inc., and the Triangle Parachute Co. after his return to military duty at Wright Field, Ohio, in July 1929, at which time he was assigned as chief of the parachute unit of the matériel division of the Air Corps at Wright Field, Dayton, Ohio.

"d. That the connection of Lieutenant Colonel Hoffman with Safe Aircraft, Inc., and the Triangle Parachute Co., particularly during the period July 4, 1929, and February 7, 1930, with especial respect to the receipt of money by him from those companies during that period, was not only highly unethical and prejudicial to good order and military discipline but constituted an apparent violation of section 113 of the Criminal Code, as well as a probable violation of section 41 of that code.

"e. That in 1930 and 1933 he misled and deceived his superior officers by his replies in official communications to questions specifically asked him by his military superiors with the purpose of ascertaining his true relationship to the Triangle Parachute Co. and its predecessor, Safe Aircraft, Inc.

"f. That in 1931 he attempted to influence the award of a Government contract, but without success due to the vigilant supervision of the head of the engineer section of the matériel division of the Air Corps at Wright Field, Dayton, Ohio.

"The evidence in support of this conclusion is insufficient to warrant trial by court martial even were such trial not barred by the statute of limitations.

"g. That he gave deceptive and misleading testimony in 1933 to Maj. Gen. John F. Preston, who at that time, under orders from the War Department, made an investigation of Lieutenant Colonel Hoffman's connection with Safe Aircraft, Inc., and the Triangle Parachute Co., and thereby prevented the real situation from becoming known at that time.

"h. That Lieutenant Colonel Hoffman's concealment of his relations to Safe Aircraft, Inc., and the Triangle Parachute Co. was unethical and in derogation of the high moral standard which governs officers of the Army.

"i. That his actions and conduct in all these matters were below the standard to be expected and required of officers of the Army.

"j. That by reason of the lapse of time Lieutenant Colonel Hoffman's trial for these offenses is barred by the statute of limitations.

"RECOMMENDATIONS

"a. That Lt. Col. Edward L. Hoffman, Air Corps, be reprimanded by the Secretary of War for concealing from his military superiors his connection with Safe Aircraft, Inc., and the Triangle Parachute Co. by misleading and deceptive replies to the chief of the matériel division, Air Corps (Brig. Gen. H. C. Pratt, Air Corps), and to the inspector general (Maj. Gen. John F. Preston).

"b. That the provisions of section 24b of the National Defense Act, as amended, be invoked against Lt. Col. Edward L. Hoffman, Air Corps."

Lieutenant Colonel Hoffman has been advised of the foregoing conclusions only and has been reprimanded for his conduct in connection with this case. A copy of the reprimand is inclosed herewith.

Sincerely yours,

GEO. H. DERN, *Secretary of War.*

JUNE 2, 1936.

RESULT OF REINVESTIGATION

To: Lt. Col. Edward L. Hoffman, Air Corps.
Through: Commanding Officer, Maxwell Field, Montgomery, Ala.

1. On April 7, 1933, The Adjutant General transmitted to you a letter giving you the results of an investigation made by the Inspector General into allegations that you had had improper business relations with the Triangle Parachute Co., of Cincinnati, Ohio, in which investigation you testified in your own behalf.

The conclusions then reached were:

"That there is nothing in Major Hoffman's relationship with the Triangle Parachute Co. in violation of law, Army regulations, or announced policies of the War Department.

"That there has been no improper expenditure of Government funds in connection with parachute development, and that no funds have been expended for the benefit of the Triangle Parachute Co."

2. On March 9, 1936, new evidence was brought to the attention of the War Department clearly indicating the exoneration ensuing to you as the result of the investigation of 1933 had been wholly unwarranted. As a result a reinvestigation was at once made and you again testified in your own behalf.

3. As a result of that reinvestigation the following conclusions were reached:

"That Lt. Col. Edward L. Hoffman, Air Corps, did, in 1927, materially assist in the promotion and organization of Safe Aircraft, Inc., of Cincinnati, Ohio, for his personal benefit financially.

"That during the period July 1927–July 1929, while acting in the capacity of aeronautical engineer, detailed with the Department of Commerce, and placed on duty by that Department with Safe Aircraft, Inc., he actively directed important business affairs of that company and participated in its operations.

"That he continued these activities with Safe Aircraft, Inc., and the Triangle Parachute Co. after his return to military duty at Wright Field, in July 1929, at which time he was assigned as the

chief of the parachute unit of the matériel division of the Air Corps at Wright Field, Dayton, Ohio.

"That the connection of Lieutenant Colonel Hoffman with Safe Aircraft, Inc., and the Triangle Parachute Co., particularly during the period July 4, 1929, and February 7, 1930, with especial respect to the receipt of money by him from those companies during that period, was not only highly unethical and prejudicial to good order and military discipline but constituted an apparent violation of section 113 of the Criminal Code, as well as a probable violation of section 41 of that code.

"That in 1930 and 1933 he misled and deceived his superior officers by his replies in official communications to questions specifically asked him by his military superiors with the purpose of ascertaining his true relationship to the Triangle Parachute Co. and its predecessor, Safe Aircraft, Inc.

"That in 1931 he attempted to influence the award of a Government contract, but without success, due to the vigilant supervision of the head of the engineering section of the matériel division of the Air Corps at Wright Field, Dayton, Ohio.

"That evidence in support of this conclusion is insufficient to warrant trial by court martial even were such trial not barred by the statute of limitations.

"That he gave deceptive and misleading testimony in 1933 to Maj. Gen. John F. Preston, who at that time, under orders from the War Department, made an investigation of Lieutenant Colonel Hoffman's connection with Safe Aircraft, Inc., and the Triangle Parachute Co., and thereby prevented the real situation from becoming known at that time.

"That Lieutenant Colonel Hoffman's concealment of his relations to Safe Aircraft, Inc., and the Triangle Parachute Co. was unethical and in derogation of the high moral standard which governs officers of the Army.

"That his actions and conduct in all these matters were below the standard to be expected and required of officers of the Army.

"That by reason of the lapse of time Lieutenant Colonel Hoffman's trial for these offenses is barred by the statute of limitations."

4. The Secretary of War has approved these conclusions and has directed they be conveyed to you in this manner as an expression of his complete disapprobation of conduct on your part which seriously compromises your character and standing as an officer, the full and proper penalty for which you now escape solely because your trial is barred by the statute of limitations.

By order of the Secretary of War:

P. T. HAYNE,
Adjutant General.

OLD-AGE SECURITY

Mr. GWYNNE. Mr. Speaker, one result of the depression has been the focusing of attention on the question of old-age security. The problem is, of course, not a new one. Ever since civilization began man has asked himself, How can I be protected from want in my last days. The development of great life-insurance companies, of savings and investment institutions, has been a partial answer. However, the recent economic disaster throughout the world has swept away millions of savings. The machine age is constantly placing the older worker at a disadvantage in securing industrial employment.

Humanity demands that every possible effort be made to make old age happy and secure. An overwhelming majority of our people favor some reasonable and adequate pension. The fact that the two great parties are committed to this doctrine shows that the people have finally become old-age-pension conscious. Now is the opportune time to secure workable, forward-looking legislation on this subject. Cold reason, however, demands that the legislation be written in the atmosphere of calm debate rather than in that of wistful wishing. We must not be misled by extravagant promises. The experience of other countries, together with that of many corporations, churches, and fraternal organizations in our own country, points out many pitfalls to be avoided.

Considerable attention has been given to the Townsend old-age-pension plan. This program would pay $200 a month to each citizen not already possessed of such an income. The payments would be financed by a transaction tax, estimated at 2 percent. For example, when the farmer sold the wheat, 2 percent of the sale price would be paid to the Federal Government. On each transaction thereafter until the wheat finally reached the consumer in the form of a loaf of bread an additional 2 percent would be collected. The cost to the consumer of any given article would be the cost of production, transportation, and distribution of each ingredient making up that article plus an added and pyramided 2 percent on each transaction which figured in its production, transportation, or distribution. The plan further provides that each recipient must spend in the United States the $200 so received within 30 days after receiving it.

A careful analysis of this plan will show its disadvantages to many groups of people. In the first place, it would be very difficult and expensive to enforce. Every farmer, every businessman, every person who sold either goods or services would be required to make regular reports to the Government. It is admitted that the licensing and regulation of millions of people would be necessary.

Secondly, the plan would be unfair to millions of people now entitled to receive aid from the Government. The Townsend plan is offered as a substitute for the Economic Security Act passed in the first session of the Seventy-fourth Congress. It makes no provision for crippled and dependent children or for the blind, who are provided for by the act now in force.

We may well question the justice of any plan which would pay approximately 40 percent of the entire national income to 7 percent of the population and leave uncared for the crippled and the blind, who are equally entitled to the consideration of the Nation.

The Townsend plan would be very unfair to the working people of the country, because on them the burden of the payment would fall. A few figures will make this clear. According to the last census there are over 11,000,000 persons in America over 60 years of age. It is estimated that 8,000,000 would be eligible for a pension. This would require an annual payment of $19,200,000,000 to be paid by means of a transaction tax. Almost every transaction has to do with the production, transportation, or distribution of something the average person uses as food, clothing, shelter, or services. In other words, it is proposed to raise the cost of living by $19,200,000,000. According to the 1930 census the population is 122,775,046. The average to each person in increased cost of living would therefore be $156. An average family, consisting of father and mother and two children in school, having a total income of $1,200 per year, would pay $624 in increased cost of living. It is claimed, however, that the forced spending of $19,200,000,000 would create a great volume of new business, out of which this added cost could be paid. This might be true if the new business came entirely from some new source, as, for example, if money now being hoarded were put into circulation. However, such is not the plan. It would simply put an undue share of the money now being earned and spent in the hands of a relatively few people to spend.

The Townsend plan would also be detrimental to the independent merchant. By eliminating many of the transactions from producer to consumer, the mail-order house and the chain store—in many cases owning the sources of production and transportation—would have an advantage over the small merchant. Tardy efforts are now being made to eliminate monopoly and to encourage the small businessman. The transaction tax would have the effect of fostering monopoly and thus creating more unemployment.

The problem of old-age security is not to be solved simply by putting a pension law on the statute book. Whatever plan may be adopted, we must remember that all money paid for old-age pensions must be paid from one source—the earnings of the people. The necessary funds cannot be raised by any financial sleight of hand. We must, therefore, strive for a greatly increased national income, widely and fairly distributed among those whose efforts contribute to it. In the last analysis, adequate old-age security demands the following:

First. A policy in industry, agriculture, and finance which will insure profitable employment to the largest number of people.

Second. A policy of thrift on the part of the people which will insure the maximum amount of saving by the individual.

Third. A policy of economy on the part of the Government which will not take from the individual in taxes the money which he has saved.

It is difficult to see how any pension system can long endure which does not put upon each generation the duty to earn

and save collectively for its own old age. In other words, we should adopt a policy of "pay as you go."

In the adoption of any pension plan many problems of administration present themselves. We must have the active cooperation of the Federal Government, the State, and the citizen. Given the three, however, there is no reason to doubt our ultimate success.

STATES' RIGHTS AND FARMERS' RIGHTS

Mr. EICHER. Mr. Speaker and Members of the House, the West will be flooded this summer and fall with loud claims that a real regeneration occurred at Cleveland; that the Republican chrysalis sloughed off its drab coat of reactionary and special-privilege leadership and emerged as a beautiful butterfly of liberal and progressive convictions. To high finance has been given the knowing wink of assurance that the sun-flower scenery is for vote-getting purposes only, and that Republican success would promptly restore the "happy days" of deflationary concentration of more and more property in fewer and fewer hands. From behind the bucolic mask peeks the same old sour visage of monopoly, seared by the same old ugly lines of gouging and exploiting practices.

By purveying the conveniently meaningless slogan of the "American way", the Republican leadership apparently hopes that it will be swallowed by the voters as a promise of all ways to all men. But the American people will not forget the one way which the policies of our administration have definitely barred—namely, the path that has been so freely followed by the financial racketeer while despoiling our savings and robbing us of our equal opportunities. The closing of that road explains the animus of the Tory opposition to our legislative accomplishments. The pitiful cry of the special interests that our party has strayed from the teachings of Thomas Jefferson will deceive no one. All the red herring that Liberty League money can buy will not obliterate the Jefferson and Lincoln trail that we are successfully reblazing toward government of, for, and by the people and away from the Hamiltonian road of Hooverism that led to government of, for, and by the rich.

Straight political thinking requires that we check our mental bearings often enough to keep constantly in mind the vital cleavage between the fundamental philosophies of Hamilton and of Jefferson. Hamilton espoused government by the rich and well-born, as he called them, frankly contending that ordinary folks lacked sufficient intelligence to govern themselves. "The people; they are a beast", was his caustic comment. Jefferson, on the other hand, urged the greatest possible degree of popular participation in the processes of government, believing that the surest guaranty of a successful, self-governing society lay in the honest ascertainment and enforcement of the popular will. The rights to life, liberty, property, the pursuit of happiness, and to self-government he considered inherent in every individual, transcending every obligation to government itself, and subject only to the obligation that those rights be not abused in their exercise to the injury of the equal rights of one's neighbor. In the beginnings of our Nation it was considered by the Hamiltonians that they could best achieve their objectives by the maintenance of a strong central government, while the Jeffersonians strove to retain the reservoir of governmental power closer to the people and in the respective States, and delegating to the Nation little more authority than was essential to it in its capacity as a member of the family of nations.

In the light of this background, is it not more than passing strange that the critics of our administration, direct political descendants of Alexander Hamilton that they are, should now evince such a tender regard for the States' rights doctrine of Jefferson? Let us see if an analysis of objectives will not disclose the answer.

A truer Democrat than Jefferson never lived—nor than Lincoln. He who believes that Jefferson favored the dominance of State authority merely because it was a State does scant justice to the statesmanlike quality of his mind and heart. The most casual study of Jefferson's life and works convinces that his controlling passion was love for and faith in the common people—those ordinary folks whom Lincoln said the Lord must have loved because He made so many of them. Lincoln found no intellectual difficulty in hurdling the constitutional obstacle of States' rights when he decided to end physical slavery of human beings, even in the face of the Supreme Court's solemn pronouncement that the Constitution contained no warrant for such action. Is it thinkable that Jefferson, if living today, would fail to support with utmost energy the efforts of this administration to end the economic slavery of millions of our fellow human beings, for whom, without fault on their part, but solely thrcugh the operation of the Hamiltonian doctrines of special privilege, the primary guaranties of life, liberty, property, happiness, and self-government have become nothing but a hollow mockery? Jefferson's consummation of the Louisiana Purchase in the face of warning that the Constitution gave the National Government no such express power concretely demonstrates what he held to be the true interpretation of the doctrine of implied powers under the general-welfare clause of the Constitution.

History makes it clear that Jefferson's advocacy of minimum power in the Federal Government and the maximum in the States was inspired by the belief that local government would be more responsive to the needs and welfare of the plain man; that it would afford him greater protection against the continuing efforts of the wealthy few to use the powers of government for their own aggrandizement than would a powerful central government far removed geographically from many of the people. Under then prevalent conditions he was absolutely right. Commerce among the States was comparatively inconsequential. New York was farther from the National Capital than it now is from London. Interstate communication and commerce was small in volume. Except for their foreign trade, the producers and manufacturers of each State found their markets largely within its own borders.

Keeping in mind Jefferson's objective—the welfare of the rank and file of the people—who will be so bold as to contend that, if living in this day, he would still be fighting for so-called States' rights? There is certainly nothing sacrosanct or of popular benefit in States' rights considered merely as an end in itself. Jefferson never indulged in the quixotic and vain sport of fighting windmills. Our critics disregard the plain truth that our political struggle of today, like Jefferson's, is to restore equality of opportunity to the little man and to break down the governmental discrimination that has grown up in favor of the privileged few. Blind adherence to past methods that under present-day conditions are ineffective obviously would be futile.

Jefferson's ideal for America was a nation preponderantly composed of independent, home-owning agricultural and seafaring people. He warned repeatedly against the evils of an industrialized order, characterizing great cities as an economic pestilence. During recent generations in our national history, however, Hamilton's theories attained the ascendancy in our governmental counsels, determining those very trends in our development as a Nation that Jefferson decried. As a result we have become, in gross, the wealthiest Nation on earth, but how about the distribution of that wealth? Do the statistics of the Department of Agriculture declaring that 60 percent of our population are forced to live on an inadequate allotment of diet and clothing afford us any reason to point with pride?

Even in his day there existed the danger to a democracy of undue concentration of wealth and economic power, and Jefferson broke it down wherever it showed its ugly head. Wealth then was chiefly agricultural, and he succeeded in preventing entails in Virginia and in repealing the law of primogeniture, which theretofore had permitted concentrated ownership in practical perpetuity of great landed estates. When he died he thought he had destroyed for America the dragon of great wealth and concentrated economic power, especially of the kind that was exercised with other people's money. But he reckoned without the host of the modern corporation which came into full flower during the nineteenth century, aided and abetted by the power of the respective States to create these artificial perpetual entities, and by the

fifth and fourteenth amendments to the Constitution, which, as interpreted by the Supreme Court, have permitted some of them to become veritable Frankensteins whose antisocial activities neither the National Government nor the creating State governments can adequately regulate and control in the public interest.

The fifth amendment, among other things, provided that the National Government should not deprive persons of life, liberty, or property without due process of law, and the Supreme Court obligingly interpreted the word "persons" to include the purely artificial and impersonal corporation. The fourteenth amendment, adopted to freeze into organic law Lincoln's emancipation of the slaves, placed identical inhibition upon the States, and the Supreme Court gave the word "persons" in this amendment the same extended application to corporations. The result has been the untrammeled use of the corporate form to accomplish the amalgamation of business into larger and ever larger units, with increasingly expanded economic power concentrated in fewer and ever fewer hands, to the culmination of the widespread monopolistic strangle holds over producers and consumers that bring joy to the heart of the financial racketeer.

A recent manifestation of the twilight zone of nonexistent power to regulate that has been created by the Supreme Court's loose construction of the fifth and fourteenth amendments and strict construction of the interstate-commerce clause of the Constitution is contained in its decision overriding the New York State minimum-wage and maximum-hour law for women. In effect, the majority of the Supreme Court solemnly declare that a widow with hungry children who can feed them only by working inhumanly long hours for a pitifully low wage in a Bowery sweatshop enjoys a freedom of contract under the Federal Constitution which no State legislature may impair. Just as solemnly, and because the garment-making work of this widow constitutes production within a State, even though every garment she may make is sold and shipped to customers in other States, the same majority has held in the Guffey coal case that the interstate-commerce clause of the Constitution gives Congress no power to remedy the admitted evil for the reason that control over production is within the reserved powers of the States.

And yet the endeavors of our administration to lay down an effective national policy for the correction of evils that are clearly national in their influence, and to do so under the authority of and within the framework of the Constitution, are vociferously condemned by the mouthpieces of the gouging interests as a deliberate effort to change our form of government and to subvert our fundamental institutions.

The Republican Party platform adopted at Cleveland, as amplified by Governor Landon's gold-standard telegram, hints at favoring a constitutional amendment to enlarge the powers of the States "if necessary." This, obviously, is the idlest of gestures. Under the protection of the interstate-commerce clause every producer and manufacturer in every State in the Union has the entire Nation as a potential market for his goods. All business, therefore, is highly competitive among the States. All socially beneficial legislation, such as old-age and retirement pensions, and mandatory minimum wages and maximum hours, adds to costs of production. It follows that unless all States should set up exactly the same standards—which is beyond hope, as witness the failure to date by the requisite number of States to ratify even the child-labor amendment—the factories in the high-standard States would be compelled to remove to the backward, nonprogressive States as a matter of mere self-preservation.

I do not believe we should jump headlong toward such a change in our Federal Constitution as might unwittingly result in altering the basic character of our Government as a Federal Union of sovereign States. The dual sovereignty of the States and the Nation should by all means be preserved to the fullest extent that the States in their control over the purely local concerns of their citizens can adequately respond to the changing necessities for the public weal. But the alarming tendency of recent years toward centralized economic power with its resulting monopolies, wielded by the few lords of high finance and largely with other people's money, must be curbed in the public interest. It threatens to become more powerful than government itself. Experience is convincing that the States separately cannot cope with the problem. Some degree, therefore, of centralized governmental power and authority is indispensable if we hope to hold in check the antisocial excesses of centralized economic power. Until that war for the liberty and freedom of the little man is won we dare not demobilize the only effective force that is available to the people.

These purposes can be attained without any rephrasing of our governmental charter. Loose construction versus strict construction of the Constitution by both Congress and the courts was the fighting issue between Hamilton and Jefferson in the early days of the Republic. The objectives of those two schools of political thought were the same then as they are now, but today the contending forces have exchanged weapons. Adherence to the mere dogma of States' rights today means surrender to the forces of private greed and entrenched wealth. The corollary of States' rights is States' responsibility. Unfortunately, however, the States in this era are helpless to meet their reciprocal obligation to protect the individual citizen against the Nation-wide ravages of predatory interests who would destroy his birthright.

To be sure, Jefferson said: "That government is best which governs least", and his present-day enemies quote it with glee. But they always fail to include his appended statement that enough government is necessary to preserve the rights of the individual against the efforts of others to take them away from him.

A broader interpretation and application of the interstate commerce clause to comport with the actualities of the present day nationally knit social and commercial order will meet the call. It is not a legalistic necessity, but only an outmoded political and social philosophy entertained by one or two human minds that stands in the way. Curbing the power of the Supreme Court does not sound feasible, even if it could be made effective without constitutional amendment, which is, to say the least, doubtful. We need an umpire in our tripartite system of government—someone with the last word. The checks and balances wisely provided by our founding fathers should not be lightly discarded, even though recent performance would appear to have been all checks and no balances.

In attaining our hoped-for results we have yet to explore the full constitutional possibilities of the powers conferred upon Congress by the interstate-commerce clause. Among them is the device of requiring Federal incorporation of all corporations engaged in interstate commerce. Such a requirement, imposed as a condition to the transaction of interstate business, would give the Federal Government plenary regulatory power in the national public interest, and would make possible the effective control that the States, acting independently, are impotent to exercise over their own creatures. When these constructive efforts have been made—as they will be—and the remedy still proves disappointing to liberal and progressive public opinion, it will be time enough to insist upon the then necessary changes in our organic law.

FARMERS' RIGHTS

After years of lip service by the Republican Party to "equality for agriculture with industry", the Democratic Party when it came into power in 1933 brought about substantial performance of that sine qua non of national recovery. The memory of the zero-approaching levels to which agricultural prices were driven by the Hawley-Smoot tariff and the other deflationary policies of the Hoover administration is too fresh in the minds of all my listeners and readers to require restatement by me now. Under the A. A. A. the farmer's purchasing and debt-paying power was given a wonderful impetus toward normalcy, and the billions of dollars it added to his annual income have played no small part in priming the Nation-wide business recovery that we are now enjoying, and in reemploying the 5,000,000 more men than were at work in March 1933.

A development that has impressed me greatly is the better understanding that is permeating Congress and the country generally of the interdependence of farm and city. As a

way of life, it is true, the average farm home, with its debt burden reasonably amortized, would afford a self-contained subsistence level for the family that the average city dweller could never hope to maintain. But our industrialized order has brought higher living standards to the farm, and if we would keep and raise those standards the farmer must receive for his products a large enough cash return to meet his overhead and to leave an adequate surplus with which to buy those products and services of industry that furnish the comforts and satisfactions of life. In turn, it has become crystal clear that the industrial employee is utterly dependent upon the vast consuming capacity of our agricultural population. The farmer is in fact a double consumer, because, in addition to the personal needs of himself and family, his requirements in the way of machinery, equipment, and supplies in his farming operations are enormous in volume. If the gross agricultural income could be doubled within the next year, there can be not the least doubt that within the same interval our still distressing unemployment problem would "fold up its tents like the Arabs, and silently steal away." There is eternal truth in the words that are carved in the stone facade of the Union Station here in the Capital City:

The farm—best home of the family—main source of national wealth—foundation of civilized society—the natural providence.

And so it is no mere alliterative twist that I intend when I stress farmers' rights as being of far greater importance in the national economy than is the mere historical abstraction called States' rights. The majority of the Supreme Court in their decision outlawing the A. A. A. determined that national control of agricultural production was an invasion of a power that the Constitution reserved to the States. But without a nationally effective program of production control Congress must sooner or later inquire how else can the farmer hope to maintain himself on a basis of equality with industry in the open-market price that he shall receive for his products. His capital investment and constant overhead, and the vicissitudes of wind and weather, compel the farmer to operate his plant at farmerlike capacity. If crop failure comes, he has to grin and bear it. If a world-wide good crop comes, the immediate surplus places him at the mercy of a glutted market. What to do? The industrialist, on the other hand, can and does accommodate the volume of his production to the fluctuations in his market and, by and large, thus saves himself from loss. The farmer, therefore, is the only businessman of consequence who is utterly without control over his income.

The Soil Conservation Act of 1936 is a sincere effort legally to fill the gap that the invalidation of production control under Federal authority has left in the administration's farm relief plans. The degree of success as a market stabilizer that may attend its operation will remain undetermined pending a crop year or two of experience. The subsidy encouragement for crop rotation in soil-rebuilding legumes will, of course, be a welcome addition to the individual farmer's income from his open-market sales. But it has long been my earnest conviction that subsidies out of the Federal Treasury and limitations upon the production of any necessity of life are at best merely temporary remedies, unnatural in their effects, and resembling more an attempt to treat symptoms than to get at the root cause of the economic inequality that constitutes the disease. Given a fair start in an open field, the farmer would ask no odds of any man in the race of life. But with so many barriers set up against him in the way of tariff preferences and various social costs that are added to the price of the things he has to buy, and of speculators' profits and manipulated markets for the things he has to sell, small wonder it is indeed that patience has not sooner ceased to be a virtue.

Equality for agriculture with industry! With the possibility of production control as a market stabilizer lost to him, how, then, can Government help attain for the farmer that legitimate goal of equality which is likewise so essential if we would promote the general welfare? A correspondent from Colorado recently wrote propounding the following questions:

In the belief that the uncertainty surrounding the ultimate, permanent solution of the agricultural problem in the United States is still the greatest obstacle to the complete restoration of employment and economic recovery, the writer submits the following inquiries and would appreciate your comments:

1. Is it not possible to restore parity between agriculture and industry by a much less complicated plan than either party has proposed or put into effect up to this time?
2. Is it necessary for a proper solution of this problem that the farmer should submit to collectivism, regimentation, or the surrender of the individualism so highly prized by him?
3. What are the objections to a Federal corporation with power to handle the exports and imports of all agricultural commodities and the products thereof?
4. Could not such a corporation fix the domestic price of all agricultural commodities, of which a surplus is produced, at the price such commodities will bring in the foreign market, with the tariff on such commodities added thereto?
5. Would this not make the tariff effective for the producer to the extent of the domestic market for such commodities?
6. Could not an impost on all primary transactions in such commodities, to be paid by the producers thereof, be devised to produce sufficient revenues to reimburse the corporation for losses sustained by it on exports of surplus commodities to the end that such losses would be equitably distributed among the producers growing such surplus commodities?
7. Could not such a corporation so regulate imports of such commodities as are not produced in sufficient quantities to meet domestic requirements as to insure the domestic producer a profitable return for such product?
8. Would this plan not have a tendency to stimulate the production of non-surplus crops and to contract the production of burdensome surpluses in the other?
9. Would not such a plan promote free competition in agricultural products?

When my correspondent wrote the foregoing letter he had not seen my bill, which I first introduced in the House of Representatives in January 1935. Even a casual reading of his intelligent questions shows that he has been doing some constructive thinking. My bill, which I shall incorporate herein at the close of my remarks, makes favorable answer to all of his questions except 4, 5, and 6. To supply the factors contemplated in those three questions my bill sets up much less complicated machinery that will automatically and progressively attain and maintain agricultural and industrial equality. I again commend this bill to the careful consideration of my colleagues, especially those on the Democratic side. I do this for two important reasons: First, it puts into simple and workable legislative form the promise that was made to the country in the farm plank of our 1932 party platform—that we would effectively control agricultural surpluses and would assure the farmer prices in excess of cost; and, second, it operates clearly within the limitations upon the constitutional powers of Congress to regulate interstate and foreign commerce that are laid down by the majority of the Supreme Court as now constituted.

Let me summarize its provisions:

First. The Secretary of Agriculture shall each year estimate the probable production of each surplus-producing crop.

Second. He shall estimate the amount thereof required for domestic consumption.

Third. He shall ascertain and proclaim what was its average cost of production over the preceding 5-year period on the average-sized farm reckoned as a business unit.

Fourth. This average cost as a minimum shall be paid by all dealers and handlers for the domestic-consumption percentage of each delivery presented for shipment in interstate commerce.

Fifth. The remaining or export percentage of each delivery shall be receipted for to the producer and turned over to a Government export agency, which shall dispose of same to the best advantage in the world market and then account to the receipt holder for the proceeds pro rata.

Sixth. Pending world market disposition, the producer may borrow on his receipt at any post office up to 90 percent of the world market value.

Seventh. To encourage the recovery of lost world markets for American-processed agricultural products, such as tex-

tiles, livestock products, and so forth, the export agency shall supply raw materials to manufacturing exporters at debenture prices.

Eighth. Local committees shall be maintained to advise with the Secretary of Agriculture in the ascertainment of costs of production.

Ninth. Even in the remaining narrow field of solely intrastate movement from producer to consumer, the minimum pegged price would be legally effective under the exercise by Congress of the power to regulate the value of money in commodities.

Tenth. Compliance by purchasers with the minimum pegged price is made mandatory under penalty.

It will be observed that no control over production is involved and that the only impingement of Federal power is when the products of the farm enter commerce. Five of the present members of the Supreme Court upheld the New York law fixing prices for milk, Justice Roberts writing the opinion. Four of the members recently upheld the price-fixing provisions of the Guffey Coal Act, but Justice Roberts was able to avoid participation in that holding through the elimination of that issue in the majority opinion, which was made to rest on the alleged inseparability of the price-fixing from the labor provisions. That Justice Roberts by his precedents is bound to uphold congressional power to fix prices of such necessities of life as agricultural products that move in interstate commerce is as certain as it is that night follows day. Therefore the Supreme Court, through five of its members, is definitely committed to the validity of my suggested bill.

The consumer will benefit through the resulting stabilization of his costs and the elimination of the now too frequent series of speculative profits that are added to the price of the commodity on the way from the producer to the consumer's table and wardrobe.

By reckoning costs each year on the basis of the past 5 years' experience, a fair and just ratio will continuously be maintained between the farmer's income and the cost of the things he must buy. As to all surplus crops except cotton, the farmer could well afford to donate his surplus, if he had to, as a selling commission for the fair price he receives for the domestic-consumption percentage, for by this bill the American market would be effectively preserved for the American farmer. The cotton surplus, handled as it will be by a Government agency in conjunction with the administration of our reciprocal-trade agreements, will enjoy constantly enlarging foreign markets that individual negotiation is finding it extremely difficult to restore.

The simplicity and noncomplexity of the program is one of its most appealing features. It will require a much smaller Government personnel than did the individual-contract system of the A. A. A. or than does the subsidy provision of the Soil Conservation Act. It can be demonstated to the satisfaction of any open mind that, by reckoning costs of production of any crop on the average-sized farm taken as a business unit, the variation in costs in different sections of the country is very slight. For example, by giving weight to all factors of investment, taxes, and overhead costs, it will be found that the average cost of producing a bushel of corn on the average Iowa farm varies less than a cent per bushel from the cost of producing a bushel of corn on the average North Dakota farm.

The encouragement we are giving to soil conservation is fine and should be continued as a national policy. But farmers must not permit themselves to be deluded and satisfied by the sop of compensating tariff benefits. Suppose the Hope-Landon bill were in effect, under which the farmer is offered tariff-equivalent certificates of 25 percent to supplement his open-market return on the domestic consumption percentage of his production. Then suppose that the open-market price of hogs sinks again to 2 cents per pound—as it might any year without production control. The farmer would then be assured under that munificent plan the tremendous total return of 2½ cents per pound.

Following is the text of my bill, and I invite your careful study of its provisions, to the end that it may be given intelligent and sympathetic consideration by the Seventy-fifth Congress:

A bill to restore and stabilize agricultural buying power by regulating interstate and foreign commerce and the value of money in agricultural commodities, of which there is an exportable surplus, by establishing a minimum cost of production price for the domestic consumption percentages thereof and by providing for the orderly marketing of the export percentages thereof, debentures for processed and manufactured agricultural products for export, and for other purposes

Be it enacted, etc., That for the purpose of assisting him in carrying out the provisions of this act, the Secretary of Agriculture shall organize committees of farmers residing in the respective governmental subdivisions for which they are selected. There shall be a committee for each State, and for each county or parish, and for each township, to be known as State, county, or parish, and township advisory committees, respectively, and the membership of each committee shall be not less than three nor more than five. The members of the State committees shall be appointed by the Secretary of Agriculture, and the members of the county or parish and township committees shall be elected by the bona-fide farmers residing within such county or parish and township, under such rules and regulations as may be promulgated by the Secretary of Agriculture. The Secretary of Agriculture shall, from time to time, obtain reports from said committees on conditions in their respective jurisdictions that are pertinent to the decisions he is required to make under this act and shall arrive at such decisions after he has the benefit of the statistical and other informative matter contained in such reports and after conference with national officers of the national and representative farm organizations.

SEC. 2. The Secretary of Agriculture shall annually ascertain the average cost to farmers, considering average yields and production during the preceding 5-year period, of the production of each agricultural commodity produced in the United States having an exportable surplus. All items of cost shall be considered and calculated in accordance with the formula and method commonly used in the manufacturing industry. He shall consider the individual farm as a business unit and shall include compensation to farm operators for management and for labor of themselves and their families and hired help equal to the compensation paid for like services in industry, together with adequate allowance for depreciation of soil, improvements, equipment, stock-breeding animals, work animals, and buildings, and also for taxes and other overhead charges. He shall also determine the investment value of the property devoted to the production of such commodities, using the official census data so far as pertinent, such determination to be at the normal level of values between inflations and depressions reckoned over such period of time as will make possible the accurate ascertainment of such normal value, and upon the property investment value as so determined there shall be calculated and allowed a capital return of 4 percent. He may also ascertain and allow an equitable differential against variations in (1) transportation costs to different markets, (2) actual costs for hired labor, and (3) all other conditions affecting the cost of production, and may establish such zones or classifications as are appropriate and necessary therefor.

SEC. 3. The Secretary of Agriculture shall annually determine and designate the beginning and ending of the appropriate marketing period for each of said agricultural commodities, and shall also annually estimate the volume of production of each commodity for the current calendar year of each such commodity that will be marketed. Prior to the marketing period for each such commodity he shall also estimate (1) the percentage thereof required for domestic consumption and (2) the percentages thereof remaining for export.

SEC. 4. The Secretary of Agriculture shall thereupon make public proclamation and announcement of the cost of production figures and the domestic consumption and export percentages aforesaid and of the date when and the period for which the same shall be controlling as provided herein upon the sale and purchase of each such commodity, and upon request he shall furnish detailed information to all dealers, manufacturers, millers, elevators, processors, packers, butchers, ginners, compressors, and other agencies dealing in or handling the same. After such effective date all said dealers, manufacturers, millers, elevators, processors, packers, butchers, ginners, compressors, and other agencies shall pay to the farmers not less than the cost of production price determined and proclaimed as aforesaid for such percentage of each delivery of such commodity in interstate commerce or otherwise as is not estimated for export. If in the judgment of the Secretary of Agriculture the objectives of this act, including the furtherance of orderly marketing, require such action, the Secretary shall proclaim such reasonable variations in the allowable minimum as may be necessary to attain such objectives, and also to govern such marketings by producers as may not have been completed during the designated marketing year. For the percentage, if any, of each such delivery thereof as has been estimated for export as aforesaid there shall be issued and delivered to the farmers a receipt, countersigned by such agency as the President of the United States may designate, which receipt shall show the grade of the commodity. Sales from one farmer to another for feeding,

breeding, or seeding purposes shall not be subject to the provisions of this act. For the purpose of this act a transaction in respect to any commodity shall be considered to be in interstate commerce if such commodity is part of that current of commerce that is usual in the industry or industries engaged in the handling of such commodity whereby such commodity (and its products) are sent from one State with the expectation that they will end their transit, after purchase, in another, including, in addition to cases within the above general description, all cases where purchase or sale is either for shipment to another State, or for manufacturing, milling, processing, packing, slaughtering, ginning, compressing, or in any manner handling such commodity or any part thereof within the State and the shipment outside the State of the products resulting therefrom. Articles normally in such current of commerce shall not be considered out of such current through resort being had to any means or device intended to remove transactions in respect thereto from the provisions of this act.

SEC. 5. At such reasonable time as the Secretary of Agriculture may direct, the said dealers, manufacturers, millers, elevators, processors, packers, butchers, ginners, compressors, and other agencies dealing in or handling such farm products shall deliver to such agency as the President may designate all of the percentage of said commodities estimated for export in the kind and grade as receipted or in processed form as hereinafter provided. If and when authorized by the Secretary of Agriculture, bills of sale evidencing storage of such exportable percentages on farms under seal will be accepted by such agency in lieu of the physical delivery of the property. In the case of livestock and poultry, the packers and also the butchers, after processing the same subject to Government inspection, shall make delivery of the percentage estimated for export in the form of livestock and poultry products: *Provided*, That the butchers may deliver their percentages through packers, and the said agency shall pay the reasonable cost of processing; and the same provision shall apply to milk and the processors thereof. If unable to make reasonable and satisfactory arrangements for such processing, then such agency shall purchase or acquire by condemnation or construct the proper equipment and facilities. Such agency shall provide by rental, purchase, or construction, or by condemnation in State or Federal courts, the necessary storage and terminal facilities for handling the export percentages, and shall remove same entirely from the domestic market, except for emergency purposes, and shall hold and dispose of the same to the best advantage in any world market, and through the Postal Service shall redeem the receipts in the net amount realized for each product after deducting all costs and expenses of handling and disposing of the same. On the direction of the President such agency shall hold in storage such portion of the said exportable percentages as it may deem advisable as a reserve against emergencies, droughts, and crop failures, and any portion thereof that is undisposed of on settlement date shall be held for such purpose. Settlement shall be made in full not later than the end of each designated marketing period and each farmer shall have the option to accept in full the net world price at the time of settlement for the percentage withheld for emergencies, or he may accept a credit of 90 percent thereof upon his receipt and await the final disposal for any balance that may be realized, or, if he has received a 90-percent loan as hereinafter authorized, he may continue the same without interest until such final disposal. The said agency is directed to estimate the cost and expense of handling each of said commodities and to estimate the probable world price and through the Postal Service to make loans to any farmers upon the security of their receipts up to 90-percent of the net value thus estimated.

If in any State the demand for domestic consumption is greater than the national estimated percentage, the said agency is authorized to supply the deficiency out of the exportable surplus from any other convenient State at the cost-of-production price plus transportation, storage, and handling charges, and it shall maintain a national balance by purchasing upon the same terms, like amounts from the percentage estimated for domestic consumption in States where the demand for domestic consumption is less than the national estimated percentage.

If any farmer at any time is unable to sell his products in the regular markets, the said agency is directed to accept and receipt for the exportable percentage of his production as herein provided for, and to purchase from him the percentage of his production for domestic consumption at the cost-of-production price and is authorized to resell such domestic consumption percentage in the domestic market at the same or higher price.

If the percentage estimated for domestic consumption should be insufficient to supply the domestic demand, the said agency is authorized to supply such shortage out of the exportable percentage at the cost-of-production price, plus storage and expenses.

SEC. 6. The Secretary of Agriculture is authorized to advance, from time to time, to the Postmaster General such sums as are shown to be required for the handling and redemption of the receipts as provided herein, and for the making of loans thereon, and for the expenses of the Post Office Department in connection therewith. At the request of the Secretary of Agriculture, the Postmaster General under such regulations as he may prescribe shall require the employees of the Post Office to perform, without extra compensation, such fiscal-agency services as may be desirable and practicable in connection with the handling, safekeeping, and redemption of said receipts, and the making of loans thereon.

SEC. 7. The said agency is authorized to use the resources and facilities of the Export-Import Bank and the Reconstruction Finance Corporation.

SEC. 8. By the enactment hereof the Congress declares and invokes its constitutional power to regulate interstate and foreign commerce, and to regulate the value, in agricultural commodities, of all authorized money.

SEC. 9. Any person, dealer, manufacturer, miller, elevator operator, processor, packer, butcher, ginner, compressor, or other agent dealing in or handling such farm products, who violates the provisions of this act by paying less than the cost-of-production price provided for herein shall be punished by a fine of not more than $5,000 or by imprisonment for not more than 2 years, or both.

SEC. 10. The said agency is directed to protect all foreign markets for the exportable surplus of agricultural products now being held or hereafter acquired by cooperative organizations, and for that purpose is directed to furnish the necessary products, when available, at the net price to farmers as herein provided; and said agency is further directed to furnish to processors and manufacturers, under bond or other adequate guaranty of performance, from the exportable surpluses coming into its possession, any raw materials to be processed or manufactured and exported, and to do so at debenture prices that will permit such processors and manufacturers to meet competition with their products in foreign markets upon fair and reasonable terms, which products shall include textiles, wheat products, corn products, oat products, livestock products, dairy products, compressed cotton, canned fruits, and canned vegetables.

SEC. 11. The President of the United States, the Secretary of Agriculture, the Secretary of the Treasury, the Secretary of State, and the Secretary of Commerce are directed to cooperate in exercising their lawful powers, through the medium of foreign-trade agreements, and through other appropriate measures for restriction or expansion of imports of competing agricultural commodities, their byproducts, and/or competing substitutes, to maintain the prices to farmers for the domestically consumed percentages of all agricultural commodities as nearly as may be within a range not exceeding 10 percent above the proclaimed cost-of-production price level.

SEC. 12. If any provision of this act is declared unconstitutional, or the applicability thereof to any person, circumstance, or commodity is held invalid, the validity of the remainder of this act and the applicability thereof to other persons, circumstances, or commodities shall not be affected thereby.

FEDERAL HIGHWAY AID ACT

Mr. GWYNNE. Mr. Speaker, the passage of the Federal Highway Aid Act is particularly gratifying to me as a representative of an agricultural section of the country because of a new feature which it inaugurates in providing for the construction of farm-to-market roads with the assistance of Federal appropriations. As a member of the Committee on Roads I have been especially anxious to secure favorable consideration of this item, and judging from the support given this feature of the law, it would appear that this marks the beginning of a new era in practical road building.

The law, as finally passed, authorizes a total of $338,000,000 for the fiscal year ending June 30, 1938, and a similar sum for the fiscal year ending June 30, 1939. It is necessary to authorize these sums considerably in advance so that the legislatures of the various States may make the necessary arrangements for matching these funds as required by law. For general road-building purposes there was authorized $125,000,000 for each year. Of this amount, Iowa will receive approximately $3,230,000 per year. Section 8 of the law authorizes $50,000,000 per year for the elimination of railway grade crossings, which amount need not be matched by the States. The apportionment is based one-half on population, as shown by the latest decennial census, one-fourth on the mileage of the Federal-aid highway system, as determined by the Secretary of Agriculture, and one-fourth on the railroad mileage, as determined by the Interstate Commerce Commission. On this basis Iowa will receive approximately $1,400,000 each year. This is in addition to the 113 highway grade separation projects which it is estimated will be financed from the $200,000,000 allocated by the President under the Emergency Relief Appropriation Act of 1935.

Section 7 of the law provides:

> In addition to any other authorizations which have been made, there is hereby authorized to be appropriated to the several States to be apportioned and expended under the provisions of the Federal Highway Act of 1921, as amended and supplemented, the sum of $25,000,000 for the fiscal year ending June 30, 1938; the sum of $25,000,000 for the fiscal year ending June 30, 1939: *Provided*, That the sums herein authorized shall be applied to secondary or feeder roads, including farm-to-market roads, rural free delivery mail roads, and public-school bus routes.

Under this section it is estimated Iowa will receive approximately $650,000 per year.

The first Federal Aid Highway Act, passed in July 1916, provided for authorizations for 5 years ranging from $5,000,000 the first year to $25,000,000 the fifth year. Since that time, through the combined efforts of the Federal Bureau of Public Roads and the various State highway commissions, a coordinated system of roads has been built. The total mileage in the United States is estimated at 3,068,919 miles. There are 226,000 miles in the Federal-aid program, most of which are now fairly well improved. The mileage of county roads is 1,071,530 and local or township roads aggregate 879,630 miles. A very small percentage of these roads are adequately improved.

While Congress has appropriated large sums for road building, it is interesting to note that during that same period the Federal Government has collected an ever larger amount in taxes traceable directly to motor-vehicle traffic. Between the date of June 30, 1917, the beginning of Federal aid, and January 31, 1936, the Federal Government has collected in excise taxes on motor vehicles and in gasoline taxes $2,033,922,673. During that time the Government spent in road contributions $1,986,655,477.

Practically every State now finances its road-building program in part at least from a gasoline tax and a tax on the registration of motor vehicles. The gasoline tax in the various States ranges from 2 to 7 cents per gallon. The average registration fee per motor vehicle ranges from $3.17 in Georgia to $22.21 in Connecticut. The average in Iowa is $15.05. The average of both gasoline tax and registration fee per vehicle for all the States in 1934 was $34.89. Iowa was among the 20 States below this average, with an average payment of $31.93.

The Federal Government first began appropriating money for primary road building on the theory that a network of interstate highways was in the national interest. In this connection some consideration was given to the value of highways from a military standpoint. There are also sufficient reasons for the use of Federal money in the development of a farm-to-market program. In the first place, a large part of the gasoline tax collected by the Federal Government is paid by users of farm-to-market roads. The desire on the part of most States to match the Federal funds available for primary roads has resulted in a substantial reduction in the State funds available for local roads, In some instances money has been diverted to paving parallel roads and to the building of expensive cut-offs and diagonal roads, which might better have been used to get the farmer out of the mud. A passable road for the many should have consideration over a perfect road for the few. Many miles of local roads are used by the Post Office Department in the delivery of rural mail. The improvement of these roads will save the Government millions of dollars each year and will give the farmer the delivery service to which he is entitled.

In the development of our present Federal-aid system the Federal Bureau of Public Roads and the State highway commissions of the various States have rendered a splendid service. In the development of the farm-to-market road program the local road authorities should play an important part. No one knows what local roads should be improved and the specifications adapted to the local needs as well as the county supervisors and the county engineer. The actual building of the farm-to-market roads should be largely in their hands.

WILLIAM D. THOMAS—TRIBUTE TO A FRIEND BY A FRIEND

Mr. GOODWIN. Mr. Speaker, in announcing to the House the death of WILLIAM D. THOMAS, the minority leader, Mr. SNELL, said:

> His genial personality and his friendly manner won for him a warm spot in the affections of his colleagues on both sides of the aisle.

Those who knew Mr. THOMAS realize the absolute accuracy of this statement. This was no perfunctory tribute. It was not only sincere but true. Although a comparatively new Member in this body, his courteous and kindly deportment attracted men to him, and underlying his innate modesty was a reserve that denoted forcefulness and strength of character. Also, in him was recognized a man of convictions, of principles, which he would not compromise at any price. Yet, withal, he respected others whose viewpoints differed from his own. This was an attribute of tolerance and forbearance. He was singularly calm and unperturbed in spirit, not given to ostentation nor to disputation, believing that mediation solves more problems than agitation. Therefore—

> His life was gentle, and the elements
> So mix'd in him that Nature might stand up,
> And say to all the world, "This was a man!"

The House of Representatives with uncanny precision and accuracy appraises its own Members and finds the proper niche for each of them. This body, sooner than usual, appraised WILLIAM D. THOMAS as a self-contained, self-controlled, quiet, dependable, and industrious legislator, one whose counsel was wise and just, and whose example of wholesome, clean living and thinking was worthy of emulation.

But, Mr. Speaker, as one who was perhaps closer to him in bonds of true affection than any other Member of this House, I need not the testimony of others, however faithful to this man's character it may be, to enable me to mirror the innermost recesses of the guileless soul of my beloved colleague and friend, for I was yoked to him by those hooks of steel that cement friend to friend in indestructible bonds which even death cannot rend asunder. I knew him so well. We were neighbors and neighborly. We lived in adjoining counties. We had much in common and in mutual confidence. We understood each other, our faults as well as our virtues. We were confidants, mutually forbearing and helpful. We could enjoy each other's company in silence and shed a sympathizing tear one for the other in sorrow. Such friendship is rare. But it existed between BILL THOMAS and me, and his passing has left an aching void in my heart. He was my dear pal, my buddy in this life, and I have faith to believe that this beautiful relationship is unbroken in death. I shall look forward expectantly to the great adventure of a reunion with him beyond the rim of the world.

Mr. Speaker, I am grateful that it was vouchsafed to me to know and to have the loyal and faithful friendship of BILL THOMAS. It is my most precious heritage. To me it is as a sweet benediction and a fragrant memory.

Solomon was indubitably right when he said:

> There is a friend that sticketh closer than a brother.

Such to me was my friend BILL THOMAS—closer than a brother. We were as willing vicarious sacrifices for each other on the altar of friendship as were those mythical characters Damon and Pythias. But still a better parallel may be found in the actual lives of those two young men of ancient Biblical times, of whom it was written:

> The soul of Jonathan was knit with the soul of David, and Jonathan loved him as his own soul.

And with the passing of my friend, my pal, BILL THOMAS, I can say, with David, from the ground of a heart filled with poignant anguish, when he learned of the death of his friend Jonathan:

> I am distressed with thee, my brother; very pleasant hast thou been unto me; thy love to me was wonderful, passing the love of women.

Mr. Speaker, I deem it most appropriate to insert in the RECORD as a further tribute to my friend BILL THOMAS, who exemplified the definition of a friend as set forth therein, the following monograph written by former Senator Harry B. Hawes, of Missouri, entitled:

IN THE MATTER OF FRIENDSHIP

All that can be expected of any man is to make the best use of the things that are within his power. Only the contented man is rich; so we must look for the things that bring contentment. And first of these is to find a friend; and if you find two friends, you are indeed a lucky man; and if you find three friends—real friends—then you are a rich and a powerful man. In prosperity it is easy to find a friend, but in adversity it is most difficult of all things. No matter how small a man's means may be, if he gives of what he has to his friend, it is the same as if it was a great amount. A man's pleasures are insured by sharing them with a friend, and his griefs are reduced by securing the sympathy of a friend. The

counsel of a friend is the best counsel, because it will be true advice; for, when received from a mere acquaintance, it may be so filled with flattery that its value will be destroyed; and faithful and true counsel rarely comes excepting from the true friend. It is said that in youth we have visions and in old age dreams, and the vision and the dream may give us an ideal of perfection; but experience and large contact with men compel us to accept the man who measures in his virtues only to the substantial average. If we view a man as a whole and find him good as a friend, we must not be diverted from the happy average—the everyday, human average—by using a magnifying glass upon his faults or frailties. We must, in order to have and hold a friend, accept him as he is, demanding but one thing in return for our affection—his fidelity.

A RESOLUTION IN SUPPORT OF A BETTER DEAL FOR THE MINING INDUSTRY

Mr. WHITE. Mr. Speaker and Members of the House, under permission to extend my remarks, I include a copy of a resolution prepared by myself and submitted to the platform committee of the Democratic national convention at Philadelphia on mining and my statement to the committee in support of the resolution:

To the Democratic Committee on Resolutions, for inclusion in the Democratic national platform:

MINING

"We recognize the importance of the mining industry, which is second only to agriculture in supporting the Nation's general business prosperity.

"We advocate a Government policy and a legislative program to foster and assist the development of our mining resources and insist on a policy of administration of our national forests which will promote the development and utilization of our mineral deposits located within national-forest boundaries."

Proposed by Congressman COMPTON I. WHITE.

ADDRESS OF THE HONORABLE COMPTON I. WHITE, FIRST DISTRICT OF IDAHO, IN SUPPORT OF THE MINING RESOLUTION FOR INCLUSION IN THE NATIONAL DEMOCRATIC PLATFORM ON JUNE 25, 1936

Mr. Chairman, ladies and gentlemen of the Democratic convention, in presenting this resolution for your approval, let me bring to your attention the importance of the mining industry to the Nation's business and its contrbution to the general prosperity. It is one of our great basic industries, second only to agriculture. Today, as in the golden era of our country's development, when nature so generously rewarded the pioneers who penetrated the mountain fastnesses and opened her storehouse of mineral deposits, the western mining States still offer unlimited opportunities and rich rewards for those who will develop our still untouched mineral deposits. If there ever was a time in the Nation's history when an active and prosperous mining industry is needed to energize and support general business prosperity, it is now. When we consider what the mining industry is contributing to business recovery and general prosperity of other nations, it is apparent that we are overlooking and neglecting the most important industry which can do more for business recovery than any other basic industry.

Mining has brought such a degree of prosperity to the Union of South Africa that the surplus in the treasury of that country has increased from $3,000,000 to $14,000,000 in the last year. With tax money received from this mining income the Government is using the proceeds to pay old-age pensions and reduce the customs duties on many of its imports so that its people may more easily secure articles of foreign manufacture such as radios, typewriters, and automobiles.

Coming closer to home, we find that Canada, by its liberal and constructive policy, in assisting those engaged in developing mining resources, is rapidly leaving us behind in restoring prosperous business conditions.

We learn the Canadian metal-mining industry is producing $1,000,000 in new wealth each working day and is providing an annual pay roll of more than $88,000,000 to some 73,000 workers, who receive $51,000,000 annually in wages, or an average of $1,500 per year. It is stated that still greater progress is expected and that the Government and industrial leaders are confident that mining will do more for Canada in defeating the depression than any other industry.

Members of the Democratic convention, let me say to you that with the rich and immense mineral deposits still awaiting development in this country it is vitally necessary to our national prosperity that our Government do what Canada, our neighbor on the North, is doing to assist the development of its mining industry by adopting a liberal and helpful policy to assist those engaged in the work of opening up new mineral deposits, and by a legislative program modify and liberalize the rigid rules now in force which prevent the investment of capital needed to finance the development of this industry.

We have it on the authority of the Federal Government that many mining districts of our Western States contain numerous and extensive mineral deposits awaiting development. In the district that I have the honor to represent, which has produced $300,000,000 in placer gold since the advent of the early pioneers, there is, according to the head of the Bureau of Mines, one of the greatest undeveloped gold fields in the United States containing gold-bearing lodes and veins from which erosion washed down the rich placer deposits mined by the pioneers.

Now, with the price of gold increased by legislative enactment from $20.67 to $35 an ounce, the day is at hand when these rich deposits are ready for development.

Money must be invested and machinery brought in to put these mining properties into production. Unfortunately, most of these deposits are miles from transportation, located in rugged mountain fastness of the national forest, entirely dependent on the Federal Government for the construction of the necessary road to have access to smelters and market. The time has come when necessity requires that we open up and utilize our store of precious metal contained in these deposits, and with all seriousness, and with all the earnestness at my command, I urge that you, the members of the convention, support the resolution with your vote.

This resolution had the approval of many of the Democratic leaders, including Chairman Farley. However, in conforming to a plan for a short platform limited to general issues, this and a number of important but special subjects were omitted by the committee in drafting the national platform.

ARE YOU INTERESTED IN THE NEW RURAL ELECTRIFICATION PROGRAM?—IF NOT, WHY NOT?

Mr. OLIVER. Mr. Speaker, a year ago the President, at the request of the Congress, launched an effort to foster extension of electric service into unserved rural areas, and set up a temporary Rural Electrification Administration (R. E. A.) to administer the program. So successful was the undertaking during the first year, and so thoroughly did the emergency R. E. A. demonstrate the feasibility of electrifying a much larger percentage of American farms, that the Congress this spring passed legislation making rural electrification a permanent function of the Federal Government.

Under this new program the Federal Government will lend money, under certain conditions, both to build facilities to provide electric service in rural areas and to finance the purchase and installation of wiring, electrical equipment, and plumbing.

This program is particularly applicable in the Sixth District of Alabama, where only 2.3 percent of the farms—less than 1 in 40—have electricity, according to the 1930 census. I urge my constituents to investigate the possibility of joining in this program, and pledge my own efforts to help you realize its benefits.

While in many sections rural electrification has been undertaken successfully and adequately by private utility companies with or without R. E. A. loans, the Federal program gives preference to applications from municipal plants, farmers' cooperatives, and similar public or nonprofit agencies. In many cases it will be found that the farmers' cooperative offers the best means of bringing electricity to a rural area.

The formation of a farmers' cooperative is neither difficult nor expensive. It requires only a little intensive effort on the part of a few public-spirited leaders in calling meetings, canvassing the neighbors, and carrying on correspondence. Until the preliminary organization work has been completed, there is no need to employ any legal or engineering assistance. R. E. A. will help you get started.

Briefly the procedure in organizing a cooperative to bring electric service is this:

First. Hold a mass meeting or a series of mass meetings to familiarize the people in the territory with the R. E. A. program and the opportunities it offers.

Second. Select a committee to canvass the neighborhood to find out how many people want electric service and what they will use it for. It is not necessary to sign anything nor to pay any money to join the cooperative.

Third. Prepare a map showing the proposed lines and prospective customers and submit the information so collected to R. E. A. As soon as R. E. A. specialists have examined the application, it will be necessary to organize a more formal association and then employ legal counsel and engineering assistance, but only after the preliminary work has been done.

As your Congressman let me strongly urge my farmer friends to avail themselves of the opportunity above mentioned. Hold a mass meeting, canvass your neighborhood,

prepare map, and write me so that I may help you secure the benefits promised.

If any of my constituents wish assistance in forming an electric cooperative, I will be glad to see that they get the full benefits of the R. E. A. facilities. Just a line to me or a letter of inquiry to R. E. A. at Washington will bring an immediate response and complete information about the program.

PRINCIPLES OF THE NATIONAL UNION FOR SOCIAL JUSTICE

Mr. BEITER. Mr. Speaker, I am receiving numerous inquiries from members of the National Union for Social Justice in my congressional district concerning my views on the 16 principles of the National Union for Social Justice.

In order that the beliefs advocated by the National Union and my views on them may be set forth for the edification of those interested, I am giving herewith a summary of my opinion on the individual principles:

Principle 1: I believe in liberty of conscience and liberty of education, not permitting the State to dictate either my worship to my God or my chosen avocation in life.

This country was founded on religious freedom and I am very much in favor of continuing this happy condition. I shall always do my utmost to uphold this essential right. The principle has my support.

Principle 2: I believe that every citizen willing to work and capable of working shall receive a just, living, annual wage which will enable him both to maintain and educate his family according to the standards of American decency.

The laboring man has come into his own and his demands are heard with great respect by both major political parties. Two important labor bills were passed by the second session of the Seventy-fourth Congress, just closed—the Government contracts and investigation of interference with collective bargaining acts. Certainly this is not a country of millionaires. The Du Ponts and the Morgans make up a very small percentage of our population and an Al Smith cannot climb from poverty to riches every day. The great majority of Americans are middle class and proud of it—work for a living and glory in it—and these are the ones who will control the political destiny of 1936. Certainly principle 2 has my approval and support.

Principle 3: I believe in nationalizing those public resources which by their very nature are too important to be held in the control of private individuals.

Although the "public resources" mentioned in the principle above are not defined and the language of the pledge is rather vague, I can safely say that I am not adverse to public control in those spheres where private regulation has shown to be blatantly unsuccessful and injurious to the public interest.

Principle 4: I believe in private ownership of all other property.

Of course, I am in accord with this belief, since it follows closely the statements set forth in an explanation of my views on principle 3.

Principle 5: I believe in upholding the right to private property, but in controlling it for the public good.

Any governmental regulation of private enterprise, when necessary, must, of course, be reasonable. I heartily endorse the principle of upholding the right to private property.

Principle 6: I believe in the abolition of the privately owned Federal Reserve Banking System and in the establishment of a Government-owned central bank.

I am in favor of this provision.

Principle 7: I believe in rescuing from the hands of private owners the right to coin and regulate the value of money, which right must be restored to Congress, where it belongs.

I agree with this belief.

Principle 8: I believe that one of the chief duties of this Government-owned central bank is to maintain the cost of living on an even keel and arrange for the repayment of dollar debts with equal-value dollars.

If such a condition could be brought about, then I am very much in favor of it, since it would go far to eliminate the inflation calamities which brought many depressions.

Principle 9: I believe in the cost of production plus a fair profit for the farmer.

It is very true that we cannot expect prosperity until the farmer has found economic equality. He is entitled to a living wage that will permit him to support his family in comfort and according to the standards of American workers. This administration has done much to help the farmers secure restoration of their purchasing power, and I believe that reestablishing foreign markets for agricultural products will help the production problem to a very large extent.

Principle 10: I believe not only in the right of the laboring man to organize in unions but also in the duty of the Government, which that laboring man supports, to protect these organizations against the vested interests of wealth and of intellect.

Of course, I believe in the right of the laboring man to organize in unions and am very much in favor of the Government protecting these organizations against the vested interests of wealth. As evidence of this I call attention to my vote on the Wagner labor disputes bill. The movement to establish the National Labor Relations Board had my wholehearted endorsement, since I believe that labor controversies should be settled by established methods of arbitration. I am very much in favor of this principle and have always supported the provisions set forth therein.

Principle 11: I believe in the recall of all nonproductive bonds and therefore in the alleviation of taxation.

I favor this proposal.

Principle 12: I believe in the abolition of tax-exempt bonds.

I agree, since the abolition of tax-exempt bonds would help the financial situation of the country.

Principle 13: I believe in broadening the base of taxation according to the principles of ownership and the capacity to pay.

I am opposed to oppressive taxation of lands and personal property and favor a just and equitable taxation for all. Certainly the capacity to pay should be taken into consideration in all matters of taxation.

Principle 14: I believe in the simplification of Government and the further lifting of crushing taxation from the slender revenues of the laboring class.

Reorganization of Government activities would doubtless lead to increased efficiency. Governmental bureaus are of necessity composite and involved. However, any consolidation of operations that could be arranged should be adopted.

As stated in the foregoing principle, I believe the capacity to pay should be taken into consideration in taxation matters and the laboring classes should not be called upon to carry any undue burden.

Principle 15: I believe that, in the event of a war for the defense of our Nation and its liberties, there shall be a conscription of wealth as well as a conscription of men.

I firmly approve of this proposal.

Principle 16: I believe in preferring the sanctity of human rights to the sanctity of property rights; for the chief concern of Government shall be for the poor, because, as it is witnessed, the rich have ample means of their own to care for themselves.

I am very much in favor of protecting both human rights and property rights. Sometimes it is extremely difficult to discriminate between them.

I was one of the 218 signers of the petition to discharge the Agriculture Committee from further consideration of the Frazier-Lemke bill, since I believe in the right of every piece of legislation to be given the privilege of fair and impartial debate in the Congress. I voted for the discharge of the committee in this connection.

I give you herewith my views on the proposals set forth by the National Union and my interpretation of those proposals. It may be that my interpretations are at variance with others. However, I shall be glad to have the comments of any of the members of the National Union if my representations are not clear or do not rightly cover the meaning of the principles which they are pledged to support.

MY LEGISLATIVE RECORD FOR THE SEVENTY-FOURTH CONGRESS

Mr. MORITZ. Mr. Speaker, we are nearing the time when the people of all congressional districts will be confronted with the opportunity of selecting and voting for candidates to represent them in the Seventy-fifth Congress.

Entrusted with responsibilities and duties as your Representative in the Seventy-fourth Congress, I am submitting

for your approval a record of my stewardship of the trust you placed with me. Disregarding party affiliations, I have always supported and voted for legislation that would eliminate the distress of those who were dispossessed of their resources, jobs, and in many cases their homes by a depression created and brought about by political maneuvers of the former administrations by their utter disregard of enacting legislation for the benefit of the masses and their untiring efforts of enacting legislation for the interest and privileges of the sinister financial wizards who were permitted to play the game of "Heads I win, tails you lose" until they had the resources of the American public absorbed in worthless and unsound securities, resulting in bank failures, stock market crashes, foreclosures, and a loss of confidence in their Government, realizing that my duty was to assist in enacting legislation to protect the public instead of measures for the exploitation of their resources.

I strenuously opposed legislation setting forth high rates of interest on loans and actively supported and worked for legislation to refinance mortgages on the homes and farms of the Nation through Government agencies at a rate of interest not to exceed the cost of negotiations for such a loan. I refer specifically to the Frazier-Lemke bill, and offer the following letter I received from the Honorable WILLIAM LEMKE commending me for my active cooperation on this measure:

HOUSE OF REPRESENTATIVES,
Washington, D. C., June 20, 1936.

Hon. THEODORE L. MORITZ,
House of Representatives, Washington, D. C.

DEAR COLLEAGUE: I wish to congratulate you on your legislative record in the Seventy-fourth Congress.

Your active support and vote on measures that were beneficial to the masses rewards the trust that they imposed with you in 1934.

Your cooperation with me on liberal legislation enacted during the Seventy-fourth Congress, namely, soldiers' bonus, Frazier-Lemke bill, social-security bill, all labor legislation, and many bills too numerous to mention, obliges me to appeal to your constituency and request of them your reelection in November.

Trusting that I may have the privilege of working and cooperating with you in the next Congress, I remain,

Very truly yours,

WM. LEMKE.

I supported and voted for legislation to adequately provide for the aged, the blind, mothers' and widows' pensions, unemployment insurance, whose comfort and happiness are issues confronting the present Government for solution. I offer a letter from the Honorable ERNEST LUNDEEN, one of the foremost Congressmen in the House of Representatives for the promotion of security legislation.

HOUSE OF REPRESENTATIVES,
Washington, D. C., June 24, 1936.

Hon. T. L. MORITZ,
House of Representatives, Washington, D. C.

MY DEAR COLLEAGUE: The record you made as a Member of Congress shows that you were a most consistent and valuable supporter of legislative measures beneficial to aged, farmers, and particularly legislation benefiting the laboring class of people.

I commend you to labor and the friends of labor in your congressional district. I sincerely hope that they will rally to your support and that you will be reelected to Congress.

With best wishes for success, I am,

Sincerely yours,

ERNEST LUNDEEN.

I actively supported and voted for legislation for the protection of labor, mindful of the fact that the recovery of this Nation from the depression is predicated upon the protection, as well as the production, of labor. I received the following endorsement from the Honorable WILLIAM CONNERY, chairman of the Labor Committee, in recognition of my support on labor legislation:

HOUSE OF REPRESENTATIVES,
Washington, D. C.

Hon. THEODORE L. MORITZ,
1622 House Office Building, Washington, D. C.

DEAR CONGRESSMAN MORITZ: I congratulate you on your legislative accomplishments as a new Member of the Seventy-fourth Congress.

I, as chairman of the Labor Committee, especially commend you for your untiring effort in cooperating, in promoting, and in voting for legislation that will benefit labor. Most particularly I commend you for your support of the Guffey-Snyder coal bill, of the Wagner Labor Relations Act, of the Unemployment, Old Age, and Social Security Act, of the railroad retirement pension bill, and many other bills too numerous to mention.

Judging by your reaction to these bills is an indication to me that you will always be 100 percent for organized labor, and that you have the interests of the masses foremost in your heart when confronted by an issue. You have been branded as a liberal, and I agree that if fighting for those who are in need and for those who are being exploited by unscrupulous employers is liberalism, then you came by your title honestly.

I assure you that it has been a pleasure to work and cooperate with one who is always ready to fight for the interest of his constituency, even to the extent of jeopardizing his political future.

I trust it will be my privilege to continue with you in this fight for the common people.

Sincerely yours,

WILLIAM P. CONNERY, Jr.

I supported and voted for the immediate cash payment of the soldiers' bonus, the regulation of the public-utility holding companies, the vocational education bill, and many other bills too numerous to mention that would eliminate our present distress and provide direct relief for those in need. I opposed legislation that would retard the progress of the Nation, namely, the "gag" rule, unheard-of appropriations in peacetime for the Army and Navy. I am submitting herein some of the many letters I received from my colleagues commending me on my liberal legislative accomplishments during the Seventy-fourth Congress:

HOUSE OF REPRESENTATIVES,
Washington, D. C., June 24, 1936.

THEODORE L. MORITZ,
Member of Congress, Washington, D. C.

DEAR CONGRESSMAN: Now that we have completed our first term together in the House of Representatives, I desire to express to you my profound admiration for your work in this Congress. You have stood with the progressives always, and no doubt you now appreciate what I said on the floor in the very beginning of the session: That on fundamental issues there was no difference between the Republicans and the Democrats. The following major issues prove this assertion:

1. Unheard-of appropriations in peacetimes for the Army and Navy.
2. Opposition to a decent plan of refinancing of the farm debt.
3. Opposition to an old-age-pension system that shall make the aged of this country other than abject objects of charity.
4. Opposition to taking the power to issue and regulate money away from private interests and restoring that power to the Congress, where it belongs.

I am pleased to know that you are willing to go down the line for the people of this country and are willing to sever the ties of the two-party system that is responsible alone for the situation the distressed millions are in today. In your independent candidacy for reelection you have my every sympathy and whatever of influence I can offer in your battle for reelection.

Sincerely yours,

USHER L. BURDICK.

HOUSE OF REPRESENTATIVES,
Washington, D. C., June 24, 1936.

Hon. THEODORE L. MORITZ,
House of Representatives, Washington, D. C.

MY DEAR COLLEAGUE: Before we separate and go our ways I want to express my appreciation of the support you have given the McGroarty bill, H. R. 7154, embodying the Townsend plan, in the Seventy-fourth Congress, and your cooperation in all efforts to promote this legislation.

I can recall no instance in which you have failed to help our cause during this Congress. If your record should ever be called in question, you may feel free to call on me at any time.

With all good wishes and kindest personal regards, believe me to be, always,

Faithfully yours,

JOHN STEVEN MCGROARTY.

THE TEACHERS CARRY ON

Mr. PETTENGILL. Mr. Speaker, now that the depression is definitely passing, notice should be given to the fine service of the public-school teachers of the Nation during these difficult years.

Children from millions of homes have had their hope and morale, if not, in fact, their physical health and energies, sustained by the cheer and courage of their teachers. For the latter it has been a period of added work, more pupils, and less pay, but they have carried on.

When the history of the depression is written I hope the writer will be able to adequately appraise the service rendered. Certainly it has meant much to the Republic that 26,000,000 children enrolled in our schools, a quarter of our total population, have had these daily contacts with their 870,000 teachers.

The Federal Government has helped to carry the load for municipalities which had reached the end of their credit and tax reserves. Thirty-two national organizations joined forces to form the national committee for Federal emergency aid for education, with James H. Richmond, chairman.

This committee, with the aid of the Congress and the executive departments, has worked unceasingly to provide ways and means to carry on. Schools have been kept open, teachers' pay rolls have been provided to close the gap of shrinking revenues, and under P. W. A. appropriations hundreds of new buildings and improvements and extensions to existing buildings have been constructed. These will stand as a lasting credit against the increase of the national debt.

Not only the teachers but also the school nurses, playground directors, and the medical and dental professions have helped to maintain a remarkable degree of health among these 26,000,000 children. The children's health is the Nation's wealth.

When we are told that the American system has broken down it is worth while to recall that with only 7 percent of the world's population and its children, we in America, during the worst year of our worst depression, spent more money on our public schools than all the rest of the world together spent on its public schools. I am for making necessary improvements in the American system to keep pace with the advance of science, invention, and technology, but am unwilling to scrap that system for any other on earth—none of which, on the testing grounds of actual experience, have ever proved as good.

One of the new and added responsibilities of our teachers in this modern age is to safeguard their pupils from traffic hazards, and to teach them habits of carefulness of lasting value when they no longer go to school.

Last year 36,000 of our people went to their graves as a result of traffic accidents. That is one every 15 minutes. In addition, countless thousands more were permanently maimed. If these were the casualties of war and not of peace the Nation would be up in arms. Any foreign foe which took 36,000 American lives would be repulsed without thought of cost.

Here, again, the teachers are our first line of defense. They are probably more important than any other force in preventing these casualties from being larger than they are.

The Federal Government is taking a sincere interest in the war against accidents and for uniform traffic regulations. The Bureau of Public Roads has printed a very useful pamphlet on accident prevention which deserves better publicity and a wider reading.

THE PROBLEM OF OLD AGE

Mr. PETTENGILL. Mr. Speaker, for many years I have spoken in favor of legislation to provide security for old age. I have stated that the objective must be a sum necessary to provide reasonable comfort on the one hand and one that will not impose a crushing burden of taxation on the other.

The problem has been too long neglected, but the depression and the loss of lifetime savings in closed banks, building and loan associations, failure of income, unemployment, and the shrinkage of real estate and security values has made it acute.

How to do justice between the old who receive and the young and middle aged who must pay is where differences arise. But we must give it our earnest attention. It is of great importance now and is going to become of more importance in the future.

The average life span has been moving up and the industrial deadline has been moving down. Both tendencies are almost certain to continue. That creates the problem and the necessity to solve it.

Let us look at the cold statistics. They come from the actuaries of great life-insurance companies whose business it is to record the past and read the future as accurately as is humanly possible. Per 100 of population they are:

	1880	1930	1980
Persons 50 and over	16	23	38
Children 0 to 20	48	39	30
Middle aged, 20 to 50	36	38	32

From the above you will note the increasing number of persons over 50 and the decreasing number of persons under 20. You will note further that in 1980 it is estimated that there will be more over 50 than those under 20.

In other words, in the not distant future those in the working period of life will find that their heaviest burden will be to provide for their parents rather than their children.

This is probably the most astonishing change of population trends since the world began.

It is due to two things in the main—a declining birth rate and an increasing life span. Fewer babies are born, but of those who are born an increasingly larger proportion survive the diseases of childhood and youth and live into middle and old age.

First, the declining birth rate: Of 1,000 women of childbearing age, we have, for the years noted, the following number of children under 5 years of age:

1810	1,006
1840	835
1870	638
1900	531
1930	246

In 120 years—1810–1930—the number of children under 5 years of age for each potential mother has declined from 1,006 to 246, or nearly 76 percent.

Second, the conquest of the diseases of childhood and youth, which permits more and more people to live into the upper age levels. Medical science has won its greatest victories for childhood and youth. In the few short years from 1900 to 1934 the death rate from summer complaint per 100,000 of population has been reduced from 133 to 18, or 86 percent; in diphtheria the reduction has been 92 percent; in scarlet fever, 80 percent; in typhoid, 91 percent; and in tuberculosis, 72 percent.

The result is that in 1870, 150 in every 1,000 were past 45; in 1930, 230 in every 1,000 were past 45 years of age, or 80 more than in 1870.

For the age 65 the figures show that in 1860, only 27 in 1,000 were past 65; in 1930, 54 were past 65; and in 1970, it is anticipated that 100, or one-tenth of our population, will be past 65.

So we have more and more of our people living to be older than 45, 50, 60, and 65, and at the same time the industrial dead line or age when people can no longer find employment is moving into the lower age levels. The age level moves up, the dead line moves down. Even in prosperous times there are many industries—steel mills, railroading, and others—where a man past 45, and in some cases 40, cannot hope to find a job, especially if he has never engaged in the particular occupation before. This is a byproduct of the machine age and not a happy one.

Another trend is the shift from rural to urban life. In 1880, 71 percent of our population was rural; today it is about 43 percent; that is, living on farms or in small towns and villages of not more than 2,500 people. This adds to the problem, because in the old days there were chores, gardening, home crafts, and other useful work that could be done by elderly men and women on farms or in small villages. But in the cities where is there work for them to do?

These figures may seem dull and uninteresting to some, but to me they are vital and significant. In them is wrapped up the future of our country. They must demonstrate to all fair-minded men and women, whether rich or poor, urban or rural, that America has a tremendous problem on its hands which must be approached with sympathy and understanding.

The old virtues of thrift and saving and self-help are perhaps more necessary than ever because the "night cometh" now much earlier than formerly when self-sustaining work becomes harder to find. Moreover, any tendency to become wards of society is full of danger.

Nevertheless it is apparent that the problem in countless cases is beyond individual or family solution alone. When a breadwinner 45 or 50 years of age is displaced from the pay rolls of industry by a new labor-saving device and his special skill, acquired by a lifetime of work, can no longer be sold at the employment window despite every effort, and the free

land of the West is no longer there to move to, his problem and that of his wife and small children becomes, in part, at least, the problem of society.

The march of science and invention knits us closer and closer together and makes us more and more "our brother's keeper."

I do not think there is only one panacea for the problem. There are many partial remedial measures which, added together, as one builds a house brick by brick, approach a complete solution. There is the movement for a shorter working day and working week. There is the effort to strike a new balance between profits and wages—a more equitable distribution of the wealth created by men and machines. There is adult vocational education to fit men and women for new occupations. There is the greater interest in life insurance, another word for thrift. There is the dismissal wage. There are private and public pension plans such as we have been learning to build up for persons in the civil service—such as postmen, firemen, policemen, school teachers, and so forth, as well as workers on railroads, and many industries.

There is, too, the great necessity of making savings safe when once acquired, to guard more and more against bank failures, building and loan failures, losses from the sale of worthless securities, losses from the fluctuating value of the dollar with inflation and deflation wiping out the savings of a lifetime. There is work to be provided by the States and the Nation—useful, dividend-paying work—reforestation, flood control, soil conservation, fish and game preserves, National, State, and municipal parks and playgrounds, road building, and so forth, to remove some of the pressure of young men on older men for jobs.

Others could be named. To them we must devote our energies, our sympathies, and our resources. The House of Have, by taxation or otherwise, must share with the House of Have Not, more especially when it is not the fault of shiftlessness or dissolute habits.

But over and above these I have named, to supplement them but not to supplant them, must be added some plan of national scope, the central government coordinating the work of the 48 States.

In the same way as provision is made for depreciation of machinery and the amortization of buildings, industry must provide for its "human obsolescence." By workmen's compensation acts we have provided against the hazards of accident and occupational disease. We must extend these principles to the hazards of growing old. As Chief Justice Charles Evans Hughes said in the railway pension case:

> What sound distinction, from a constitutional standpoint, is there between compelling reasonable compensation for those injured without any fault of the employer, and requiring a fair allowance for those who practically give their lives to the service and are incapacitated by the wear and tear of time, the attrition of the years?

We have made an approach to this in the Social Security Act. I will not discuss it at length. I do not regard it as perfect. But it is a beginning—the first Nation-wide approach to our problem since the beginning of the Republic. Thirty-six States out of forty-eight are already sharing in its benefits. Twenty-six million wage earners will be brought under its provisions. Imperfect as it is, the administration which brought it into being will be recognized for all time as the pioneer in a movement as significant to our future as the conquest of the West by our fathers has been to us. I am glad to have helped lay the foundation stones.

As conditions improve I do not doubt that the benefits under it will be extended and a just and fair balance struck between the necessities of those beyond the working years and those whose toil alone supports both age and youth.

JUSTICE TO THE VETERANS

Mr. HILDEBRANDT. Mr. Speaker, over $2,000,000,000 has been paid just lately by the American Government to the surviving veterans of the World War—a so-called bonus—which was and is no bonus at all, but reimbursement that should have been placed in the hands of the ex-soldiers years ago.

One of my proudest accomplishments is my work to obtain the enactment of the adjusted-compensation law. So bitter were our opponents, so reluctant were some Congressmen, so fearful and hesitant were others, and so misinformed were many in Congress and out, that it required a hard and bitter struggle to get this law written on our statute books. The curious part of it was that several men in high office who had been against America's participation in the World War and who regretted to see life, blood, and tears sacrificed without necessity or rightfulness were the strongest champions of the bonus. We wanted no war. We wanted peace, reason, and neutrality. But after the Nation entered that ghastly orgy we considered it an inescapable obligation to pay the boys who went "over there" something more than a cheap and tawdry dollar a day. We remembered the profiteers who pocketed thousands and millions. We thought that the lads who waded in trenches and were tormented and tortured in the most barbarous brutality of the ages ought to get as much money as the men who fought on parlor carpets and in swivel chairs, clipping coupons from dividends, and living lives of ease and selfishness. We finally won; and the bonus is today a reality—insufficient as it is.

Not very long ago registered packages were given to veterans containing bonus payments of $1 for every day they served in the Army in this country and $1.25 for every day served overseas—except for the first 60 days in each category, for which no payment was made. The average veteran received about $550. In some cases payments were as low as a few dollars. In others they were as high as $1,500. The amount depended on how long the former service man had been under the colors; also on whether he had borrowed on his adjusted-service certificate. About 38,000,000, $50 bonds were distributed to the 3,500,000 veterans on the bonus pay day. And that day will go down in history as a red-letter day of social justice.

While our Government was providing this belated compensation to the ex-soldiers, Dean Carl W. Ackerman, of the Columbia University Graduate School of Journalism, was flinging abuse at the recipients of the bonus. No meaner and no more unjust language was ever used than that of Ackerman when he called the veterans "privilege-hungry groups" threatening America's democracy and peace.

If I recall correctly, Ackerman was ardently in favor of the war. At that time he was urging another type of privilege—the privilege of going to Europe to be shot, gassed, blinded, gnawed by rats in the mud and mire, or imprisoned in the jails of another country. He thought that the soldier boys should consent to such a privilege without objection. He believed that it was "theirs not to reason why, theirs to do and die." Now, after they did their bit so bravely and uncomplainingly, he begrudges them the insufficient compensation they are getting far too late—and that some, who have gone to the Great Beyond, do not get at all. I have no patience with such reasoning. It is not reason. It is unreason. It is the stupidity of a man who does not know what he is talking about, or the selfishness of a man who vilifies the boys of 1917–18 by stigmatizing them as "privilege-hungry groups."

Can you imagine a more absurd statement or a more abominable misstatement of the truth than the assertion that "the payment of a three-billion bonus to those who served in the World War is a great national wrong"?

As a friend of the veterans, a friend of peace, and a foe of unnecessary wars, I brand such a remark as an insult to every American who served in that terrible conflict. The boys of nearly two decades ago did not seek purchase and they did not ask it. They went, for the most part, because they had implicit faith in the demand of their Government—except for a few who, equally honestly, believed that the World War was a tragic mistake and that they could be better citizens by suffering the penalties of resistance. The lords of money, the captains of industry, the barons of finance, stayed back here in America and accumulated mountains of dollars. It was they who wanted to be purchased. They were not purchased after all. By the legal trickery possible in such a period, they stole their profits—

to the everlasting sorrow of our America and to the everlasting disgrace of the profiteers.

Adjusted compensation should have been authorized and paid the day after the armistice. It took us who pioneered in the fighting for it nearly 18 years to have it paid in any form and at any time. We are glad that we succeeded eventually. And again, let me say, we have had enough of wars, grafters, the heroes of Hog Island, and the kaisers of all lands. If we ever participate in a war again, we shall try to be very certain that it is not a case of having the youth of America hurled into a hideous hell of butchery for the greed and gain of alien imperialists.

JOSEPH W. BYRNS

Mr. SABATH. Mr. Speaker, JOSEPH WELLINGTON BYRNS, to whom we pay tribute today, was one of the truly remarkable men of his time, which time was, perhaps, the most epochal of our history—a singular, striking, and marvelously gifted man. Language is inadequate to portray him. Those of us who were fortunate enough to know him through years of strenuous service in this hallowed Hall can recall him in memory only. His boundless energy, his unremitting industry, his unresting spirit, the breadth and depth of his sympathies and tolerance, the scope and the power of his intellect may be recounted; but there was something more—that inimitable, indefinable personality, JOE BYRNS—which neither language nor the brush can adequately reveal. It is difficult to recognize that he has passed beyond the reach of human help or harm.

His life from youth to manhood and from manhood to a premature grave was one long incessant battle for his deep convictions and for his high ideals. He lived in a great epoch, as I have suggested, and his name is blended with its glories and achievements, its reverses, and its disappointments. Men have differed and will differ as to the soundness of his policies and the worth of his views, as is natural in a bipartisan government, but nobody who knew him could doubt his sincerity or challenge his purity of purpose. To inferior intellects many of his combinations appeared impossible, his plans quite impracticable, but in his hands simplicity marked their development and success vindicated their adoption.

Our departed friend was not born to a life of ease. He was born and reared on a farm in his native State, and by much self-abnegation, as we are told, he was graduated from the law department of Vanderbilt University. Thus he is another outstanding example of how unfavorable environment may not subjugate one with the stature of character of sufficient magnitude to single him out from the masses. He extended the area of his influence not only by gaining a place in circles of civic distinction and political achievement and by his close association with others most prominent in other worthy undertakings but also by a familiarity with the present-day needs and conditions of the humbler masses of our people and by keen and accurate observation of the trend of their movements and impulses. In the din of political strife he taught by precept and example that the country, as well as his district, had an imperative claim upon superior American activity, and that accumulation of wisdom was charged with an inexorable trust. He taught that frivolity and extravagance tend to the undermining of patriotic sentiment; he taught the equality of American citizenship, the independence of American enterprise, the honor of labor, and the wickedness of neglecting or in any way degrading free and intelligent suffrage.

Such teaching and influence have not been ineffective; but death has made them more solemnly impressive and has added a kind of consecration to the lofty example which we have too listlessly seen builded in our midst. If we may hope that this teaching and example have been endued by death with new potency, as forces creating better and purer citizenship, and with graver import as instrumentalities in the development and stimulation of patriotic ideals, and if we may hope that our countrymen will with sincerity heed the way of duty they point out, we may not only be doubly assured that our dead is not lost to us but may confidently renew our faith in the American people as custodians of their scheme of free government.

Mr. BYRNS was well grounded in the fundamental principles of government; groomed in the traditions of the fathers and inspired by the teachings of Washington and Jefferson, he was an aggressive advocate and a dangerous antagonist. A clear and forceful speaker, he never approached a subject but that, given adequate time, he exhausted it. He was well equipped for his important task by temperament, studies, and political experience. Cool, cautious, deliberative, he was capable of prolonged concentration in intellectual work, which resulted in convictions securely based in profound study and adequate reflection. His mental equilibrium was not upset by gusts of passion, and he had no aptitude for attempts to sway others by tempestuous eloquence. He sought to convince, and he became formidable in debate because he was thorough in preparation and precise in statement. With his regard for the processes of reason, there was no acerbity in his disposition, and there was a notable absence of any assumption of undue superiority. Exceptionally modest, he was tolerant in spirit, temperate in speech, and conciliatory in action.

He was a devout Christian but hated religious intolerance. There was no duplicity in his make-up. He detested hypocrisy and loathed deception. Demagogy to him was despicable. He spurned pretense and despised sham. Candor, courage, and conviction were the dominating qualities of his matchless character. Truly may it be said of him also:

> If treachery had come near him, it would have stood abashed in the presence of his truthfulness, his manliness, and his confiding simplicity.

In all the reaches of the earth there is no place just like this Hall. Those who rise to the headship of this House are few in number, and those who climb the heights to reach that headship compose a galaxy of jeweled characters, unsurpassed in any other assembled group in all the world. Students of history and lovers of country who are yet to be will visit here or read of these illustrious characters who have played such mighty roles in molding American history and shaped her course in every epoch of her journey. What a galaxy of stars to brighten the firmament of the past and light the Nation's future.

In the passing of the kindly soul of JOSEPH WELLINGTON BYRNS the Nation and this House have lost one of the most brilliant and beloved Speakers who ever occupied that transcendent office.

There is fresh in my memory that day many years ago when he first came here to represent his district. "Stovepipe" John W. Gaines had preceded him, and, therefore, the House as a whole was eager to meet the newcomer who had defeated that powerful Member.

Mr. Gaines was perhaps one of the greatest parliamentarians the House had ever known, although the charge was frequently made, and it was on this point that the election in his district hinged, that he took up too much of the time of the House by prolix discourses on procedure, precedents, and parallels between our Congress and the English Parliament.

The attention JOSEPH W. BYRNS attracted from the rest of the House because of his defeat of "Stovepipe" John stood him in good stead from that time. He came to know more Members than is generally the good fortune of a new Representative.

In the Sixty-first Congress he evoked the admiration of a great many of us when, in the fight against Uncle Joe Cannon, then Speaker, he remained steadfast and loyal to the small Democratic majority in the struggle to liberalize the rules of the House. Some, unfortunately, deserted the ranks of their fellow Democrats. Little did he sense at that time that a future day would herald his own advance to the exalted office of Speaker, with its unimaginable responsibilities.

His unflagging, assiduous, and intelligent activities were rewarded by membership on the powerful Committee on Appropriations, and later he became its able chairman. In that capacity he rendered services so outstanding as to elicit

the praise of all the members, and under his wise leadership the committee assumed a distinction it had never previously enjoyed.

When Speaker Garner became Vice President of the United States Mr. BYRNS' many friends thought he should be a candidate for the Speakership. As his lifelong friend and admirer, it caused me deep personal regret that I could not support him. Together with other Members I was anxious to retain him as chairman of the Committee on Appropriations, where he had made his services so invaluable. But a few years previously the House had entrusted to that supercommittee the task of passing on all appropriations, and the splendid manner in which the difficult work was handled by Mr. BYRNS brought him the merited commendation of the entire House, regardless of political affiliations.

It so happened that at that time a truly distinguished Member from my own State, Illinois, was a candidate for the Speakership, and I, with others, felt that his long and honorable record unmistakably gave him first call upon our support. Moreover, the claim of the Middle West to that office was generally recognized as a fair one. I therefore supported this Member, the late Henry T. Rainey.

After consulting some of my colleagues, I approached WILLIAM BANKHEAD and urged that he become a candidate for the majority leadership.

At that time one of the most able and affable Members, the Honorable John McDuffie, was a candidate for the Speakership. I later learned that he had been campaigning for months and had the pledges of nearly a majority of the Democratic Members and the support of some of the leaders of the incoming administration. Mr. BANKHEAD, honor and duty bound to support Mr. McDuffie, came to me and frankly stated his position. This caused a complete change in strategy, and it was finally decided that we would, in the interest of Mr. Rainey's candidacy, have to abandon our hope of keeping Mr. BYRNS at the head of the Committee on Appropriations. With that end in view, we urged Mr. BYRNS to become a candidate for the majority leadership, to which he ultimately agreed. Thereafter the elections of Mr. Rainey as Speaker and Mr. BYRNS as majority leader were assured.

After the untimely death of Speaker Rainey, although many able Members were mentioned to succeed him, there was never any thought in my mind but that the commendable record of Mr. BYRNS, his exceptionally successful party and committee leadership, and merited popularity should attract the exalted honor.

On that sad day when Speaker Rainey was laid to rest at Carrollton, Ill., there being those who felt that the representation accorded to the great Midwest should not be lost, I was urged to become a candidate for the office which to my mind is second to the Presidency of the United States only. Nevertheless I strongly felt that JOSEPH W. BYRNS was the one man who should have that office; and in a conference that was called later that evening in St. Louis I urged him to yield to the widespread demands of his party that he become a candidate for the Speakership.

For 28 years I had known JOE BYRNS, but never was I more impressed with the sterling character of the good man than on that day. Even then, in the face of persistent urging, he modestly shrank from accepting the honor, arguing that others, too, were entitled to careful consideration in that connection. At length, however, he yielded, and, although some opposition naturally arose, long before the vote was taken it was conceded that he would be elected by unanimous vote of the Democratic Members, as he was.

I need not remind you how strenuous these last few years have been for him. You have seen him day in and day out, carrying a tremendous burden, helping the administration and the party to effect their great program for the amelioration and betterment of the conditions of our people.

JOE BYRNS always took the side of progress. Others might see obstacles in the path, might laboriously weigh the chance of defeat; this son of Tennessee pioneers saw always the promised land. "Forward" was ever the word. This was much more than a hopeful attitude; it was a happy instinct for underlying realities, a recognition that progress is the law. He accurately sensed the predominance of good, of intelligence, and of kindness in the world.

Of course, our departed friend had a genius for friendship. The ability to see the best in men gave him a key to hearts. His happy, modest informality knew no barriers.

His long service for the public weal, beginning with membership in the lower house of the Legislature of Tennessee and going on to the second office within the gift of a free and enlightened electorate, seemed to him chiefly a record of warm, animating friendships. His work as Speaker meant much to him as an opportunity for wider, warmer contacts, and for effective, quickening strokes on the side of genuine progress. Such qualities, such purposes must march on.

In conclusion, let us realize our obligation to make safe and secure the government by the people which has been entrusted to our keeping. Let us remember that it can thrive and grow only in the atmosphere of popular devotion and unselfish attachment, and, above all things, let us open our hearts to such influences and teachings as emanate from the life and death which we today memorialize.

WHAT THE DEMOCRATS HAVE DONE FOR THE VETERANS

Mr. RANKIN. Mr. Speaker, as chairman of the Committee on World War Veterans' Legislation, I wish to call attention to some of the things that have been done for the ex-service men during this administration.

I presume no one who is familiar with my record or who has served with me in this House will question my devotion to the veterans' cause. If there be any who have such doubts, I refer them to the veterans themselves, and especially to those disabled men who are entitled to our first consideration, as well as to the widows and orphans of the ones who have passed away.

Conscious of the responsibility that rests upon me in the position I occupy, I do not hesitate to say that our veterans and their dependents are better cared for, better satisfied, and more contented today than they have been at any time since the close of the World War.

Those carping critics who attempt to stir up prejudice among the veterans by trying to create the impression that the Democrats are unfriendly to them are so overwhelmingly answered by the crushing facts of the records as to render them not only ridiculous but pathetic.

The veterans of the World War are now receiving pay for their adjusted-service certificates. On January 27 of this year a Democratic Congress voted overwhelmingly to pay this 18-year-old debt to the veterans and passed a law to pay the face value of their adjusted-service certificates and to cancel the interest after October 1, 1931.

Approximately 4,000,000 veterans are now enjoying the proceeds of this legislation, which finally passed the House by a vote of 325 to 61. Voting for it in the House were 250 Democrats, 65 Republicans, 3 Farmer-Laborites, and 7 Progressives.

The measure finally passed the Senate by a vote of 76 to 19. Voting for it were 57 Democrats, 16 Republicans, 2 Farmer-Laborites, and 1 Progressive.

The last Congress, which was also overwhelmingly Democratic in both Houses, restored all benefits to Spanish-American War veterans that had been taken away by the so-called Economy Act. This measure to restore these benefits is known as Public, No. 269, and was approved by President Roosevelt on August 13, 1936.

Certain Spanish-American War veterans who had directly service-connected disabilities were also given increases in pensions under the World War rate, which they still enjoy. Therefore, the Spanish-American War veterans are receiving more benefits than they enjoyed prior to the passage of the Economy Act.

The World War veterans suffering from service-connected disabilities have also been restored to their former rates enjoyed prior to the Economy Act, and the presumptively service-connected World War veterans have been restored to 75 percent of their former rates.

I think I ought to point out here that when what was called the Rankin bill to advance the presumptive period for World War veterans to January 1, 1930, was passed by Congress it was vetoed by President Hoover. Then the disability allowance bill was passed, leaving out the widows and orphans of the disabled men. In other words, it provided a certain amount of pay for the presumptively service-connected veteran as long as he lived, but when he died his widow and orphans were turned away without a penny, so far as compensation was concerned. That bill was rushed through under suspension of the rules, and we were denied any opportunity whatsoever to amend it. It not only cut to the minimum the compensation of the men we were trying to take care of but it invariably hastened his demise and added additional pangs to his death, in the consciousness that when he passed away his compensation would entirely cease and leave those dependent upon him unprovided for.

Besides, there was no provision in any veterans' law prior to the last Congress to take care of the widows and orphans of service-connected veterans who died from causes other than the ones for which they were drawing compensation. For instance, we had the case of a blind veteran who was groping his way across the street and was run down by an automobile. Although his eyes had been shot out on the western front, under the law his widow and orphans were denied compensation because he did not die of the disability for which he was drawing compensation. If a veteran who had his arm or leg shot off, or who was shell-shocked, or otherwise disabled, died of pneumonia or some other disability or cause other than the one for which he was drawing compensation, his unfortunate dependents were turned away without a penny of compensation at the hands of the Government he served.

During the Seventy-third Congress I introduced a bill to take care of the widows and orphans of the disabled World War veterans who die from causes other than the ones for which they were drawing compensation. It passed both Houses and was signed by President Roosevelt. This legislation brought to those unfortunate dependents a measure of justice they had been denied ever since the war closed.

During the session of Congress that has just closed our committee reported a bill, which I introduced, extending the provisions of this law to the widows and orphans of those veterans who had presumptively service-connected disabilities, but who died of other causes, and wiped out the vicious misconduct clause insofar as it applied to these dependents. That bill passed both Houses of Congress and was approved by the President.

I think I ought also to call your attention to the fact that during the previous Congress President Roosevelt, by Executive order, gave us one of the most complete programs for the construction and improvement of veterans' hospitals that has ever been put into effect at any time, setting aside more than $20,000,000 for that purpose.

We also passed a measure to safeguard the estates of incompetent veterans and to protect them against the misuses of their funds by dishonest or incompetent guardians.

Hospitalization was restored to veterans of all wars and even to peacetime veterans, who were receiving compensation as result of disabilities incurred in the service.

We also provided compensation for World War veterans, Spanish War veterans, peacetime veterans, and nonveterans who were injured in the Florida hurricane, and for the dependents of the ones who lost their lives in that disaster, in accordance with the Federal Employees' Compensation Act.

I give you these facts to let you know that we have not been derelict in the care of our veterans who fought the Nation's battles in times of war, or in the discharge of our obligations to the dependents of the ones who were killed, wounded, or otherwise disabled as result of their services to their country.

It has been said that prosperity is a state of mind. Shakespeare once said that it is better to be with the dead "than on the torture of the mind to lie in restless ecstasy." What the disabled veteran wants is peace of mind, so that he may enjoy the years that are left to him without suffering those agonies of uncertainty and disappointment to which I have referred.

I have devoted my time and efforts to try to prevent their unnecessary disturbance, to try to see to it that they are permitted to enjoy that peace and contentment to which their services entitle them, and that their dependents are reasonably cared for. Typical of the flood of letters I am receiving is the following one from a little woman in Miami, Fla., who writes as follows:

DEAR MR. RANKIN: In a cozy little home in this city two children slept while the widow of a veteran listened to your comments on the Democratic platform.

For the first time I learned how I might reach the originator of the Rankin bill.

I do not know if you ever hear from anyone who is benefiting by your bill, but I do want you to know that you are directly responsible for the family of a peacetime veteran who was not able to prove his wartime illness living like human beings for the first time since their provider lost his health.

He left us a short time ago for the long journey, and without the pension which your bill makes possible I shudder to think how I would raise and educate my children.

I also want you to know that a fervent prayer went up last night for success in your every venture.

Therefore it is a source of gratification to me at the end of 4 years of service as chairman of the Veterans Committee in the House under a Democratic administration to be able to say to the world that our veterans of all wars and their dependents are better cared for and more contented today than they have ever been at any time within the last 18 years.

TRIBUTE TO REPRESENTATIVE WILLIAM D. THOMAS

Mr. HILDEBRANDT. Mr. Speaker, warm hearts and human sympathies know no party lines, no credal distinctions, no sectional separations.

Every Representative who knew WILLIAM D. THOMAS, of New York State, from the Twenty-ninth District of that great Commonwealth, felt honest affection for him. His death grieved us all.

Congressman THOMAS belonged to the Republican faith and I was not in accord with his position on many points. But I came to know him as generous, sympathetic, sincere, and earnest. With me he was a member of the House Committee on the Post Office and Post Roads. In our sessions I found no trace of partisanship or pettiness in him. He joined hands with the rest of us in trying to do the best possible for the employees of the postal system. As a resident of a farming section, he knew, as I know, the burdens and sacrifices of the rural mail carrier. BILL THOMAS cooperated unselfishly and freely at all times in our efforts to raise the standards of living for carriers and for star-route contractors.

While adhering to the conservative program of the Republican Party, Mr. THOMAS had none of the jingoism and militarism so often found in G. O. P. ranks. He preferred peace and he deprecated bloodshed—as all humane citizens must.

We deeply miss this genial, kindly, lovable colleague in the House of Representatives.

I am more than glad to have the opportunity to pay a tribute to a Republican who was so democratic and so helpful as the late Representative WILLIAM D. THOMAS.

THE UNITED STATES SOLDIERS' HOME

Mr. SNYDER of Pennsylvania. Mr. Speaker, as a member of the Subcommittee on Appropriations that has to do with the United States Soldiers' Home, located in the northeast boundary of Washington, I have looked into the operation of this institution during the last few years.

I want to take this opportunity to commend all who have anything to do with this home. I feel sure if all Members of Congress would visit this home several times, they would be as enthusiastic about its splendid services to our disabled soldiers and its economic management as I am.

Some weeks ago Congressman JOHN H. HOEPPEL, of California, inserted an extension of remarks in the RECORD and embodied some figures and statements that were not in keeping with the real basal facts relative to the operation of this institution.

Being a member of the Committee, I know that certain statements in Mr. HOEPPEL's extension of remarks were in error, and, therefore, I have gone into the details of the set-up of the United States Soldiers' Home, and at this time I am giving a compilation of some of the outstanding features of this wonderful institution.

JUNE 18, 1936.

(Memorandum for the Honorable JOHN B. SNYDER, M. C.)

The United States Soldiers' Home Reservation consists of approximately 500 acres, utilized as follows:

Two hundred acres occupied by buildings, grounds maintained as park, etc.

One hundred and seventy-five acres maintained as farm land for the benefit of the members of the home.

The remaining acres are left in their natural state of woodland as an attractive natural feature for the pleasure and benefit of the members.

The dairy herd of Holstein cattle, rated as the first accredited herd of the United States by the Department of Agriculture, produces approximately 300 gallons of milk per day, all of which is consumed for the needs and uses of the home. The cost of milk per gallon is approximately 33½ cents for the highest type of grade A milk, classified in the same grade as certified milk for invalids and children. Milk of equal quality is valued wholesale at from 65 to 75 cents per gallon. It has always been considered that the members of the home should receive the highest grade of milk obtainable, provided the cost was reasonable; and, while it is true that milk of a quality considered suitable for hospitals and other institutions can be purchased perhaps at about 2 cents less per gallon, the superiority of the product produced at the Soldiers' Home has always been considered well worth the slight increase in cost, as it adds to the health and contentment of the members.

The golf course maintained at the Soldiers' Home, at no cost whatsoever to the members of the home and maintained entirely by voluntary subscription, is open and available to any and all members of the home who desire to avail themselves of its advantages. No member of the home has ever been denied, criticized, or discriminated against for availing himself of the facilities of the course, and no member of the Soldiers' Home has ever been discharged, disciplined, or criticized for utilizing the course.

Attention is invited to the attached enclosure of an article which has just appeared in the Army and Navy Journal, setting forth a brief history and record of the origin and manner of conducting the United States Soldiers' Home.

Civilian employees of the home are hired for positions to which members of the home are not suitable, but employment with compensation is offered to approximately all members of the home who desire work within their physical capacity to perform skilled or manual labor.

[Enclosure]

THE UNITED STATES SOLDIERS' HOME

HISTORY

The United States Soldiers' Home is the outgrowth of the dream of a great soldier, Gen. Winfield Scott, a dream in which he visioned an institution that would live and, while it would perpetuate the gratitude of a nation for faithful service, it would be a self-sustaining institution, thereby removing any burden of taxation from the people for its maintenance.

In February 1848 General Scott transmitted to the Secretary of War a draft for $100,000 as part of the tribute levied by him on the City of Mexico for the benefit of the Army, and he expressed the hope that it might be allowed to go to the credit of an Army asylum. Again, in November 1849, in another letter he says, referring to the same matter:

"The draft was made payable to me, and in order to place the deposit beyond the control of any individual functionary whatever, I endorsed it 'The Bank of America will place the within amount to the credit of the Army Asylum subject to the order of Congress.'"

This $100,000, with $18,791.19 remaining from the same levy, together with an unexpended balance of some $54,000 which remained in the Treasury from an appropriation made by Congress in 1847 for returning wounded and invalid soldiers of the War with Mexico to their homes, was appropriated in the organic act entitled "An act to found a military asylum for the relief and support of invalid and disabled soldiers of the Army of the United States", an act which was passed on March 3, 1851. Thus, through the untiring efforts of Gen. Winfield Scott, was founded an institution for the benefit of Regular Army soldiers that for the past 85 years has been a living memorial to the wisdom and foresight of this great and beloved soldier.

More than 99 percent of the operation and maintenance costs of the home since 1851 have been derived from the pay of the enlisted men of the Regular Army; further, with the one exception of the $54,000 mentioned above, the funds disbursed for the support and maintenance of the home have never been taxpayers' money.

MANAGEMENT

In the organic act mentioned above the management of the home was vested in a board of commissioners composed of the principal officers of the United States Army. Though the composition of the board has been changed from time to time by legislative enactment, the basic idea of having the home administered by officers of the Regular Army has not changed in the least.

Today the board of commissioners is composed of high-ranking officers who have had long service.

Functioning under the board of commissioners is the governor of the home, who is assisted in the everyday running of the home by a deputy governor, secretary and treasurer, a chief surgeon, and a quartermaster. The governor and his assistants are retired officers of the Army.

INCOME

The act of March 3, 1851, provided funds for the initial establishment of the home and for its maintenance, as follows:

(a) Any unexpended balance of the appropriation of March 2, 1847, for the benefit of discharged soldiers disabled by wounds. Under this clause the sum of $54,136.03 was provided for the initial fund.

(b) The sum of $118,791.19 levied by the commanding general of the United States forces in Mexico.

(c) All stoppages of fines adjudged against soldiers by sentence of courts martial.

(d) All moneys, not exceeding two-thirds of the balance on hand, of the hospital and post funds of each military station. (This has been inoperative for many years.)

(e) All moneys belonging to the estates of deceased soldiers and unclaimed for 3 years.

(f) Twenty-five cents per month deducted from the pay of all soldiers of the Regular Army. This amount was reduced to 12½ cents per month in 1859 and in 1908 is was discontinued altogether.

(g) The income of the home today is derived from interest (3 percent) on money known as the Soldier's Home permanent fund (trust fund) deposited in the Treasury of the United States; stoppages and fines noted in (c) above; and the unclaimed estates of deceased soldiers of the Regular Army, noted in (e) above.

Other than the amounts noted in (a) and (b) above, there has never been a dollar appropriated by Congress for the Soldiers' Home. The soldiers of the Regular Army have provided the funds for the development and maintenance of the home, as indicated herein, i. e., contributions, fines and forfeitures, and unclaimed estates.

BENEFITS

The enlisted man of today may wonder why he is being required to contribute 25 cents a month to the trust fund of the home. The reason dates back to the soundness of General Scott's idea in establishing the home. General Scott loved his profession. Deeply implanted in his affection was the steadfast loyalty of the soldiers who shared with him the hardships of campaign and battle. He realized, as do the Regular officers of today, that all too often is the Regular soldier viewed by the man in the street as one paid to fight (which he is) in the defense of his country, and so, having fought a good fight, he is soon forgotten. The policy of the United States has ever been to depend on a small, highly trained Regular Army, augmented in times of national emergency by the National Guard, Reserves, volunteers, draftees, etc.

Those who become veterans of a national emergency become a political factor of such power that their services are remembered. Volunteer homes, veterans' facilities, pensions, etc., are established for their care. In the eyes of the people these things are but their due. After a long era of profound peace the expense to the taxpayer of these benefits will fade from the picture. But during this long period of peace the Regular Army is still in existence and in order that those who serve therein during this era of peace may be assured of care and comfort when disease, accident, or old age has rendered them unable to earn a livelihood, they have maintained, by their contributions a home to which they can go. It is their home in which they have bought an equity at little expense to themselves. They are not beholden to the taxpayers of the country. They themselves have insured their future comfort and security.

What will the enlisted man who has contributed to the home find there when, for one cause or another, he wishes to enter the home?

He will find awaiting him:

The handsomest home of its kind in the world located right in the heart of the National Capital, a dignified residence in which every good soldier may well swell his chest and be proud to call his home.

Clean, sanitary quarters with every convenience.

The best of food, excellently prepared and served in a spotless mess hall.

Neat, well-fitting clothing.

A cleaning and pressing establishment and laundry at his service.

Such amusements as the movies, radio, band concerts, a large well-equipped billiard and pool hall.

A fine library.

Beautiful grounds with well-kept roads and paths.

Hospitalization under a staff, expert and understanding. If tubercular, he will be sent to Fitzsimons General Hospital for care and treatment. If insane, he will be sent to St. Elizabeths for care and treatment. If he dies while in the home, he will be buried with full military honors.

There is no restriction on individual activities other than that necessary for the welfare of all.

Above all, he will be under the care of officers who have served long in the Regular Army and who know and understand the soldier.

The insignificant premium for such insured security must appear more than reasonable. Even though the enlisted man pays this for 30 years, he has but invested $90 for future comfort and independence that today costs the home $1.50 per day per member.

More than this, should the enlisted man the day after enlistment in the Regular Army be kicked by a mule or be otherwise so injured as to be incapable of earning his own livelihood, he has the right to enter the home because he has contributed to it, be it

only a fraction of the 25 cents. He will be cared for there until he is able to earn a livelihood. If the injury is such as to make him permanently incapable of earning a livelihood, the home is his so long as he desires to remain there, provided he conducts himself in a seemly manner.

As a prominent patriot often says, "Let us now take a look at the record." The original fund, as you have seen, consisted of $118,000 that General Scott had levied on the City of Mexico for the benefit of the Army, plus $54,000 of an appropriation for the benefit of disabled soldiers of the Mexican War. This sum, together with the income provided for in the organic act of 1851, was set up as a trust fund, known as the United States Soldiers' Home Permanent Fund, Trust Fund.

In the first 30 years there went into this fund, from all sources of income, the sum of $4,969,367.89. In the same period there was expended for the purchase of land, equipment, and maintenance of members the sum of $4,957,644.90, leaving a balance to the credit of the home of $11,722.99. The peak of the permanent fund was reached in 1923 when it was, in round numbers, $4,220,000. Since then the fund, due to the repeal of the 12 cents per month, has gradually decreased. From 1931 to March 31, 1936, receipts for the permanent fund amounted to $2,133,511. Withdrawals from the trust fund for the maintenance of the home during the same period amounted to $3,455,432, so that the average yearly decrease in the fund has been $264,384. The permanent fund on March 31, 1936, was $2,394,474.82. It is, therefore, easy to see how short a time this fine institution could continue to function with such adverse conditions prevailing. With the 25 cents a month now contributed by the enlisted personnel of the Regular Army to the permanent fund, and the possibility of some increase in one or more of the other sources of income, the permanent fund will again be on a sound basis and able to take care of increasing costs of maintenance due to the gradual increase in membership.

Can anyone conceive of a finer security insurance at such a low cost to the one benefited? There is probably no other such institution in existence, with the possible exception of the United States Naval Home in Philadelphia, Pa., which is maintained by the naval personnel.

The United States Soldiers' Home has been built and supported by money derived from the pay of enlisted men of the Regular Army. Congress makes no specific appropriation for its support out of public funds. The members of the home, feeling that it belongs to them, take pride in keeping it for themselves.

The management of the United States Soldiers' Home cordially invites the enlisted personnel of the Regular Army in and near Washington and any who may come to Washington to visit the home, that they may see what the home will mean to them personally, should they ever, through accident, disease, or old age, become incapable of earning a livelihood. They will never have to depend on the charity of relatives.

JUNE 9, 1936.

The EDITOR, THE ARMY AND NAVY JOURNAL,
1701 Connecticut Avenue NW., Washington, D. C.

SIR: The board of commissioners and the officers of the United States Soldiers' Home, who are entrusted by law with the management of the home, believing that the enlisted personnel of the Regular Army, your constant readers, would be much interested in learning through the medium of your valuable paper just what their monthly contributions to the fund of the home may mean to them personally, have had the enclosed article prepared.

The article has been carefully prepared from the records of the home, which date back to its establishment in 1851. In its 85 years of existence it has grown from an extremely modest beginning into an institution of which the enlisted personnel of the Regular Army may well be proud. This was made possible by General Scott's untiring efforts and by the steadfast adherence to his principle of having the Regular Army own and manage the home. For 85 years the basic principle in the management of the home has been "what is for the best interest of the soldier of the Regular Army."

You are at liberty to make such use of the article as you may deem best.

Sincerely,

J. P. WADE,
Colonel, United States Army, retired,
Secretary.

SPEAKER JOSEPH W. BYRNS

Mr. PARSONS. Mr. Speaker, no death in recent years, unless it be that of ex-President Coolidge, has caused such profound grief and sorrow as that of the sudden and unexpected death of the late Speaker of the House, the Honorable JOSEPH WELLINGTON BYRNS, of Tennessee.

Seemingly in good health, active in the performance of his duties, racing forward toward adjournment of the Seventy-fourth Congress, which he so successfully led, he laid down his gavel on the Speaker's stand at 5 o'clock, June 3, 1936, only to fall asleep into the arms of death at 12:15 the same night.

There is no necessity for me to try to recite the educational and legislative achievements of JOSEPH W. BYRNS. That splendid record is written for all time in the annals of the Congress of the United States.

When I was first a candidate for Congress he was chairman of the congressional committee and as such contributed much to my election. When I first came to Congress he was among the first to greet me, and he gave me the aid, advice, and assistance, which is so greatly appreciated by new Members. Perhaps no Member of this or any other Congress ever gave more time to counseling and training new Members than Speaker BYRNS. That is why he was so universally loved by his colleagues and associates.

I had the delightful pleasure and privilege in the Seventy-third Congress of trying in part to repay him for his services by aiding in his election as majority leader; and again in the Seventy-fourth Congress in pledging my support to him as Speaker of the House of Representatives.

Occupying the third highest position in the Government, JOSEPH W. BYRNS led a gallant and successful fight for the principles of his chief, the noble President of the United States, Franklin Delano Roosevelt. As majority leader in the Seventy-third Congress under his predecessor, the late Speaker Henry T. Rainey, he bore mutually with Speaker Rainey the great responsibilities of putting through Congress the largest collection of laws for social justice ever recorded in two Congresses in the history of the American Nation.

It is not too much to say that his labors in the Seventy-third and Seventy-fourth Congresses, together with the burdens he bore, are indirectly, if not directly, the cause of his sudden demise. Virtually he gave his life for his country as much as any soldier on the field of battle, because the scene of his last 4 years was a battlefield for human rights and liberty for the great masses of the common people. No greater love hath any man than that he lay down his life for his friends and country.

He left us when he had perhaps reached the peak of his ambition and the zenith of his power and glory. He had satisfied what Arnold has called "the highest earthly desire of the ripened mind, the desire of taking an active part in the great work of government." He had achieved standing, influence, and power not only from his colleagues in the House but from the whole American people. He had won what men call success because of the fine character and arduous labor placed into his work. Yet the joy of the race ends with the goal. Although we may get little consolation from reflecting upon the thousands of mortals who have paid the debt of nature, yet if we realize that death is as normal as nightly sleep, then perchance our own fears may be allayed and our grief softened for one who has been called before us. But if death be sleep, shall we awake? That is the tragic question of the ages? No orator, no scholar, no philosopher, no statesman has ever answered that question with logic supported by the cold facts, which we group under the name of science. Yet, all through the ages man has relied upon something within himself; call it instinct, intuition, soul, or whatever you will; it confirms his faith in a supreme power. From faith, the substance of things hoped for, the evidence of things not seen, springs the eternal confidence that if a man die he shall live again. Certainly there must be change, but into what shape we know not; but unbounded shall be our hope, supreme our faith, that somehow, somewhere, we shall live again. That was the faith and the hope and the courage of JOSEPH W. BYRNS.

He was the center of a happy family circle to whom we can only give sympathy and condolence. The bitter anguish of kindred, who loved the dead, cannot be assuaged by another's pity. Yet, if the burden of their sorrow can be lightened, even in small degree, by the knowledge that others, too, are grieving, my sincere hope is that these words may help toward that end. More confident, however, is our hope that when time, the healer, has dulled the agony of loss, and when memory becomes a solace and a pride, that these eulogies pronounced for our late Speaker will encourage the bereaved to let gratitude for a life outweigh grief for a death.

Though he has left us, may we with the poet say:

There is no death! What seems so is transition;
This life of mortal breath
Is but a suburb of the life elysian,
Whose portal we call death.

He has joined the ranks of other great Tennesseans; the intrepid soldier and statesman, Andrew Jackson; the leader during the Mexican War, James K. Polk; the conqueror, Samuel Houston; and the courageous Andrew Johnson. In his day and generation JOSEPH W. BYRNS contributed as much as they to American life and government. Honor and peace to his memory.

DEMOCRATS OPPOSE AND REPUBLICANS FAVOR ANTILYNCHING LAW

Mr. WOLVERTON. Mr. Speaker, with the closing of this session of Congress tonight there will be recorded a failure to enact an antilynching law.

It is deplorable that all the earnest and sincere effort that has been made to procure the passage of such legislation at this session of Congress is now doomed for failure. Indeed, it seems almost unbelievable that this legislation, which seeks to protect our colored citizenship from the outrages of mob violence and provide to them that measure of justice guaranteed to all citizens by the Constitution, should not even be permitted to come before Congress for consideration and a vote. To some it might seem that such a thing could not happen in America, with its boasted representative form of government, yet that is what has happened during the present session of Congress, and for this unfair and un-American treatment of our colored citizens the Democratic Party is solely responsible.

DEMOCRATIC CONTROL OF CONGRESS

Since March 4, 1933, there has been a Democratic President in the White House, and both Houses of Congress have been under the complete control of the Democratic Party. The overwhelming majority of Democrats in both Senate and House made it possible for the Democratic Party to do anything and everything it wished to do. It could have passed antilynching legislation if it had desired to do so.

The power of the Democratic Party to pass such legislation is clearly evidenced by the fact that in the present House of Representatives there are 315 Democrats and only 103 Republicans.

In the Senate there are 70 Democrats and only 23 Republicans. The Judiciary Committee of the House, to which was referred the proposed antilynching laws, consists of 18 Democrats and only 7 Republicans. These Democratic majorities in Senate, House, and committee leave no doubt that there could have been enacted antilynching legislation, if the Democratic Party had desired to do so. They had the votes and the strength to pass it, but they refused to do so. They turned a deaf ear to the thousands of appeals addressed to Congress by individuals, groups, and organizations, both white and colored, who were interested in the passage of antilynching legislation.

DEMOCRATS PREVENT CONSIDERATION OF ANTILYNCHING BILL

Furthermore, the determination of the Democratic Party to prevent not only the passage but even the consideration of such legislation on the floor of the House is clearly demonstrated by the refusal of Democratic leaders to recognize, by any action upon their part, the petition signed by 218 Members, more than a majority of the entire House, that the committee be discharged from further consideration of the proposed bill and the House thereby be permitted to vote upon its enactment.

If the Democratic Party is such a good friend of the colored people as it is now striving to have them believe, why has it buried all antilynching legislation in committee? Why has it not permitted the bill to come before Congress? Why has it not been willing to let the Members of Congress vote for its adoption? The answer is plain. The Democratic Party is not now and never has been in favor of the adoption of antilynching legislation.

REPUBLICANS SUPPORT ANTILYNCHING BILL

The antagonistic attitude of the Democratic Party as well as the friendly attitude of the Republican Party toward such legislation was demonstrated the last time such a bill was before Congress. At that time, on recommendation of a Republican President, it passed the House. There were 221 Republicans who voted for it and only 8 out of the 115 Democrats did so. The legislation was killed by the Democratic Members of the Senate. And when the Costigan-Wagner antilynching bill came up in the Senate at the last session of Congress, it was defeated by a filibuster conducted by Democratic Members.

In face of facts that demonstrate the need for antilynching legislation, it is difficult to understand how any political party can feel justified in refusing to give full-hearted support to its enactment or treat it with such evident disrespect as characterized the action of the Democratic administration during this session of Congress.

NEED FOR ANTILYNCHING LEGISLATION

Testimony and records submitted in committee hearings showed that from 1889 to 1935 there were over 3,000 lynchings in 13 Democratic States, as follows:

Georgia	458
Mississippi	455
Texas	373
Alabama	340
Louisiana	249
Florida	242
Arkansas	242
Tennessee	209
Kentucky	174
South Carolina	140
Oklahoma	107
Missouri	92
North Carolina	90

And from 1882 to the present there have been 582 lynchings in the State of Mississippi alone. It is stated that more than 100 of those lynched were women. And, according to statistics submitted, less than one out of every six lynched was charged with rape or attempted rape. Hundreds were charged with only trivial offenses and many cases innocent of any offense at all. Justice is but a mockery when it is realized that although there were more than 3,000 lynched between 1889 and 1935, only in about 12 cases were there any apprehension and conviction of the perpetrators, and they were given only slight sentences.

In view of this unpleasant record of atrocious treatment of helpless colored citizens and the failure of justice in such cases to be either adequate or effective in granting them protection or providing compensation to their families, it is not strange that the Judiciary Committee of the Senate, in making its report on the Wagner-Costigan antilynching bill, stated:

> A continuation of the practice of lynching, coupled with a complete failure of the government of those States involved to apprehend and punish the participators of these crimes, supports the need for Federal legislation.

NATIONAL ASSOCIATION FOR ADVANCEMENT OF COLORED PEOPLE APPEAL TO PRESIDENT

The National Association for the Advancement of Colored People, in strong, clear, and forceful language, on May 7, 1936, made its appeal to President Roosevelt in the following message:

> At Colbert, Ga., on April 28, and at Lepanto, Ark., April 29, occurred the seventy-first and seventy-second authenticated lynchings since you took office on March 4, 1933. These killings by mobs have occurred at an average of one every 15½ days since you have been the Chief Executive of this Nation. * * * Since January 1934 the Government has had it within its power to pass a Federal antilynching law, but thus far the Costigan-Wagner bill has been sidetracked while unchecked mobs stage grisly parades every fortnight.
>
> The National Association for the Advancement of Colored People, together with more than 40,000,000 persons who have endorsed this legislation, urgently request your administration to bring this legislation to the floor of both Houses so that it may be considered upon its merits.

Notwithstanding the fact that the records show that about every 15½ days since President Roosevelt and the Democratic Party have been in complete control of our Government, there has been a lynching, and that in more than 95 percent of these cases the lynchings have occurred in Democratic-controlled States, yet no action has been taken either by the President or Democratic leaders in Congress to bring before Congress any one of the numerous antilynching bills that have been introduced to provide protection and relief to our colored citizens in States where justice fails.

PRESIDENT TAKES NO ACTION TO FORCE PASSAGE OF ANTILYNCHING LAW

Since March 4, 1933, the President has held such complete domination of the Democratic Congress that he could obtain passage of any and all legislation in which he was interested. He had merely to make known his wishes to Democratic leaders and they in turn would start the legislative wheels and grind out the desired legislation. So complete was the Presidential control of Congress that from time to time the President felt free to issue lists of what he termed "must" legislation. These lists were just what the name indicates—legislation that the President said "must" be passed. The Democratic Congress has never failed to respond. Every such demand has been complied with.

I have mentioned these conditions and made reference to legislative "must" lists prepared by the President in order to make plain that if antilynching legislation had been placed upon such "must" lists it likewise would have been passed. The failure of the President and Democratic leaders in Congress to place it upon any such "must" list indicates a complete lack of interest in or desire to have any antilynching legislation passed by Congress, and the statements made concerning it by Democratic leaders leave no doubt of an actual opposition upon their part to the passage of any such legislation. Under Democratic leadership this just and fair legislation seeking to right a great wrong to our colored citizens was placed upon a "must not" list instead of a "must" list, where it should have been.

The President had no difficulty in having a subservient Democratic Congress pass "must" legislation to control the growing of potatoes, peanuts, and rice, and to plow up wheat, corn, cotton, and tobacco, and to kill pigs. All of this was done, notwithstanding the violation of constitutional principles. Yet when antilynching legislation was sought to control mobs, protect the rights of colored citizens, and stop unlawful killings, the same Democratic leadership claimed the existence of constitutional provisions against such legislation. Their action indicates they are more interested in peanuts, potatoes, tobacco, cotton, rice, wheat, corn, and pigs than they are in human beings who suffer from the ravages of mob violence.

And, notwithstanding this record of unfaithfulness to our colored citizens, the Democratic Party by numerous methods of propaganda, publicity, and through the oratory of its speakers is seeking to impress them with its solicitude for their welfare. To make its appeal more effective it is making every endeavor to withhold from sight the true facts of Democratic opposition to antilynching legislation.

REPUBLICANS FIGHT FOR PASSAGE OF ANTILYNCHING BILL

In the face of this Democratic opposition the Republican Party in Congress has sought by every conceivable means to procure favorable consideration of the Wagner-Costigan antilynching bill or any other measure that would accomplish the same purpose. Republican members of the House Judiciary Committee have tirelessly striven to get the measure reported to the floor of the House for action, but the overwhelming Democratic majority of the committee has prevented. With other Republican Members of the House I have signed the petition to discharge the committee from further consideration of the bill so that the membership of the House might act upon the same, but without success. The truth is that the Democratic Party is opposed to the adoption of any such legislation and will not let it come before the House for consideration.

In conclusion, I wish to give assurance that the discouragements of the past will not preclude my continuing interest in the enactment of adequate and effective antilynching legislation, and I shall continue my endeavors until full justice has been done and protection provided for our colored citizenship in their constitutional right of life, liberty, and the pursuit of happiness.

DEADLOCKING A PRESIDENTIAL ELECTION

Mr. LEA of California. Mr. Speaker, under leave to extend my remarks in the RECORD, I include a radio address I will deliver June 29, 1936, as follows:

Mr. Farley declares President Roosevelt will be returned to office by the same overwhelming vote as in 1932. Mr. Hamilton, chairman of the Republican committee, declares Mr. Landon will carry 42 of the 48 States. According to Mr. LEMKE, the candidate of the newly born Union Party, he will have so many votes that neither of the old parties will have a majority, there will be a deadlock in the electoral college, and the election of the President will be thrown into the House of Representatives.

As we cannot believe all these predictions, we are left to our own judgment.

The electoral-college system provides a crude method of counting votes, where only two candidates are in the field. Even then it is capable of tricky results.

With two strong parties in the field, a third party of sizeable strength cannot appear without creating a doubt as to whether or not the election will be by the votes of the people, or result in a deadlock to be settled by election of the President in the House of Representatives.

So far, the American field of politics has never developed a congenial climate for the endurance of third parties. They have flourished for their brief hour and declined as rapidly as they ascended.

In 1800, 1824, and 1876 the Presidential electors were, under the Constitution, unable to decide the election. In the first two instances the election was in the House of Representatives; in the latter instance a specially appointed electoral commission determined the result.

The provisions for the election of the President are among the most important sections of the Constitution. They are generally known, but little understood.

Why an electoral college? How does it provide for breaking deadlocks?

With difficulty the constitutional fathers decided upon the method of selecting the President. At that time there were no political parties as we now know them. The electoral college was designed for a nonpartisan government. It had two main purposes. One was to place the selection of the President in a small group of wise, experienced men, each of whom was to use his own discretion in voting for the best man possible for President.

When it was suggested the people should elect the President one of the delegates in the Constitutional Convention declared the people were no better qualified for that serious duty than a committee of blind men would be to select colors. That did not fully represent, however, the viewpoint of the constitutional fathers.

The other important reason for selecting the President through Presidential electors instead of by direct vote was to preserve to each State its relative strength in exercising the powers of the Federal Government. Each Colony was jealous of surrendering its individual powers to be swallowed up in the greater organization of the Federal Government. To assure each State a permanent part in the Federal Government according to its importance it was provided that each State should be represented in the lower House of Congress by Representatives in proportion to its population. To placate the distrust of the small States it was provided that in the upper House of Congress each State should have equal representation with every other State, each State to have two Senators.

This same distribution of power to the States was provided in selecting Presidential electors.

Opposition was made to electing the President by direct vote, because such a system of election would furnish no guaranty to the States of the preservation of their relative strength. The qualification of voters was left to each State. It was recognized that the proportionate number of people who would vote would greatly vary in the different States. In elections in recent years the number of people per hundred who vote in different States has varied from 10 or 15 up to 43.

Thus, the relative strength of the States in proportion to population could not be preserved by a Nation-wide vote regardless of State lines. The vote of the individual voter was not a common unit to measure the rights of the States in a national election. The electoral votes, granted uniformly to the States and mainly in proportion to population, furnished the common voting unit the States accepted as a means of preserving their just proportion of power in the Federal Government.

After the Federal Government started to function under the leadership of Hamilton on one side and Jefferson on the other, political parties rapidly developed. Those parties had defined purposes and knew what kind of a President they wanted. The people no longer wanted Presidential electors to use an independent judgment in selecting a President. The people wanted to use their own judgment. So beginning with the third Presidential election, and completing the change in the fourth Presidential election of 1800, delegates were selected to vote for party candidates, and pledged to that purpose in advance.

The discretionary power of the electors was taken away. Thus, one of the two original purposes of the electoral-college system ceased to exist.

Another important transformation of the system began and was completely consummated about 1832, except for unimportant exceptions. Many electors were originally selected by districts. This method frequently resulted in a division of the State electoral votes among different party candidates.

For years there was a struggle for and against minority representation in the State vote for President. Suppression of minority representation finally prevailed. Party interest was placed above public interest. Votes cast for minority party candidates are not only not counted for the minority, so far as electoral votes are concerned, but are actually counted for their opponents. The State unit vote still stands as a monument to the suppression of minority representation in the election of Presidents.

Presidential electors are selected on a plurality vote; that is, the set of candidates receiving the highest vote in the State is elected regardless of whether or not that vote be a majority.

Novel results frequently happen from this rule. In 1912 Mr. Wilson, with only 42 percent of the popular vote, received 82 percent of the electoral votes.

Suppose two candidates are running for President. The electors representing one candidate receive a majority of 5,000 in the State of New York, with its 4,500,000 voters, and the electors representing the opposing candidate receive a 5,000 majority in the State of Nevada, with its 3 electoral votes. Thus the total vote for the two candidates would be exactly equal in those two States, but in the electoral college the man who carried New York would have 47 electoral votes and the other candidate who carried Nevada would have 3. Although over 2,000,000 voters in New York voted for the minority candidate, he would receive no electoral votes whatever from New York.

In each of the last two Presidential elections over 38 percent of all the popular votes for President, representing probably 15,000,000 people, had no representation whatever in the electoral college.

Though no majority is required to elect an elector, the Constitution requires a majority of the electors to elect the President. If no candidate receives a majority, the election is thrown into the House of Representatives.

If Mr. LEMKE receives a sufficient number of electoral votes to prevent either Mr. Roosevelt or Mr. Landon from receiving a majority of all the electoral votes, the election will be decided in the House of Representatives.

The House is thus selected as a means of breaking a deadlock in the electoral college. The method of selection in the House is crude and archaic. Each State has but one vote. A majority is necessary to elect. New York, with 13,000,000 people, has no more votes than a State with 400,000. The majority of the Representatives from each State determine how the vote of that State shall be cast. If there is a tie vote, the State has no vote. Thus it might easily happen that the party which carried the country by a very substantial plurality would have only a minority of the votes in the House of Representatives and be unable to elect its candidate.

Under the "lame duck" amendment, the newly elected Congress would select the President. Where there are three candidates for President, all of whom have carried some States, it may well follow that the same division that made it impossible for any one party to get a majority in the electoral college will make such majority impossible in the House.

Then, in all probability, at least three parties will be represented in the membership of the House and no party may have a clear majority. Members from one party must vote for the candidate of another party if a President is to be selected. The practical results that follow from such a situation have been established by former elections in the House. Patriotic fidelity may prevail. The contest may resolve itself into a political auction, with each party bidding for sufficient votes from one of the other two parties to secure the election of its President. That means wire pulling, underground trafficking, and scandal, with the resulting reflection upon the title of the succeeding President, who becomes a beneficiary of the questionable method by which his selection was secured.

The whole electoral-college system, with its method of settling deadlocks is crude, antiquated, and unworthy of an intelligent, progressive people.

When the discretionary power to select the President was taken away from the Presidential elector there was no longer any reason for his existence. His position should have been abolished. The other great purpose of the electoral-college system, to preserve the relative strength of the State, could be preserved by retaining electoral votes without Presidential electors. Those votes should be divided between the candidates in direct proportion to their popular vote in the State. Thus we would still preserve the electoral vote as the common voting unit for all the States. Popular will would be justly reflected in electing a President.

The plurality vote should determine the election. A method that requires the settlement of a deadlock, through political trading and trafficking and scandal, in order to secure a majority vote, is far less desirable than a clean-cut plurality selection of the President. Thus we could abolish elections in the House of Representatives. We could assure the election of a President by a method that is just and certain in its results.

For 8 years I have been advocating this reform in our electoral system. Twice a committee of the House has reported unanimously in favor of this method.

At times in the past, when these deadlocks have occurred, the country was aflame with partisan feeling to such an extent that reform of our electoral system was impossible. Then when the bitterness had ceased there was a lack of general interest necessary to accomplish such reform. Ordinarily we get by under the present system. We see no immediate alarm. We have proceeded much like the man who could not build his roof when it was raining, and who did not need it when it was not raining. In the next few years, while our country is free from these bitter controversies of the past, we should consider, debate, and supplant our archaic system of electing a President by one that is just, honest, and certain in its operation.

THE STATE OF THE COUNTRY

Mr. MITCHELL of Illinois. Mr. Speaker, under leave to extend my remarks in the RECORD, I include an address to be delivered by me before the Democratic national convention, in Philadelphia, Pa., June 25, 1936, on the state of the country:

Mr. Chairman and fellow Americans, it is my conception that the party which we represent here today was not founded for a single mission, which accomplished left it drifting with no fixed star or principle to guide it. It was born and has lived to uphold great fundamental truths of government that need always to be lifted and enforced.

This administration came into power with the distinct understanding that the forgotten man should be remembered, and that the Government should function not only for the rich and powerful but for the hungry and helpless. It was dedicated to the task of helping the underprivileged, in which group millions of American citizens find themselves today.

No thinking American was surprised a few years ago when a former Republican Vice President went to a Republican President and from the coffers of our Treasury received a so-called loan of $90,000,000 for what was said to have been a defunct bank. This is the way the Republican Party does things. That party always lends a listening, attentive, and sympathetic ear to the cries and requests of the rich and the privileged. Not so with the Democratic Party. It is the party of the common people and stands for a square deal for all the people.

One of the most startling events in the recent political life of this Nation was a humble happening in the Delta of the Mississippi shortly after this administration came into power. Sylvester Harris, a Negro farmer living near Columbus, Miss., in some way heard that this was a humanitarian administration which had as a part of its program the lending of money to distressed home owners. This poor Negro, unlettered, dressed in overalls, sold a cow from his farm, and with the price of the cow called President Franklin Roosevelt at the White House, and said to him: "I am about to lose my farm through the foreclosure of a mortgage. I have no money with which to pay the mortgage. I understand that this Government through you will help people in my condition. Will you not help me?" Within less than 30 days money with which to pay this mortgage had been provided through the activities of this party and this man was once more a happy farmer, a happy and contented husband and father—a satisfied and progressive American citizen, realizing in his heart that under the Democratic Party this is a Government that reaches down and helps the forgotten man, the underprivileged citizens, be they white or black.

This is but one of millions of incidents where the Government, through the Democratic Party, has reached out a helping hand and saved deserving but helpless families. When has this Government been so close to the common people as it is at this very hour? You will be interested to know that while Harris has kept faith with the Government and met his payments, Mr. Dawes has defaulted and suit has been filed against him by the Government.

There is no doubt in my mind but that under this administration my group has been given the largest opportunity to share in the benefits and protection of the Government that has come to it for four decades. The Democratic Party as constituted today has said to the Negro, through the conduct of its program and through the action of our great President, "That any American, whether white, black, yellow, or brown, who is good enough to fight and die for his country should be given the largest and fullest opportunity to work and live for his country, and no privilege or opportunity vouchsafed to American citizens by the Constitution should be denied him."

There was a time when the late Frederick Douglas said: "That insofar as the Negro was concerned the Republican Party was the ship and all else the sea." That might have been true in his day, but certainly it is not true today. The Republican Party may be the ship, but I say to you the ship is on fire and, like the *Morro Castle*, is burning to the water's edge. The safety of my people consists in taking a life belt and plunging into the sea. By so doing, there is hope through the rescue agencies of the Democratic Party.

The so-called generous attitude of the Republican Party toward the Negro ended 30 years ago. The Grand Old Party long since deviated from its ancient doctrine of human rights in quest of material prosperity. It grew cold and indifferent toward its black ward and beneficiary and insisted upon weaning him. In the meantime the Democratic Party has been gradually growing not only less hostile but more friendly and considerate toward my group.

Mr. Chairman and fellow citizens, these 12,000,000 of struggling Negroes in this country have not forgotten the economic conditions in which the Democratic Party found them in 1933 after having witnessed the Hoover prosperity in which we had neither chicken nor pot. For 3 long tragic years we heard the voice of a Republican President reflecting the sentiment of his party, telling us that prosperity was just around the corner. We discovered to our everlasting disappointment that prosperity was around the corner, but was going the other way. We know who saved the day. We know how our great President threw himself and the Government between the American people and actual starvation. At his inauguration he said that he would see that no American citizen starved; that promise has been kept, and instead of being a nation of starving, disgruntled, and dissatisfied people, ready to get at each other's throats, we are fast becoming a nation of contented and employed people, working for the advancement of our country. You ask me, now that the crisis is virtually past, what will be the attitude of my people in the coming election? I answer in

these words: "The Negro of America is a grateful people. We never have and we never will bite the hand that helps us."

Out of the turmoil of deliberate misrepresentation and vicious, cruel, and unwarranted attacks, will more than 30,000,000 grateful Americans march on the 3d day of November to say to the greatest President who has lived, that "We are with you, and by the grace of God, you shall serve us another term." Among these millions of grateful voters, you will see more than 3,000,000 of colored American voters marching breast to breast with you to the great victory that awaits the faithful and the true.

We shall stand with you in this matter as Crispus Attucks stood with the little group on State Street in Boston in pre-Revolutionary days. We shall stand as that valiant group of Negro soldiers stood with General Jackson in the Battle of New Orleans. We shall stand as the Negro soldiers stood with Theodore Roosevelt in his famous charge on San Juan Hill. We shall stand as the Negro soldiers stood side by side with you in the World War and faced the German cannon in Argonne Forest. History shows that we have always stood by our friends. We will not fail them now.

The name of Franklin Delano Roosevelt is indelibly stamped upon the mind and heart of every Negro in this country. We look upon him as our greatest friend and benefactor. Our final word: "Mr. President, we are with you all the way."

WASTED WATERS

Mr. O'MALLEY. Mr. Speaker, it is my desire at this time to very briefly discuss H. R. 12678, a bill to provide for the control of flood waters in the Wisconsin Valley and for the irrigation of arid and semirarid lands, to create a Wisconsin Valley Authority. This bill also provides for the sale of surplus power on the aforementioned projects.

Keeping in mind the decision of the Supreme Court of the United States in relation to the Tennessee Valley Authority in drafting this bill, it has been my purpose by the introduction of this legislation to make a beginning in the direction of utilization of the vast water-power resources of Wisconsin so as to bring to the people of my State and my city the benefits and advantages of cheap electrical rates. These great benefits are now being enjoyed, and will be enjoyed in the future, by the populace of other sections of the country where the development of natural resources has begun so auspiciously under the Democratic administration.

The power question and the development of natural resources for power purposes is unquestionably one of the greatest issues with which the American people have to deal during the next 25 or 50 years. It is a question that touches every business, every home, and every walk of life. From the beginning of the discovery of the principle of electricity, selfish and greedy groups of men have attempted to sequester and control the great natural resources of water used to develop hydroelectric power. In many States these great natural resources have been lost to the people for perhaps all time to come. In Wisconsin we have been fortunate in that we have not frittered away our inheritance as lavishly as have the people of other States, yet we constantly face the danger of losing all control of the vast water power available for the public benefit.

It has been ascertained that there is enough hydroelectric power now being wasted in the navigable streams of the Nation that, if properly harnessed, could be used to turn all the wheels of industry, light all the homes and halls, factories and mills, wash all the clothes, heat all the water used in America. In Wisconsin one of our greatest sources of wealth, with the exception of the soil, which gives sustenance to our fine herds of dairy cattle, and the factories, which produce a myriad selection of products for sale to all the world, is a vast supply of flowing water which can be turned to the generation of power.

Those who are familiar with the tremendous development at Muscle Shoals can realize, without the need of any descriptive powers of mine, the inherent power possibilities of the great Wisconsin Valley. The amount of hydroelectric power that can be produced at Muscle Shoals now is equal to the combined strength of all the slaves freed by the Civil War. It is safe to say that untold amounts of power can be generated along the lengthy reaches of the fast-flowing Wisconsin.

While some still hold to the theory that our streams should be private property, used only by private interests for private gain, I have maintained always that natural resources, made profitable only by the nearness of consumers to purchase the output, make these resources primarily public property. These great resources constitute a national wealth which should and must be developed solely for the benefit of our citizens.

As instances of what the development of Wisconsin's vast water power would mean to the people and to the industry of our State, I quote here some comparisons between what is now being paid by people in various cities of America for power consumption and what is possible through the development of natural resources as exemplified by the Tennessee Valley Authority.

When the Muscle Shoals bill was passed, the first 100 kilowatt-hours in Columbia, S. C., had been costing consumers $8. Under the Tennessee Valley Authority contract the same number of hours will now cost $2.50. The average annual consumption of electric power for domestic use in the Dominion of Canada, where power is supplied by publicly owned plants, is 4,321 kilowatt-hours, in comparison to only 603 kilowatt-hours in the United States. If we use 4,000 kilowatt-hours per month of electrical energy for domestic use in Quebec or Ontario as a basis for our comparisons, we would find this energy cost approximately $30 to the citizens of Canada. These 4,000 kilowatt-hours per month in the United States, costing so little in Canada but so much here, cost the consumers of Bisbee, Ariz., $164.40. In Fort Smith, Ark., $290; in Denver, Colo., $260; in Wilmington, Del., $249.63; in Miami, Fla., $281.90; in Boise, Idaho, $162.30; in Quincy, Ill., $240.85; in Winona, Minn., $124.20; in Scottsbluff, Nebr., $244.38. These figures were compiled by the National Electric Light Association in 1931.

To give the citizen of the rural districts an opportunity of comparing what his costs to operate his farm would be under the development of public power in Wisconsin, I include herewith a table of estimated monthly cost to farmers for certain items of electrical service in the Tennessee Valley area. Most people who live in country districts know the drudgery of country life. Rural electrification promises to be the greatest blessing that the women of the country have ever known. Not only will it give them lights and bring to them the marvels of the radio, but it supplies power for the iron and the churn, the washing machine, cream separator, the vacuum cleaner, and all the other conveniences that too few farm women in our State have known. The following schedule briefly shows what the use of the various equipment adds to the farmer's light and power bill under the yardstick for power costs established by the Tennessee Valley Authority:

Estimated monthly cost to farmers of following items of electrical service (Tennessee Valley Authority)

Item no.	Monthly bill	Service and appliance used
1	$0.75	Lights.
2	1.00	Lights and radio.
3	1.50	Lights, radio, and water pump.
4	2.00	Lights, radio, water pump, electric iron, and percolator.
5	2.50	Lights, radio, water pump, electric iron, percolator, and washing machine.
6	3.00	Lights, radio, water pump, electric iron, percolator, washing machine, toaster, waffle iron, vacuum cleaner, food mixer, and fans.
7	3.50	Lights, radio, water pump, electric iron, percolator, washing machine, toaster, waffle iron, vacuum cleaner, food mixer, fans, and refrigerator.
8	5.00	Lights, radio, water pump, electric iron, percolator, washing machine, toaster, waffle iron, vacuum cleaner, food mixer, fans, refrigerator, and electric range.
9	6.50	Lights, radio, water pump, electric iron, percolator, washing machine, toaster, waffle iron, vacuum cleaner, food mixer, fans, refrigerator, electric range, and electric water heater.
10	8.00	Lights, radio, water pump, electric iron, percolator, washing machine, toaster, waffle iron, vacuum cleaner, food mixer, fans, refrigerator, electric range, electric water heater and operation of small farm motor for sawing wood, running feed mill, ensilage cutter, and miscellaneous small power requirements.
11	10.00	Lights, radio, water pump, electric iron, percolator, washing machine, toaster, waffle iron, vacuum cleaner, food mixer, fans, refrigerator, electric range, electric water heater, operation of small farm motor for sawing wood, running feed mill, ensilage cutter, and miscellaneous small power requirements, and light and power for 30-cow dairy.

For those in the city, and particularly in the great metropolitan areas which could easily and most economically be served by the surplus power that could be generated from the wasted waters of Wisconsin, I submit a table showing the domestic rates of the net monthly bills for typical residential

consumers. In the city of Milwaukee alone the savings possible in the use of 40 kilowatt-hours of energy, as compared with Toronto, show a saving of more than 100 percent for lighting and simple appliances and on 100 hours for refrigeration a saving of over 200 percent. These tables indicate the tremendous possibilities for comfort, convenience, and happiness made available by lower electric rates through the development of public power.

TABLE 2.—*Domestic rates—Net monthly bills for typical residential customer*

City and State	Population	Company	(1) Lighting and small appliances			(2) No. 1 plus refrigeration		(3) No. 2 plus cooking	(4) No. 3 plus water heating	(5) No. 4 plus extra use		Average monthly domestic consumption
			15 kilowatt-hours	25 kilowatt-hours	40 kilowatt-hours	100 kilowatt-hours	150 kilowatt-hours	250 kilowatt-hours	500 kilowatt-hours	750 kilowatt-hours	1,000 kilowatt-hours	
Atlanta, Ga	270,000	Georgia Power Co	$1.00	$1.45	$2.12	$3.95	$4.95	$6.57	$8.57	$11.36	$13.92	73
Boston, Mass	781,000	Edison Electric Illuminating Co	1.05	1.65	2.40	5.20	6.70	9.70	12.70	18.70	23.70	52

Business and the manufacturers are as interested and as much in need of efficient public power development as any other group; and to indicate the possibilities of savings which a planned and careful development of the water-power resources of our State would make possible, I include herewith a table recently compiled on commercial rates, showing net bill costs and monthly commercial consumption for various cities both in the United States and Canada. The Canadian figures indicate the lower cost of public power development.

TABLE 3.—*Table of monthly commercial rates—Net bills for billing demands and monthly commercial consumptions*

City and State	0.75 kilowatt			3 kilowatts		6 kilowatts	12 kilowatts
	25 kilowatt-hours per month	50 kilowatt-hours per month	75 kilowatt-hours per month	150 kilowatt-hours per month	375 kilowatt-hours per month	750 kilowatt-hours per month	1,500 kilowatt-hours per month
Atlanta, Ga	$1.63	$3.15	$4.65	$9.14	$20.88	$39.61	$72.08
Boston, Mass	1.88	3.75	5.63	11.25	28.13	53.75	102.50
Brooklyn, N. Y	1.90	3.40	4.65	11.40	22.65	44.40	87.90

Cheap electricity is the greatest boon that modern science can bring to the women and the families of America. It transforms the mother and the wife from a land and a life of drudgery to a land and life of freedom and development. It makes possible the enjoyment of those too few leisure hours of life to which the women of rural and urban America are so richly entitled.

Cheap electricity makes the difference between a State of few manufacturers and few opportunities of employment and a State humming with the wheels of industry and offering employment and opportunity to present and future generations. In the West and in the South, where power projects are under construction, new factories, new industries, new opportunities for employment are daily, weekly, and monthly on the increase. Cheap electricity not only benefits every farmer and industrial worker but adds billions to our national wealth from resources now running waste to the sea. Cheap electricity will make America the richest, the most contented, the most powerful, and the most prosperous nation in the world.

In drafting H. R. 12678, with the aid and assistance of those leaders in the House and the Senate who have done much to embark America on the beneficial development of our natural resources, I have kept in mind the principle that these natural resources can be developed and that the wasted waters of our rivers can be harnessed without destroying a single penny of the capital of private investors or working any hardships upon any of our citizens in any walk or occupation of life. While H. R. 12678 provides for the thorough and planned development of the Wisconsin Valley, the harnessing of surplus waters and control of flood waters, it also provides that power incidentally generated shall be sold to those distributing companies, whether private or municipally owned, that will and can agree to provisions which limit the resale of such power to the consumer at prices providing for not more than is necessary to return a fair and equitable profit upon invested capital.

The introduction of this measure is the only possible manner by which a thorough study and survey of the power possibilities of the Wisconsin River can be inaugurated by the War Department for report to the Congress. I am advised that this survey has begun and that reports of its progress and findings will be made to the Congress. While the survey, beginning, and development of a project with such vast possibilities of prosperity and advantages for our people is not a matter of days or weeks but of months and perhaps years, I feel that by a proper beginning we have taken the first step toward progress in Wisconsin. Perhaps the task will be long and arduous. Unquestionably the opposition will be the same that has come from special privilege and special interests every time the people themselves have desired to improve their conditions through their own efforts.

While once many of us frowned upon public ownership of power resources, the vast majority have been convinced that we never can get power to the farm and city residents of this country at rates they should pay through private enterprise, but that it must come through public enterprise, or at least the public must own the power-production facilities. Propaganda, floods of money, misrepresentation, and opposition face the friends of any project designed to develop Wisconsin water power for this generation and the generations to come. Truth, fact, and right, however, have always survived such attacks and prosper despite criticism and calumny. In closing I want to impress one vital fact upon you: A great wealth of power is at the command of the people of our State in the Wisconsin Valley. It should and must be used for the benefit of the people. If used properly and in the public interest, every home, every factory in the State and the surrounding States can be electrified, and our people can enjoy the advantages of appliances and facilities that scientific developments of this great modern age have made possible.

Let us electrify Wisconsin and those surrounding areas through the development of our great power resources. When we have done that, we will have added one more glorious chapter to the history of a great country and a great State. We will have provided for the common good and promoted the general welfare. We will have laid the foundation for the building of a new civilization, prevented the destruction and economic losses of floods and droughts, and we will have brought to a great State a magnificent development that the ages cannot impair and time only add to in value.

TABLE NO. 1.—*Typical monthly bills—Residential service*

[Domestic and residential light and power rates in effect on Jan. 1, 1935, in cities of 50,000 population and over. These tables are taken from the preliminary report of the electric-rates survey made by the Federal Power Commission. In the column designed "Control" it is specified opposite the name of each company whether it is (I) independent, (S) subsidiary of a holding company, (M) municipally owned and operated]

CITIES OF 100,000 POPULATION AND OVER IN UNITED STATES

Name of community	Population, 1930 census[1]	Service supplied by—			Lighting and small appliances					Lighting, small appliances, and refrigeration		Lighting, etc., and cooking	Lighting etc., cooking and water heating	Average cost (cents per kilowatt-hours)			
					Minimum bill

AGRICULTURE LEADS THE WAY TO PROSPERITY

Mr. PARSONS. Mr. Speaker, since the Republican convention held at Cleveland, Ohio, has declared for the repeal of all of the laws benefiting agriculture, I think something should be said with reference to the benefits derived from the legislation passed by this and the last Congresses for the benefit of the agricultural industry of America, and especially for Illinois.

When the present administration took office on March 4, 1933, the prices of most farm commodities sold directly by the farmers were the lowest in the history of this country. The buying power of the farmers was destroyed because of such pauperous prices. They were heavily in debt, and their earnings from their farms in many instances were not sufficient to even pay the interest on their loans, not to mention principal.

In a few short months after the inauguration of President Roosevelt and the passage through Congress of beneficial agricultural legislation, solvency was restored to the American farmers. There has never been a time in the history of this country, not even during the World War, that agricultural commodity prices rose as rapidly as they did in the spring and summer of 1933; and those prices have been maintained on a stabilized basis down to the present day.

The policy of this administration is not a policy of scarcity; it is a policy of economic production at a profit to the farmers, just as much as economic production in industry supplies the needs of consumption. No Member of this Congress in either House or Senate, no Cabinet officer or any officer under him in the executive branch of the Government, have ever advocated a policy or system of scarcity. They advocate a policy of economic production to supply the needs of consumption at a profit to the farmers. I take pleasure, therefore, Mr. Speaker, in showing what has been done for the farmers of Illinois during the past 3 years; and what is true of Illinois is true of every State in the Nation.

AGRICULTURAL IMPROVEMENT IN ILLINOIS

The agricultural improvement situation in Illinois for the years 1932 to 1935, inclusive, shows that the cash receipts from the sale of principal farm products in Illinois rose from $228,661,000 in 1932 to $363,476,000 in 1935, including $34,009,000 in rental and benefit payments. This is an increase of 59 percent. Cash receipts for Illinois represent approximately 95 percent of the total farm cash income from production.

Mr. Speaker, the price changes on certain selected commodities, which brought about a considerable share of the increased cash receipts indicated above, are shown in a table prepared by the Department of Agriculture, which reads as follows:

Average prices received by Illinois farmers for commodities listed on dates specified

Commodity	Aug. 15, 1932	Mar. 15, 1933	Dec. 15, 1935
Wheat, per bushel	$0.41	$0.40	$0.93
Corn, do	.23	.15	.48
Oats, do	.12	.11	.23
Barley, do	.25	.23	.46
Rye, do	.28	.28	.45
Buckwheat, do	.50	.45	.45
Potatoes, do	.55	.55	.75
Hay (all loose), per ton	5.30	4.80	7.60
Apples, per bushel	.70	1.00	.80
Hogs, per hundred	4.30	3.40	9.00
Beef cattle, do	5.50	4.15	7.90
Veal calves, do	5.30	5.40	9.10
Lambs, do	4.80	4.70	9.30
Milk cows, per head	37.00	34.00	55.00
Chickens, per pound	.115	.085	.165
Butter, do	.20	.18	.33
Eggs, per dozen	.137	.087	.295
Wool (unwashed), per pound	.09	.10	.25

For the United States as a whole, the yearly average price for all groups of farm products increased from 65 percent to 108 percent of the pre-war level during the period 1932–35, an increase of 66 percent. The low point occurred in March 1933, when prices were only 55 percent of the pre-war level, whereas in December 1935 they averaged 110 percent of that level. These figures do not include rental and benefit payments. The gain in exchange value of farm products per unit was somewhat less than the gain in farm prices, since prices farmers pay for commodities used in living and production also advanced about 17 percent during the period. The exchange value per unit of farm products increased from 61 percent of the pre-war level in 1932 to 86 percent in 1935, a gain of about 41 percent.

FARM REAL ESTATE APPRECIATION

A new appreciation of farm real estate in Illinois has been one result of increased farm income. Voluntary sales and trades of farms increased from 13.6 per thousand for the year ending March 15, 1933, to 15 for the year ending March 15, 1935. During the same period the number of forced farm sales per thousand declined from 50.7 to 25.1. For the first time since 1920, the decline in value of farm real estate per acre halted in the year ending March 1, 1933, when it stood at a low of 54, the State average value from 1912 to 1914 being 100. From this low of 54 in 1933 the estimated value per acre rose to 61 for the year ending March 1, 1935.

IMPROVEMENT EXTENDED TO FARM LABOR CONDITIONS

On January 1, 1933, the demand for farm labor in Illinois was 41 percent below normal, and the supply was 28 percent above normal. At this time the farm wage rate per person, with board, was $18.75 per month. Three years later, on January 1, 1936, the farm labor supply was 2 percent below normal. Demand was only 20 percent below normal; that is, it had improved 105 percent in the 3-year period. The farm wage rate per person, with board, stood at $23.25 per month, having advanced 24 percent above the 1933 level.

SOIL-CONSERVATION PRACTICES UNDER A. A. A.

The programs of agricultural adjustment, from their launching in the spring of 1933, were concerned with good use of the land of cooperating farmers, as well as with adjustment of crop acreage in line with effective demand. Farm leaders and administration officials recognized from the start that relieving a proportion of farm land from the soil-exhausting burden of major crop production created an unprecedented opportunity for putting this land to the soil-conserving uses which farm specialists had been advocating for many years. The first corn-hog contract—that for the 1934 crop year—authorized use of the rented acreage only "for planting additional permanent pasture; for soil-improving and erosion-preventing crops not to be harvested; for resting or fallowing the land; for weed eradication; or for planting farm wood lots." The first wheat contract contained similar provisions regarding the rented acreage. The cotton contract for 1934–35 specified use of the rented acres only for "soil-improving crops; erosion-preventing crops; good crops for consumption by the producer on his farm; feed crops for the production of livestock or livestock products for consumption or use by the producer on his farm; or fallowing; or such other uses as may be permitted by the Secretary of Agriculture or his authorized agent." Food and feed crops for home use were authorized on rented acres in the South, as it was recognized that the standard of farm living in that region might thereby be improved. The tobacco contracts carried similar provisions. The corn-hog, cotton, and tobacco contracts further specified that the total acreage planted to commercial crops on a given farm be not increased over the acreage during the base period less the amount of the rented acreage.

These provisions meant a real net increase in the proportion of land on a given farm that could be put to less intensive uses through the adjustment contract.

In the 1934 crop year, the first in which the adjustment programs were in full swing, farmers agreed to shift nearly 36,000,000 acres. About two-thirds of these shifted acres were put in soil-building and soil-conserving crops, and one-third were used for emergency forage crops and for crops that supplied food and feed for home use. These shifted acres represented one out of every nine acres of cultivated

land in the country. Farmers in Illinois in 1934 shifted more than 1,700,000 acres from the production of corn, wheat, and tobacco.

DAIRY CATTLE DISEASE ERADICATION

In my State milk has been an important source of farm income. For the past few years over $50,000,000 annually has been returned to milk producers.

Approximately $50,000,000 of Agricultural Adjustment Administration funds have been made available for use in the country as a whole in eradicating cattle diseases, primarily bovine tuberculosis, Bang's disease, and mastitis. This work is being done in cooperation with the Bureau of Animal Industry. As of December 31, 1935, some 1,892,000 cattle in Illinois had been given the tuberculin test and approximately 136,000 the agglutination test for Bang's disease. Since the work of tuberculosis is financed by State and regular Department of Agriculture funds, no emergency funds have been expended by the Agricultural Adjustment Administration in Illinois. My State was allocated $800,000 for the eradication of Bang's disease and of this amount indemnities and operating expenses as of December 31 last totaled $554,960.

EXTENT OF FARMER PARTICIPATION IN PROGRAMS

From the inauguration of the adjustment programs in 1933 through January 6, 1936, a total of about 284,122 crop-adjustment contracts signed by Illinois farmers had been accepted by the Agricultural Adjustment Administration. Of this number of contracts, 214,480 were corn-hog, 69,436 wheat, 140 sugar beet, 134 cotton, and 32 tobacco.

Four important referenda among producers were held in Illinois during the continuation of the agricultural-adjustment program. During the first 2 weeks in October 1934 corn-hog producers were asked whether they favored an adjustment program for 1935. In this referendum returns showed that 33,602 contract signers favored a 1935 program, while 11,111 opposed. In the Bankhead referendum conducted on December 14, 1934, to decide upon the applicability of the Bankhead Act to the 1935–36 cotton crop, 245 votes were cast in the State, of which 199 favored application of the act. A Nation-wide wheat referendum was held on May 25, 1935, in which producers were asked: "Are you in favor of a wheat production adjustment program to follow the present one which expires with the 1935 crop year?" In Illinois 23,706 votes were cast by producers, of which 21,177 or 89.3 percent, favored a program and 2,529 opposed. The last referendum in Illinois was that conducted on October 26, 1935, in which corn-hog producers were asked whether they favored a corn-hog program for 1936. Official returns indicated that 79,208 producers favored such a program while 5,605 opposed.

RENTAL AND BENEFIT PAYMENTS

As of December 31, 1935, rental and benefit payments disbursed among cooperating producers in this State from the beginning of the program totaled $56,886,049.18. Of this amount, corn-hog raisers received $50,135,224.01; wheat growers, $6,700,477.19; sugar-beet producers, $45,296.60; cotton farmers, $3,285.57; and tobacco producers, $1,765.81.

Funds to provide these rental and benefit payments were raised through processing taxes. As of December 31, 1935, processing and related tax collections made at points in Illinois aggregated $155,874,891.04. Processing taxes were collected through the medium of first processors, or converters of the raw product—millers, packers, cotton and tobacco manufacturers—wherever these processing establishments were located. They were paid by consumers throughout the Nation, wherever the processed products were sold.

THE DROUGHT EMERGENCY

Twelve counties in Illinois were severely affected by the drought of 1934. In this emergency A. A. A. rental and benefit payments, calculated on the farmers' production during a previous base period rather than upon the current year's production, served as a form of crop insurance. For their 1934 corn crop reduced to 146,760,000 bushels by the drought, Illinois farmers received only $34,030,000 at the market; but their rental and benefit payments brought their cash income from the 1934 corn crop to $51,731,000. This was 4 percent more than they received for their 1932 crop, amounting to 402,179,000 bushels, which was more than two and seven-tenths times as large.

In 1934 drought threatened Illinois farmers with the loss of thousands of cattle and sheep by thirst and starvation. On June 19, 1934, the Emergency Appropriation Act was approved. It allotted $525,000,000 to the Agricultural Adjustment Administration for financing a drought program to relieve distress in certain areas of the United States. The object of the program was (1) to maintain the foundation for a balanced or diversified farming system in the drought areas; (2) to preserve animals or herds of high producing quality; (3) to relieve some of the financial load carried by both borrower and lender; and (4) to perform these tasks quickly, efficiently, and economically. The purchase and disposition of cattle was conducted jointly by the Agricultural Adjustment Administration, the Bureau of Animal Industry, the Federal Surplus Relief Corporation, the Federal Emergency Administration, and other governmental agencies. During September and October 2,587 head of cattle were purchased by the Government in Illinois at a cost of $42,650.

In the seed-purchase program the A. A. A. acquired about 18,000,000 bushels of grain for seed in the Nation's drought-stricken areas. The cost to the Government of purchasing and selling these seeds amounted to about $19,000,000. In Illinois alone nearly $220,000 were spent in this work. The seed later offered for sale was accumulated to meet an emergency and was intended to supplement rather than to supplant locally obtainable supplies. Under this program about 15,000 bushels of seed and screenings were sold to distressed farmers in this State.

FARMERS' MONEY GOES TO TOWN

The extent to which increased farm income during the past 3 years enabled farmers to increase their purchases of city-made goods is reflected in a number of ways.

New automobile registrations in Illinois during the period 1932–35 have been approximately as follows:

1932	69,894
1933	97,224
1934	126,871
1935	205,248

The increase from 1932 to 1935 was 194 percent.

The purchases of new automobiles, among other things, meant an increased gasoline consumption. Consumption rose from 950,822,000 gallons in 1932 to 1,025,918,000 in 1934, and to 1,069,243,000 in 1935. From 1932 to 1935, therefore, the increase amounted to 12 percent.

The sales of new ordinary paid-up life insurance in Illinois increased by $13,436,000, from $489,567,000 in 1933 to $503,003,000 in 1935.

Now, along with these indexes of increased business activity, resulting in part from renewed purchasing power, there have been others. Monthly statements issued by the Federal Reserve System indicate that debits to individual accounts increased greatly from 1933 to 1935. For 1933, debits in the Chicago Federal Reserve district amounted to $32,129,366,000; but by 1935, according to preliminary figures, they totaled $49,643,653,000, an increase of about 55 percent over the 1933 figure.

During a recent study of freight way bills on car-lot shipments of industrial products over four railroads, from 16 industrial States of the North, including Illinois, to 10 agricultural States of the Southeast, shows that shipments in the year ending June 30, 1934, were greater by 816,302,238 pounds, or 38.8 percent, than in the preceding 12 months. Shipments from the State of Illinois to these 10 Southeastern States totaled 471,597,096 pounds in the year ending June 30, 1933, whereas during the following year ending June 30, 1934, after the farm program and other recovery measures went into effect, the total was 589,605,633 pounds, an increase of 25 percent.

Illinois products of a widely diversified nature were affected by the increased buying. Several outstanding groups were farm implements and machinery, which increased by 212.5 percent, from 4,523,515 pounds to 14,134,078 pounds; automobiles, which increased by 110.5 percent, from 2,497,777 pounds

to 5,258,311 pounds; hides and pelts, by 103.1 percent, from 3,627,191 pounds to 7,366,063 pounds; refrigerators, by 103.1 percent, from 508,973 pounds to 1,019,264; wire and fencing, by 58.7 percent, from 15,607,536 pounds to 24,770,238 pounds; and gasoline, oil, and petroleum products, by 8.3 percent, from 142,088,937 pounds to 153,900,446 pounds.

Shipments from Chicago to the Southeast by way of the four railroads increased 36.8 percent, from 106,830,955 pounds to 146,145,430 pounds. Of the classes of products shipped, steel and iron products bulked the largest, with carlot shipments increasing from 15,656,053 pounds in the earlier year to 37,636,356 pounds in the later, or 140.4 percent. Shipments of industrial materials and supplies increased from 6,159,876 pounds to 9,578,077 pounds, or 55.5 percent. Food and related products shipments increased 9.3 percent, from 12,167,336 pounds to 13,299,202 pounds. The survey shows notable increases in the shipments of commodities used, especially by farmers. These included farm implements and machinery, tractors and parts, steel fence posts, wire and fencing, and wagons and wheels. Shipments of such commodities used by farmers totaled 3,810,945 pounds in the first year of the survey and 9,301,220 pounds in the second year. This represents an increase of 144.1 percent.

In a similar study of the freight waybills on five railroads of carlot shipments of industrial products, from the 16 Northern States to 10 Southwestern States, shipments were shown to increase from 2,398,582,166 pounds to 3,294,993,200 pounds, or 37.4 percent. For Illinois shipments increased from 969,169,842 pounds to 1,071,939,711 pounds, a gain of 10.6 percent. The above figures for the Southwest do not include coal shipments.

Mr. Speaker, I submit that these facts, compiled by the Agricultural Department, as Government reports show conclusively, beyond a doubt, what this administration, under the leadership of our great President, Franklin Delano Roosevelt, has done for the farmers of America. They are not going to be deceived in this approaching campaign. The American farmers for the first time in history have been given a parity price and equality with industry, and they are going to the polls on November 3 and support not only the leadership of Franklin Delano Roosevelt, but support the men in the House of Representatives and in the United States Senate who have made such a program possible.

JAMES P. HORNADAY—A GENTLEMAN OF THE PRESS

Mr. LUDLOW. Mr. Speaker, the necrology of the last eventful year will be forever memorable in respect to the unusually large number of illustrious persons who have been gathered to their fathers. It has been said—and seemingly with much truth—that "death loves a shining mark." Never within my recollection as a Washington newspaper correspondent and as a Member of Congress, spanning a period of 35 years, has the grim reaper, in a similar period of time, laid such a heavy toll on both the Congress of the United States and the press gallery, which is so intimately associated with the workings of the legislative body. With unerring aim and bewildering suddenness death has removed, one after another, many of the most shining lights in the constellation of brilliant minds assembled here in the kindred occupations of making and recording history.

It is worthy of mention that in a period of less than 6 months death removed under circumstances that were amazingly parallel the stellar figure of the House of Representatives, Joseph W. Byrns, and the dean of the press gallery, James P. Hornaday, both equally outstanding and beloved in their respective spheres. Both died as they would have wished to die—in active service; Mr. Hornaday at his desk and Speaker Byrns just at the close of a hard day's work. In many respects these two great men, one eminent in the realm of statesmanship and the other distinguished in the art of gathering and writing news, were very much alike. They had the same lovable characteristics, the same high ideals, the same passion for service.

As one who was privileged to be associated with Mr. Hornaday for many years, when we were coworkers in the newspaper field, though on opposition newspapers, I doubt whether I could pay him a higher tribute than to make a simple statement that was true in regard to him, everlastingly and under all circumstances, and that simple statement of fact is this:

He knew when not to print the news as well as when to print the news.

A newspaperman who knows when not to print the news, and acts accordingly, is usually a man of courage, of big heart, and infinite compassion, and all of these qualities Mr. Hornaday possessed in marked degree. If the publication of a story would violate a confidence or do a grievous wrong or cause innocent hearts to ache, it could be taken for granted it would never see the light of day through any act of his. I have always believed that the ability to know what should not be printed is one of the highest qualifications of journalism, and certainly Mr. Hornaday had that discriminating judgment in a degree that approached perfection. As for myself, while I think I may modestly lay claim to my share of important "scoops", I shall always feel as much pride in the stories I did not print as in the stories I did print. It was, I think, this ability of Mr. Hornaday to respect the rights of others and to feel the touch of human sympathy in a world where selfishness is too rampant that caused this genial and gracious journalist to become known far and wide as "a gentleman of the press", a title conferred on him by President Roosevelt in February 1934, when he attained his fiftieth anniversary as a newspaperman. There was the warmth of genuine affection in President Roosevelt's voice when he called Mr. Hornaday to him during a White House press conference and said:

> The nicest and truest thing I can say about you is that you are a gentleman of the press.

Mr. Hornaday's constructive and creative genius as a journalist was exemplified during 46 years of continuous service for one great newspaper—the Indianapolis News. When he was a slender, black-haired youth he began his active career in metropolitan newspaperdom on that paper as a reporter, and when his hair was silver with age he was still true to his first attachment, and always, in youth and age, he was the same understanding soul who liked to help others and who was never known to violate a confidence. He was indefatigable in the search for news and his dependability made him the friend and confidant of Presidents. He derived the keenest pleasure in helping young men who came to consult him in regard to a journalistic career, and his fondness for his fellow workers was demonstrated by his activity in organizations created in their behalf. He was one of the founders of the National Press Club and was a member and past president of the Gridiron Club.

There was no base alloy in the character of this good man. He was pure gold. He was not of that happily diminishing school of journalists of whom it is sometimes said, "They never allow the truth to spoil a good story."

He was passionately wedded to the truth and the Nationwide and honorable reputation which he achieved as a journalist was founded on accuracy. Many a time I have heard the statement solemnly made in regard to some newspaper article, "That story must be true because Jim Hornaday wrote it."

What a tribute that was, implying as it did that there could be no doubt about the authenticity of an article because of the flawless reputation of the author!

In his private life Mr. Hornaday was a kind husband and father, a devout believer in the fatherhood of God and the brotherhood of man, and an exemplar of good citizenship. His professional ideals helped to raise the standard of journalism in America and his journalistic career was a credit to American achievement.

I cannot bring this sincere tribute to an old friend to a more fitting close than by quoting the words of President

Roosevelt, spoken with visible emotion when he heard of the sudden death of Mr. Hornaday.

I share with his legion of friends the grief which the passing of James P. Hornaday has brought to all of us at this Christmas time—

said the President—

Dean of White House correspondents, he had through long years faithfully chronicled national events, not less admired for his talents as a newspaperman than he was beloved because of the beauty and strength of his personal character. There was—there is—among Washington newspapermen no gentler, truer soul than Jim Hornaday. We shall long remember him and miss him and mourn him and be thankful that we were permitted to know him and love him.

So say all of us who knew him.

MY DUTY AS A CONGRESSMAN IN TIME OF NATIONAL DISTRESS

Mr. WOLVERTON. Mr. Speaker, for nearly 7 years this Nation has experienced a degree of distress that exceeds that of any other similar period in the entire history of our Nation. There has been no way of escape from its ravages by any class of our citizenship. Each has felt in a varying degree some measure of distress. To some it has meant an absolute wiping out of all the material things of life; to others it may have been loss sufficient to awaken fear as to the future ability to carry on; but to some extent all have experienced concern, discouragement, and fear.

In times such as these, what is the duty of a Member of Congress? What should be his attitude toward legislation proposed as a remedy for these distressing conditions? Should he be satisfied to give merely partisan consideration to such measures? Or should he study each proposal in the light of existing conditions and determine whether the proposed remedy will afford the relief that is necessary?

This naturally creates a situation whereby a Member of Congress must decide the extent to which he is willing to set aside party considerations and set up in place thereof the general welfare as of prime importance.

During these times of national stress and strain, both under Republican and Democratic administrations, I have permitted no other consideration than that which I conceived to be for the common good to dictate my actions and votes upon important matters of legislation. To have done otherwise would have given me a consciousness of being unfaithful to the duty expected of me.

To adopt this course of action necessarily creates criticism upon the part of those who feel that loyalty to a party can only find proper expression by a complete subordination of individual thought, the elimination of intelligent consideration, the adoption of no course other than what has been determined by others, regardless of what may be their peculiar interest in the result to be attained; in other words, a rubber-stamp variety of statesmanship.

Whatever may be said in behalf of such a type of statesmanship in normal times does not apply with equal force when the Nation faces a condition that threatens an economic and financial catastrophe involving millions of our people, destroying their opportunity for employment, robbing them of their homes and lifelong savings, placing them in need for the necessities of life, closing the door of opportunity for their children, and creating fear of the approaching insecurity of old age.

These are conditions that call for a statesmanship that recognizes the general welfare of our people as of paramount importance, that places the common good above party gain, that demands a service that goes beyond the restrictions of party labels, and requires of everyone in public office, no matter what may have been the party ticket upon which elected, to think only in terms of those in distress and give support to those measures and policies best calculated to restore and reestablish normal conditions, regardless of party origin.

Realizing as I do the importance of adherence to these principles, it has been my constant endeavor through all of these trying years to determine my course of action and vote upon each legislative measure presented to the House of Representatives for its consideration solely upon the basis of its merits.

In the fulfillment of my desire to bring relief, provide security, and reestablish faith and confidence I have supported legislation to strengthen our banking structure, guarantee bank deposits, protect labor in its right to bargain collectively, provide means under Federal supervision to settle disputes by peaceful means, security against unemployment, old-age assistance, more adequate provision for the blind, the crippled, and the otherwise handicapped in life; pensions for those engaged in railroad transportation and security for those engaged in industrial pursuits; public-works programs to assist private industry in reducing the ranks of the unemployed; relief for those in necessitous circumstances that none may go unfed, unclothed, or without shelter; educational assistance to communities and individuals; credit for agricultural purposes to farmers; financial assistance to refinance distressed home owners faced with foreclosure, and make possible the construction of new homes and improvements to old ones; removal of slum areas; the building of low-cost housing projects to benefit those of low income and wage; immediate payment of veterans' bonus; disability compensation to veterans; and a multitude of other measures to promote the welfare of our people.

It would be difficult to sustain all that has been done as right, but it would be unjust to break down all that has been done as wrong. Mistakes may have been made that must be corrected in the light of the experience that has been gained. But, whatever estimate may be placed upon the value of the actual good accomplished, I am certain that as I have voted in favor or in opposition of proposed legislation, some enacted and some defeated, there has been no consideration other than the merit of the measure that has controlled or prompted my course of action or vote.

I have been continuously aware of the fact that when prosperity returns it will shine on Republicans and Democrats alike, and therefore faithful fulfillment of my duties as a Member of Congress requires my constant endeavor at all times to do only those things that will in my opinion prove helpful to all our people and refrain from such that may be otherwise, no matter from what party or source the proposal may originate, and such shall continue to be my course of action in the future as in the past.

WHISKY OVERPRODUCTION—WHAT TO DO

Mr. CELLER. Mr. Speaker, the enactment of the legislation to enforce the twenty-first amendment focuses attention on problems confronting both the Federal Government and the industry with respect to the traffic in spirits. Two and one-half years have passed since prohibition was repealed. During that time there has been reestablished in the United States the wine and spirit industry. The conditions under which this industry operates today are entirely different from those conditions which were true before prohibition. Beginning with repeal in December 1933, all the alcoholic-beverage industries were controlled by various codes of fair competition enforced by the Federal Alcohol Control Administration. The operations of these codes directed the energies of the various branches of the industry along economic lines differing from those which had been followed before prohibition was adopted in our country.

In the old days most distillers were concerned with the production, storing, and aging of whisky. They did little, if any, merchandising of goods in consumers' packages. Their sales were primarily to wholesalers and rectifiers. The customary procedure was for the distiller to make his whisky, place it in a barrel, and maintain these goods in a Government-bonded warehouse. He would finance himself in the main part by selling warehouse receipts to wholesalers and rectifiers who merchandised the whisky in bottles to consumers. Today practically all of the leading distillers not only make and store the whisky but they also pack the goods in smaller containers and advertise and sell these consumers' goods to the wholesale and retail trade. Legislative attempts have been made to permit return to the old regime, permitting again sales in bulk to rectifiers and wholesalers. Such efforts

have thus far failed. They will undoubtedly be renewed in the next Congress.

When prohibition was finally repealed the stocks of whisky on hand in the United States were so small that it would have been impossible to supply the demand for more than a few days. Importations of American-type whisky from Canada helped fill the gap in part, but in a major way the demand for whisky had been met by marketing whisky after a relatively short period of storage, or after blending with a small proportion of the matured whisky on hand in December 1933.

The distillers viewed their major problem as one of accumulating sufficient stocks of whisky in Government bonded warehouses to permit the aging and maturing in such volume as finally to attain the situation that existed just prior to the World War. At that time, roughly, there were in storage approximately 250,000,000 gallons of whisky, and each year there were withdrawn approximately 75,000,000 gallons of matured whisky, and at the same time the distillers would make approximately that amount and place the new whisky into bonded warehouse for aging.

A serious situation seems to confront the industry today. The Alcohol Tax Unit of the Treasury Department reports that at the close of May 1936 there were actually remaining in Federal bonded warehouses 281,000,000 gallons of whisky. Production is going ahead at a rate of approximately 22,000,000 gallons a month, and tax-paid withdrawals represent, as a rule, not more than 25 to 33 percent of the quantity produced. As a result, the accumulations are now reaching staggering figures. It is predicted that by the middle of summer the quantity of whisky in storage will have passed the 300,000,000-gallon figure. Certainly saturation point will be reached this fall. These figures cannot be viewed with complacency. They may constitute a decided menace.

Two problems present themselves because of this huge stock of whisky now in storage. One is purely an economic problem, and resolves itself solely on the ability of the distilling industry to finance this quantity of whisky and thus avoid the possibility of financially weaker firms being forced to throw the whisky on the market at sacrifice prices in order to meet banking and other financial conditions. The second problem is one which definitely involves the Federal control of the liquor industry. The question naturally arises, Where are the distillers going to find markets for the disposition of this huge accumulation of stocks? Will the distillers continue to keep on making whisky at a rate far in excess of the public demand? That would be suicidal. Will the economic pressure exerted by this huge accumulation force some of the smaller and more weakly financed firms to liquidate their stocks and to resort to markets which are legally closed to them today? That would be dangerous.

It is a well-known fact that the operations of bootleggers, smugglers, and producers of illicit spirits have been sharply curbed by the activities of the Treasury Department. Nevertheless, it is also recognized that a new illicit traffic has developed in the handling of legal tax-paid spirits. In the dry States there appears to be a steady flow of whisky and similar distilled spirits which were produced legally and which paid all Federal taxes. In States which maintain their own liquor-control systems, including State stores, it is also known that there is a considerable business of smuggling into these wet States legal tax-paid liquor to compete on a price basis with the spirits sold by the State. A minor form of illegal activity has developed in the smuggling of legal spirits from one wet State into another where the second State imposes a higher gallonage tax than the first State.

Bearing the foregoing operations in mind, there may be some justification for fearing that the gigantic stocks of whisky may be in part liquidated by sales under the conditions outlined above.

A great many different proposals already have been made with respect to what should be done to control the situation. It has been suggested that the distiller be put on a quota basis for production. Such a proposal would probably base a quota for production on present conditions and would tend to create a monopoly, because the amount of goods produced by the smaller distillers would virtually be negligible. We had quotas under the N. R. A. The system worked badly. A return to it is unthinkable.

It has been suggested that the distillers reach a voluntary agreement to limit their production. One of the country's largest distilleries in Illinois is now using 20 carloads of grain daily. Instead of curtailment, there seems to be a general stepping up of production. It must be remembered, too, that agreement to limit production might probably be regarded by the Government as a conspiracy in the restraint of trade. It has been suggested that the able and efficient Administrator, Wilford S. Alexander, of the Federal Alcohol Administration, refuse to grant any more permits to new distilling enterprises or for extensions in plant capacity of existing distilleries. All of these proposals go against some of the fundamental business concepts of our country.

Overproduction and accumulation of stocks is not something new for the distilled-spirits industry. The same thing has happened in a thousand and one other industries, and the final cure has been evolved by the same process and the same weeding out of firms who cannot stand the financial burden and who have refused to recognize that the basic laws of supply and demand are still in existence. In my opinion, the Government should participate only in a limited way at this juncture in this problem of overproduction of whisky. It should, of course, prevent the formation of any combination or trust which might be evolved if large quantities of whiskies were thrown on the market at distress prices. The Government should forbid any of our larger distillers or a group of distillers taking over the stocks of the weaker members of the industry. On the other hand, the Government might well emphasize and continue the sort of publicity Mr. Wilford S. Alexander, the able and efficient Administrator of the Federal Alcohol Administration, has resorted to. He announced in a public release on June 5, 1936, the stocks on hand as of March 1936 of whiskies and other distilled spirits and the ages of these spirits. Among the amazing things shown by Mr. Alexander's report is that out of 249,000,000 gallons as of March 31, 1936, only 2,600,000 gallons were over 4 years old. The stocks of whisky over 3 but less than 4 years old amounted to only slightly more than 1,000,000 gallons. The whisky more than 2 years but less than 3 years old amounted to something over 10,000,000 gallons. There was, however, some 56,000,000 gallons of whisky over 1 year but less than 2 years old, and about 179,000,000 gallons of whisky less than 1 year old. These figures indicate that some years will elapse before there will be sufficient whisky in the United States to permit the bottling of bottled-in-bond whisky 4 years or more of age. They indicate also that for some time to come the bulk of the sales of whisky must come from the younger whiskies, which may in some cases be ameliorated and improved by blending with older stocks.

May I be so bold as to make the suggestion that the distinguished head of the Federal Alcohol Administration, Mr. Alexander, confer with our Federal Reserve Board at Washington and urge that it limit the financing of whisky distillation. Mr. Alexander could suggest that the Board inform its member banks to scrutinize with greatest care applications for the advancement of money on whisky warehouse receipts. The latter should not, under any circumstance, be used to finance further production. After careful inquiry, the Board should place a limit upon the rediscountable paper with such warehouse receipts as collateral security. Certainly no one should be permitted to borrow money on warehouse receipts for gambling in the whisky market. In other words, the Federal Reserve bank should refuse to rediscount paper, collateralized by warehouse receipts, beyond the reasonable limits it shall set.

It might be well, too, for Mr. Alexander to contact the Securities and Exchange Commission and officially make known to it the danger of whisky overproduction and stress the fact that great vigilance should be exercised on applications for registration of stock and/or bond issues which have

for their main purpose the financing of additional whisky production.

In citing all of the foregoing I have in mind calling the attention of the industry to the serious situation which may develop if the overproduction of whisky is continued. We who fought prohibition and who did our utmost to bring back the legal sale of spirits and wines are anxious that the industry itself use the utmost care in its relations with the public and the Government. The drys did not vanish in December 1933. They are with us and they are formidable in number and in vociferousness. The distillers of the United States should recognize that if they do not change their methods they are heading for economic disaster, with the attending evils which always come when merchandise is sacrificed and when there is a scramble by terrified producers to get rid of their goods at any price. Distillers themselves should recognize that neither the people of this country nor the Federal Government will countenance the formation of anything remotely resembling a whisky trust. I hope that the industry will come forward frankly and discuss its problems with the highly competent Government officials, such as the Administrator of the Federal Alcohol Administration and the officers of the Treasury Department. I am convinced that a frank, open exposition of the problems to these men will result in sound advice and the planning of future activities which will safeguard the operations of the distillers and reduce the problem of enforcement which the Federal Government now faces with the adoption of the bill to enforce the twenty-first amendment.

NEEDY AND WORTHY HIGH-SCHOOL STUDENTS GET FEDERAL AID THROUGH THE YOUTH ADMINISTRATION

Mr. SNYDER of Pennsylvania. Mr. Speaker, very few people know the splendid services and the adequate financial support the Roosevelt administration has given to education in general.

To give a comprehensive idea of what is being done throughout the Nation in giving financial aid to high-school students, I will give you the financial help received by the different high schools in my congressional district and the number of students in each high school receiving such aid.

The Federal set-up for next year calls for still greater service for needy and worthy boys and girls.

CONTRAST OF REPUBLICAN AND DEMOCRATIC ATTITUDE TOWARD COLORED VOTER

Mr. WOLVERTON. Mr. Speaker, in a speech recently made before this House by our colored Democratic colleague from Chicago [Mr. MITCHELL] he said:

> It is only during the past 4 or 5 years that Negroes have found that the Democratic Party is a safe place to live and vote.

A statement of this kind coming from one who was born in Alabama, and it is said lived there until past 40 years of age, but never had the privilege of voting, and who had been a student under that great Negro teacher, Booker T. Washington, challenges our attention.

To contrast his words and thoughts with those of Fred Douglass, who by common consent is regarded by his race as one of the most outstanding it has ever produced in this country, creates an issue or division of thought that justifies a careful study and analysis of the historical background of the subject. The words of Fred Douglass, to which I have referred as being directly opposed to the thought expressed by our colleague, are as follows:

> The Republican Party is the great ship of safety for the Negro, and all else is the great wide seething seas.

These were the words of one who had felt the anguish of being taken from his own mother and one whose interest in promoting the welfare of his race was based upon no other consideration than to guard and protect his people and their children, yet unborn, in the rights they had gained through the loss of precious blood, both white and colored, in the great conflict between the States, and whose sincerity of purpose commanded the respect of great men on this as well as on the other side of the Atlantic.

REPUBLICAN PARTY LEADS FIGHT FOR EMANCIPATION

The Republican Party was conceived in and dedicated to the cause of human rights. The principles upon which it was founded recognized that this Nation could not endure "half slave and half free." It sought equality for every race, color, and creed. It determined that this Nation should, in fact as in theory, as expressed at a later date by the Great Emancipator, be "a government of the people, by the people, and for the people", and that the principles of the Declaration of Independence and the Constitution of our country should be so applied that the freedom declared by one and the rights guaranteed by the other should not be denied to anyone, no matter what his color might be.

It was the recognition by the Republican Party of these fundamental principles of justice and right that brought the Republican Party from the day of its birth into direct conflict with the Democratic Party.

On July 6, 1854, under the great oak trees so characteristic of the strength to be ultimately attained by the new party, the Republican Party was born at Jackson, Mich.

The resolutions adopted at this first meeting clearly set forth the reason that had brought the Republican Party into existence and why the adoption of such resolutions made a

conflict with the Democratic Party inevitable. They read as follows:

Resolved, That the institution of slavery, except in punishment of crime, is a great moral, social, and political evil.

Resolved, That slavery is a violation of the right of man as man; that the law of nature, which is the law of liberty, gives to no man rights superior to those of another; that God and nature have secured to each individual an inalienable right of equality.

The Republican platform adopted at its first national convention at Philadelphia, Pa., on June 17, 1856, contained the following declaration with respect to slavery:

SECTION 1. *Resolved*, That the maintenance of the principles promulgated in the Declaration of Independence and embodied in the Federal Constitution is essential to the preservation of our republican institutions, and that the Federal Constitution, the rights of the States, and the Union of the States must be preserved.

SEC. 2. *Resolved*, That with our Republican fathers we hold it to be a self-evident truth that all men are endowed with the inalienable right to life, liberty, and the pursuit of happiness. * * * it becomes our duty to maintain this provision of the Constitution against all attempts to violate it for the purpose of establishing slavery in the United States by positive legislation prohibiting its existence or extension therein.

SEC. 3. * * * And that in the exercise of this sovereign power it is both the right and the imperative duty of Congress to prohibit in the Territories those twin relics of barbarism—polygamy and slavery.

By way of contrast to this outspoken denunciation of slavery in the first Republican platform of 1856, compare the attitude of the Democratic Party in the same year. In the Democratic platform adopted at the Democratic national convention at Cincinnati, Ohio, June 2–6, 1856, reference was made to the slavery question in the following language:

* * * that all efforts of the Abolitionists, or others, made to induce Congress to interfere with questions of slavery, or to take incipient steps in relation thereto, are calculated to lead to the most alarming and dangerous consequences, and that all such efforts have an inalienable tendency to diminish the happiness of the people. * * *

3. That the Democratic Party will resist all attempts at renewing, in Congress or out of it, the agitation of the slavery question, under whatever shape or color the attempt may be made.

The Republican platform adopted at its national convention, May 16–18, 1860, at Chicago, which nominated Abraham Lincoln, denounced in no uncertain terms the slave policy of the Democratic Party in the following language:

That we brand the recent reopening of the African slave trade, aided by perversions of judicial power, as a crime against humanity and a burning shame to our country and age; and we call upon Congress to take prompt and efficient measures for the total and final suppression of that execrable traffic.

Abraham Lincoln was nominated and elected President upon that platform declaration in the election of 1860. It was during this term of office that Abraham Lincoln, as President of the United States, issued the emancipation proclamation that struck the shackles from 4,000,000 of the colored race that had bound them to involuntary servitude for centuries of time.

Permit me to quote a small part of that great and memorable document signed by the Great Emancipator as a Republican President of the United States:

And by virtue of the power and for the purpose aforesaid, I do order and declare that all persons held as slaves within designated States and parts of States are and henceforth shall be free; and that the executive government of the United States, including the military and naval authorities thereof, will recognize and maintain the freedom of such persons.

The Democratic platform adopted by the Democratic national convention at Chicago August 29, 1864, denounced Abraham Lincoln and the Republican Party for granting freedom to the Negroes, and demanded that Abraham Lincoln stop the war. This would have permitted the Democratic Party to continue to enslave human beings.

The Republican platform of that year, however, instead of retreating sounded the note for an advance in the cause of human freedom. The platform adopted by the Republican Party convention at Baltimore on June 7, 1864, declared as follows:

Resolved, That as slavery was the cause and now constitutes the strength of this rebellion, and as it must be always and everywhere hostile to the principles of republican government, justice and the national safety demand its utter and complete extirpation from the soil of the Republic, and that while we uphold and maintain the acts and proclamations by which the Government in its own defense has aimed a death blow at this gigantic evil, we are in favor, furthermore, of such an amendment to the Constitution, to be made by the people in conformity with its provisions, as shall terminate and forever prohibit the existence of slavery within the limits of the jurisdiction of the United States.

It was upon this courageous and righteous declaration of policy in the Republican platform that Abraham Lincoln was elected Presiden for a second term. We are all familiar with subsequent events that wrote into the Constitution, never to be removed, the amendments that would guarantee the rights of free men to all within our boundaries without regard to race, color, or previous condition of servitude.

From those memorable days, when the principles of human rights were written with the blood of courageous men, until the present time, the Republican Party has never ceased to maintain its allegiance to those principles, and has constantly sought to protect the rights and privileges of those for whom the privileges of citizenship were written into the Constitution.

Contrast this record of Republican interest in the adoption, extension, and continuation of principles that gave the rights of free men to these millions of the colored race with the attitude of the Democratic Party in relation to the same subject.

For 136 years the Democratic Party has been in existence. At no time during these 136 years has the Democratic Party in national convention ever adopted a platform that acknowledged the inherent right of the colored race to participate in government. On the contrary, it has sought wherever possible by every conceivable subterfuge to curtail and even deny the rights guaranteed by the constitutional amendments written into the Constitution under the leadership of the Republican Party.

DEMOCRATIC PARTY DENIES CONSTITUTIONAL RIGHTS TO COLORED CITIZENS

The attitude of the Democratic Party, as a national organization, toward the constitutional rights of colored citizens is unmistakably written into the laws and customs that govern the right to vote in those Southern States where the Democratic Party dominates political activities and government. In no such State, even today, is the inherent right of the colored man to vote generally recognized or acknowledged. It is only in the States of the North, East, and West where our colored citizenship can freely express its individual thought by the ballot on election day.

The truth of this statement was recognized by our colored Democratic colleague when, in the course of his speech, he said—and I use his exact words:

I find that in 23 States where we expect to wage a campaign for Negro votes, where the Negro is permitted to vote, and where their votes are counted, we have more than 2,400,000 Negroes who can vote in this election.

Notice it is the purpose of the colored Democratic Member of Congress to campaign among the 2,400,000 colored voters who owe that right of citizenship to the Republican Party. What about the 4,000,000 who live in the Democratic States of the South who are not permitted to vote; whose rights of citizenship are not recognized, notwithstanding the constitutional amendments that give such rights? He also related a conversation he had with a prominent Democrat who said, "The Democratic Party doesn't owe the Negro a damn thing." I say that the Democratic Party does owe him the right to vote. It owes him the right of citizenship, the right of equal justice under the law, the right to protection from the lynching mob, and all the other rights guaranteed them by the Constitution and denied them by the Democratic Party in our Southern States. It is in these same States that over 3,000 lynchings have occurred since 1889, with only 12 apprehensions and convictions of guilty parties, and those in most cases were only given slight punishment.

This condition exists today, and it is astounding to realize that even since the present Democratic administration was inaugurated on March 4, 1933, there have been over 70

authenticated lynchings. This represents an average of one every 15 days. And what has been done about it? A Democratic Congress has refused to do anything. It has even refused to report to the House for action a single antilynching bill from among the 30 and more introduced for the purpose. And yet the colored Democratic Congressman from Chicago intends to campaign among the colored voters and urge them to support the Democratic Party.

Upon what does the colored Democratic Member of Congress base his claim that during the last 4 or 5 years "Negroes have found that the Democratic Party is a safe place to live and vote"? Can he show in any Democratic State where the right of colored citizens to vote has been denied or curtailed; that during the last 4 or 5 years that constitutional right has been observed? Can he show any Democratic State that in the past has had the "grandfather's" clause, or any other similar barrier, that has changed its attitude and given to the colored citizens, whose right to vote has been barred by such restrictions, the full right to vote? The truth is that there has been no change in the attitude of such Democratic States, nor any promise of a change; and yet the Democratic colored Member of Congress will campaign for Democratic support among the voters of his race in those States of the North, East, and West where they do enjoy a right to vote, gained under the leadership of the Republican Party.

I am informed that under the laws passed by a Democratic legislature in the State of Texas, our Democratic colleague would not be permitted to vote in a Democratic primary and he would not be permitted to attend a Democratic convention, and I am also informed that the Democratic Legislature of Texas some months ago adopted a resolution calling upon the Democratic Party of the Nation to prevent Negro delegates from sitting in the Democratic National Convention.

As a further illustration, you will find that in South Carolina a colored citizen can vote in a Democratic primary election only providing 10 good Democrats will make a sworn affidavit that they know the colored voter and have personal knowledge that he voted for Wade Hampton in 1876 and has been supporting the Democratic Party ever since. Wade Hampton was a candidate for office in 1876—60 years ago. Our colored colleague from Chicago is less than 60 years of age. You can see how difficult it would be for him to vote in the Democratic Party.

It is also interesting to study the effective means adopted in Mississippi to deny colored citizens the right to vote. Before he can register he must pass an examination as to his knowledge and ability to interpret the constitution of that State. He must be able to satisfy the registration official as to what is meant by "ex post facto" law, or what does it mean "to suspend the writ of habeas corpus." Or, if this is not difficult enough, then he is required to read a copy of the constitution with some lines printed straight across the page and others printed in an opposite direction from the top to the bottom of the page. All of which is done to confuse the colored voter with the intention of providing an excuse to the registration official for refusing to permit him to vote. And there is no appeal from the decision of the registration officer.

Innumerable illustrations of a similar character could be given as evidence of the antagonistic attitude toward colored voters in these Democratic States. In some of these Democratic States they adopted the so-called "grandfather's" clause, denying the right to vote to those colored citizens whose parents or grandparents as slaves were not entitled to vote. In every one of such Democratic States, so far as I am informed, the Democrats have adopted the "grandfather's" clause, or something equally as effective, or have attempted to do so. The effectiveness of such restrictive laws is demonstrated by the fact that in 15 counties of one of these States in a recent election, I am informed, not a single vote was permitted to be cast by a colored citizen.

REPUBLICAN PARTY PROTECTS CONSTITUTIONAL RIGHTS TO COLORED CITIZENS

The Republican Party from the time of its birth has fought these efforts of the Democratic Party to disfranchise colored citizens. The Republican Party has never ceased in its efforts to preserve a free ballot for colored voters and all citizens, without regard to race, color, or creed. The Democratic Party of the States to which I have referred—and we must not overlook the fact that the real strength of the Democratic Party is in such States—has always by every means possible tried to take away the right of the colored people to vote ever since they were granted the right to vote by the Republican Party.

Again I ask in what particular has there been any change in this Democratic attitude toward colored voters that would justify the claim that the Democratic Party has become a safe place for our colored citizen "to live and vote"? There is still restriction of their right to vote, to hold office, or participate in the government of the Democratic States; also, discrimination that prevents the colored Member of Congress from even riding in such States in the same railroad coach as the white Members who sit with him on the Democratic side of this House, and refusal to pass any law that would protect from mob lynchings or give any remedy, financial or otherwise, to the family of any who might suffer by reason of such; and yet, in the face of this outstanding record of Democratic antagonism to the rights guaranteed to colored citizens by the Constitution of the United States and its amendments, an appeal will be made to colored voters, in States where, through Republican leadership, they enjoy such right, to support the Democratic Party that has in the past refused, does now, and will continue to refuse, to recognize or acknowledge the constitutional rights and privileges of members of the colored race in the Democratic States to which I have referred.

Is not this a strange situation? We are told that a great campaign will be made among colored voters in States where they are permitted to vote to procure their support for the Democratic Party and its candidates. It was the Republican Party of this Nation that fought the battle of freedom, that procured constitutional amendments guaranteeing the right to vote, that has defended and protected them against encroachment, and without such action upon the part of the Republican Party, the colored Member of Congress would not have the right to vote. He would not be a Member of this Congress. He would not have the opportunity to go over the Republican States "where Negroes vote" urging them to vote the Democratic ticket. Why does he not go where the Democratic Party really is, and where there are seven or eight million of his race and some three or four million of whom are not permitted to vote? Why does he not make his appeal, for instance, in the State of Alabama, wherein he was born, or Mississippi, Louisiana, Arkansas, Texas, Florida, Georgia, or South Carolina? Here he would find millions of his own race who are anxious and willing to vote but cannot.

DUTY TO HELP DISFRANCHISED COLORED CITIZENS

There is a duty to be performed by the colored voters who do have the privilege of exercising the right to vote. It is a duty they owe to the less fortunate members of their race who live in States where the privilege of voting is denied to them, where mobs override law and justice, and where discriminations of every conceivable kind are practiced. It is a duty in the performance of which they should not permit themselves to be diverted by false or alluring promises, nor bribed by "political plums" in the way of political offices given to a few representatives of the colored race. That may be sufficient reason for the few individuals who have received the financial benefits of such offices to support the Democratic Party, but it should not be sufficient for the great body of colored voters to desert the unfortunate members of their race in their upward struggle, nor to give support to a party that offers nothing to them as a race in its aspiration to gain and profit by the privileges given to them in the Constitution and its amendments and now denied to them in Southern States controlled by the Democratic Party.

There could be no more fitting conclusion to these remarks than for me to again emphasize that wise and prophetic utterance of that great outstanding colored citizen, Fred Douglass, who seemed to have a vision that enabled him to look down through the years and see conditions affecting his race,

and the relative worth of political parties today, as clearly as if he were here in our midst and pointing the way for his race—"The Republican Party is the great ship of safety for the Negro, and all else is the great wide seething seas."

UNWISE LEGISLATION

Mr. RICH. Mr. Speaker, one important thing we older Members, and some of the new Members, have learned in the discharge of our duties here is to be very vigilant in watching legislation that comes to the floor during the last week, and especially the last day, of a session to see to it that no improper legislation is enacted by unanimous consent and after it has received little or no consideration.

Despite the vigilance several of us tried to maintain at all times during the last week of the session just ended, I am surprised to find that at least a few pieces of legislation got through without any objection that probably should not have been passed.

I refer to House Resolution 482, which increases the salaries of our six official reporters of debates by $640 a year each; increases the salaries of the six transcribers in the office of the official reporters of debates by $260 a year each; and abolished the position of janitor to the official reporters of debates at $1,440 a year and creates a new position of assistant clerk in the office of the official reporters of debates at $2,000 a year.

House Resolution 518 abolishes the position of janitor to the official stenographers to committees at $1,440 and creates a new position of clerk to official committee stenographers at $3,360 per annum.

This legislation fixes the salary of each reporter of debates at $8,140 a year. In this connection I want to remark that such is a very good salary, and only 10 States in the Union pay their Governors as much. For instance, the great State of Michigan pays its Governor only $7,000 per annum. Connecticut pays her Governor only $5,000 per annum. Ohio pays her Governor only $8,400 per annum. This information is shown at page 249 of the January 1936 Congressional Directory.

The House handles its committee reporting differently than the Senate, the Senate having no official corps, thereby paying only for work actually performed. The House has four official committee stenographers at $7,000 each, and is, according to this resolution, to have a clerk, which is a new job, at $3,360. That is, though, not the only expense of this corps. The contingent fund of the House provides "for the amounts actually and necessarily paid out by them for transcribing hearings." That item amounts to 1,500 pages a month for each reporter, and the pages are paid for at the rate of 12 cents each. A page consists of any number of words from 1 to 125, or a page may consist of something pasted upon a page and simply given a number. Therefore, while Congress is in session, each committee stenographer gets $185 a month to reimburse himself for expense of transcribing, excluding the items of office space, office supplies, such as notebooks, ink, Ediphone cylinders, and so forth. In other words, each stenographer costs about $768 a month while the Congress is in session, excluding the items of supplies and the cost of the $3,360 clerk. During any 6 months or any other time the Congress is not in session the stenographers, and their clerk, will cost the Government $839 each a month. In other words, the Government will expend at least $15,710 a year and get absolutely no return therefor. The official committee stenographers occupy five rooms, and if the House Office Building cleaning force should clean those rooms, I see no reason for the employment of any assistant for the committee stenographers.

The Government Printing Office could, as it does for the Senate and other branches of the Government, estimate the work performed for House committees by unofficial reporters. I am told that the Government Printing Office is the most reliable source of estimating words in a manuscript, and that the Senate requires such a certificate from the Government Printing Office when paying for its committee reporting. I say that $31,360 for the salaries of four committee reporters and a clerk for that corps, and $4,440 a year for transcribers for this corps, means a very great deal of money.

The one who is expected to become clerk to the official committee stenographers is now the janitor for that corps, and in addition to his salary of $1,440 a year he receives $185 a month, while Congress is in session, indirectly from the Government through a committee stenographer for whom he transcribes. At the new rate of pay he will receive $3,360 a year and in addition $180 a month during 5 or 6 months of the year, yet there will not be any change in the duties performed by this employee.

I am calling this matter to the attention of the Congress, and especially the members of the Committees on Appropriations and Accounts, in the hope that, if it is concluded these increases should be ratified, this clerk to committee stenographers may be required to do his stenographer's transcribing without additional cost to the Government. I submit that $471 a month for such work is too much.

If anybody says that only a small amount of money is involved I remind you that this is something that will continue forever.

I was pleased by the action of the Committee on Accounts holding down increases in pay until last year. When we made those increases in pay last year I knew that, after they were granted, further drives would be made for increases. It must be said for the credit of the subcommittee on legislative appropriations that it last year withstood the drive by the official committee stenographers in behalf of their janitor. I now predict that if these increases are ratified by the Committee on Appropriations we shall be harassed by other demands for increases; and certainly this is no time to consider increasing salaries here.

REPORT OF THE WORK OF THE COMMITTEE ON INVALID PENSIONS

Mr. LESINSKI. Mr. Speaker, as chairman of the oldest pension committee of the Congress, the Committee on Invalid Pensions, which on January 10, 1936, had its one hundred and fifth birthday under its present title and which is the successor to and has in its library the reports of the Committee on Pensions and Revolutionary Claims, established in 1813, and for the information of the Congress and others interested in legislation referred to the committee, I submit herewith my report relative to the work accomplished by the committee during the Seventy-fourth Congress.

There were introduced in the House of Representatives during the Seventy-fourth Congress 13,026 private and public bills, and of that number 3,057 private bills and 5 public bills were referred to the Committee on Invalid Pensions. I am justly proud of the record of the committee in handling this deluge of work and having it current at the adjournment of the Congress. The records of the committee disclose that 2,211 private bills were included as items in the 14 omnibus pension bills reported to and passed by the House. Under the provisions of the rules and practices jointly adopted by the committee and the Senate Committee on Pensions, it was found necessary to deny favorable action on 675 private bills. No action was taken by the committee on 122 private bills because evidence was not filed in support of same, although letters were addressed to my colleagues who introduced the bills advising them of the committee requirements, and 49 private bills were rereferred back to the House under the provisions of clause 2 of rule XXII of the House of Representatives because of improper reference.

The legislative history of the 14 omnibus pension bills reported to and passed by the House is as follows:

H. R. 8421: 374 private bills, introduced by 145 Members, reported by the chairman of the Committee on Invalid Pensions to the House of Representatives June 10, 1935; Report No. 1141. Private Calendar. Passed House August 6, 1935. Reported in Senate August 13, 1935; Report No. 1244. Passed Senate, amended, August 16, 1935. House agreed to Senate amendments August 20, 1935. Pocket veto September 2, 1935.

H. R. 8422: 25 private bills, introduced by 19 Members, reported by the chairman of the Committee on Invalid Pensions

to the House of Representatives June 10, 1935; Report No. 1142. Private Calendar. Passed House August 6, 1935. Reported in Senate August 13, 1935; Report No. 1246. Passed Senate, amended, August 16, 1935. House agreed to Senate amendments August 20, 1935. Pocket veto September 2, 1935.

H. R. 8423: 29 private bills, introduced by 24 Members, reported by the chairman of the Committee on Invalid Pensions to the House of Representatives June 10, 1935; Report No. 1143. Private Calendar. Passed House August 6, 1935. Reported in Senate August 13, 1935; Report No. 1247. Passed Senate, amended, August 16, 1935. House agreed to Senate amendments August 20, 1935. Pocket veto September 2, 1935.

H. R. 8424: 478 private bills, introduced by 105 Members, reported by the chairman of the Committee on Invalid Pensions to the House of Representatives June 10, 1935; Report No. 1144. Private Calendar. Passed House August 6, 1935. Reported in Senate August 13, 1935; Report No. 1248. Passed Senate, amended, August 16, 1935. House agreed to Senate amendments August 20, 1935. Pocket veto September 2, 1935.

H. R. 8425: 156 private bills, introduced by 71 Members, reported by the chairman of the Committee on Invalid Pensions to the House of Representatives June 10, 1935; Report No. 1145. Private Calendar. Passed House August 6, 1935. Reported in Senate August 13, 1935; Report No. 1245. Passed Senate, amended, August 16, 1935. House agreed to Senate amendments August 20, 1935. Pocket veto September 2, 1935.

H. R. 8426: 20 private bills, introduced by 16 Members, reported by the chairman of the Committee on Invalid Pensions to the House of Representatives June 10, 1935; Report No. 1146. Private Calendar. Passed House August 6, 1935. Reported in Senate August 13, 1935; Report No. 1249. Passed Senate, amended, August 16, 1935. House agreed to Senate amendments August 20, 1935. Pocket veto September 2, 1935.

H. R. 8936: 13 private bills, introduced by 12 Members, reported by the chairman of the Committee on Invalid Pensions to the House of Representatives July 23, 1935; Report No. 1623. Private Calendar. Passed House January 7, 1936. Reported in Senate June 15, 1936; Report No. 2345. Passed over in Senate Thursday, June 18, 1936, CONGRESSIONAL RECORD, pages 9846–9847.

H. R. 8937: 31 private bills, introduced by 27 Members, reported by the chairman of the Committee on Invalid Pensions to the House of Representatives July 23, 1935; Report No. 1624. Private Calendar. Passed House January 7, 1936. Reported in Senate June 15, 1936; Report No. 2346. Passed over in Senate Thursday, June 18, 1936, CONGRESSIONAL RECORD, pages 9846–9847.

H. R. 8938: 43 private bills, introduced by 35 Members, reported by the chairman of the Committee on Invalid Pensions to the House of Representatives July 23, 1935; Report No. 1625. Private Calendar. Passed House January 7, 1936. Reported in Senate June 15, 1936; Report No. 2347. Passed over in Senate Thursday, June 18, 1936, CONGRESSIONAL RECORD, pages 9846–9847.

H. R. 12700: 10 private bills, introduced by 8 Members, reported by the chairman of the Committee on Invalid Pensions to the House of Representatives May 13, 1936; Report No. 2647. Private Calendar. Passed House May 14, 1936. Reported in Senate June 15, 1936; Report No. 2348. Passed over in Senate Thursday, June 18, 1936, CONGRESSIONAL RECORD, pages 9846–9847.

H. R. 12701: 134 private bills, introduced by 59 Members, reported by the chairman of the Committee on Invalid Pensions to the House of Representatives May 13, 1936; Report No. 2648. Private Calendar. Passed House May 14, 1936. Reported in Senate June 15, 1936; Report No. 2349. Passed over in Senate Thursday, June 18, 1936, CONGRESSIONAL RECORD, pages 9846–9847.

H. R. 12702: 478 private bills, introduced by 107 Members, reported by the chairman of the Committee on Invalid Pensions to the House of Representatives May 13, 1936; Report No. 2649. Private Calendar. Passed House May 14, 1936. Reported in Senate June 15, 1936; Report No. 2351. Passed over in Senate Thursday, June 18, 1936, CONGRESSIONAL RECORD, pages 9846–9847.

H. R. 12703: 375 private bills, introduced by 133 Members, reported by the chairman of the Committee on Invalid Pensions to the House of Representatives May 13, 1936; Report No. 2650. Private Calendar. Passed House May 14, 1936. Reported in Senate June 15, 1936; Report No. 2352. Passed over in Senate Thursday, June 18, 1936, CONGRESSIONAL RECORD, pages 9846–9847.

H. R. 12908: 45 private bills, introduced by 38 Members, reported by the chairman of the Committee on Invalid Pensions to the House of Representatives May 29, 1936; Report No. 2889. Private Calendar. Passed House June 2, 1936. Reported in Senate June 15, 1936; Report No. 2350. Passed over in Senate Thursday, June 18, 1936, CONGRESSIONAL RECORD, pages 9846–9847.

The private bills approved by the committee and passed by the House this Congress were carefully scrutinized and were of an especially meritorious character, conforming strictly to the rules and practices jointly adopted by the committee and the Senate Committee on Pensions. While I have advocated the adoption of a uniform national policy with respect to benefits extended our veterans and their dependents, I regard private pension bills as a legislative necessity, as they tend to reduce the pressure for additional general pension legislation which would cost the Government much more annually. A survey of the private pension legislation enacted from the Thirty-seventh Congress in 1861 to the adjournment of the Seventy-second Congress in 1932 discloses that the House and Senate have been very conservative in the enactment of such bills, and the following is a compilation by Congresses of the number of bills enacted:

Thirty-seventh	12
Thirty-eighth	27
Thirty-ninth	138
Fortieth	275
Forty-first	85
Forty-second	167
Forty-third	182
Forty-fourth	98
Forty-fifth	230
Forty-sixth	96
Forty-seventh	216
Forty-eighth	598
Forty-ninth	856
Fiftieth	1,016
Fifty-first	1,383
Fifty-second	217
Fifty-third	119
Fifty-fourth	378
Fifty-fifth	694
Fifty-sixth	1,391
Fifty-seventh	2,171
Fifty-eighth	3,355
Fifty-ninth	6,030
Sixtieth	6,600
Sixty-first	9,649
Sixty-second	6,350
Sixty-third	5,061
Sixty-fourth	5,885
Sixty-fifth	3,641
Sixty-sixth	2,200
Sixty-seventh	2,319
Sixty-eighth	2,436
Sixty-ninth	5,375
Seventieth	7,569
Seventy-first	5,987
Seventy-second	438
Total	83,248

As heretofore stated, five public bills were referred to the committee. These bills proposed to give additional benefits to the survivors of the Civil War and their dependents. Each of the bills was transmitted to the Veterans' Administration for a report and which in each instance was adverse and the bills were tabled by the committee.

In closing, Mr. Speaker, I wish to express my appreciation for the loyalty and cooperation of each member of the committee and my sincere thanks to the membership of the House for their many courtesies.

THE TAX AND TARIFF ISSUES IN THE COMING CAMPAIGN

Mr. TREADWAY. Mr. Speaker, there will be many major issues before the American people in the coming election campaign. I shall direct these remarks principally to two of these important issues, namely, taxation and the tariff.

I. TAXATION AND SPENDING UNDER THE NEW DEAL

Any discussion of the tax question necessarily involves a collateral discussion of governmental expenditures, for without the latter there would be no need for taxes. Every dollar the Government spends must be collected from the people in some way and at some time. No one escapes the tax burden. Those taxes which we do not pay directly to the Government we bear in the form of increased prices for what we buy. Hence it follows that every man and woman, every boy and girl, has a vital interest not only in the total amount of Federal expenditures but in whether the money is being spent wisely, prudently, and economically, or unnecessarily, wastefully, and extravagantly.

NEW DEAL EXPENDITURES EXCEED TWENTY-FIVE BILLIONS

Due to the fact that the present Dew Deal administration has been the most reckless spending administration in peacetimes in all our history, the taxes which must be imposed to pay for its unprecedented spending must be higher and more burdensome than ever before.

It is only possible to realize the enormity of the present administration's orgy of extravagance and waste when we consider the fact that up to the present time President Roosevelt has spent more than was spent by all the administrations from President Washington's down to and including that of President Taft. This amazing fact can readily be proven by reference to the official records. The annual report of the Secretary of the Treasury shows that the total expenditures of the Federal Government for all purposes in the 124-year period from 1789 to 1913 were $24,521,845,000. From March 4, 1933, to June 30, 1936—a period of a little over 3 years—President Roosevelt has spent $25,127,000,000.

This total only covers cash outlays, and therefore does not include any of the contingent liabilities which have been incurred, amounting to several billions of dollars, which some day, to some extent at least, will become actual liabilities.

COST OF GOVERNMENT ON INCREASE UNDER NEW DEAL

It will be recalled that the Democratic platform of 1932 called for a drastic reduction in Federal expenditures. Candidate Roosevelt accepted that platform "100 percent." Speaking at Pittsburgh on October 19, 1932, he said:

I shall carry out the plain precept of our party, which is to reduce the cost of the current Federal Government operations by 25 percent.

* * * * * * *

I regard reduction in Federal spending as one of the most important issues in this campaign. In my opinion, it is the most direct and effective contribution that government can make to business.

If reduction of Federal expenditures was one of the most important issues in the campaign of 1932, it is going to be an even greater issue in the campaign of 1936. President Roosevelt has not only failed to carry out the "plain precept" of his party to reduce expenditures but he has increased them by several billions over the expenditures which he described in 1932 as "staggering." The following table shows the rise in the cost of government under the Roosevelt regime:

Increased cost of Government, 1932 to 1936

Fiscal year ending June 30—	Expenditures	Increase over 1932
1932 (Hoover)	$5,154,000,000	
1933 (8 months Hoover; 4 months Roosevelt)	5,143,000,000	
1934 (Roosevelt)	7,105,000,000	$1,951,000,000
1935 (Roosevelt)	7,376,000,000	2,222,000,000
1936 (Roosevelt)	8,880,000,000	3,726,000,000

INCREASE NOT ALL DUE TO EMERGENCY APPROPRIATIONS

I call particular attention to the fact that the increase in Federal expenditures is not altogether due to appropriations for recovery and relief. Any effort on the part of administration spokesmen to convince the people that such is the case is pure and unadulterated deception, as is proven from the figures submitted to the Ways and Means Committee by Budget Director Bell. The following table, based on his testimony before the committee, shows that there has been a gradual increase even in the so-called ordinary or permanent expenditures under the present administration:

Increase in ordinary Federal expenditures (excluding recovery and relief)

Fiscal year ending June 30—	
1934	$2,822,000,000
1935	3,128,000,000
1936 (Budget estimate)	3,627,000,000
1937 (Budget estimate)	5,650,000,000

NEW DEAL HAS SPENT OVER $2 FOR EACH $1 OF REVENUE COLLECTED

In spite of the fact that the Roosevelt administration has constantly increased the tax burden, the Federal revenues are today less than one-half the present cost of government. The New Deal is spending more than $2 for every $1 it collects. As compared with expenditures of $25,127,000,000 between March 4, 1933, and June 30, 1935, receipts in the same period have only been $11,894,000,000.

At this rate the present tax load, burdensome and oppressive as it is, would have to be more than doubled to put the Government on a pay-as-you-go basis.

ACCUMULATED DEFICIT OF THIRTEEN BILLIONS PILED UP UNDER ROOSEVELT ADMINISTRATION

This reckless and dangerous policy of spending money twice as fast as it comes in has resulted in an accumulated deficit between March 4, 1933, and June 30, 1936, of the staggering total of $13,233,000,000. This is the extent to which the Roosevelt administration has lived beyond its income.

In order to spend the money, the administration, of course, had to raise it. This was done by the flotation of bonds, which were largely taken up by banks, often under pressure from Washington.

By absorbing the lending capacity of the banks in this way the administration thereby took that much available credit away from business.

NATIONAL DEBT INCREASED BY NEW DEAL TO UNPRECEDENTED TOTAL OF THIRTY-FOUR BILLIONS

When President Roosevelt took office on March 4, 1933, the gross national debt stood at $20,937,000,000. At the close of the current fiscal year ending June 30, 1936, it stood at $33,779,000,000, the highest in all history, in peace or war. This is an increase of almost $13,000,000,000 since the inception of the New Deal.

This colossal debt represents a tax burden which the present and future generations must bear in addition to that necessary to pay the ordinary running expenses of the Government. If the Government would start in at the present time to retire it at the rate of $500,000,000 annually, which is approximately the amount budgeted for debt retirement, it would take nearly 70 years to pay it off. A child born today would still be contributing to the reduction of the debt when an old man.

When I came to Congress 23 years ago, it required about a billion dollars annually to run the country. Now it takes that much just to pay the interest on the debt, without allowing a cent for amortization.

THE SO-CALLED RECOVERABLE ASSETS

At this point it might be advisable to say a word about so-called recoverable assets. The Secretary of the Treasury, in his radio address of July 1, stated that the total national debt was offset by certain recoverable loans made by the R. F. C. and other lending agencies, amounting to $4,000,000,000. According to a statement furnished to the Ways and Means Committee by the Director of the Budget, some $2,284,000,000 of these loans were recoverable on March 1, 1933, and therefore are not properly credited to the Roosevelt administration. In effect, they reduce the "net" debt when Mr. Roosevelt took office to $18,653,000,000. Any net increase in the debt under his administration should be figured from this base.

CANDIDATE ROOSEVELT'S VIEWS ON DANGER OF CONTINUED DEFICITS

During the 1932 campaign the country heard a great deal about the danger of continually piling up deficits. Speaking at Albany on July 30, 1932, Candidate Roosevelt said:

Let us have the courage to stop borrowing to meet continuing deficits. Stop the deficits.

Later on, in his Pittsburgh speech of October 19, 1932, he said:

Now the credit of the family depends chiefly on whether that family is living within its income. And this is so of the Nation. If the Nation is living within its income, its credit is good.

If in some cases it lives beyond its income for a year or two, it can usually borrow temporarily on reasonable terms.

But if, like a spendthrift, it throws discretion to the winds, is willing to make no sacrifice at all in spending, extends its taxing to the limit of the people's power to pay, and continues to pile up deficits, it is on the road to bankruptcy.

The Roosevelt administration has not had the courage to stop borrowing to meet continuing deficits. It has not stopped the deficits. On the contrary, it has thrown discretion to the winds, has been willing to make no sacrifice in spending, has extended the Federal taxing power to the limit of the people's power to pay, and has continued to pile up deficits. The result has been to carry the Nation further on the road to bankruptcy and at an accelerated pace.

PRESIDENT'S ECONOMY MESSAGE AN INDICTMENT OF HIS OWN ADMINISTRATION

Allow me to paraphase President Roosevelt's now-forgotten economy message of March 10, 1933. The only substantial change I shall make is to bring the figures up to date:

For 6 long years the Federal Government has been on the road toward bankruptcy.

For the fiscal year 1931 the deficit was $903,000,000.

For the fiscal year 1932 it was $3,153,000,000.

For the fiscal year 1933 it was $3,068,000,000.

For the fiscal year 1934 it was $3,989,000,000.

For the fiscal year 1935 it was $3,575,000,000.

For the fiscal year 1936 it was $4,764,000,000.

Thus we shall have piled up an accumulated deficit of $19,452,000,000.

With the utmost seriousness I point out to the profound effect of this fact upon our national economy. It has accentuated the stagnation of the economic life of our people. It has added to the ranks of the unemployed. Our Government's house is not in order, and for many reasons no effective action has been taken to restore it to order.

Upon the unimpaired credit of the United States Government rests the safety of deposits, the security of insurance policies, the activity of industrial enterprises, the value of our agricultural products, and the availability of employment. The credit of the United States Government definitely affects these fundamental human values. It, therefore, becomes our first concern to make secure the foundation. National recovery depends upon it.

Too often in recent history, liberal governments have been wrecked on rocks of loose fiscal policy. We must avoid this danger.

Thus, President Roosevelt's own language, taken from one of his messages to Congress, may be used as an indictment against his own administration. When he uttered the words of which the foregoing are a paraphrase, he was referring to an accumulated deficit of $5,000,000,000. Now it is nearly four times as much.

The fact that the President has failed to follow his own warning doubtless accounts for the fact that the New Deal administration has constituted a definite drag on recovery. Perhaps it accounts for the fact that some 12,000,000 men are still unemployed. Unquestionably, the administration's loose fiscal policy has undermined confidence and engendered fear as to our economic and financial stability.

A BRIEF HISTORY OF THE BUDGET-BALANCING PROMISES

It will be recalled that the Democratic platform of 1932 promised a Budget "annually balanced * * * within revenues." The first definite assurance of when the Budget would actually be balanced was made by President Roosevelt in his economy message of March 10, 1933. He said:

I ask that this legislation go into effect at once, without even waiting for the beginning of the next fiscal year. I give you assurance that if this is done, there is reasonable prospect that within a year the income of the Government will be sufficient to cover the expenditures of the Government.

FAILURE TO BALANCE BUDGET IN 1934 AS PROMISED

Congress enacted the legislation, but "within a year" the income of the Government was still a long way from being sufficient to cover its expenditures. The fiscal year ending June 30, 1934, closed with a deficit of nearly $4,000,000,000, which was a billion dollars greater than the year before. The income of the Government had increased from $2,000,000,000 to $3,000,000,000, but the expenditures, instead of being reduced, had increased from $5,000,000,000 to $7,000,000,000.

BUDGET BALANCING POSTPONED UNTIL 1936

When President Roosevelt sent his Budget message to Congress on January 4, 1934, he realized he would not be able to make good on his assurance to balance the Budget by June 30 of that year. He therefore postponed Budget balancing until 1936, saying:

The Government during the balance of this calendar year should plan to bring its 1936 expenditures, including recovery and relief, within the revenues expected in the fiscal year 1936.

It was well that the President postponed the date for 2 more years, because the fiscal year 1935 closed with a deficit of $3,575,000,000. Expenditures continued their upward trend, and the public debt rose to $28,701,000,000.

PRESIDENT HEDGED ON PROMISE IN 1935 BUDGET MESSAGE

In his Budget message of January 7, 1935, the President had already begun to hedge on his promise of a balanced Budget in 1936 which he had made the year before. Pointing out that unemployment was still large, he added:

For this reason it is evident that we have not yet reached a point at which a complete balance of the Budget is possible.

This was a frank admission that the spending program was a failure. Billions had been poured out, but we still had 12,000,000 unemployed.

FAILED TO BALANCE BUDGET IN 1936 AS PROMISED

The fiscal year 1936 has come to a close, but we find that the Budget is further out of balance than ever. With total expenditures of $8,880,000,000 against receipts of only $4,116,000,000, there was a deficit for the current year of $4,764,000,000.

Thus for "3 long years" we have been hearing promises of a balanced Budget, but as yet we have seen no performance. Matters are going from bad to worse.

PRESIDENT NOW AVOIDS DEFINITE PROMISE

When the President appeared before Congress at the opening of the present session of Congress the best he could say was that—

We approach a balance of the National Budget.

What he meant by that statement is hard to say. He certainly could not have used the word in the sense of making any progress toward a balanced Budget, because no progress has been made. The administration is not even "creeping" toward a balanced Budget. It can never hope to achieve a balance as long as it keeps increasing expenditures year by year.

NEW DEAL PLATFORM OF 1936 STILL PROMISES BALANCED BUDGET BUT DOES NOT SAY WHEN

The New Deal platform for 1936, as adopted by the Philadelphia convention, has this to say respecting expenditures and the Budget:

We are determined to reduce the expenses of government. * * * Our retrenchment, tax, and recovery programs thus reflect our firm determination to achieve a balanced Budget and the reduction of the national debt at the earliest possible moment.

In the light of the failure of the administration to carry out the 1932 platform pledges and all subsequent assurances of the President, this promise can be disregarded. How can the New Deal be determined to reduce governmental expenses when it increases them year by year? And who ever heard of the New Deal's "retrenchment program"? When did it ever have a definite tax program? How can the New Deal expect ever to reduce the national debt when it keeps piling up deficits at the rate of $4,000,000,000 annually? The "earliest possible moment" date for Budget balancing is extremely vague and is even more meaningless than the definite promises to achieve a balanced Budget in 1934 and again in 1936.

SUMMARY OF FISCAL RECORD OF THE NEW DEAL

At this point I shall insert in the RECORD a table which I have prepared which gives the complete fiscal record of the New Deal to date, that is, from March 4, 1933, to June 30, 1936:

Fiscal record of the New Deal, Mar. 4, 1933, to June 30, 1936

Date	Expenditures	Receipts	Deficit	Tax measures enacted during fiscal year with estimated revenue[1]		Public debt
Mar. 3, 1933						$20,937,000,000
Mar. 4, 1933, to close of fiscal year ending June 30, 1933 (4 months).	$1,767,000,000	$862,000,000	$905,000,000	Beer tax	$150,000,000	22,539,000,000
				Processing taxes	500,000,000	
				N. I. R. A.:		
				Special taxes	227,000,000	
				Extension of nuisance taxes	300,000,000	
				Extension of gasoline tax and 3-cent postage rate	200,000,000	
					1,377,000,000	
Fiscal year ending June 30, 1934.	7,105,000,000	3,116,000,000	3,989,000,000	Liquor taxes	467,000,000	27,053,000,000
				Revenue Act of 1934	417,000,000	
					884,000,000	
Fiscal year ending June 30, 1935.	7,375,000,000	3,800,000,000	3,575,000,000	Extension of nuisance taxes, including gasoline and 3-cent postage.	500,000,000	28,701,000,000
Fiscal year ending June 30, 1936.	8,880,000,000	4,116,000,000	4,764,000,000	Pay roll taxes, Social Security Act	[2] 2,500,000,000	33,779,000,000
				Pay roll taxes, Railroad Retirement Act	[3] 100,000,000	
				Revenue Act of 1935	250,000,000	
				Revenue Act of 1936	800,000,000	
					[2] 3,650,000,000	
Totals	25,127,000,000	11,894,000,000	13,233,000,000		(4)	
Increased in public debt						12,842,000,000

[1] List does not include taxes under Bankhead Cotton Act, Smith-Kerr Tobacco Act, or Potato Control Act, all of which have been repealed, or under Bituminous Coal Act, which was held unconstitutional.
[2] Budget estimate for pay roll taxes for 1937 is $433,000,000. Amount increases gradually until maximum rates become applicable in 1949, yielding $2,500,000,000 annual revenue.
[3] Budget estimate for 1937.
[4] Not possible to total due to overlapping, repeals, etc.

THREE WAYS TO BALANCE A BUDGET

The uncontrolled spending orgy of the New Deal, coupled with the policy of borrowing without limit to meet recurring deficits of gigantic proportions, will eventually lead the country to ruin. The only question is how soon.

The Nation's credit can be saved only by a determined effort at Budget balancing. There are three ways by which this may be done: (1) By imposing sufficient new taxes to meet the prodigal spending program; (2) by reducing expenditures to meet existing revenues; or (3) by a combination of increased taxes and reduced expenditures. Those in charge of the New Deal's spending program seem to know little about these elementary facts and they care less.

NEW DEAL TAXES FAILED TO HELP BUDGET BALANCING

Since the New Deal administration has been in power, numerous taxing statutes have been enacted, but with no apparent effect on Budget balancing. This is not strange, however, since none of its taxing acts have been aimed at balancing the Budget.

The $150,000,000 of new revenue under the 3.2 percent beer law of 1933 was purely incidental to the modification of the Volstead law.

The $500,000,000 annual processing taxes imposed under the Agricultural Adjustment Act were earmarked for payment to farmers.

The $227,000,000 of special taxes imposed under the National Industrial Recovery Act were earmarked for amortization of the $3,300,000,000 public-works appropriation which that act provided.

The extension of the nuisance taxes for an additional year under the same act provided no new revenue.

The extension of the tax on gasoline and the 3-cent rate on first-class postage also produced no new revenue.

The $467,000,000 of new revenue under the Liquor Taxing Act of 1934 was purely incidental to the repeal of the eighteenth amendment.

The $417,000,000 of new revenue under the Revenue Act of 1934 resulted incidentally from plugging up loopholes in the tax law.

The extension of the nuisance taxes for a second time again produced no new revenue.

The two pay-roll taxes under the Social Security Act, which will eventually impose a burden of $2,500,000,000 annually on employers and employees, are earmarked for unemployment insurance and old-age retirement.

The pay-roll tax under the Railroad Retirement Act is also earmarked.

The $250,000,000 of revenue resulting from the Revenue Act of 1935, otherwise known as the President's "share the wealth" tax measure, was purely incidental to the social purposes of the act.

Of the $800,000,000 of new revenue under the recently enacted Revenue Act of 1936, $500,000,000 takes the place of the unconstitutional processing taxes and is earmarked for benefit payments to farmers. Another $120,000,000 is for amortization charges incident to the payment of the bonus before maturity. The balance goes to reimburse the Treasury for processing taxes it was unable to collect on account of the invalidation of the Agricultural Adjustment Act. Hence all the Revenue Act of 1936 does is to preserve the status quo as it existed prior to the Supreme Court's decision in the A. A. A. case and prior to the legislation providing for the bonus payment. The 1936 and 1937 Budgets are as much out of balance as they were before the new tax law was enacted.

TENDENCY OF NEW DEAL TAXATION HAS BEEN TO SHIFT BURDEN TO THOSE LEAST ABLE TO PAY

In connection with the tax legislation enacted under the present administration, it should be pointed out that the New Deal has shifted the burden of taxation from those best able to bear it to those least able.

The Democratic platform of 1932 calls for taxes "levied on the principle of ability to pay." Candidate Roosevelt, in his Albany speech of July 30, 1932, interpreted this platform plank as follows:

> This is a declaration in favor of graduated income, inheritance, and profits taxes, and against taxes on food and clothing, whose burden is actually shifted to the consumer.

In spite of this declaration, the second taxing act of the Roosevelt administration was that providing for processing taxes on the very necessaries of life—food and clothing. Secretary of Agriculture Wallace in his annual report for 1934 admitted that these taxes fell heaviest on the "poorer people." Translated into increased costs of food and clothing, they were higher in proportion than the income and estate taxes, which are based on ability to pay.

The Roosevelt administration twice continued the nuisance taxes, once for 1 additional year and again for 2 additional years. These taxes are, of course, levied on consumption, without reference to ability to pay.

In 1930, according to a statement made by the General Counsel for the Bureau of Internal Revenue before the Senate Finance Committee last year, 68.2 percent of the taxes collected were based on ability to pay, and only 31.8 percent

were so-called consumption taxes. In 1935, under the New Deal, this situation was completely reversed. At that time 61.3 percent were hidden consumption taxes and only 38.7 percent were based on ability to pay. This is something for the man of small income to ponder over. It is not merely another broken campaign promise but it is a broken promise that adversely affects every single person in the country who has limited means.

WHERE WILL MONEY FOR NEW TAXES COME FROM?

If the administration were to balance the Budget by the imposition of new taxes, we have seen that it would have to double the present tax load. Some $4,000,000,000 of additional revenue would have to be raised, and the question is, Where can it be had?

The answer is very simple. The taxes on the wealthy have been increased several times and they now border very near to confiscation. Even if actual confiscation took place, there would not be much more revenue from this source. Business has been taxed and taxed until it can hardly exist under the load. The only place to turn for more money is to the great masses of our people—those with small and moderate means. The sooner the people realize this the sooner the spending orgy is going to stop.

HOW TAXES HAVE INCREASED UNDER NEW DEAL

The increase in the tax burden under the New Deal is shown in the following table of tax collections since the fiscal year 1933:

1933	$1,620,000,000
1934	2,672,000,000
1935	3,299,000,000
1936	3,513,000,000
1937 (Budget estimate)	5,140,000,000

It will be seen that there has been a steady increase year by year.

It is possible that eventually, if enough taxes were piled upon the backs of the taxpayers, the Budget could be balanced by this method. However, there is grave question whether business and the people could stand the load. Certainly, any further increase would be a serious threat to recovery.

A few moments ago I pointed to three ways by which the Budget could be balanced. The New Deal has not tried any one of these three ways. It has imposed taxes, it is true, but never with a view to Budget balancing.

The second of these three methods was by reducing expenditures. The New Deal has never tried this method. Nor has it tried the third method of combining increased taxes with reduced expenditures.

EVERY DOLLAR OF EXPENDITURES SAVED MEANS A DOLLAR OF NEW TAXES AVOIDED

It goes without saying that every dollar of unnecessary expenditure saved means a dollar of new taxes avoided. In view of the exhaustion of other tax sources by the administration, savings by this method would really mean the avoidance of new taxes on the great masses of our people.

The Republican minority in Congress, in opposing the administration's tax legislation, have taken the view that if Government expenditures were reduced to a reasonable basis a large part of the coming tax burden could be avoided.

TAXPAYERS' MONEY BEING SQUANDERED

There can be no question but what the administration spendthrifts are wasting hundreds of millions on every hand. There can be no question but what hundreds of millions are being spent unnecessarily and extravagantly. There also can be no question but what hundreds of millions are being spent for purely political purposes with a view to entrenching the New Deal political machine in power.

THE QUESTION OF RELIEF

I do not wish to be understood as suggesting that all relief expenditures should be abandoned. There has already been some evidence that New Deal partisans will attempt to sway thousands of votes during the coming election campaign by making the charge that if the Republican Party is put in control there will be no more relief. Of course, any such charge is utterly false and deliberately misleading. The Republican Party is committed to the continuance of necessary Federal appropriations for relief, but in the interest of economy, efficiency, and humanity it proposes to transfer the actual administration of relief to nonpolitical local agencies familiar with local relief problems.

ELIMINATION OF UNNECESSARY EXPENDITURES SHOULD PRECEDE ANY TAX INCREASE

Along with my Republican colleagues in Congress I am unalterably opposed to any further increase in the tax burden until it can be determined to what extent expenditures can be reduced without impairing any of the ordinary functions of Government and without denying adequate relief to the needy. After that is done, I am willing to cooperate in the enactment of the necessary tax legislation to assure the maintenance of the Nation's credit, and I am sure that the people will shoulder any necessary increase in taxes under those conditions. But the New Deal is not giving the people a square deal when it wantonly squanders their hard-earned tax money, keeps calling for more and more, and even mortgages their future earnings by piling up huge deficits that they must eventually pay.

It is a difficult task for Congress to find sources of taxation where it can raise new revenue. Likewise, it is difficult for those who are called upon to pay increased taxes to find the money with which to meet them. But it would be an easy matter for the administration to eliminate $100,000,000 or $500,000,000, or even $1,000,000,000, of unnecessary expenditures and thus avoid the necessity for new taxes of a corresponding amount. This is a matter which the New Dealers do not seem to understand.

REPUBLICANS REDUCED WORLD WAR DEBT AND TAXES AT SAME TIME

Contrast the record of the Republican Party with that of the new dealers. The Republicans inherited the World War debt. The highest post-war debt, according to the Treasury Department, was $26,597,000,000 on August 31, 1919. In December 1919 the Republicans came into control of both Houses of Congress. While a Democrat was still President, the Republicans had the supervision of the Nation's purse strings. The lowest post-war debt was $16,026,000,000 on December 31, 1930. From December 1919 down to and including December 1930 the Republicans were in control of both branches of Congress, and they were in control of the Presidency after March 1921. During this period the debt was reduced by $10,500,000,000, or at the rate of approximately $1,000,000,000 annually. Not only did the Republican Party reduce the debt by that amount, but during the same period it reduced taxes four separate times, as follows:

Republican tax reductions

Revenue Act of 1921	$663,000,000
Revenue Act of 1924	519,000,000
Revenue Act of 1926	422,000,000
Revenue Act of 1928	222,000,000
Total reductions	1,826,000,000

The new dealers increase taxes all the time yet keep on increasing the public debt. The Republican Party reduced taxes and still reduced the public debt. If the Republicans are returned to power in November, business would undoubtedly recover to such an extent that the present tax structure would more than be sufficient to meet all necessary expenditures, and possibly the history of the 1920's would repeat itself—tax reduction and debt reduction going hand in hand.

REPUBLICAN PLATFORM OF 1936 PLEDGES BUDGET BALANCING BY REDUCED EXPENDITURES RATHER THAN INCREASED TAXES

The financial plank of the Republican platform of 1936 constitutes a reassuring and welcome message to the American people. It reads:

The New Deal administration has been characterized by shameful waste and general financial irresponsibility. It has piled deficit upon deficit. It threatens national bankruptcy and the destruction through inflation of insurance policies and savings-bank deposits.

We pledge ourselves to—

Stop the folly of uncontrolled spending.

Balance the Budget—not by increasing taxes but by cutting expenditures, drastically and immediately.

Revise the Federal tax system and coordinate it with State and local tax systems.

Use the taxing power for raising revenue and not for punitive or political purposes.

I call particular attention to the pledge to balance the Budget "not by increasing taxes but by cutting expenditures, drastically and immediately." This pledge will be kept. The people know it will be kept. At the same time, they know by past experience that the pledge to reduce expenditures contained in the New Deal platform will not be kept.

DISCUSSION OF THE REVENUE ACT OF 1936

I shall now refer briefly to the details of the new revenue law enacted by the present session of Congress under the lash of the President, which is known as the Revenue Act of 1936. This is really a misnomer, however, as the measure is not entirely one to raise revenue, but, like many other New Deal measures, it uses the taxing power as a means of achieving other ends which cannot be reached directly. In this case the end sought is to force corporations to distribute their current earnings, irrespective of the needs of the business.

In his message to Congress of March 6, 1936, President Roosevelt outlined his proposed plan substantially as follows: All existing corporate taxes yielding an assured revenue of over $1,000,000,000 annually were to be repealed. In their place was proposed a graduated tax or penalty based wholly on the percentage of current corporate income not distributed to stockholders.

The Democratic majority on the Ways and Means Committee, while not at all enthusiastic about the President's proposal, decided that with a Presidential election in the offing they could not afford to disregard his wishes and accordingly set to work to draft a bill in conformity with his suggestions.

OVERWHELMING OPPOSITION TO PRESIDENT'S PLAN AT HEARINGS

Hearings were held before any bill had been prepared, and witnesses therefore were handicapped in testifying. Outside of Treasury officials, and one other Government employee, only two persons appeared in support of the President's plan. One was a young lawyer with certain theories of his own regarding taxation, and the other was a representative of the Communist Party. Every businessman who appeared opposed the plan as revolutionary, dangerous, unwise, and unjust. No one of experience or ability in the field of taxation supported it. Even the committee's own tax expert, Mr. L. H. Parker, was on record as being opposed to the plan.

While the scheme was in line with Professor Tugwell's proposal to use the Federal taxing power as a means of forcing the distribution of corporate earnings, the moving spirit behind it seemed to be Professor Oliphant, General Counsel of the Treasury Department, who has rapidly risen in the good graces of the President but whose only knowledge of tax problems and business affairs had been gleaned from books and the classroom.

DEMOCRATS DRAFT BILL IN SECRET MEETINGS

In spite of the overwhelming opposition to the plan, the Democratic majority on the committee went into secret executive sessions to draft a bill. The Republican members of the committee saw the bill for the first time the day it was introduced and reported to the House.

As worked out by the Democrats on the committee, the bill repealed all existing corporate taxes as recommended by the President, and provided for a tax of as high as 42½ percent on corporate incomes, graduated according to the amount of current earnings not distributed.

REPUBLICANS OPPOSED PROPOSED SCHEME

I joined with my Republican colleagues on the Ways and Means Committee in a minority report opposing the bill on numerous grounds. One of the principal objections was that it would allow a large, well-financed corporation, which could afford to distribute all its current earnings, to avoid taxation altogether, while absolutely crucifying a small, weak corporation which must retain its earnings. In the case of a corporation with $100,000 income, for example, the most that it could possibly have retained under the House bill was $57,500, because the 42½-percent tax would take the balance.

SENATE REJECTED HOUSE BILL

The bill passed the House over Republican opposition, but the Senate very wisely refused to accept the President's radical tax plan. The Senate Finance Committee, in reporting against the House bill, raised virtually the same objections to it that the Republican members of the Ways and Means Committee had raised. As a substitute for the House bill the Senate retained the existing corporate-income tax but increased the rates by 3 percent. Then, as a gesture to the President, it reluctantly adopted a flat tax of 7 percent on undistributed earnings to be imposed in addition.

COMPROMISE BILL MOSTLY RESEMBLED HOUSE PROVISIONS

The bill was then sent to conference to adjust the differences between the Senate and House provisions. The result was a hybrid measure combining the conflicting tax schemes of both bills, but which in its general outline mostly resembled the discredited House bill.

The compromise was based upon no sound premise, but was accepted only in order to eventually comply with the dictates of the President. In the haste to come to some agreement, so that the Democratic Members of Congress could attend the Democratic convention in Philadelphia, the conferees did not even take the trouble to agree upon definite provisions. The legislative drafting experts were practically given a blank check to write the bill. Not a single member of the conference committee in either branch saw a copy of the completed draft before the conference reports were made to each House.

CONFERENCE REPORT ADOPTED WITHOUT PRINT AVAILABLE

The conference report was called up in the House without even a print of it available. There was not even an extra typewritten copy for the minority members to see. I doubt if even the majority members had a copy. It is possible that even the reading clerk did not have one, because the report was not read, as is the ordinary custom. No one attempted to explain the report in any detail, because no one was able to. It was under these circumstances that an $800,000,000 revenue bill became a law. This measure was an outstanding example of the type of ill-advised legislation that is sure to result from an effort to carry out an arbitrary "must" program of the President in the closing hours of a congressional session without adequate consideration or study and without intelligent debate.

PROVISIONS OF 1936 REVENUE ACT AS FINALLY PASSED

The new act provides the following plan of corporate taxation:

First. The present graduated income tax on corporations is retained, but with the following rates:

Net income

	Percent
First $2,000	8
Next $13,000	11
Next $25,000	13
All over $40,000	15

Second. In addition, there is imposed on that part of the corporate earnings withheld from distribution a supertax, as follows:

Income not distributed

	Percent
First 10 percent	7
Next 10 percent	12
Next 20 percent	17
Next 20 percent	22
All over 60 percent	27

The normal corporate income tax is treated as a distribution and is therefore deducted in computing the percentage of income withheld. In the case of corporations with adjusted net incomes of less than $50,000 the minimum rate of 7 percent is applicable to the first $5,000 withheld, regardless of the percentage which it bears to the total.

Third. Corporate dividends received by stockholders are henceforth to be subject to the normal individual income tax

of 4 percent as well as to the surtax. This, of course, constitutes double taxation.

Fourth. Banks and insurance companies are to be taxed at a flat rate of 15 percent on their income and are to be exempt from the supertax on amounts withheld from distribution.

Fifth. Corporations in receivership are to be subject to the graduated corporate income tax, but exempt from the supertax. Corporations under contract not to pay dividends are to be subject to the graduated corporate income tax, but exempt from the supertax to the extent to which they are restricted. Common trust funds operated by banks and certain classes of investment trusts are also given special treatment.

Sixth. Foreign corporations are exempted from both the graduated corporate income tax and the supertax, but pay a flat tax on their income. The rate is 15 percent on nonresident foreign corporations and 22 percent on resident foreign corporations.

Seventh. The special taxes on corporations improperly accumulating surpluses and on personal holding companies are reduced by 10 percent and 12 percent, respectively.

Eighth. The present exemption of intercorporate dividends from the normal corporate income tax is reduced from 90 percent of the amount of such dividends to 85 percent.

Ninth. The present capital-stock tax is continued, but the rate reduced to $1 per $1,000 of declared value. The present excess-profits tax is continued at the existing rates.

EFFECT OF LAW NOT CONFINED TO CORPORATIONS

The foregoing are the important provisions of the new law in connection with corporations. Their net effect, along with certain other provisions of the bill, will be to increase the tax burden by approximately $800,000,000. This money will come not only from corporations themselves but from their stockholders as well, both large and small. While it may appear at first blush that this new tax measure is imposed primarily on business, its effect will be felt by every citizen. Simply because the man on the street is not directly taxed by the bill is no assurance that he will not be affected by it. As Candidate Roosevelt said in his Pittsburgh speech during the 1932 campaign:

> Our workers may never see a tax bill, but they pay in deductions from wages, in increased cost of what they buy, or (as now) in broad cessation of employment.

Never was this more true than with respect to the measure just enacted.

It not only increases the tax burden, but by penalizing the accumulation of "rainy day" reserves it tends to weaken the whole business structure, thereby jeopardizing the stability of our economic system and threatening the security of jobs and investments.

IMPORTANCE OF CORPORATE RESERVES

The importance of corporate reserves to business stability and to the maintenance of employment has been clearly demonstrated during the depression. Thousands of businesses were enabled to keep their doors open, maintain employment, and pay dividends because they had built up reserves during good times. If the tax policy prior to the depression had been such as to penalize prudent business management, as does the act just passed, there is no telling how much worse the depression might have been.

According to figures published by the Department of Commerce, American business in the 5-year period from 1930 to 1934, inclusive, distributed in wages, dividends, and so forth, $26,600,000,000 more than it earned. This contribution which business made to recovery was made possible only by drawing upon its savings, which the law just passed would now discourage. No stronger argument could be advanced against the President's unsound plan of penalizing the accumulation of reserves than this.

NEW TAX PLAN WILL HAVE RETARDING EFFECT ON RECOVERY

Not only does the new tax on undistributed earnings discourage prudence and thrift but it also puts a penalty on earnings used for purposes of business expansion and business rehabilitation. This will have a retarding effect upon recovery and reemployment.

The President's new tax plan encourages monopoly by imposing higher taxes on financially weak corporations which are not in a position to distribute all their earnings than on large, strong corporations which have huge reserves on hand and can thus avoid the penalty tax by distributing all current earnings to stockholders. It further encourages monopoly by making it more difficult for new corporations to become established in competition with those already in the field.

The President's new tax plan brings about unequal competitive conditions between corporations by imposing a higher tax on one than on another, even though the net income may be the same.

Corporations which must borrow money to carry on their business are penalized because they must pay a penalty on earnings retained for debt-paying purposes.

ANOTHER EXAMPLE OF REGIMENTED FEDERAL CONTROL

In effect, the undistributed earnings tax is simply the exertion of pressure by the Government, under the guise of the taxing power, to force the distribution of corporate earnings, irrespective of the needs of the business. It substitutes regimented Federal control for the prudent business judgment of the officers and directors of the corporation. Scores of other objections could be cited to this unwise and unsound policy. It will certainly be abolished just as soon as the New Deal theorists and experimenters can be turned out of office.

II. TARIFF REDUCTIONS UNDER THE NEW DEAL

With respect to the tariff question, the issue is clearly drawn between the New Deal and the Republican Party. The New Deal stands for the increased importation of foreign goods that compete with the products of American farmers, manufacturers, and workingmen. The Republican Party, on the other hand, stands for a protective-tariff policy that will insure American agriculture, industry, and labor the first opportunity to supply the goods consumed in the home market and that will maintain American wages and the American standard of living.

NEW DEAL HAS REDUCED TARIFFS ON HUNDREDS OF ITEMS

The New Deal tariff policy is exemplified by its foreign trade treaty program, which is being carried on under the direction of the Secretary of State, an acknowledged low-tariff advocate. Under the 14 trade treaties which thus far have been negotiated, our tariff rates have been drastically lowered on several hundred agricultural and manufactured products. These trade treaties are supposedly reciprocal, but they have had the effect of trading off our rich home market for lean foreign markets. They hold out no hope of any net benefit to this country, since the tariff concessions which we make under a treaty with one country are extended to all other countries in the world, with the exception of Germany, without requiring these other countries to give us reciprocal concessions in return. Thus, to say the least, the treaties are extremely one-sided in favor of foreign countries.

The New Deal platform of 1936 attempts to cover up the administration's disastrous tariff policy of the last 3 years by advocating "adequate protection to our farmers and manufacturers." We are warned by the Good Book that "by their deeds ye shall know them."

We also know that actions speak louder than words. Under its trade-treaty program the administration has carried on a piecemeal destruction of the tariff protection afforded by the Republican Tariff Act of 1930. Following are a few of the agricultural products on which duties have been reduced under the 14 New Deal trade treaties which have been negotiated up to the present time: Cattle, cream, cheese, poultry, honey, pearl barley, corn, apples, cherries, blueberries, grapefruit, lima beans, peas, potatoes, tomatoes, turnips, cucumbers, eggplant, okra, peppers, squash, cabbage, hay, cane and beet sugar, maple sugar, wrapper tobacco, filler tobacco, potato starch, wines, and flax.

The list of manufactured products on which reductions have been made is very long, and it would be difficult to pick out representative items. However, it may be pointed out that numerous reductions are made in each of the 15

dutiable schedules, affecting imported products that compete directly with goods manufactured in this country.

TRADE-TREATY PROGRAM BASED ON FALSE PREMISE

It is thus clear that instead of protecting the home market the New Deal has invited further competition from abroad. Such was its declared purpose when the legislation authorizing the trade-treaty program was passed. It was argued that the only way we could regain our foreign trade was by allowing foreign countries to sell us more of their products. In spite of the fact that two-thirds of our imports, on a value basis, were already free of duty, the New Deal insisted that the gates should be opened wider to foreign goods.

The fallacy of the administration's program has already been demonstrated. Although in 1935 we increased our merchandise imports by $392,000,000 over the previous year, our exports only increased by $149,000,000. In other words, for every $3.92 in additional purchasing power we gave to foreign countries we received back $1.49, leaving us with a net loss of $2.43 on the transaction. When we take into consideration the other items entering into our foreign commerce, such as our gold and silver purchases, tourists' expenditures, immigrant remittances, and so forth, our loss is much greater, and the administration's false theory is more completely exploded. For example, in 1934 these items transformed our favorable balance of merchandise trade into a net unfavorable balance of total trade of $970,000,000. In 1935 the net unfavorable balance was in excess of $2,000,000,000. In 2 years, therefore, we had a net unfavorable balance of total trade of nearly $3,000,000,000. This huge sum represented the excess of dollar credits in the hands of foreigners over the amount necessary to pay for the goods purchased in this country. This net debt was paid to the foreigners not by the sale of more goods but by the transfer of capital assets.

AMERICAN PRODUCERS BEING SOLD OUT UNDER NEW DEAL PROGRAM

These trade treaties do not bind foreign countries to purchase any goods in our markets. What is happening is that they are taking advantage of the opportunity which the New Deal afforded them to sell in the United States, but they are spending their money elsewhere. There is nothing to indicate that a continuation of the New Deal's good-neighbor policy will have any different result. American producers are being sold out and we are receiving no compensating benefits from foreign countries.

FARM EXPORTS DECLINING—FARM IMPORTS INCREASING

Our farmers were promised an outlet for their surplus commodities as soon as the trade-treaty program got under way. Instead they have seen their foreign markets shrink still further. For example, our exports of wheat and wheat flour declined from 36,000,000 bushels in 1934 to 16,000,000 bushels in 1935. In the same period, exports of tobacco declined from 419,000,000 pounds to 381,000,000 pounds. Exports of pork declined from 84,000,000 pounds to 62,000,000 pounds. Exports of lard declined from 431,000,000 pounds to only 96,000,000.

While farm exports have declined, farm imports have tremendously increased. From 1934 to 1935 imports of canned beef rose from 47,000,000 pounds to 76,000,000 pounds; wheat from 8,000,000 bushels to 27,000,000 bushels; corn from 3,000,000 bushels to 43,000,000 bushels; oats from 5,000,000 bushels to 10,000,000 bushels; barley malt from 193,000,000 pounds to 320,000,000 pounds; and egg products from 3,000,000 pounds to nearly 8,000,000 pounds.

EXPANSION OF FOREIGN TRADE NOT A NEW DEAL ACHIEVEMENT

Senator BARKLEY, in his keynote address before the Democratic Convention, sought to give the administration's trade-treaty program sole credit for the increase in our foreign trade from $2,933,000,000 in 1932 to $4,330,000,000 in 1935. As a matter of fact, the trade-treaty legislation was not passed until June 1934, and the first treaty, which was that with Cuba, did not go into effect until September 1934. Only three additional treaties became effective in 1935, that with Belgium on May 1, that with Haiti on June 3, and that with Sweden on August 5.

From 1932 to 1933 our total foreign trade increased from $2,933,000,000 to $3,125,000,000, or by $192,000,000. This increase was wholly under the much-maligned Republican Tariff Act of 1930.

From 1933 to 1934 our total foreign trade increased from $3,125,000,000 to $3,788,000,000, or by $663,000,000. With the exception of the possible limited effect of the Cuban treaty in the last 4 months of 1934, this increase also was entirely under the Republican Tariff Act of 1930.

From 1934 to 1935 our total foreign trade increased from $3,788,000,000 to $4,330,000,000, or by $542,000,000. It is obvious that the greatest part of this increase must have taken place under the Republican Tariff Act of 1930, since trade treaties were in effect only with four small countries, and for only a part of the year in the case of three of them.

IMPORTS INCREASE MORE THAN EXPORTS UNDER TREATY PROGRAM

When we break down our total trade into imports and exports, the effect of the trade-treaty program can be clearly shown. From 1933 to 1934 our exports increased 27 percent, but from 1934 to 1935 they only increased 7 percent. Thus, so far as our export trade is concerned, the rate of increase has been much smaller since the trade-treaty program became effective than before.

In the case of our import trade, however, the situation is just reversed. Our imports increased only 14 percent between 1933 and 1934 as compared with a 24-percent increase from 1934 to 1935.

This comparison of exports and imports before and after the trade-treaty program is proof of my previous statement that we are trading off our rich domestic market for lean foreign markets. I again point out that while a trade treaty with one country only affects our export trade with that one country, our imports from the whole world are affected, because all countries are given the benefit of our reduced duties which we extend to a particular country although we get no concessions from them. Thus the trade treaties result in a disproportionate increase between exports and imports, which adversely affects our domestic producers.

TRADE TREATIES HAVE RESULTED IN ADVANTAGE TO FOREIGN COUNTRIES

Even as regards our trade with particular treaty countries, excluding the adverse effects of generalizing our reductions in favor of other countries, we have come out on the short end of the bargain. This can be proven by reference to the official trade figures. For example, the Department of Commerce, on March 8, 1936, issued a mimeographed pamphlet dealing with our foreign trade in 1935. On page 7 reference is made to the trade treaty with Sweden. Then follows this statement:

> Compared with the corresponding periods of 1934, exports of United States merchandise to Sweden increased 15 percent in the period prior to the effective date of the agreement and 16 percent in the period following the agreement.
>
> Comparing imports during corresponding periods of 1934 and 1935, the value of our imports from Sweden in the period prior to the agreement increased 9 percent and in the period following the agreement increased 34 percent

Thus we have the story: Exports increased from 15 percent to 16 percent; imports from 9 percent to 34 percent. We give much and get little.

This same Department of Commerce publication also refers to our trade with Belgium. It says:

> Our exports to Belgium increased 16 percent over 1934, and our share of Belgium's import trade was larger than in 1934.

It will be noted that the figure is given for the increase in exports, but not for the increase in imports. Perhaps there was a reason. Our imports from Belgium increased from $26,000,000 in 1934 to $40,000,000 in 1935, or by more than 50 percent.

The administration is always publicizing the increase in exports, but it says little, if anything, about the increase in imports. The Secretary of the Treasury, in a press release dated October 31, 1935, perhaps inadvertently showed how the Cuban treaty had adversely affected our domestic producers. Comparing our trade with Cuba in the 12-month period prior to and after the effective date of the Cuban treaty, he pointed out that our exports to Cuba increased only

$21,000,000 as compared with an increase in imports of $103,000,000. In terms of percentages the respective increases were 58.8 percent in the case of exports and 213.3 percent in the case of imports.

It is quite apparent that the trade treaties which have been negotiated have been bad bargains. What makes them appear even worse is the fact that we have increased our exports to nearly all nontreaty countries without giving up any consessions in our home market in return. In the case of the United Kingdom alone our exports in 1935 were $50,000,000 greater than in 1934.

TREATIES NEGOTIATED IN STAR-CHAMBER PROCEEDINGS

One of the most reprehensible features of the trade-treaty program is the fact that the treaties are negotiated with foreign representatives by a group of theorists in the State Department in secret star-chamber proceedings, from which American producers are excluded. No opportunity is afforded for the representatives of American agriculture, industry, or labor to be heard with respect to the treaties once they have been negotiated, nor are the treaties subject to ratification by either House of Congress. Under such procedure, representative government becomes a mockery.

NO PRECEDENT FOR PRESIDENT'S POWERS UNDER TRADE-TREATY LEGISLATION

Senator BARKLEY, in his remarks before the Democratic convention, to which I have already referred, attempted to justify the constitutionality of the trade-treaty legislation by saying that Congress had from time to time ever since 1789 conferred similar authority on the President in the interest of foreign trade. Such, however, is not the case.

The Supreme Court has many times held that Congress cannot delegate its legislative authority to the President. The New Deal Congress, in giving the President the right to reduce tariff rates in pursuance of trade treaties negotiated by him, confers on him legislative authority in violation of the Constitution. It is true that the Supreme Court has upheld the powers given to the President under the so-called flexible tariff provisions of the present tariff act, but in so doing it pointed out that Congress did not give the President discretionary authority, since it laid down a definite rule or yardstick which the President was required to follow in adjusting duties either up or down—namely, the difference in cost of production formula. No such rule or yardstick is laid down in the trade-treaty legislation. The President can use his own discretion both as to the items to be affected and as to the rate to be fixed. The only limitation is that he cannot go beyond 50 percent of the statutory rate, but this merely puts a limit on the amount of discretion he may use. Within that limit he exercises legislative powers.

New Deal orators also attempt to show that under past Republican administrations the President has been empowered to enter into trade treaties. It is true that the President was given certain authority under the tariff acts of 1890 and 1897 respecting reciprocal agreements with foreign countries, but in both instances Congress named a specific list of articles which might be the subject of negotiation, and at the same time determined in advance the precise reductions in duty that might be made or the penalty duties that might be imposed. No President had any discretionary legislative authority under any previous Republican tariff legislation.

Where the President has been given general treaty-making authority in the past, it has always been provided that any trade treaties negotiated under such general power should be ratified by the Senate and approved by the House of Representatives before becoming effective. The New Deal treaties are not even ratified by the Senate, as required by the Constitution.

REPUBLICAN ATTITUDE ON RECIPROCITY

The Republican Party has favored reciprocity in the past, but only under constitutional methods and only when it could be effected consistent with the principles of protection and without injury to American agriculture, American industry, or American labor. That is the policy of the party today.

In this connection I might point out that the reduction of our duties on competitive foreign products is not the only way of securing benefits for our exports in foreign markets. We should keep in mind that the imposition of provisional penalty duties on the tremendous quantity of foreign products now enjoying free access to our market would be an effective method of securing fair treatment for our export products abroad. Provision could be made for the suspension of such penalty duties with respect to imports from all countries which did not discriminate against American commerce.

REPUBLICAN PLATFORM PROMISES REPEAL OF TRADE-TREATY LAW

The Republican platform of 1936 calls for the repeal of the New Deal trade-treaty legislation under which our rich domestic market is being surrendered to foreigners. I have advocated this ever since the law was enacted. I bitterly fought its enactment. It has worked out just as I prophesied, namely, to the great detriment of the country as a whole.

I cannot close this reference to the tariff more appropriately than by quoting the following passage from my remarks of June 14, 1934:

> In the coming elections, the Democrats will have to justify their votes in giving the President this unconstitutional and dictatorial authority over the tariff and over all domestic industries dependent upon tariff protection. They will have to answer for giving him this power to say what our people shall produce at home and what they shall buy abroad. They will have to explain by what principles of fairness and justice one industry may be destroyed in order to benefit another. They will have to demonstrate by what economic laws the importation of foreign agricultural products can rid our farmers of their surpluses; how the importation of more industrial products can reopen our own factories, and how the displacement of American by foreign labor can reduce the army of the unemployed. * * *
>
> The Republican Party awaits with expectancy the opportunity to meet the issues raised by this bill before the American people in November. Having adhered to our traditional position of preserving the home market for American industry, agriculture, and labor, we are confident of the outcome.

III. THE ONE BIG ISSUE OF THE ELECTION CAMPAIGN

For practical purposes, all the various issues of the coming election campaign can be summarized into one: Do the people want 4 more years of the New Deal? On this question I think there can be no doubt but that the great majority of the voters in November will give a negative answer. They were misled in 1932 by the promises of the New Deal candidate and the pledges of the New Deal platform, but they will not be misled again.

In 1932 the New Deal platform said:

> We believe that a party platform is a covenant with the people to be faithfully kept by the party when intrusted with power, and that the people are entitled to know in plain words the terms of the contract to which they are asked to subscribe.

This solemn declaration was followed by specific pledges to reduce expenditures, abolish useless bureaus, eliminate extravagance, balance the Budget, preserve a sound currency, free the tariff from Executive interference, strengthen the antitrust laws, remove the Government from business, prevent the improper and excessive use of money in political activities, and to do a host of other things. The New Deal has deliberately broken faith with the people by failing to keep these "covenants."

NEW DEAL PLEDGES BROKEN

Disregarding its pledges, the New Deal has tremendously increased the cost of government; it has set up a vast bureaucracy by the creation of 60 or 70 new Federal agencies, adding 250,000 of the party faithful to the public pay roll; it has squandered and wasted the people's money; it has unbalanced the Budget more than ever; it has undermined the security of our money; it has delegated tariff- and treaty-making authority to the President; it has nullified the antitrust laws; it has put the Government in competition with private business; it has used the Federal Treasury as a campaign chest to intrench itself in power; and it has in many other respects dishonored the people's trust.

CENTRALIZATION OF POWER UNDER NEW DEAL

Not only has the New Deal administration violated its specific pledges, but it has adopted many policies which were

not mentioned in "plain words" in the so-called "contract" to which the voters in 1932 subscribed. It has put into effect many of the proposals advocated by the Socialist Party in its 1932 platform. But of more consequence are the efforts which the New Deal has made to undermine our Constitution, break down its system of checks and balances, destroy our established institutions, infringe upon the liberties of our people, invade the rights of the States, and set up in Washington an all-powerful bureaucratic dictatorship with the President at its head. Nothing was said in the New Deal platform of 1932 about these revolutionary changes in our governmental system.

NEW DEAL PLATFORM NO LONGER A COVENANT WITH THE PEOPLE

It is not strange that the New Deal platform of 1936 fails to renew the declaration that a party platform is a "covenant with the people to be faithfully kept by the party when entrusted with power." It would only have served to emphasize the broken promises of the last platform. By the omission of this declaration the people are put on notice that the New Deal platform of 1936 is made to run on and not to stand on.

It is very significant that the New Deal platform of 1936 also fails to contain any declaration that the people "are entitled to know in plain words the terms of the contract to which they are asked to subscribe." The planks of the 1936 platform are couched in such general terms that they can be interpreted to mean most anything and to justify most anything.

REELECTION OF ROOSEVELT WOULD BE MANDATE TO GO THE LIMIT

I think there can be no question but what the reelection of President Roosevelt would be interpreted by him as a mandate to "go the limit." The "breathing spell" which he promised last fall would definitely be over. Experimentation with "brain trust" theories would be resumed. There has already been some indication that the N. R. A. might be revived. Doubtless an amendment would be sought to the Constitution extending the Federal powers. Unbridled spending would be continued. It makes one shudder to think of the possibilities.

EFFECT OF ROOSEVELT'S REELECTION ON SUPREME COURT

One thing the people should bear in mind is that if Mr. Roosevelt is reelected he will undoubtedly have the opportunity of naming several members of the Supreme Court. It is only necessary to mention this fact to call to mind the consequences which would follow. The Court of last resort, instead of being an independent tribunal, would become a part of the New Deal. The "bloodless revolution" would continue unabated. No longer would the people be able to say, "Thank God for the Supreme Court."

The President has been unsparing in his criticism of the Supreme Court. He contemptuously referred to its decision in the N. R. A. case as taking the country "back to the horse and buggy days." As a matter of fact, the decision in that case was the best "break" the President had, because if the N. R. A. had been allowed to continue, the opposition to it would alone have been enough to defeat him for reelection. Because of public opposition it was discredited and virtually dead when the Supreme Court, by a unanimous decision, delivered the fatal blow.

NEW DEAL MEASURES HAVE BEEN DRAG ON RECOVERY

The New Deal is making a determined effort to convince the people that it is responsible for the recovery thus far achieved. Most of the recovery has taken place not because of but in spite of the New Deal. It is generally conceded that the bottom of the depression was reached in 1932. Since that time things have been on the upgrade. Most of the New Deal policies, however, have been a definite drag on recovery. Our greatest improvement has occurred since June 1935, following the invalidation of the N. R. A. by the Supreme Court. While the New Deal criticizes the Court for its opinion in that case, it is glad to take unto itself the credit for the upturn in business which that decision caused.

SPENDING PROGRAM HAS BEEN FUTILE

The spending program of the New Deal has been absolutely futile in promoting recovery. According to the daily statement of the Treasury for June 30, 1936, the tremendous sum of $19,140,000,000 has been appropriated for relief and recovery purposes, yet the problem is as great today as ever, with 12,000,000 unemployed walking the streets looking for work and approximately 20,000,000 persons dependent upon the Government for a meager existence. The only solution of the unemployment problem is the recovery of business, but this will never be achieved under the New Deal. If the unemployed want their old jobs back, the New Dealers must be turned out of office. According to a statement appearing in the press a few months ago, American business is ready to expend from fifty to eighty billions of dollars for expansion purposes as soon as the restrictive, costly, and dangerous legislative experiments of the administration are ended. But the New Deal has indicated that its experimental program will be carried forward.

DESTRUCTION AND DROUGHT

While millions have been crying for bread, the New Deal economic planners have plowed under the farmers' crops and destroyed millions of little pigs. In 1934 the country was visited by a devastating drought, which destroyed both crops and livestock and left thousands of farmers destitute. Again this year we are witnessing the ravages of another drought. There are many who believe that these are but the punishment inflicted by an all-wise Providence for the administration's program of destruction.

UNCONSTITUTIONAL LEGISLATION UNDER NEW DEAL

The New Deal platform of 1936 states that the administration has sought and will continue to seek to meet the problems at hand "through legislation within the Constitution." Anyone who is in the least familiar with the record of the New Deal knows that this is a deliberate misstatement at least so far as the past is concerned. We have only to recall President Roosevelt's mandate to Congress to pass the Guffey coal bill notwithstanding "any doubt as to constitutionality, however reasonable", and to record the list of major New Deal measures held unconstitutional by the Supreme Court. This list includes (1) the oil-control section of the National Industrial Recovery Act, (2) the joint resolution of Congress invalidating the gold clause in Government bonds, (3) the Railroad Pension Act, (4) the National Industrial Recovery Act, (5) the Farm Mortgage Moratorium Act, (6) the removal of Federal Trade Commissioner Humphrey, (7) the Agricultural Adjustment Act, (8) the Guffey Coal Act, and (9) the Municipal Corporation Bankruptcy Act.

COUNTRY HAS BEEN MOST PROSPEROUS UNDER REPUBLICAN RULE

Doubtless during the election campaign New Deal orators will spend much of their time asking the voters if they want to go back to the conditions in 1932, and telling them that this is exactly what will happen if the New Deal is repudiated at the polls and the Government turned over to the Republican Party. Of course, no one wants to go back to 1932, and there is no reason for thinking that with the Republican Party in power we would go back to 1932. It should not be forgotten that our most prosperous times have been under Republican administrations. In the 71 years since the Civil War we have had only 16 years of Democratic control under three different Democratic Presidents.

REPUBLICAN PLATFORM OF 1936 PROGRESSIVE AND FORWARD LOOKING

But we are not concerned with the past—only with the future. The world moves forward, not backward. The Republican Party at Cleveland adopted a sound, progressive, and forward-looking platform upon which all who are opposed to the New Deal and all who favor the preservation of the American system of government can unite. The Republican platform assures jobs to the unemployed by encouraging, rather than hampering, legitimate business. It assures nonpartisan relief for the needy. It assures protection against involuntary unemployment and dependency in old age. It assures protection to the rights of labor. It assures agriculture a policy of abundance rather than scarcity. It assures to agriculture, industry, and labor, adequate tariff protection against foreign competition in the home market. It assures the elimination of monopoly. It assures the restoration of the merit system in Government service. It

assures the balancing of the National Budget, not by increased taxes but by reduced spending. It assures a sound currency. It assures a government of laws and not of men. Finally, it gives assurance that the candidates of the party, "as a matter of private honor and public faith", will undertake to be true to the principles and program set forth.

NEW-DEAL PLATFORM INSINCERE

Contrast this platform with the generalities of the New Deal platform; with its false claims, its misleading statements, and its insincere promises. The people will not be fooled by the beautiful word picture of the New Deal which it paints, either as regards the past or the future.

The New Deal platform was drafted at the White House and ratified by the Philadelphia convention. It was almost a sacrilege for the New Deal convention to be held in the city which is "the cradle of American liberty." The aims and principles of the New Deal are as far apart from the aims and principles of those who there drafted the Declaration of Independence and the Constitution as are the North and South Poles from one another. The New Deal platform plagiarizes the words, "We hold these truths to be self-evident", as contained in the Declaration of Independence but it adopted none of the substance of that great document.

ELECTION CAMPAIGN WILL BE FOUGHT OVER PRINCIPLES

The coming election campaign is not a fight between the "ins" and the "outs." It is not a fight between the Republican Party and the Democratic Party, because there is no more Democratic Party as such. The election campaign is really a fight for principles. The New Deal is on one side and the Republican Party, representing all who are opposed to the New Deal, is on the other. The issue is clearly drawn. The verdict of the people is awaited.

NEW DEAL ON THE WAY OUT

Already there is evidence that the new dealers know they are on the way out. It was demonstrated in the apologetic speeches at the Philadelphia convention, and it was most strikingly shown in the insistence of New Deal leaders that the Governor of New York consent to renomination in the hope that thereby he would be able to assist the President to carry his own State.

I am confident that next November the people will decide that they have had enough of the New Deal and that they wish to restore the system of government established by the fathers under a businesslike and progressive administration. Let the slogan be: "Off the rocks with Landon and Knox!"

PRINCIPLES OF THE NATIONAL UNION FOR SOCIAL JUSTICE

Mr. WOLVERTON. Mr. Speaker, the widespread interest that exists with respect to the attitude of Members of Congress toward the 16 principles of the National Union for Social Justice impels me to make known my views, as follows:

Principle 1. I believe in liberty of conscience and liberty of education, not permitting the state to dictate either my worship to my God or my chosen avocation in life.

This principle is fundamental in our form of government. The duty to maintain and support it is an obligation of true citizenship. I am in complete accord with it and could not do otherwise than pledge to it my wholehearted allegiance.

Principle 2. I believe that every citizen willing to work and capable of working shall receive a just, living, annual wage which will enable him both to maintain and educate his family according to the standards of American decency.

This principle is right, just, and proper. To provide such a standard of wage would make a better and more contented Nation. My support has and will continue to be given to such measures as will make possible its fulfillment.

Principle 3. I believe in nationalizing those public resources which by their very nature are too important to be held in the control of private individuals.

The public interest must be considered paramount. This should at all times be the determining factor. Governmental regulation, control, or ownership should be the means to insure the safety of the public interest; and the method to be pursued being that which is most appropriate or necessary.

Principle 4. I believe in private ownership of all other property.

This principle is sound and based upon the custom, law, and experience of the American form of government.

Principle 5. I believe in upholding the right to private property, but in controlling it for the public good.

This principle is in accord with established principles of law. In all well-organized society the right of the individual must be subservient to the public good. The power in the Government to regulate and control, upon a reasonable basis, is just as necessary as that the right to private property shall be recognized and protected by Government.

Principle 6. I believe in the abolition of the privately owned Federal Reserve Banking System and in the establishment of a Government-owned central bank.

There is nothing so vital to the welfare of our people than a banking system that insures stability and complete assurance that its tremendous powers can and will only be utilized in the public interest. Therefore, while there is much to justify the thought that at times the rights and privileges that now exist under the present system can be and have been utilized for private gain, yet there is a corresponding fear that under a Government-owned central bank system there would be a temptation for political control, resulting in political gain in place of private gain under the existing system. Thus the Government-owned central bank can only prove beneficial if a system is devised that will provide a business management in the public interest and preclude all possibility of political control. If this is not accomplished, then the result would be disastrous and our last estate worse than the first. My support of this principle, therefore, is based upon the assumption that there can and will be complete divorcement of politics from the management and control of the bank.

Principle 7. I believe in rescuing from the hands of private owners the right to coin and regulate the value of money, which right must be restored to Congress, where it belongs.

The purpose of this principle is plain. The result to be attained is worth while. I am in full accord with the objective that is sought.

Principle 8. I believe that one of the chief duties of this Government-owned central bank is to maintain the cost of living on an even keel and arrange for the repayment of dollar debts with equal-value dollars.

The fulfillment of this principle would go far to eliminate economic uncertainty and periods of depression, and in the accomplishment of this purpose my support would be given to such measures as would give reasonable assurance thereof.

Principle 9. I believe in the cost of production, plus a fair profit, for the farmer.

This principle is basic to the welfare of the farmer. Without such a return the farmer cannot attain that standard of living to which he and his family are entitled. It is just as necessary for the farmer to have an adequate return for his labor as for the worker to have a just, living, annual wage. Our national welfare is closely linked to the individual welfare of these two classes.

Principle 10. I believe not only in the right of the laboring man to organize in unions but also in the duty of the Government, which that laboring man supports, to protect these organizations against the vested interests of wealth and of intellect.

My favorable attitude toward this declaration of principle has been evidenced by my support of all measures presented to Congress for the accomplishment of this purpose. My continuing interest is assured to the end that there may be the fullest recognition of this principle.

Principle 11. I believe in the recall of all nonproductive bonds and therefore in the alleviation of taxation.

To the extent that I understand what is included in the definition "nonproductive bonds" I am in accord with the principle and the object it seeks to attain.

Principle 12. I believe in the abolition of tax-exempt bonds.

The acceptance of this principle as a Government policy, both Federal and State, would, in my opinion, materially reduce the burden of taxation upon those least able to pay and close a way of escape now available to those most able to pay.

Principle 13. I believe in broadening the base of taxation according to the principles of ownership and the capacity to pay.

The relief of the intolerable tax burden now carried by real estate is a fair example of the need for a remedy that will provide a broadening of the base of taxation into fields where the ability to pay exists. There is no equity in a system that does not base taxation upon the ability to pay.

Principle 14. I believe in the simplification of government and the further lifting of crushing taxation from the slender revenues of the laboring class.

Extravagant expenditures by local, State, and Federal Governments is immediately reflected in the tax burden. This burden in the final analysis falls most heavily upon the laboring class. Frequently those least able to pay are not aware of the extent to which the inequality exists. This result is made possible by reason of the indirect method in which the tax is levied. The extent to which there is simplification of government, producing economy and efficiency, there should be a corresponding reduction of the tax burden, and in any event there must be a recognition of the ability to pay as the only proper basis of taxation. Recognizing this principle, I have opposed the imposition of sales, processing, or any other form of tax that is laid upon the necessities of life or commodities in general use by the laboring class. With any method that will provide simplification of government and relief from crushing taxation I am in entire accord.

Principle 15. I believe that in the event of a war for the defense of our Nation and its liberties there shall be a conscription of wealth as well as conscription of men.

This principle is fundamentally right, just, and sound. There can be no honest difference of opinion with respect to it. To take our boys and exempt our wealth is based upon a false sense of values. Wealth can never be more precious than human life, and to take the latter and leave the former is unthinkable. The experience of the last war provides the reason and the necessity for the acceptance of this principle.

Principle 16. I believe in preferring the sanctity of human rights to the sanctity of property rights, for the chief concern of Government shall be for the poor, because, as it is witnessed, the rich have ample means of their own to care for themselves.

Whenever or in whatever way human rights may come into conflict with property rights there should be no doubt that human rights must prevail. To hold otherwise is to place a higher value upon material things than upon the human or life element. It must ever be the duty of government to protect the weak against the strong.

FRAZIER-LEMKE BILL

Recognizing what I believe to be a fundamental principle of representative government, namely, the right of our people to have important matters of legislation decided in the open, upon the floor of Congress, by all their duly elected Representatives, instead of by a few who hold important committee assignments, I signed the petition to discharge the committee of the House from further consideration of the Frazier-Lemke bill; and, when as a result of the signing of the petition by 218 Members of the House, the motion was made that the committee be discharged, I voted in favor of said motion and thereby brought the bill to the floor of the House.

My support of the measure on final passage was contingent upon the inclusion of certain amendments, which to me seemed vital if full justice was to be done to all classes by the legislation, particularly with respect to the inclusion of city owners as well as farm owners within the benefits of the bill. To provide for one without giving any consideration to the welfare of the other produced an inequality, and was an injustice that in my opinion should have been corrected. I am inclined to believe such an amendment would have helped materially in the passage of the bill.

CONCLUSION

I have sought to give in plain and unmistakable language a frank expression of my views with respect to the important principles advocated by the National Union for Social Justice. I recognize the sincerity of purpose that actuates those who advance such principles, and with like sincerity I have sought to leave no doubt as to my favorable stand with reference thereto.

I am of the opinion that the recognition of these principles as policies of government, without regard to party lines, would tend to make a better and more secure Nation.

HON. JOHN H. HOEPPEL

Mr. DUNN of Pennsylvania. Mr. Speaker, I wish to make a few remarks in behalf of my colleague, Congressman JOHN H. HOEPPEL, who represents the Twelfth District of California.

During the 4 years that Mr. HOEPPEL has been in Congress he sponsored and supported the following legislation: Adequate pensions for the aged, widows with dependent children, and all those who are physically incapacitated; increased compensation for disabled veterans; payment of the adjusted-service certificates; and every other form of legislation from which ex-service men could derive a benefit. He was also very active in behalf of the Townsend old-age pension plan.

Unfortunately Congressman HOEPPEL was accused of a crime which I do not believe he committed; in fact, all of his colleagues, with whom I have discussed the matter, believe that he is innocent of the charges preferred against him. I hope for the sake of Congressman HOEPPEL, his family, and his constituents that he will be exonerated.

If the citizens desire to obtain information concerning their Congressman, I suggest that they read the CONGRESSIONAL RECORD. The RECORD will prove by Congressman HOEPPEL'S speeches and the bills he sponsored and supported that he was a progressive and humanitarian Representative. I am sure that if the citizens of his district will reelect him to the office he now holds he will again represent them as he has done in the 4 years while a Member of Congress.

WORK OF THE COMMITTEE ON THE POST OFFICE AND POST ROADS, HOUSE OF REPRESENTATIVES, DURING THE SEVENTY-FOURTH CONGRESS

Mr. MEAD. Mr. Speaker, so many Members have evinced an interest in postal legislation that I should like to submit a brief summary of the bills reported by our committee during the Seventy-fourth Congress. I am dividing them into groups so that it will be readily apparent just which bills became law and which measures failed of passage.

The first group consists of bills reported favorably by the Committee on the Post Office and Post Roads, passed by the House and Senate, and signed by the President.

POST OFFICE COMMITTEE BILLS ENACTED INTO LAW

H. R. 3612 (Public Law No. 249). To provide for adjusting the compensation of post-office inspectors and inspectors in charge to correspond to the rates established by the Classification Act of 1923, as amended. (Provides a series of salary grades to which post-office inspectors may be allocated on the basis of the work performed.)

H. R. 5049 (Public Law No. 338). Providing punishment for forging or counterfeiting any postmarking stamp. (Safeguards postmarking stamps used by postmasters in canceling stamps on letters.)

H. R. 5159 (Public Law No. 317). To authorize the Postmaster General to contract for air-mail service in Alaska. (Extends air-mail service in Alaska.)

H. R. 5162 (Public Law No. 339). Providing for punishment for attempts to obtain mail by fraud and deception. (Extends the penal law to cover attempts to obtain mail fraudulently.)

H. R. 5218–S. 932 (Public Law No. 12). To postpone the effective date of certain restrictions respecting air-mail contracts. (Extended certain air-mail contracts for 6 months.)

H. R. 5360 (Public Law No. 340). Providing for punishment for the crime of robbing or attempting to rob custodians of Government moneys or property. (Brings within the provisions of the Penal Code the crime of robbing or attempting to rob custodians of Government moneys.)

H. R. 5540 (Public Law No. 341). Excepting the imposition of demurrage charged on collect-on-delivery parcels exchanged between the continental and island possessions. (Extends the free-storage period for collect-on-delivery mail and waives demurrage charges on parcels exchanged between the continental and island possessions.)

H. R. 6374–S. 1539 (Public Law No. 118). Providing compensation for the Post Office Department for the extra work involved in the return of valuable packages from the Dead Letter Office to the writers. (Decreases the cost to the Post Office Department of handling dead letters.)

H. R. 6511 (Public Law No. 270). To amend the air-mail laws and to authorize the extension of the Air Mail Service. (Provides for the extension of the domestic air-mail system and reasonable rates of compensation to the carriers.)

H. R. 6717 (Public Law No. 174). To amend section 1 of the act of July 8, 1932. (Permits prosecution of the senders of extortion letters in the jurisdiction where such mail is delivered.)

H. R. 6990 (Public Law No. 275). To fix the hours of duty of postal employees, and for other purposes. (Establishes a 40-hour workweek for postal employees.)

H. R. 7688, H. R. 12608 (Public Law No. 641). To provide for the appointment of substitute postal employees, and for other purposes. (Establishes the ratio of substitutes to regular employees in post offices and in the Railway Mail Service.)

H. R. 7709 (Public Law No. 366). To provide time credits for substitute laborers in the Post Office when appointed as regular laborer. (Gives watchmen, messengers, and laborers in the Postal Service credit toward promotion for their substitute service.)

H. R. 8790 (Public Law No. 322). To amend section 6 of the act of February 28, 1925. (Reclassifies the salaries of superintendents in the motor-vehicle service.)

H. R. 9496 (Public Law No. 634). To protect the United States against loss in the delivery through the mails of checks in payment of benefits provided for by laws administered by the Veterans' Administration. (Safeguards the delivery of checks issued by the Veterans' Administration and expedites the payment of the soldiers' bonus.)

H. R. 10193 (Public Law No. 575). To amend the act to fix the hours of duty of postal employees. (Restores the salaries of certain per-diem employees at the mail equipment shops.)

H. R. 10267 (Public Law No. 619). To provide for adjusting the compensation of division superintendents, assistant division superintendents, assistant superintendents at large, assistant superintendent in charge of car construction, chief clerk, assistant chief clerks, and clerks in charge of sections in offices of division superintendents in the Railway Mail Service, to correspond to the rates established by the Classification Act of 1923, as amended. (Establishes a wider range of salary grades for supervisory officials in the Railway Mail Service.)

S. J. Res. 92 (Public Resolution No. 24). Making final disposition of records, files, and other property of the Federal Aviation Commission. (Provides for the transfer of the records, etc., of the Federal Aviation Commission to the Interstate Commerce Commission.)

The following Senate bill, which also passed the House, failed of passage:

S. 1439. Amending the postal laws to include as second-class matter religious periodicals publishing local information. (Vetoed, Aug. 20, 1935.)

While we were fortunate in having many of our bills enacted into law during the Congress, the closing days found some of them still pending on the calendars of the House or before the Senate Post Office Committee. I am listing them below. We reported a few resolutions adversely and the measures were tabled by the House.

Three of the bills recommended by our committee were pending on the calendars of the House of Representatives at the close of the Congress, as follows:

BILLS REPORTED AND PENDING IN HOUSE AT ADJOURNMENT

H. R. 2793. To amend the provisions of laws relating to appointment of postmasters. (Permits the Post Office Department to appoint a new postmaster whenever the incumbent's term expires.)

H. R. 6868. To provide time credits for substitutes in the motor-vehicle service. (Gives motor-vehicle employees credit, for the purposes of promotion, for fractional parts of a year's substitute service.)

H. R. 11822. To permit certain special-delivery messengers to acquire a classified status through noncompetitive examinations. (Authorizes noncompetitive examinations for special-delivery messengers who have as much as 5 years' continuous service on the date of approval of the bill, so that they may qualify for the position of substitute clerk, carrier, or laborer.)

The last group of bills consists of those measures which were approved by our committee and the House and referred to the Senate, but were not acted upon by that body prior to adjournment:

BILLS PASSED BY THE HOUSE AND PENDING BEFORE THE SENATE COMMITTEE ON POST OFFICES AND POST ROADS AT ADJOURNMENT

H. R. 1993. Giving superintendents at classified post-office stations credit for substitutes serving under them. (Passed House June 3, 1935.) (Includes substitutes as station employees in determining salaries of superintendents.)

H. R. 4036. For the relief of Ralph C. Irwin. (Passed House May 7, 1935.) (Corrects the records with regard to the appointment of Mr. Irwin as a village letter carrier.)

H. R. 4450. To provide for the purchase of the pneumatic mail-tube systems in New York and Boston. (Passed House Aug. 7, 1935.) (Authorizes an appraisal by competent engineers of the properties comprising the pneumatic mail-tube systems in New York and Boston.)

H. R. 5596. Granting equipment allowance to third-class postmasters. (Passed House June 3, 1935.) (Allows third-class postmasters 50 percent of the box rents at offices where the postmasters furnish the equipment.)

H. R. 5723. To give certain railway postal clerks the same time credits for promotion purposes as were given others who were promoted on July 1 when automatic promotions were restored. (Passed House June 3, 1935.) (Provides for the promotion of terminal clerks whose earned advancement was denied them by the joint action of the Economy and the Terminal Reclassification Acts.)

H. R. 6014. To reclassify the rate of premium on bonds of officers and employees in the motor-vehicle service of the Post Office Department. (Passed House Feb. 17, 1936.) (Limits the premium which may be charged by sureties in bonding officers and employees in the motor-vehicle service.)

H. R. 7506. To provide for a stenographic grade in the offices of the chief clerk and superintendent in the Railway Mail Service. (Passed House July 16, 1935.) (Defines the position of stenographer and provides for the promotion of certain railway postal clerks.)

H. R. 7936. To adjust salaries of rural letter carriers, and for other purposes. (Passed House July 15, 1935.) (Increases the pay of rural letter carriers serving short, heavy routes.)

H. R. 8002. To increase the compensation of letter carriers in the Village Delivery Service. (Passed House July 15, 1935.) (Establishes higher salaries for village letter carriers.)

H. R. 8369. Relating to laborers in the Railway Mail Service and motor-vehicle employees of the Postal Service. (Passed House Aug. 7, 1935.) Protects the rank and pay of laborers and motor-vehicle employees who are surplused and transferred temporarily to another branch of the Postal Service.)

H. R. 8541. For payment of compensation to persons serving as postmaster at third- and fourth-class post offices. (Passed House Feb. 3, 1936.) (Provides compensation for persons serving as postmasters in cases of emergency.)

H. R. 8730. To provide special rates of postage on reading matter and sound-reproduction records for the blind. (Passed House Aug. 7, 1935.) (Provides a special low rate of 1 cent a pound on publications furnished the blind at cost, and continues the free mailing privilege on publications furnished without charge.)

H. R. 8869. To amend sections 181 and 186 of the Criminal Code. (Passed House Aug. 7, 1935.) (Amends the private express statute with regard to the conveyance of letters outside of the mails.)

H. R. 10850. To extend the provisions of the 40-hour law for postal employees to watchmen and messengers in the Postal Service. (Passed House Feb. 17, 1936.) (Establishes a 40-hour workweek for post-office watchmen and messengers.)

H. R. 10930. To credit laborers in the Postal Service with any fractional part of a year's substitute service toward promotion. (Passed House Apr. 6, 1936.) (Gives post-office laborers, watchmen, and messengers credit for any fractional part of a year's substitute service in determining eligibility for promotion to the next higher grade following appointment to a regular position.)

H. R. 11954. To amend the act of February 28, 1925 (43 Stat. 1053), relative to postal rates on third-class mail matter. (Passed House June 1, 1936.) (Classifies bills and statements of account produced by any photographic or mechanical process as first-class mail matter.)

The committee will continue to function throughout the year as, in accordance with House Resolution 551, we will cooperate with the Post Office Department in conducting two surveys: (1) With respect to the equitable compensation of star-route carriers; and (2) with respect to the equitable compensation of fourth-class postmasters.

MY RECORD IN CONGRESS

Mr. ELLENBOGEN. Mr. Speaker, when the present session of the Seventy-fourth Congress adjourns, I will have concluded 4 years of service in Congress as the Representative from the Thirty-third Congressional District of Pennsylvania.

I now present to my constituents an excerpt of my record in Congress. They can check it in the CONGRESSIONAL RECORD, a copy of which is kept in the Carnegie Library in Pittsburgh.

WEEKLY RADIO REPORTS

First, I should like to mention that I was the first and still am the only Member of Congress to make weekly radio reports to his constituents. For 3 years I have come to Pittsburgh every week end at my own expenses to deliver, over station WJAS in Pittsburgh, a report of the activities of the Congress. I invited criticism and comment. I was anxious to know what the people were thinking. I am proud of the great success of these talks. They have been widely commented upon, hailed as a forward step in public enlighten-

ment on issues of the day. They carry out in true democratic spirit the idea that the people should know what their public servants do.

THREE IMPORTANT PROBLEMS

I was first elected to Congress in a period of darkness and despair. They were days when hunger and desolation stalked the streets and homes of our country.

In facing the job which was before me, I saw that three immediate problems cried for solution. They were:

First. Immediate relief for the unemployed.

Second. Saving of the homes and farms of the Nation from foreclosure.

Third. A permanent national program of social security.

The first of these problems—relief for the unemployed—loomed like a dark shadow over the land at the time of my first election in November 1932. The situation had been aggravated because the Hoover administration had definitely and finally refused to extend substantial aid to the unemployed.

I advocated that the Federal Government should make substantial contributions toward unemployment relief. This was done. At the time I was elected local and State governments were forced to carry this entire burden. It was a staggering load, under which many local governments were already crumbling.

FAVORED FEDERAL CONTRIBUTION

That burden was being carried almost entirely by the home owner and farm owner because practically all revenue of local or municipal government is obtained by taxes upon real estate. Therefore, the greater the contribution by local government for relief, the larger the increase of taxation on homes and farms. I was utterly opposed to this system; I fought it as early as 1932.

I advocated the principle of contribution toward unemployment relief from the Federal Government whose chief source of revenue is from graduated income taxes—from sources that are taxed according to their ability to pay. I believed that this was sound policy in the emergency.

I believe in giving employment by public works in preference to the cash dole. Such public works should be useful and of a lasting character.

I voted accordingly.

SPONSORED BILL FOR CENSUS OF JOBLESS

I maintain that in order to deal intelligently with the problem of unemployment we should know the number of unemployed in this country and their occupations and skill. That is necessary to solve the problem of relief and jobs. Therefore, I introduced a bill for an unemployment census. The bill for a national unemployment census passed the House of Representatives on June 7, 1934. Unfortunately, this was in the closing days of the session, and the bill was blocked in the Senate by a Republican filibuster.

I CARRIED OUT MY PLEDGE

I pledged myself to secure Federal contributions toward unemployment relief during the national emergency. I submit that I have faithfully and successfully carried out that pledge.

RELIEF FOR HOME OWNERS

Secondly, I have done much to provide relief for the mortgage-burdened home owners and farmers and to save their homes and farms from foreclosure. The home owner is the backbone of this country and we help to preserve this Nation when we assist him. Thousands of home owners can bear witness of my unceasing efforts in their behalf.

Let me give here a partial résumé of my efforts in behalf of the distressed home owner.

It should be remembered that the original bonds of the Home Owners' Loan Corporation were not guaranteed as to principal. This fact made mortgagees reluctant to accept them, and consequently relief for the home owner was impossible in many cases. Therefore, on January 3 and 8, 1934, I introduced three bills—H. R. 6141, H. R. 6147, and H. R. 6564—to increase the amount of H. O. L. C. bonds to be issued, to guarantee the principal as well as the interest of the bonds, and to use H. O. L. C. funds for new-home construction. On April 13, 1934, I introduced H. R. 8118, to increase by $1,000,000,000 the authorized issuance of H. O. L. C. bonds. On January 3, 1935, I introduced House Resolution 46, which directed the H. O. L. C. to resume consideration of applications for home owners which had been suspended on November 16, 1934. On March 9, 1935, I introduced House Resolution 157, directing the H. O. L. C. to permit the filing of new home-loan applications. On January 9, 1936, I introduced H. R. 9994, to stop the H. O. L. C. from foreclosing on needy home owners who could not meet their payments.

MY POLICIES BECAME LAW

I am glad to say that most of the policies which I advocated became law. Next year, I am confident, I will secure the adoption of the remaining ones.

AID TO THE SMALL-BUSINESS MEN

During the debate on the bill amending the H. O. L. C. on March 8, 1935, I proposed an amendment making homes with one store eligible for home loans. The H. O. L. C. before this had ruled such properties ineligible, so that a small-business man, grocer, tailor, barber, and the like, who conducted his business in the property in which he lived could obtain no relief. My amendment became law, and this injustice to the small-business man was remedied.

TO REDUCE MORTGAGE INTEREST RATES

My bill—H. R. 3974, now known as H. R. 10638—proposes that the interest on H. O. L. C. loans to home owners be reduced to 3½ percent and the period of payment be increased to 25 years. At the present time the interest rate is 5 percent and the period of payment 15 years. Formerly the Home Owners' Loan Corporation paid 4 percent interest on its bonds; now it pays only 2¾ percent. Why not pass this saving on to the home owner?

My bill would reduce the monthly payments from $8 per thousand-dollar-mortgage debt to $5. For instance, on a $3,000 H. O. L. C. mortgage monthly payments would be reduced from $24 to $15 per month. It is a sound bill. It is a fair bill. Its passage is necessary to prevent a repetition of wholesale foreclosures. I hope to secure passage of this bill in the next Congress.

PERSONAL AID TO HOME OWNERS

Let me add, too, that, in addition to this work in the Halls of Congress, I have personally given advice and guidance to several thousand home owners in their dealings with the H. O. L. C. I have made their problems my problems. I have fought against inefficiency and red tape in the H. O. L. C. I have protested when Pennsylvania was behind other States in granting H. O. L. C. loans.

MY PLEDGE TO HOME OWNERS CARRIED OUT

I submit that my pledge for aid to the home owners has been carried out, year after year, untiringly, loyally, successfully.

SOCIAL SECURITY

Third. I pledged myself to work for the enactment of a program of social security. I did my best to bring this about.

OLD-AGE PENSIONS

Let me begin by stating that on February 14, 1934, the House of Representatives, by unanimous vote, passed my resolution, House Resolution 249, directing Congress to make a study of a national contributory system of old-age pensions. I am proud of that resolution, because it represents the first official action ever undertaken by Congress toward setting up a national system of old-age-pension payments. It was the first step toward the social-security bill, passed a year later.

SIGNED BY ROOSEVELT

In my office hang copies of two bills, H. R. 5711 and H. R. 7167. Under each of these bills is the pen which President Roosevelt used to sign them, and make them the law of the land. The one bill, H. R. 5711, provides for pensions for the needy blind of the District of Columbia. The other, H. R. 7167, is the Ellenbogen Unemployment Insurance Act for the

District. My unemployment compensation act has been recognized as one of the most carefully drawn bills on the subject of social security ever enacted. It has been referred to as a model bill—one which is serving as a guide to many States.

Of course, I voted for the Social Security Act. But I did much more than merely vote for this measure. I urged that it be liberalized.

WE NEED CHANGES IN THE SOCIAL SECURITY ACT

Many provisions of the Social Security Act should be changed. I am especially in favor of making more liberal the provisions for old-age pensions. A maximum pension of $30 a month, such as we now have in Pennsylvania, is entirely too low. I have said time and again that the aged people of this country are entitled to a real old-age pension—one sufficient to remove from them forever the dread specter of the almshouse and the poorhouse. I want the aged people of this country to spend the twilight of their lives in peace and tranquillity, secure in the knowledge that their remaining years will be undisturbed and happy.

AGE LIMIT FOR OLD-AGE PENSIONS SHOULD BE REDUCED

Furthermore, I believe that these pensions should begin at 60 years of age and not at 70 and 65, as now provided. Sixty-five years is far too old in these days when the terrific pace of modern industry burns able-bodied men out at 45 and 50 and then tosses them aside like worn-out machinery.

TRUE SOCIAL SECURITY

In the true social security of the future, the ideal will be security of the individual from birth onward. Maternity and infant care will look after him when he is born. Social security would make every possible effort to protect the child from sickness and want. It would provide hospitalization for crippled children, curing those who can be cured, and leading those who are physically handicapped into avenues of usefulness. Vocational training—the use of arts and crafts—these would be available. And, finally, there would be true protection against the hazards of unemployment, and against the misery and uncertainty of insecure old age.

We do not have this yet; but we now have the foundation; we can improve and enlarge from time to time the building which we construct upon that foundation. Let me put it another way: This act is a way station, a part-way stop toward the end of the journey. The end is true social security for all, as I have outlined it, and for which I shall work.

I pledged that I would work and vote for social security.

I submit that I have carried out that pledge.

But I have not stopped here. To me, social legislation also means decent living and working conditions, decent housing, fair wages, maximum-hour standards, abolition of child labor, and everything else which is necessary for the betterment of the conditions of life.

ABOLISH CHILD LABOR

Because of this concept, I have introduced, and worked for, a number of bills touching on these conditions. My bills H. R. 7017 and H. R. 7738 aim to abolish child labor.

THE TEXTILE BILL

Another bill, and one which is in the forefront of public attention at the present time, is my bill H. R. 12285, for the regulation of the textile industry. It outlaws child labor; it sets up minimum wages and maximum hours; it bans cutthroat competition and sweatshop conditions. It has the full support of the American Federation of Labor, of the United Textile Workers of America, and of a large number of manufacturers and dealers. The House Committee on Labor has concluded exhaustive hearings on this bill and reported it out to Congress, recommending its passage.

My textile bill has been acclaimed throughout the United States as the solution for the chaotic conditions in the textile industry. It is expected to pass the Congress and become law next year.

HOUSING LEGISLATION

In any program of social legislation, I include decent, sanitary housing, and particularly housing for those with limited incomes.

For the last 4 years I have worked for the passage of housing legislation. Recently, Senator WAGNER, of New York, and I have jointly introduced in Congress the Wagner-Ellenbogen housing bill, which we believe provides a solution for the housing problem—a problem which everyone recognizes as one of the most important the country faces today.

THE WAGNER-ELLENBOGEN HOUSING BILL

Our bill sets up a permanent agency within the Government to promote and foster low-cost housing. It will provide homes for those families whose incomes are so low that they cannot afford to live decently. The bill will not permit competition with private home construction. On the contrary, it will stimulate business revival in the construction industries, give employment to hundreds of thousands of unemployed workers in the building trades, and provide the impetus for a great and permanent revival in the heavy goods industries.

Few measures which have been proposed in Congress have aroused such Nation-wide and well-nigh universal support as the Wagner-Ellenbogen housing bill.

BUSINESS AND LABOR SUPPORT THE BILL

Outstanding national organizations of business, chambers of commerce, large business and banking institutions are strongly supporting our bill. Labor has hailed the bill as the most important measure necessary for the welfare of the country. The executive council of the American Federation of Labor; Mr. William Green, president of the American Federation of Labor; Mr. John L. Lewis, president of the United Mine Workers; the United Textile Workers of America; the American Federation of Hosiery Workers; the International Garment Workers of America; the Amalgamated Clothing Workers of America are just a few of the endorsements among labor. I do not know of any labor union which is not openly and enthusiastically for this bill.

THE NEWSPAPERS SUPPORT THE WAGNER-ELLENBOGEN BILL

The newspapers of the country have hailed the Wagner-Ellenbogen housing bill as a sound, forward-looking, and as an absolutely necessary piece of legislation. I shall only mention a few of the many newspapers who favor the bill: The Pittsburgh Press, the New York World-Telegram, and the other newspapers belonging to the Scripps-Howard chain; the New York Times, the Christian Science Monitor, the New York Evening Post, the Baltimore Sun, the Philadelphia Record, the Buffalo (N. Y.) Times, and many others all over the United States.

Mr. John H. Fahey, Chairman of the Federal Home Loan Bank Board and of the Home Owners' Loan Corporation; Mr. Stewart McDonald, Federal Housing Administrator; the Honorable Harold L. Ickes, Secretary of the Interior and P. W. A. Administrator; and Miss Frances Perkins, Secretary of Labor, have all warmly endorsed the principles of the bill.

OTHER ENDORSEMENTS

The Pennsylvania House of Representatives and other State legislatures, a large number of city councils, the United Conference of Mayors, a large number of mayors from large and small cities and towns, urban and rural communities have all endorsed this bill. I could go on indefinitely, but I just wanted to add a few more endorsements of outstanding importance: The Federal Council of Churches of Christ in America, the Unitarian Ministerial Union, the National Council of Catholic Charities, the Social Justice Commission of Special Conference of American Rabbis, National Association of Housing Officials, National Public Housing Conference, National Urban League, National Association for the Advancement of Colored People, National Association of Letter Carriers, and the National Board of Young Women's Christian Association.

AN IMPORTANT RECOVERY MEASURE

There is no more important social measure before this session of Congress than the Wagner-Ellenbogen housing bill. It provides, at last, decent living quarters for our low-income groups; it is a blow at the insanitary and crime-breeding slums; it meets the demand, now insistent in this country, for new home construction, of which millions of units are badly needed.

There can be no lasting recovery unless the Wagner-Ellenbogen housing bill is passed. Its passage will give to the children of America the opportunity to grow up to a better life in sanitary and healthy homes, full of light and sunshine; it will permit the parents of America to live in decency and comfort, befitting the American standard of living. The Congress will pass this bill next year.

FLOOD RELIEF

I did not wait for the flood of March 1936 to arouse my interest and convince me of the need for flood-control measures for Pittsburgh and the surrounding territory. Shortly after I assumed my office in the spring of 1933 I appeared before various Federal agencies urging flood relief for the Pittsburgh district. I aided greatly in the passage by the House of Representatives of the omnibus flood-control bill in 1935—a year before the recent flood—a bill which has just become a law and which contains authorization for the construction of the dams and reservoirs to protect Pittsburgh.

March 17, 1936, is a date which will never be forgotten by Pittsburghers. Because of the havoc and desolation which the floodwaters wreaked on Pittsburgh that day, I introduced in the House 2 days later H. R. 11919, appropriating $50,000,000 for the relief of flood victims, and pleaded with my colleagues on the floor of the House for consideration of Pittsburgh's plight. I also asked the heads of W. P. A. in Washington to send W. P. A. workers into the flooded areas at once to facilitate the work of rescue and salvage. Realizing the great damage which had been done to the supplies of merchants during the flood, I introduced a bill to permit $250,000,000 in loans to flood-stricken businessmen.

THE FLAG BILL

I should like to call attention to my bill H. R. 6193, which has been widely endorsed. It prohibits the importation of United States flags made in foreign countries, so that we may no longer have the spectacle of sitting down to the President's birthday banquet and finding on the table American flags labeled "Made in Japan."

TO COLLECT WAR DEBTS

H. R. 10310. To create a debt commission for the purpose of negotiating the payment of war debts with foreign powers. My purpose in introducing this bill was to revive this issue. It is a sorry spectacle indeed that these foreign nations present—a barefaced and shameless repudiation of debts honorably incurred for the carrying on of a war which involved their very existence.

We wanted nothing from that war—no spoils; no territory; no new countries. But we have a right to demand an honest effort to repay the money we so lavishly dealt out. While nations arm to the teeth and spend billions in armament races, they have no right to repudiate the honorable debts of past wars. Of the billions owed us, as much as possible should—indeed, must—be collected, and I am convinced a determined effort on our part will be productive of results.

VETERAN AND BONUS LEGISLATION

I introduced and voted for payments and free hospitalization to disabled veterans and for aid to dependents of veterans who died from service-connected injuries. I voted for the immediate cash payment of the soldiers' adjusted-compensation certificates, commonly misnamed "bonus." I voted to override the President's veto and for every measure which aimed to secure justice for the veterans. I have personally aided thousands of veterans in every matter for which they called on me. The veterans know me as a true friend.

INSURANCE OF BANK DEPOSITS

I voted for the bill to protect the currency system of the United States and to insure bank deposits. Losses of billions of dollars suffered by innocent depositors through bank failures under the former Republican administrations can no longer occur.

I VOTED TO PROTECT INVESTORS AND CONSUMERS

I am proud of my vote in favor of the bill to eliminate the evils of the utility holding company. Despite the existence of a million-dollar lobby, the use of fake telegrams, and false and malicious propaganda, I voted with our great President for what was falsely called the "death sentence" of unnecessary utility holding companies. This bill was desperately needed to protect the investors in the stocks and bonds of utility operating companies against the schemes which robbed them of the profits justly due them and destroyed their investments.

A $16,000,000,000 SWINDLE

During 1929 corporate insiders sold $19,000,000,000 of utility holding company stock to the investing public despite the fact that they only owned actual assets of about $3,000,000,000. When the inflated utility-stock balloon collapsed, investors lost $16,000,000,000 as a result of this criminal oversale of worthless and fraudulent stock.

The utility holding companies were guilty of write-ups and fictitious loans and transfers from operating companies that were added to the rate base to enable them to extort excessive and illegal rates from the public. They siphoned the profits to corporate insiders and denied the widows and orphans, for whom they shed crocodile tears, their just share of the profits.

I voted for the Wheeler-Rayburn bill to eliminate the evils and abuses of unscrupulous utility holding companies. I voted to protect the interests of the consumers, the rate payers, and of the investors.

UTILITY BARONS ARE OPPOSED TO ME

And, because of my votes in the interest of the people and against evils practiced by utilities, I am being opposed by a man who spent most of his professional life fighting for the utilities, by a man who mouths reforms, but who, in every critical hour and in every important battle, has been found in the camp of the special interests and of reaction. Every utility baron and every reactionary enthusiastically supports my opponent. They have confidence in him. They also know that I have proven myself a friend of the people, a friend of the investor, and a friend of honest business.

NO RUBBER STAMP

As a Member of Congress I have supported the policies of our great President, Franklin D. Roosevelt. I voted with the administration on every measure in which I believed, but I voted against the administration whenever my best judgment dictated such a course.

I VOTED AGAINST GAG RULE

Despite strong pressure I voted against the iniquitous gag rule that would have prevented the consideration of independent measures. These gag rules are a violation of the democratic principles of representative government, and I therefore have consistently opposed them. I was not a "rubber stamp" Congressman. I voted independently, according to the dictates of my conscience and according to my best judgment.

I have used every possible device to ascertain the views of my constituents on pending legislation and have been guided accordingly in my votes.

I DEFEATED THE ATTEMPT TO ESTABLISH A SYSTEM OF TOLL BRIDGES AND TOLL HIGHWAYS IN ALLEGHENY COUNTY

I believe it would be disastrous for Allegheny County to return to a system of toll bridges and toll highways. It would substantially depreciate the value of real estate, would undermine business, and would forever destroy the industrial supremacy of Allegheny County. The imposition of tolls would have meant the end of further industrial and financial progress for Allegheny County and would have throttled and choked the business life of the county.

I knew it was a question of life and death for Allegheny County. Therefore I was determined to prevent the imposition of tolls as far as it was within my power to do so.

When the law for the creation of the Allegheny County Authority with its program of tolls was introduced in the State Legislature in Harrisburg, I hurried to Harrisburg, although I was a Member of the National Legislature and not the State legislature, and spent weeks in arguing and fighting against the passage of that law. The Republican-controlled legislature passed the law and created the Allegheny County Authority. I then carried on a consistent and

determined fight against the endless delay and red tape employed by the Allegheny County Authority. I submitted a substitute program which would eliminate tolls and construct all the useful, needed projects. Finally after struggling for several years the substitute program which I had advocated was adopted by a new board of county commissioners. The proposal to impose tolls was scrapped and the Allegheny County Authority is headed for dissolution.

I am very proud of the fact that I was privileged to take a leading part in preventing the imposition of tolls in Allegheny County and thus save every property owner in Allegheny County from depreciation of the value of his property and every businessman from loss of a large part of his business. I am proud that I was able to help to kill the tolls and thus permit the future growth of Pittsburgh and Allegheny County.

Mr. Speaker, this concludes a partial report of my work in Congress.

I HAVE KEPT MY PLEDGES

I have shown that my campaign pledges and my congressional accomplishments square with each other. I have tried to do my job to the best of my ability and in the best interests of those whom I was chosen to serve.

HELPED CONSTITUENTS

I have tried to be helpful to my constituents in the many and various ways which are at the disposal of a congressional office. Although my mail averages 200 letters a day, each one receives a personal answer, and wherever help, assistance, or guidance is requested it is given to the full measure possible.

BROUGHT GOVERNMENT PROBLEMS TO PEOPLE

I have tried, through my radio talks, to bring to the people of my district an appreciation and understanding of the problems of government, and of how the Nation's affairs are handled. I am hopeful that in this process I have been able to contribute, in however slight a degree, to a knowledge of our work as Members of Congress—for only through an enlightened electorate can democracy flourish.

CONFIDENT OF REELECTION

The measure of a man's future accomplishment is his achievement in the past. The past is the yardstick of the future. By this yardstick, I ask that my constituents measure me, and, if they find me worthy, enable me to continue the work I have begun.

LET US HAVE REAL PATRIOTISM RATHER THAN BLIND, SELFISH, AND MACHINE-CONTROLLED PARTISANSHIP IN THE ELECTION OF OUR NATIONAL REPRESENTATIVES

Mr. HOEPPEL. Mr. Speaker, there are two kinds of Congressmen. One is the say-nothing, do-nothing kind who are dictated to by the leaders of their political party. This type can be seen daily, listlessly and unattentive, in the rear of the floor reading newspapers or in the cloakrooms chatting over old times like inmates of the Old Soldiers' Home. When a roll-call vote is to be taken they run into the House Chamber and ask the leaders, "How shall I vote?"; and then like slaves vote as they are instructed without knowing anything as to the merits of the legislation being voted on. It would be just as satisfactory to the people they represent to replace this type of Congressman with a machine which could utter "yea" and "nay", inasmuch as many of these machine Congressmen have served for years and have yet to make a speech on the floor of the House. Nor would they dare stand up and swerve one-thousandth of an inch from the line marked out by their political bosses.

Then there is the other type of Congressman, who does not hesitate to cast his vote in the interest of the people regardless of party criticism. It is this type of Congressmen that I hope will be returned to serve the people. Strange as it may seem, nevertheless my observations disclose that the more independent and fearless a Congressman is in the interest of the people the more difficult it is for him to obtain relection because the machines at home, whose interests he would not serve, organize and use every means posible to defeat him.

The facts are that we will never have national recovery until we have an independent and aggressive Congress. The late beloved Speaker of the House, Mr. Rainey, advised me that I was the most independent Democrat in the Seventy-third Congress; and my record proves that I would not be coerced but voted consistently in the interest of the people. Naturally, with this attitude, I was always quite anxious to observe and advise new Members of Congress to prevent them becoming vassals of the party leaders—thereby submerging their own individuality and losing their effectiveness as Congressmen. It was a pleasure to find that the Seventy-fourth Congress contained more independent-thinking Congressmen than the Seventy-third Congress. Limited time prevents my going into detail on the record of these various Representatives; however, I do wish to make a reference to one of them, a Congressman from Pennsylvania, who has proven himself to be courageous, independent, and sincerely interested in the people he represents. I refer with pleasure to the Honorable THEODORE L. MORITZ, of the Thirty-second Congressional District, who is indeed not a servant of any selfish political or other minority groups.

Congressman MORITZ's first vote upon taking over his duties as a Congressman was a vote against the "gag rule", which he had the courage to oppose against the orders of his political party.

All of Congressman MORITZ's votes, as the CONGRESSIONAL RECORD will disclose, were motivated by how they would benefit the people and not how they would please the political bosses. Time and time again he voted against foolish and excessive appropriations, such as retiring able-bodied Army officers at the age of 37 at $150 and more per month, and such as retiring our Supreme Court judges at $15,000 per year. With his single vote he blocked the creation of additional judgeships because he felt in these critical times that it would be best to legislate in the interest of the people rather than create additional jobs for the political bosses. He helped to defeat the huge appropriation to complete the Mount Rushmore statues because he felt the time was not opportune to spend money for art when the people were hungry.

On the other hand, Congressman MORITZ voted for all measures which he thought would help the rank and file—such as regulation of utility companies, the Tennessee Valley Authority Act, the Railroad Retirement Act, the Guffey Coal Act, the Old-Age Security Act, the Wagner labor relations bill, and the Frazier-Lemke Farm Act. He not only voted for these measures but spoke in support of them, and the CONGRESSIONAL RECORD contains a number of his speeches on these subjects which are masterpieces.

If our country is to prosper and if our country is to get out of the old-time rut of special privilege, it can only be done by sending independent thinkers like THEODORE L. MORITZ to the National Congress.

Mr. Speaker, I should like to say that I am chairman of the Committee on War Claims, one of the few committees in the House with the power to appropriate money, of which Congressman MORITZ is a member. I can truthfully say that no member of my committee has shown the deep interest in and given as much study to legislation before the committee as Congressman MORITZ. We need men of Congressman MORITZ's caliber in the House—men who take an interest in committee work and men who take an interest and make a study of legislation which reaches the floor for consideration.

In Congressman MORITZ's home town he has been buffeted by his own party because he was outspoken and independent minded, but the people are fully aware of his good work. And when the people are for you it makes little matter who is against you. I have watched his work and activities since he became a Member of the House and sincerely hope that the people of his district will arise en masse, throw the gauntlet to the self-seeking bosses, and send Congressman THEODORE L. MORITZ back to Washington, so that he may continue to fight for the people of whom he considers himself a delegate.

The people of the Thirty-second District of Pennsylvania are entitled to know the caliber and stamina which Congressman MORITZ has typified as their Representative, as no doubt the political machines will use hammer and tong in

an effort to defeat him. If the people of his district could only appreciate his independent qualities and fair attitude on legislation in their interest, they would give him an overwhelming vote of confidence and return him to Congress, first, as a reward for his courageous attitude, and, second, as a rebuke to the crooked and too often controlled political machines.

As I am the editor of a national periodical devoted to the interest of all war veterans, and as a past commander of the American Legion, United Spanish War Veterans, and Veterans of Foreign Wars, I have a sympathetic insight and understanding of the problems of our veterans. In this capacity I have always taken a determined attitude on the problems pertaining to our disabled veterans and their dependents. Congressman MORITZ is not a veteran, but he assisted me in every effort and supported me at all times in advancing the interest of the veterans of our wars. World War and Spanish War veterans owe an obligation to Congressman MORITZ and should support him for reelection. The unemployed and so-called underdog owe it to themselves to support a man who has stepped out boldly in advancing their cause.

Unless men of Congressman MORITZ's type are reelected, and their number is increased, we may as well disband the Congress and accept a dictatorship which is so prevalent in many of the European countries where the law-making bodies have been abolished, where freedom of the press is unknown, where religious worship is jeopardized, and the voice of the people is no more than a rubber stamp in the hands of the dictator. Patriotism, rather than politics, should actuate the votes of the people of the Thirty-second District of Pennsylvania and in all other sections of our beloved country. Rubber stampism is alien to American principles. It is destructive to government, and if we are to maintain our high ideals of Americanism it must be done through men of Congressman MORITZ's caliber and not by Congressman hand-picked by political machines—dominated and controlled as they are by the hand of Farley.

RESTORATION AND PRESERVATION OF U. S. FRIGATE "CONSTITUTION", U. S. S. "CONSTELLATION", U. S. S. "HARTFORD", U. S. S. "OLYMPIA", AND U. S. YACHT "AMERICA"

Mr. COCHRAN. Mr. Speaker, I have just introduced a bill, which will be referred to the Committee on Naval Affairs of the House, which provides for the preservation as historical naval relics of the U. S. frigate *Constitution*, the U. S. S. *Constellation*, the U. S. S. *Hartford*, the U. S. S. *Olympia*, and the yacht *America*.

For many years I have been endeavoring to bring to the waters adjacent to the city of Washington the U. S. S. *Olympia*, desiring it to be preserved as a memorial to the men and women who served in the War with Spain. As you know, this vessel was the flagship of Admiral George Dewey in the Battle of Manila Bay. My bill has not only been reported favorably by the Committee on Naval Affairs of the House on several occasions, but it passed the House and was sent to the Senate in the first session of the Seventy-fourth Congress. Unable to secure favorable action in the Senate, due to the fact that I could not secure the approval of the Director of the Budget, I took the matter up with the President and wrote him at length on May 21, 1936.

I am happy to say that I have received from the President the following letter, which indicates he is not only in favor of bringing the U. S. S. *Olympia* to Washington but also the other vessels:

THE WHITE HOUSE,
Washington, June 1, 1936.

Hon. JOHN J. COCHRAN,
House of Representatives, Washington, D. C.

MY DEAR MR. COCHRAN: I have your letter of May 21, 1936, regarding bill H. R. 7220, to provide for establishing in the District of Columbia the old cruiser *Olympia* as a memorial to the men and women who served in the War with Spain.

The *Olympia* is only one of four or five old naval vessels having historical and patriotic tradition, which should be preserved and made available to the public as national shrines.

Several bills have been introduced which propose the restoration and preservation of these old naval vessels at different localities. I have given this matter considerable thought and have come to the conclusion that the *Constitution*, the *Constellation*, the *Hartford*, the *Olympia*, and the *America* should be restored, insofar as practicable, to their original condition and berthed together in the District of Columbia, along the Potomac River, on land belonging to the United States, and maintained as historical naval relics for the inspection and inspiration of all the people of the United States who wish to visit such vessels.

It is now contemplated that preliminary surveys may soon be made and that a comprehensive plan may be developed for the consideration of Congress looking to the gradual and orderly restoration and establishment of these vessels here in Washington, such work and expense to be spread over a period of 4 years. It is difficult to select any one of these vessels as having a better claim for preferential treatment than the others. It is my view that action on bills providing for the restoration and establishment at particular locations of any or all of the old vessels in reference should now be deferred pending the conclusion of the survey and study now contemplated.

I have the assurance of the Navy Department that the *Olympia* is not required to be scrapped by any provisions of existing naval treaties.

Respectfully,

FRANKLIN D. ROOSEVELT.

The fact that people who come to Washington from the Middle West, especially my constituents from St. Louis, have always expressed disappointment over not being able to see a naval vessel while here was one reason that caused me to conceive the idea of bringing the *Olympia* to Washington. The more outstanding reason, however, was that I did not desire to see this historic vessel destroyed, as was recommended by the Navy Board about 8 years ago.

The first report made by the House Committee on Naval Affairs on the bill I introduced to preserve the *Olympia* contained the following:

The preservation of historic treasures has received little attention at the hands of the American people. The historic relics which are preserved in the large cities of Europe are what make these cities so interesting to American visitors.

A wave of resentment, especially among the veterans of the Spanish War, followed in the wake of the decision of naval officers to junk the *Olympia*.

I have received the assurance of Hon. CARL VINSON, chairman of the Naval Affairs Committee of the House, that reports on my bill to preserve these historic vessels will be secured during the vacation period, so that the matter can be taken up by the committee when the Seventy-fifth Congress assembles.

I am submitting a brief history of the vessels mentioned in my bill which the President says should be restored and berthed in Washington:

THE UNITED STATES FRIGATE "CONSTITUTION"

After the close of the Revolutionary War the United States disposed of all her ships until she had no Navy left in 1785. In consequence of this defenseless condition the Barbary powers preyed upon her commerce until it was no longer safe for her merchant ships to display the American flag in the Mediterranean or the waters off Gibraltar.

To meet this state of affairs the construction of six frigates was authorized by act of Congress March 27, 1794. One of these frigates was the *Constitution*, recently restored and now making a tour of the ports of the country.

This famous ship was constructed at Boston, Mass. Her keel was laid in November 1794; she was launched October 21, 1797, and went to sea in August 1798. She was built as a 44-gun ship and carried from 400 to 435 men. She was able to carry stores sufficient for a 6 months' cruise. Much of the timber used in her construction was live oak brought from the State of Georgia in the southern part of the United States. She cost when finished $302,718.84.

Her first service was in the West Indies, 1798–1801, against the French who were committing depredations upon our commerce. She made several captures during this period, including the *Niger*, a privateer of 24 guns and 70 men, which she sent into Norfolk, Va.; the *Spencer*, a British ship, which was a prize of the French frigate *Insurgente*; and the *Sandwich*, which she cut out in the harbor of Port Platte, San Domingo.

At the close of the French (quasi) War the *Constitution* was thoroughly overhauled and fitted out for service in the Mediterranean as the flagship of Commodore Edward Preble.

She left the United States in August 1803, and during the next 4 years she was constantly in service, participating in five attacks on the harbor of Tripoli and capturing three of the enemy's ships. Not only was she employed against the enemy herself, but it was on board her that operations were planned and orders originated for the rest of the squadron. In her cabin the Treaty of Peace with Tripoli was signed June 3, 1805, which ended the paying of tribute to that country. The table on which this treaty was signed can now be seen in the captain's cabin, where it stood during that important event.

It was during our second war with Great Britain, the War of 1812, that the *Constitution* distinguished herself so conspicuously. She was in the Washington Navy Yard when war was declared June 18, 1812. The declaration was read on her deck on the 20th, and she sailed next day to join the American squadron under Commodore John Rodgers at New York. During this cruise her troubles began when she found herself in the midst of a British squadron of five ships just off New York. She finally escaped after a chase of nearly 3 days, by good management and superior seamanship. The story of the escape is one of the most interesting chapters in her history.

During the War of 1812 she ran in and out of Boston seven times, in spite of the fact that it was closely blockaded by a British fleet; she made five cruises, ranging from Halifax, Nova Scotia, on the north to Guiana on the south, and as far east as the coast of Portugal; she captured and burned, or sent in as prizes, nine merchant ships and five British ships of war; and she was shut in Boston Harbor nearly 9 months. The ships of war captured were the *Guerriere,* of 49 guns and 280 men, August 19, 1812; the *Java,* of 49 guns and 422 men, December 29, 1812; the *Pictou,* of 14 guns and 60 men, February 15, 1814; and the *Cyane* and *Levant,* captured in one engagement February 20, 1815. The *Cyane* carried 34 guns and 175 men and the *Levant* 21 guns and 138 men. This last engagement occurred 3 days after the termination of the war.

It was after the engagement with the *Guerriere* that she received the name *Old Ironsides,* because, as her seamen said, the shots of the enemy bounced off her sides as though they were made of iron.

In addition to her participation in the wars mentioned above, the *Constitution* was a very busy peacetime vessel.

She was flagship of the Mediterranean for the protection of our commerce 1821–24, 1824–28, 1835–38, and 1848–50.

She was flagship of the Pacific Squadron, operating on the west coast of South America, 1839–41.

She was employed, 1842–43, for the suppression of piracy in the West Indies.

She circumnavigated the globe, 1844–46. She left New York May 30, 1844, and visited the following places: Madeira and Rio de Janeiro; sailed around the Cape of Good Hope to Madagascar, Mozambique, Sumatra, Singapore, Borneo, China, Manila, Hawaii, San Francisco, Monterey, and Valparaiso; passed around Cape Horn and again visited Rio de Janeiro. From there she set her course for Boston, where she arrived in October 1846, having sailed 52,249 miles. During this cruise she once more found herself suddenly in the midst of a British squadron, but this time they were friends in the need of stores instead of an enemy to be outwitted.

She served as flagship of the African Squadron, 1853–55, sent out to suppress the slave trade. During her stay on the African coast she captured the American schooner *H. N. Gambrill,* suspected of being a slaver, and sent it home to New York. Commodore Isaac Mayo, the flag officer, was instrumental in bringing about peace between various warring tribes of natives along the coast.

During the Civil War, 1861–65, the *Constitution* was used as a training ship for midshipmen in connection with the Naval Academy, which was temporarily at Newport, R. I., and after the war, when the academy was removed to Annapolis, Md., she continued to serve in that capacity until 1871, when she was taken to Philadelphia, Pa., and used as a training ship for naval apprentices.

Her last cruise to a foreign shore was made in 1878, when she carried the American exhibit to France for the Universal Exposition at Paris. When she returned home she was placed out of commission, but was used for awhile as a training ship and later as a receiving ship.

In 1897 she was towed to Boston to help celebrate her one hundredth anniversary, after which she was moored to a wharf in the Boston Navy Yard and used as a naval museum until 1925, when the work of restoring her was commenced.

The *Constitution* has been rebuilt several times, and twice she has been condemned to destruction. The first time was in 1830, when she was saved by the poem Old Ironsides, by the American poet, Oliver Wendell Holmes. The second time she was marked for destruction was in 1900, when it was proposed to tow her to sea and use her for a target. This time she was saved largely through the efforts of a patriotic organization called the Daughters of the War of 1812.

In 1925 the Congress of the United States authorized her complete restoration, but appropriated no funds for it. Instead it was planned to raise the money by private contributions. The sum needed was about $725,000 and it has been raised largely by the sale of pictures of her and small amounts given by American school children. It is estimated that approximately 4,500,000 children contributed.

The list of officers who served on the *Constitution* carries many names famous in American naval history, such as Silas Talbot, Edward Preble, John Rodgers, Stephen Decatur, Isaac Hull, William Bainbridge, Charles Stewart, Jacob Jones, and George Dewey.

U. S. S. "CONSTELLATION"

One of the six frigates authorized by act of Congress of March 27, 1794. Designed by Naval Constructor Joshua Humphreys. Built at the shipyard of Samuel and Joseph Sterrett, Baltimore, Md., under the immediate supervision of Capt. Thomas Truxtun, United States Navy, and Naval Constructor David Stoddard. Materials used in her construction, live oak, cedar, and pine. Keel laid, 1795. Launched, September 7, 1797; the second vessel launched under the reorganization of the United States Navy.

Length, 164 feet; beam, 41 feet; tonnage, 1,278; battery, 36 guns. Complement, 340 men. Cost, $314,212. Sailing qualities so fine that the French called her the "Yankee race horse."

June 1798 sailed from Baltimore on her first cruise under command of Commodore Thomas Truxtun, to protect American commerce in the West Indies in the naval war with France. Made flagship of Commodore Truxtun's squadron.

February 9, 1799, near St. Kitts, West Indies, after a spirited engagement of more than an hour, received the surrender of the French frigate *L'Insurgente.* Later in the same month captured two smaller vessels from the French.

February 2, 1800, received the surrender of the French frigate *La Vengeance* after a running fight of 5 hours. This prize, though badly damaged, managed to escape in the darkness and reached Curaçao in a sinking condition.

1802–05, cruised in the Mediterranean during war with the Barbary powers.

1806–11, laid up at the Washington Navy Yard.

1812, rebuilt; 14 inches added to her beam.

1813–14, blockaded at Norfolk by the British fleet, but her boats took an active part in operations at Craney Island. Assisted in sinking 3 boats, taking 43 prisoners, and killing and wounding 90 of the enemy.

1815–22, cruised in Mediterranean, Brazil, and Pacific Squadrons.

1823–24, out of commission.

1825–44, cruised in the Mediterranean, West Indies, and the coast of Brazil.

1845–53, laid up.

1854, rebuilt at the Norfolk Navy Yard; her battery changed to 22 guns.

1855–58, Mediterranean Squadron.

1859–61, African Squadron.

1862–64, cruising in search of Confederate vessels in European waters.

1865–68, receiving ship, Norfolk and Philadelphia.

1869–71, undergoing repairs at Norfolk, Va.

1872, gunnery ship, Washington Navy Yard.

1873–92, practice ship, Naval Academy, Annapolis, Md.

1893–1933, attached to the training station, Newport, R. I.

The *Constellation* is now used as station ship at Newport, where she is visited by many people every year.

U. S. S. "HARTFORD"

The U. S. S. *Hartford* was a steam sloop of war, launched at the Boston Navy Yard November 22, 1858. Steam sloop, first class; length, 225 feet; beam, 44 feet; depth, 18½ feet; maximum speed, 13½ knots; ordinary speed, 8 to 12 knots. Built of wood; displacement, 2,900 tons; 18 guns. Tonnage and battery were changed when alterations were made in her, and she is entered in the Navy Registers from 1862 to 1865 as of 1,990 tons, and her battery variously given as 22 guns and 26 guns. The latter number of guns she carried in 1862–63.

The first cruise of the *Hartford*, 1859–61, was to the East Indies as flagship of Commodore C. K. Stribling. She returned to the United States at the beginning of the Civil War and was refitted and put in commission January 19, 1862, commanded by Commander Richard Wainwright, and became flagship of Admiral D. G. Farragut in the West Gulf Blockading Squadron. She reached the mouth of the Mississippi River February 20, 1862; March 11 she anchored off Southwest Pass; April 7 to 16 was preparing for the passage of Forts St. Philip and Jackson, below New Orleans. Their bombardment commenced April 18 and lasted until April 24, when the *Hartford* and Farragut's fleet passed the forts; engaged Chalmette batteries on April 25. At 1 p. m. of the same day the *Hartford* anchored before New Orleans; Farragut demanded the surrender of the city through Capt. Theodorus Bailey, second in command, and the next morning the American flag was hoisted on the city hall. From this period until the surrender of Vicksburg July 4, 1863, and Port Hudson July 9, 1863, the *Hartford* was conspicuously engaged, having taken part in the bombardments of those strongholds, the unsuccessful attack on the C. S. ram *Arkansas* July 22, 1862, and at one time blockaded the mouth of Red River.

After the opening of the Mississippi River to Vicksburg was accomplished and the flag hoisted over Port Hudson rest was needed. The *Hartford* returned to New Orleans, and on August 1 sailed for New York, arriving there August 10. She sailed from New York January 3, 1864, under command of Capt. Percival Drayton, with Admiral Farragut on board, reaching Southwest Pass January 21, 1864, where she resumed her duties as the flagship of the West Gulf Squadron.

August 5, 1864, the memorable engagement of Mobile Bay took place, Farragut leading his squadron in his now famous ship, the *Hartford*, part of the time standing in the rigging to obtain a better view of the action, which ended in the surrender of the squadron of Admiral Buchanan and the forts of Mobile Bay. After the active work of the squadron was finished the *Hartford* returned to New York in December, where she was put out of commission long enough to prepare for a cruise in the East Indies which lasted from July 17, 1865, to sometime in 1868.

After this she was repaired and again sent as flagship of the same station, Rear Admiral Jenkins, from 1872 to 1875.

From 1876 to 1877 she was flagship of the North Atlantic Squadron, and under Capt. S. B. Luce began her career as a training ship. From 1877 to 1879 she was on the south Atlantic station.

During 1882 she carried the solar eclipse party around Cape Horn to the Pacific. In 1886 she was in the Pacific and was laid up for repairs at the Mare Island Navy Yard until 1899. October of that year she was recommissioned and sent on special service, and then became a training ship for landsmen, and as such cruised in all parts of the world until 1906, during part of which year and in 1907–11 she was used as practice ship for the midshipmen at the Naval Academy. In 1912–26 she was station ship at Charleston, S. C. November 19, 1904, she took part in the ceremonies at the unveiling of the statue of Frederick the Great at Washington, D. C. Her battery in 1922 was of light rapid-fire guns.

She is still at Charleston, S. C., out of commission.

U. S. S. "OLYMPIA"

A protected cruiser, built at the Union Iron Works, San Francisco, Calif. Authorized September 7, 1888; keel laid in 1890; launched November 25, 1892, and named for the capital city of the State of Washington. Commissioned February 5, 1895.

Length overall, 344 feet 1 inch; breadth on waterline, 53 feet ½ inch; mean draft, 21 feet 6 inches; normal displacement, 5,865 tons; speed, 21.69 knots; armament, ten 5-inch R. F. guns, four 8-inch B. L. R.; complement, 34 officers, 346 men.

After service as the flagship of Rear Admiral F. V. McNair, from 1895 to 1898, cruising in waters of Japan, China, and the Sandwich Islands, the *Olympia* became the flagship of Admiral George Dewey, in command of the Asiatic Squadron, on January 3, 1898, Capt. G. V. Gridley commanding.

On May 1, 1898, at the Battle of Manila Bay, the *Olympia* led the attack on the ships of the Spanish Squadron. Admiral Dewey in his autobiography states:

> At 5.40, when we were within a distance of 5,000 yards, I turned to Captain Gridley, and said, "You may fire when you are ready, Gridley." While I remained on the bridge with Lamberton, Brumby, and Stickney, Gridley took his station in the conning tower and gave the order to the battery. The very first gun to speak was an 8-inch from the forward turret of the *Olympia*, and this was the signal for all the other ships to join in the action.

The action lasted from 5.41 a. m.—with an interruption of 3 hours—until 12.30 p. m., and ended in the destruction of the enemy's vessels.

On account of the ill health of Captain Gridley, Commander B. P. Lamberton was ordered to take command of the *Olympia* in June 1898. The vessel continued with the Asiatic Squadron until she went out of commission November 8, 1898, at the navy yard, Boston, Mass.

In January 1902 the *Olympia* was recommissioned under command of Capt. H. W. Lyon and joined the North Atlantic Squadron as flagship in April 1902.

From December 1903 to April 1904 the *Olympia* was protecting American interests and lives in Panama, going on the same service in June to Smyrna and Turkey. In May 1905 and from July to December 1905 she was on a similar mission in Dominican waters.

This vessel was placed out of commission on April 2, 1906, at the Norfolk Navy Yard, but was recommissioned on May 15, 1907, and cruised with the midshipmen from the Naval Academy. Placed in reserve at Annapolis. In 1912 taken to Charleston, S. C., where she remained in ordinary until 1916.

When the United States entered the World War the *Olympia* was en route from St. Thomas, Virgin Islands, to the Norfolk Navy Yard. A week later she was designated flagship of the United States patrol force, Commander of the Patrol Force Rear Admiral Henry B. Wilson and Capt. Waldo Evans in command of the *Olympia*.

She was employed in patrol duty off the coast of Nova Scotia and as ocean escort for British merchantmen en route to and from New York and the war zone. On April 28, 1918, she sailed from Charleston for Europe, arriving on May 20 at Scapa Flow, Scotland, and arrived at Murmansk, Russia, May 24. She transported Lieutenant General Poole, of the British Army, and a small detachment of troops. They drove off an attack at Pechenga.

On June 8, 1918, the *Olympia* sent a detachment 150 strong to Kandalaska to assist in guarding that point. When the Murmansk government broke with the Bolsheviki allied troops landed in Murmansk. In August a detachment from the *Olympia* under Captain Bierer took part in the successful expedition against Archangel. This same detachment under Lieutenant Hicks bore their share in the pursuit of the retreating Bolshevists to the interior, having some hard fighting.

In December 1918 the *Olympia* became the flagship of the commander, United States naval forces, eastern Mediterranean, visited ports along the Adriatic, and made a cruise of the Black Sea.

In September 1919 was underway for Trau, Dalmatia, having been informed by the Italian senior naval officer present of the occupation of Trau by renegade Italian troops from the Italian occupied zone, which he urged the United States naval authorities to induce to return to the Italian zone prior to an inevitable clash of arms with the Serbian military authorities. Arriving at Trau, disembarked a landing force of 101 men and officers. The mission having been accomplished, the landing force returned to the ship, which returned to Spalato the same evening.

November 7, 1920, assisted in the delivery to the Italian Government of the ex-Austrian battleship *Radetzsky* and ex-Austrian battleship *Zrinyi*. These two vessels held in trust by the United States after the armistice were towed out to sea and delivered to the Italian authorities as per agreement.

At Ragusa, Dalmatia, assisted in caring for refugees who were landed there and were in desperate circumstances due to hunger, lack of shelter, and the outbreak of typhus and smallpox. The ship distributed fuel, soap, clothing, and food and the medical officer cared for the sick.

The *Olympia* remained in European waters until May 4, 1921, when she left for the Philadelphia Navy Yard. She participated in the bombing exercises of the ex-German ships *Frankfort* and *Osterfriesland*.

In September 1921 she was assigned the duty of bringing home for burial in Arlington Cemetery the Unknown Soldier, representative of the heroes of the American forces of the World War. She left the Philadelphia Navy Yard on this mission on October 3, 1921, reaching Plymouth October 16. She arrived at the Washington Navy Yard on November 9, 1921, with the Unknown Soldier, where she was met by representatives of the Army and Navy and the other services.

The *Olympia* was placed out of commission at Philadelphia December 9, 1922. During the Sesquicentennial Exposition at Philadelphia visitors to the exposition were admitted on board as part of the Navy's exhibit at the celebration. She is still at Philadelphia, out of commission—1936.

UNITED STATES YACHT "AMERICA"

The United States yacht *America* was originally the famous American racing vessel that won the trophy known as the *America's* cup from the Royal Yacht Squadron at Cowes, England, August 22, 1851. She was a sailing schooner, built by George Steers, of New York, in 1851. Her dimensions, and so forth, were as follows: Length over all, 111 feet; beam, 25 feet; deck to keelson, 11 feet. Draft: Aft, 12 feet; forward, 7 feet 6 inches. Rate: Fourth. Tonnage, 100.

For the early history of the *America* see the Lawson History of the *America's* Cup, from which the following résumé of events following her victory and prior to her acquisition by the United States Navy is culled:

After sailing a match with the *Titania* off the Isle of Wight, August 28, 1851, the *America* was sold by the American syndicate that owned her to Lohn John de Blanquiers for $25,000. Her masts were shortened and her rigging changed, and in 1852 she was raced in England with moderate success. She cruised in the Mediterranean during the same year, and in 1853 was sold to Lord Templeton, who used her for about a year and then laid her up at Cowes. In 1859 she was sold to the owner of the Northfleet Yard—England—who rebuilt her, making her as good as new. In 1860 she was purchased by H. E. Decie—Lord Decie—who changed her name to *Camilla*, cruised in the West Indies, and upon his return to England raced her with indifferent success. She is next heard from on this side of the water, having been bought from her English owner by some person—name not recorded—in Savannah, Ga., where she arrived in April 1861. At Savannah a gun was mounted on her and she was fitted out as a blockade runner and dispatch boat for the Confederacy under the name of *Memphis*. No connected history of her adventures in this picturesque period of her career has been preserved.

The *Memphis* was finally chased into the St. Johns River, Fla., by a United States blockading vessel and was sunk there by the Confederates. She was discovered in Dunns Lake by a boat expedition commanded by Commander Thomas H. Stevens, United States Navy, in March 1862, was raised by him, and, after being repaired, was taken into the United States Navy under her original name. She was appraised at $6,000 by Rear Admiral S. F. du Pont November 1, 1862, and was purchased from the New York prize court by the Navy Department May 19, 1863, for $700. She served on the South Atlantic Blockading Squadron off Charleston, S. C., until May 1863.

Commander Stevens' version of the *America's* connection with the Confederacy, given in his report of April 23, 1862, to Flag Officer S. F. du Pont, commanding the South Atlantic Blockading Squadron, is as follows:

> The *America* was brought to Jacksonville by a Lord Dacy, and, I am well informed, was sold to the Confederate Government some 4 months ago (at which time she ran the blockade) for the sum of $60,000. It is asserted and generally believed she was bought by the rebels for the purpose of carrying Slidell and Mason to England.

The officers who found and raised the *America* waived all claim to prize money, requesting that she be sent North and used as a practice ship for midshipmen at the Naval Academy. She was ordered to this duty in May 1863, and was the pride of the midshipmen until 1873. She was sold at auction to Gen. Benjamin F. Butler and Col. Jonas H. French, of Boston, June 20, 1873, and used for racing and cruising. She was rebuilt in 1885, and sailed her last race in that year unsuccessfully. In 1917 she passed into the hands of the Eastern Yacht Club of Marblehead, Mass., and was by them and others presented to the Navy in 1921, as follows: She was turned over to the Government at the Naval Academy at Annapolis on October 1, 1921, at 10:30 a. m. for the sum of $1, the presentation being made by Mr. Charles Francis Adams on behalf of the American Restoration Fund and other organizations, and so forth, and taken over by the Navy Department as a relic.

U. S. S. "AMERICA"

Line of battleship; 182½ feet length; 50 feet beam; 1,982 tons; full complement, 626 officers and men. First ship of her class built in America.

Built by order of Congress at Portsmouth, N. H., under the direction of Col. James Hackett. From May 10, 1777, to May 12, 1781, Capt. Tobias Lear superintended the building, and she was completed under the supervision of Capt. John Paul Jones. Commenced in 1777, launched November 5, 1782.

Capt. John Paul Jones was unanimously selected by Congress to command the *America*, but it was decided to present her to France to replace the *Magnifique*, wrecked in Boston Harbor. She was accordingly when launched delivered to the Chevalier de Martigne, late commander of the *Magnifique*. The French Minister at Philadelphia, Chevalier de Luzerne, was directed to receive her for the service of the King of France. Jones was ordered to superintend her fitting out.

She sailed for France and was in active service during 1782 and 1783, then laid up at Brest. In 1786 a commission ordered by the King to examine the *America* found her too much decayed to be repaired; she was ordered to be broken up and a new vessel built to bear the name *America*.

The figurehead of the *America* was designed by John Paul Jones. It was the figure of the Goddess of Liberty crowned with laurel; the right hand raised, forefinger pointing to heaven, on the left arm a shield of blue with 13 silver stars in it.

ROOSEVELT OR LANDON?—BUILDERS VERSUS WRECKERS!

Mr. SADOWSKI. Mr. Speaker, the battle lines are drawn. The war is on. It is Roosevelt and Garner versus Landon and Knox. Progressives, liberals, humanitarians versus old guards, reactionaries, monopolies, Liberty Leaguers.

The one pronounced progressive candidate, Senator BORAH, was so disgusted with the standpat atmosphere of the Republican Cleveland convention that he did not even attend the convention, nor has he endorsed the candidate since.

The outstanding liberal and progressive Republican, Senator NORRIS, of Nebraska, has openly and publicly endorsed President Franklin D. Roosevelt.

THREE LONG YEARS?

They have stressed the 3 long years of Roosevelt. They have said nothing of the 3 long and terrible years under Hoover.

This is not only a mighty interesting comparison but it tells the very heart of the political question confronting every voter when he goes into his voting booth on November 3.

In the first place, think of the Hoover 3 long years from what you yourself saw and experienced—suffering mothers, sweatshops, ragged children, hungry and starving toilers, ground down by the greedy oppressors' heels, 14,000,000 or 15,000,000 unemployed, banks failing everywhere—causing universal ruin and suicides, homes and farms foreclosed by the hundreds of thousands, millions of boys tramping the roads and railroads, drifting hither and yon and headed straight for the devil, businesses going to pot on every hand in every community, farm prices so low that they would not bring enough even to pay interest and taxes, with almost everybody you saw without hope and surrounded in gloom and despair. As you think back, is not this the actual, the unvarnished, picture of the Hoover 3 long years?

And then compare these with the 3 long years under Roosevelt; the hungry fed; sweatshops abolished; many millions given employment; the farm income raised toward a prosperous condition; workers given more decent working and living conditions; bank failures almost entirely stopped; business prosperous everywhere; millions of boys taken from the streets and railroads into the C. C. C. camps and employment; mortgage foreclosures on homes and farms reduced almost to a minimum; stock-market graft wiped out; millions of needy old people, blind, and dependent children helped; spirits revived; and gloom and distress turned into hope and assurance.

We should pick up their slogan and song of 3 long years and bring it, as it actually is, and burn it into the minds of every possible voter in the country. This is the real question between the two parties, Do you want to go back to the Hoover 3 long years or do you want to continue the Roosevelt 3 long years?

The Republican convention's great demonstration, you know, was for Mr. Hoover, and Mr. Hoover heartily approves Governor Landon; therefore, it would seem that Governor Landon typifies the Hoover 3 long years, especially as the Governor so heartily condemns the Roosevelt 3 long years.

ROOSEVELT ACCOMPLISHMENTS

He has turned despair into hope and prosperity for nearly all of the people.

He has provided jobs for many, many millions.

He has fed hungry mouths and has kept great groups of our people from starving and from anarchy.

He has practically doubled the farm income.

During the Hoover administration more than 6,000 banks were closed, with the consequence of disaster and loss almost beyond telling and beyond measuring, while the President has so rearranged the situation that a bank failure is now almost unknown.

He has guaranteed the bank deposits for more than 50,000,000 of American citizens.

He has shifted the money center of America from Wall Street to Washington.

He has saved a million homes from foreclosures through the Home Owners' Loan Corporation.

Farm evictions prior to his administration were at a rate of more than 200,000 a year. He has loaned about $4,000,000,000 and has saved hundreds and hundreds of thousands of farms and farm homes from the continued foreclosures.

He has saved and helped tens of thousands of banks, insurance companies, railroads, and other business institutions through the R. F. C.

He has taken a million and a quarter boys from begging rides from automobiles on the highways and from stealing rides on railroad trains, drifting back and forth aimlessly and heading straight into crime, and has put them into the health-giving, the hope-giving, and the prosperity-giving C. C. C. camps.

He has outlawed the sweatshop and abolished child labor.

He has provided for old-age insurance through cooperation with the States, and has given help to dependent children and the physically incapacitated.

He has given us the Securities Commission, which protects innocent investors from the lying and thieving devices of the unscrupulous confidence men and their worthless stocks.

He has given us the Tennessee Valley electrical yardstick and is bringing electricity into hundreds of thousands of farm homes through the R. E. A., and its efficient chairman, Morris L. Cooke.

He has taken 600,000 farm families—about 3,000,000 people—from relief rolls and put them into self-respecting and self-supporting conditions on farms through the Resettlement Administration.

He has kept tens of thousands of young people in schools and colleges.

Through the Federal Housing Administration he has helped hundreds of thousands of people to build and buy their own homes.

In 1932, 900 corporations made a net profit of $142,000,000. Last year these same corporations made more than 10 times that much profit—$1,568,000,000. On every hand business is better and in some instances is booming.

He has increased our foreign trade with many countries, in some as much as 30 percent.

And there are a lot of other great benefits which his administration has accomplished.

The 3 years under Roosevelt was a people's Government. The 3 years under Hoover was an Andy Mellon-Wall Street Government.

I could go on all day making similar comparisons, but these I have given tell the whole story. There is no question in my mind as to which 3 long years the people will choose.

The Wall Street-Old Guard crowd are about as honest with the people as the hubby was with his wife. He telephoned to her from a night club, "I'm working late at the office, dear." Replied the wife, "Well, you must be made of asbestos. Your office burned down shortly after 5."

DEPRIVED OF LIBERTIES?

Another fearful convention howl was that President Roosevelt is depriving us of many of our liberties. Yes; this is true. He is. There are two kinds of liberties—the kind of liberties we want, and the kind of liberties we do not want.

The kind of liberties that we do not want are those which gave to certain powerful financial interests special privileges to loot and rob the American public at will. Those interests and special privileges regarded these rights which they possessed under the previous Republican administration as their liberties. It was those liberties which wrecked and ruined our Nation. The rules of the game that were established by Andy Mellon and his crowd have been scrapped and discarded and in doing so, the real liberties of the people, as originally contemplated by the fathers of our country and guaranteed by the Declaration of Independence and the Constitution, will again be triumphant in this great land of ours.

LABOR FOR ROOSEVELT

The American Labor movement has abandoned its nonpartisan policy and has taken a definite stand favoring Roosevelt Democratic liberalism. John L. Lewis, head of the Mine Workers' Union, and Maj. George L. Berry, of the Pressman's Union, have pledged to deliver 500,000 members of these organizations to President Roosevelt. The members of the labor organizations are active in their support of the President.

President William Green of the American Federation of Labor, in a speech in Washington last spring heartily endorsed the President and his policies.

WHO IS DISSATISFIED WITH ROOSEVELT?

The Republican newspapers would lead their readers to believe that the people are dissatisfied with President Roosevelt.

Let us tear down their vicious cartoons and libelous articles. Let us analyze those subsidized remarks that appear in the Republican press.

Now who is it, then, that is dissatisfied with the work of the Roosevelt administration? Not those who have been aided by the Agricultural Adjustment Act. Not those whose farms have been saved by the Farm Credit Administration. Not those who have been able to refinance their mortgages at a lessened rate of interest through the activities of the Federal Housing Administration. Not those whose homes have been saved by the Home Owners' Loan Corporation. Not the stockholders or creditors of banks, insurance companies, and railroads that have been rescued by the Reconstruction Finance Corporation.

Surely not those who have received aid or found work through the Public Works Administration or the Works Progress Administration. Not the 1,250,000 boys who were taken from idleness and the streets and given opportunity and training in the Civilian Conservation Corps. Not the 52,000,000 American citizens whose deposits in the banks of the country have been made secure by the act creating the Federal Deposit Insurance Corporation. Not the laboring groups in whose interest the National Recovery Administration established collective bargaining, improved working conditions, outlawed the sweatshop, abolished child labor, and gave to industry an opportunity for constructive leadership.

Not those whose humanitarian instincts approve the Social Security Act and its provisions for old-age insurance and grants to States for widows' pensions, child welfare, and public-health service. Let me say to you at this time that the inadequate old-age pensions now being paid by the State of Michigan is not the Federal Government's fault, but this lies at the door of our Republican Governor who apparently does not believe in fair treatment for the aged of our State and for the widows and for child welfare.

Not those who recognized the need of abolishing holding companies, formerly connected with the banks of our country, which made it possible for reckless or corrupt financiers to speculate with the savings of depositors or waste the funds entrusted to their care. Not those who favor stock-market regulations to protect the public in connection with securities offered for general sale. Not those whose utility rates have been reduced through the activities and influence of the Tennessee Valley Authority.

Not those who wanted to see the price level lifted and the debt burden of the country made bearable. Not those who have followed international developments and have noted the fruitful efforts to expand our markets and to revive foreign trade. In Detroit alone the reciprocal tariff agreements made by our President and our Secretary of State, Hon. Cordell Hull, has increased industrial production and has aided the export trade of automobiles over 100 percent. This in turn aids in increasing employment in our factories and places at work many a person, who prior to these trade agreements was unemployed.

Not those who realize that the American dollar is the soundest money on earth; and that there is a larger metallic reserve behind every Government issue than at any previous time in our history.

Surely not the great masses of the people who see evidence of increasing prosperity upon every hand.

Who, then, I repeat, are dissatisfied? No doubt thwarted political ambitions, unrelenting partisanship, and ultra-conservatism account for the major portion of the forces arrayed against us. These things we understand and accept. There are those who complain that the Budget has not been balanced. If the President had balanced the Budget at the time his critics insisted that he should do so, how many of our citizens would have been forced to go without food? Which was the more important thing to do, balance the Government's Budget or balance the people's budget?

The people of this great country are proud that they had a President and a Congress that thought of them first. Men with a heart, who, seeing and knowing the condition of the people of our country, thought in terms of them. It was impossible to balance the Budget and feed the people at the same time. If it be treason to the doctrines of sound finance to feed and clothe the hungry and naked, then let the critics of the administration make the most of it.

Of course, recovery has cost a great deal of money, but far less than unfriendly critics assume. Nor do the critics allow any credit for the public buildings that have been erected, the great bridges that are being flung across our rivers, the thousands of miles of good roads that are being laid, the dams that are being built, and the innumerable other projects that add to the wealth and well-being of our country. This outpouring of public credit had for its primary object the rescue of millions of Americans from the impossible position in which the economic collapse had placed them. The purpose was to preserve to them their private ownership of property; their right to conduct their enterprises as independent and useful factors in American life and to avoid the processes of liquidation by which the great bulk of our fellow citizens were rapidly being forced into the growing army of the unemployed.

There are still many grave problems yet to be worked out, which must be approached not only with all the intelligence the Nation can summon, but with a devotion amounting to consecration.

Do you suppose for a moment that the Republican Party, as now constituted, or as it is likely to be constituted, would be able to grasp the social consequences involved in these great economic problems or be willing to adopt the measures of relief that existing conditions demand? It would be a vain and futile hope.

The dawning future is aglow with promise and when the history of this era is written, President Roosevelt will be more and more clearly revealed not only as a friend of human justice and social progress, but as the protector and defender of our accredited form of government, which by his genius he has vindicated.

BUILDERS VERSUS WRECKERS

The issue is clear—shall we continue the New Deal which has rescued our country from disaster and despair; or shall the Government be turned back to the old dealers who wrecked and ruined it?

The consequences of the coming election are vital to the future of our Nation. We must do our utmost toward swelling the majority that will testify to the national desire that the processes of recovery, initiated and caused by President Roosevelt, shall not be interrupted.

The verdict must be so overwhelming, so conclusive, so compelling, that nobody can doubt that the country is united in its determination and there shall be no backward step in our progress.

HON. TILMAN BACON PARKS

Mr. BUCHANAN. Mr. Speaker, I should not wish for this session to come to a close without expressing to the House my keen regret over the fact that our beloved colleague, the distinguished gentleman from Arkansas, the Honorable TILMAN BACON PARKS, is voluntarily retiring from membership in this body. Despite the importunities of his many friends in and out of Congress our friend has concluded to terminate his enviable congressional career.

Mr. PARKS took his seat in this House on March 4, 1921, and has served continuously with distinction ever since. But relatively few of the present membership have had longer service. My service antedates Mr. PARKS by 8 years. Therefore, it has been my privilege to know and serve with him throughout his membership. Our association naturally became closer when he became a member of the Committee on Appropriations on December 9, 1931, immediately becoming a member of the important War Department subcommittee, in which he succeeded to the chairmanship at the commencement of the Seventy-fourth Congress. No word of praise from me is necessary of the splendid record he made

in that important post. Every Member here who gives close attention to the national defense will bear witness to the signal contribution he has made in providing us with a better, more effective, and more efficient Military Establishment.

Mr. PARKS' withdrawal can only mean a decided loss to the House, to his great State, and to the Nation; and I am sure there is no man in this body, on either side of the aisle, who does not join me in the earnest wish that his future may be blessed with good health, happiness, and prosperity in abundant measure.

Mr. Speaker, as a part of my remarks I shall include an editorial from the Boston Evening American entitled "A Real Representative." It is a well-deserved tribute to our departing friend:

[From the Boston American]

A REAL REPRESENTATIVE

The retirement from Congress at the expiration of his present term of Representative TILMAN B. PARKS marks the passing from public life, for the present at least, of a statesman who will leave behind him in Washington an enviable record of devoted service to the national defense of his country.

While faithfully representing his own constituents of the Seventh District of Arkansas for the past 15 years, he has been broad enough in his stalwart Americanism to visualize the Nation and its needs as a whole. This is an attribute so rare today as to be deserving of the highest praise.

As chairman of the military subcommittee of the House Committee on Appropriations in his closing term, Mr. PARKS was largely instrumental in bringing before the House, with the full support of his committee, an appropriation bill which for the first time in many years recognized the deplorable state of weakness into which the United States Army had been permitted to sink, and presented an intelligent program for its improvement.

For the first time also in many years, under the leadership of Mr. PARKS, the attention of Congress was directed to the Pacific.

Accompanied by Representative JOHN F. DOCKWEILER, of California, who gave him constant encouragement and support, and by other members of his subcommittee, Mr. PARKS a year ago made a personal examination of the defenses of the west coast from Seattle to San Diego, of the Panama Canal, and of the Hawaiian Islands.

The committee was impressed with the strategic importance of the Pacific, gathered valuable data at first hand, and incorporated the ideas obtained in the Army bill of this year which gives the country its first adequate defense program since the close of the World War.

It is, unhappily, unusual to find a public servant who maintains his enthusiasm to the very close of his appointed term of office. It is a weakness of human nature to lose interest in a duty which is soon to be relinquished.

Mr. PARKS has known for a long time that he would not be a candidate to succeed himself in Congress with the expiration of his present term.

The indefatigability of his zeal for the national defense thus grew from no selfish motive, but from the highest instincts of disinterested love of country.

With his retirement the Army will lose a valued supporter, Arkansas a faithful servant, and the Nation a patriotic and most efficient legislator.

SALARIES

Mr. SABATH. Mr. Speaker, in accordance with leave to extend, I am submitting a statement of salaries paid officials and directors of certain companies and corporations. This list was furnished by the Securities and Exchange Commission on June 15, 1936, and reads as follows:

TABLE 1.—*Total remuneration of officers and directors receiving annually $50,000 or more. Selection limited to domestic corporations with assets of $50,000,000 or greater and having securities permanently registered on national securities exchanges*

Name of company and official	Capacity	Remuneration
Allied Stores Corporation:		
B. Earl Puckett	President and director	$73,147
Richard Mitton	Chairman and director of registrant; officer of 1 subsidiary.	50,235
American Express Co., P. F. Small	President and director	68,665
American Rolling Mill Co.:		
George M. Verity	Chairman and director	63,000
Charles R. Hook	President, general manager, and director.	54,000
American Smelting & Refining Co.:		
Francis H. Brownell	Chairman and director of registrant; president of 1 subsidiary.	100,000
H. G. Guess	Vice president and director	70,000
Simon Guggenheim	President and director	50,000
American Sugar Refining Co., Earl D. Babst.	Chairman and director	77,160
American Telephone & Telegraph Co.:		
W. S. Gifford	President and director	$206,250
C. P. Cooper	Vice president and director	74,250
C. M. Bracelen	Vice president and general counsel	61,875
B. Gheradi	Vice president and chief engineer	61,875
H. D. Pillsbury	President and director of 1 subsidiary.	55,008
Leonard H. Kinnard	Chairman and director of 1 subsidiary.	55,000
American Tobacco Co.:		
George W. Hill	President and director	137,043
James E. Lipscomb, Jr.	Director and president of 1 subsidiary.	100,000
Vincent Riggio	Vice president and director	60,000
Charles F. Neiley	do	60,000
Thomas R. Taylor	do	50,000
Paul M. Hahn	do	50,000
American Water Works & Electric Co., Inc., H. Hobart Porter.	President and director	80,625
American Woolen Co.:		
Lionel J. Noah	do	85,300
Moses Pendleton	Vice president and director	50,300
Anaconda Copper Mining Co.:		
Cornelius F. Kelley	President and director of registrant; president of 8 subsidiaries.	174,504
James R. Hobbins	Vice president and director of registrant; president of 1 subsidiary.	60,574
Associated Gas & Electric Co., J. I. Mange.	President and director	55,572
Atchison, Topeka & Santa Fe Ry. Co., S. T. Bladsoe.	do	55,500
Atlantic Refining Co.:		
J. W. Van Dyke	Chairman and director	100,000
W. M. Irish	President and director	75,000
Baltimore & Ohio R. R. Co., Daniel Willard.	President	60,000
Beneficial Industrial Loan Corporation, Charles H. Watts.	President and director of registrant; officer and director of 5 subsidiaries; director of 45 subsidiaries.	68,585
Bethlehem Steel Corporation:		
Charles M. Schwab	Chairman and director of registrant; officer or director of 1 or more subsidiaries.	230,000
Eugene G. Grace	President and director of registrant; officer or director of 1 or more subsidiaries.	180,000
Quincy Bent	Director of registrant; officer, director, or employee of 1 or more subsidiaries.	90,000
C. Austin Buck	do	90,000
Paul Mackall	do	75,000
R. E. McMath	Vice president, secretary, and director of registrant; officer or director of 1 or more subsidiaries.	58,500
Borden Co., Arthur W. Milburn	President and director	95,000
Boston & Maine R. R., E. S. French.	President and director of registrant; president of 1 subsidiary.	59,000
Brooklyn-Manhattan Transit Corporation, William S. Menden.	President and director	62,189
Brooklyn Union Gas Co., James H. Jourdan.	do	81,092
California Packing Corporation, L. E. Wood.	President and director of registrant; officer or director of various subsidiaries.	50,240
Chicago & North Western Ry. Co., Fred W. Sargent.	President and director	50,000
Chicago, Burlington & Quincy R. R. Co., Ralph Budd.	do	50,000
Coca-Cola Co., R. W. Woodruff	President and director of registrant; director of 1 subsidiary.	100,500
Columbia Gas & Electric Corporation:		
Philip G. Gosler	President and director of registrant; officer or director of various subsidiaries.	91,300
Thomas B. Gregory	Senior vice president and director of registrant; officer or director of various subsidiaries.	51,050
Commercial Credit Co.:		
A. E. Duncan	Chairman and director	55,000
J. P. Maguire	President of subsidiary	55,000
Commonwealth & Southern Corporation, Wendell L. Willkie.	President and director	65,971
Consolidated Gas Co. of New York:		
George B. Cortelyou	President, trustee, and member executive committee of registrant; officer or director of 22 subsidiaries.	108,506
Frank W. Smith	Trustee and member executive committee of registrant; officer or director of 9 subsidiaries.	78,188
Floyd L. Carlisle	Chairman, trustee, and member executive committee of registrant; officer or director of 9 subsidiaries.	57,930
Consolidated Gas, Electric Light & Power Co. of Baltimore, Herbert A. Wagner.	President, member executive committee, and director.	66,640
Continental Oil Co., Dan Moran	President and director	100,000
Corn Products Refining Co.:		
George M. Moffett	do	144,750
Frederick T. Fisher	Vice president, secretary and treasurer, and director.	121,500
George S. Mahana	Vice president and director	121,500

TABLE 1.—*Total remuneration of officers and directors receiving annually $50,000 or more. Selection limited to domestic corporations with assets of $50,000,000 or greater and having securities permanently registered on national securities exchanges*—Con.

Name of company and official	Capacity	Remuneration
Crown Zellerback Corporation, Louis Bloch.	Chairman and director	$67,760
Curtis Publishing Co.:		
G. H. Lorimer	Chairman, president, and director	100,000
P. S. Collins	Vice president and director	60,751
F. A. Healy	do	54,000
Delaware & Hudson Railroad Corporation, L. F. Loree.	President and director	50,000
Delaware, Lackawanna & Western R. R., J. M. Davis.	do	60,000
Detroit Edison Co., Alex Dow	do	75,715
Eastman Kodak Co.:		
Frank W. Lovejoy	do	90,904
William G. Stuber	Chairman and director	61,230
Electric Power & Light Corporation, H. C. Couch.	Director of registrant; officer or director of 8 subsidiaries.	71,335
Erie Railroad Co., C. E. Denney	President and director	53,750
Federal Water Service Corporation, C. T. Chenery.	President and director of registrant; chairman and director of 14 subsidiaries.	56,700
Federated Department Stores, Inc.:		
Simon Lazarus	Vice president and director of registrant; officer or director of 2 subsidiaries.	100,440
Fred Lazarus, Jr	Director of registrant; officer or director of 2 subsidiaries.	100,320
Louis E. Kirstein	do	80,400
Edward J. Frost	Secretary, treasurer, and director of registrant; officer or director of 2 subsidiaries.	80,320
Lincoln Filene	Chairman and director of registrant; chairman and treasurer of subsidiary.	80,140
Samuel J. Bloomingdale	Director of registrant; chairman of 1 subsidiary.	76,201
Edward C. Blum	Assistant secretary and assistant treasurer of registrant; president and director of 1 subsidiary.	57,720
Fidelity-Phenix Fire Insurance Co.:		
Ernest Sturm	Chairman and director of registrant; chairman of 5 associated companies and director of 8 associated companies.	96,597
Bernard M. Culver	President and director of registrant; president of 5 associated companies and director of 8 associated companies.	56,201
General American Transportation Corporation, Max Epstein.	Chairman and director	60,000
General Electric Co.:		
Gerard Swope	President and director	87,260
Owen D. Young	Chairman and director	87,260
General Motors Corporation:		
William S. Knudsen	Executive vice president and director.	211,129
Alfred P. Sloan, Jr	President and director of registrant; director of 1 subsidiary.	201,744
Charles F. Kettering	Vice president and director	140,695
Donaldson Brown	Vice president and director of registrant; director of 1 subsidiary.	134,688
John L. Pratt	Vice president and director	134,528
Lawrence P. Fisher	do	125,219
John Thomas Smith	do	125,213
Richard H. Grant	Vice president	118,802
James D. Mooney	Vice president and director	118,129
William A. Fisher	Vice president	110,569
Albert Bradley	Vice president and director	98,253
Charles E. Wilson	do	98,018
Ormond E. Hunt	Vice President	98,003
Charles T. Fisher	Vice president and director	78,840
John T. Schumann, Jr	Director of registrant; president and director of 1 subsidiary.	71,631
Gimbel Bros., Kenneth Collins	Vice president and director	50,000
B. F. Goodrich Co., J. D. Tew	President, member executive committee, and director.	60,143
Goodyear Tire & Rubber Co., P. W. Litchfield.	Chairman, president, and director	81,000
Great Northern R. R. Co., Wm. P. Kenney.	President and director	60,009
Great Western Sugar Co.:		
W. L. Petrikin	Chairman of board and director	55,000
W. D. Lippitt	President and director	53,363
Houston Oil Co. of Texas, Geo. A. Hill, Jr.	do	51,480
Illinois Central R. R. Co., L. A. Downs.	do	60,000
International Business Machines Corporation:		
Thomas J. Watson	do	365,339
Otto E. Braitmayer	Vice president and director	60,330
International Harvester Co., Addis E. McKinstry.	President and director	60,757
International Paper & Power Co.:		
Archibald R. Graustein	President and director of registrant; president of 2 subsidiaries.	95,696
Frank D. Comerford	Vice president and director of registrant; officer or director of 3 subsidiaries.	73,100
International Paper Co., R. J. Cullen.	Vice president of registrant; officer or director of 2 subsidiaries.	62,880
International Telephone & Telegraph Corporation, Sosthenes Behn.	President and director of registrant; director of 10 subsidiaries; director of foreign subsidiaries not named.	51,648
International Utilities Corporation, P. M. Chandler.	President and director of registrant; officer or director of 7 subsidiaries.	$57,110
Kennecott Copper Corporation:		
D. C. Jackling	Chairman operating committee of registrant; officer or director of 6 subsidiaries.	101,410
E. T. Stannard	President and director	75,820
Stephen Birch	Chairman and director of registrant; director of 1 subsidiary.	75,700
Kroger Grocery & Baking Co., Albert H. Morrill.	President and director	77,756

REPORT TO CONSTITUENTS

Mr. COCHRAN. Mr. Speaker, following the custom adopted at the time I was first elected to Congress, I desire to place in the RECORD a statement concerning my service during the Seventy-fourth Congress, the second session of which has just ended.

When one seeks to again place his candidacy before his constituents it is only proper that he give an accounting of his services in the past.

In the campaigns of 1932 and 1934 Democrats pledged themselves to support Mr. Roosevelt in the event of his election. At that time, due to the failure of the Missouri State Legislature to redistrict the congressional districts of Missouri, I was a candidate at large and was elected by a majority of nearly 500,000 votes, leading the 13 congressional candidates.

We all know the situation that confronted the country and President Roosevelt when he took office on March 4, 1933. Who can help but recall his appeal to the people of the country immediately following his inauguration, when he issued the order that resulted in the so-called bank holiday? The American people, Republicans as well as Democrats, approved the President's course, or at least offered absolutely no objection, because they were aware that our financial system would be destroyed if he had not taken the action.

During the 4 years of the Hoover administration which had just ended, 1,035 national banks had closed their doors. During the administrations of President Coolidge, which just preceded that of Mr. Hoover, covering 4½ years, 533 national banks failed.

During 1933, 3 months of which were under President Hoover, 435 national-bank suspensions occurred prior to or during the bank holiday, while only 3 national banks closed their doors during the remainder of that year. The activities of 250 national banks were suspended during the banking holiday, requiring the appointment of receivers to complete liquidation. These receivers either reorganized the banks or made partial payments to depositors.

The President proceeded with two objects in view—first, to conquer the depression, and second, to prevent a recurrence.

One of the outstanding achievements of the Roosevelt administration was the passage of the so-called Bank Deposit Guaranty Act, which guarantees all deposit accounts up to $5,000. Accounts are now insured by the Federal Deposit Insurance Corporation, created during the Roosevelt administration.

During 1934 and 1935 only five national banks in this country suspended operations, and every depositor whose account was $5,000 or less received his or her money in full. This covered the deposits of over 90 percent of the depositors

in the closed banks. How happy hundreds of thousands of our citizens would be if we had had such a law in force during the Coolidge and Hoover administrations. In 1934 and 1935 five national banks closed their doors, while up to this date in 1936 not one national bank has suspended operations.

SUPPORTED PRESIDENT ROOSEVELT

Any number of outstanding laws were passed during the Seventy-third Congress, which was the first Congress of the Roosevelt administration. I referred to my service in that Congress in a previous report, and I will not go into detail in reference to the meritorious legislation that was passed other than to say that I kept the pledge I made to the people of the State of Missouri during the campaign of 1932 and supported every recommendation the President made to the Congress.

In times of war it has always been the policy of the Congress to delegate unusual powers to the Chief Executive. When the Democratic Party assumed control in March 1933 we were at war—war with the depression or panic, or whatever you might desire to call it—millions of our citizens were without food, clothing, and shelter. Something had to be done immediately, because not only the millions of citizens out of employment were demanding action by the Congress but the businessmen of the country were likewise demanding action. In order to meet this unprecedented situation, Congress did on numerous occasions delegate certain extraordinary powers to the President, and at the time there was no complaint either from the press, the masses of the people, or from the business group. On the contrary, Congress was complimented for expediting relief measures.

Slowly but surely conditions started to improve, and as business became better there was a change of attitude among the leaders of industry, who had previously been appealing for help.

Congress had passed numerous laws extending relief to the unemployed, help to the farmers, and billions of dollars in loans to business. Through the Reconstruction Finance Corporation gigantic corporations, some of our largest banks, and especially the railroads, were saved from bankruptcy. There was no complaint then when business was in distress.

NATIONAL RECOVERY ACT

One of the laws that Congress passed was the National Industrial Recovery Act, the purpose of which was to assist the recovery of business. Under that act business was permitted to organize in groups, adopt codes, and in many instances the antitrust laws of the country were practically suspended.

I do not know where the thought for the enactment of this legislation originally came from, nor do I know who prepared the bill, but I do know that the president of the National Association of Manufacturers who happened at that time to be a resident of the city, a part of which I represent in Congress, St. Louis, came to me and pleaded with me to speak in favor of and vote for that legislation when the President submitted the bill. He pictured the ultimate destruction of business if the Congress did not respond to the appeal of the President for the enactment of the National Industrial Recovery Act. I supported that bill and it proved to be beneficial to hundreds of thousands of businessmen throughout the country, the great majority of which were shocked and disappointed when the Supreme Court declared it unconstitutional.

Business men in groups adopted codes under the N. R. A. and among the agreements was the shortening of the hours of labor. This required additional help. Another agreement was in regard to salaries, the employees benefiting by receiving increases in wages. Shortly after the Court declared Congress had gone beyond its powers under the Constitution, complaints reached the Department of Labor that employers were lengthening working hours and reducing salaries. A survey was made and the result has just been announced. It is estimated that nearly 1,000,000 employees lost their jobs in the 6 months following the decision of the Supreme Court, while the reduction in salaries was great but unestimated. The benefits that accrued by reason of the passage of the act were lost to many of the employees.

NATIONAL RECOVERY ACT WAS BENEFICIAL

After the passage of that law business recovered steadily and then developed the change of attitude, especially among those who had been appealing to the President and the Congress for help, until today we find the National Association of Manufacturers of the United States probably the most outstanding critic of the Roosevelt administration. Among the acts they criticize is the National Industrial Recovery Act which their president urged me to support. They not only abandoned their own child but criticized Congress for enacting the law they urged Congress to pass.

Other critics of the administration are the Liberty League, the Economy League, and other leagues and associations, the wealth of whose members run up into the billions of dollars.

In the final analysis the ultimate conclusion that one must reach is, that they are displeased because the Roosevelt administration has taken from them the special privileges which they so long enjoyed. They know that they will never regain those special privileges while the Democratic Party is in power. While their vile tongues and pens pour forth vituperation, commendation comes from those who seek no special favors and who are grateful for the help that has been extended by the President, a Democratic House and Senate.

As an indication of improvement the report of increases in salaries that have been granted to the executives of the large corporations of the country in the last 2 years is ample proof of the recovery of big business. While they have increased the salaries of their executives, they complain whenever Congress attempts to legislate in a way that will bring about an increase in the salaries of the employees or pass legislation that will put the unemployed to work. The objective of the Roosevelt administration has been to more equally distribute the profits of industry among the workers who are responsible for those profits and not confine the profits and increases to the officials of the corporations.

Under the terms of the National Security Act the Commission has the power to make public the salaries and bonuses of officials of corporations. Just a few days ago one of the many lists was released by the Commission. At the head of that list was the name of a director and member of the executive committee of a large 5- and 10-cent store. His salary and bonus for the year 1935 amounted to $309,880. Eighteen officials of that corporation received in bonus, which was in addition to their salaries, $1,186,053. Would it not make for a better condition if some of that money had been used in increasing the salaries of the underpaid clerks? I doubt if the Governors of the 48 States in the Union receive altogether $300,000 a year.

The answer of big business to criticism of increases in salary and bonus to executives is that the amount paid officials is small in comparison to that paid to employees. Probably if the same percentage of increases were granted employees as was given to executives then there would not be so much discontent among the workers.

It is true that a number of the laws that Congress enacted have been declared unconstitutional by the Supreme Court, but I can say now that is not going to prevent the Congress in the future from trying to write legislation that will be beneficial to the farmers of the country as well as to the laboring man if a way can be found to do so under the Constitution.

WILL REPUBLICANS REPEAL NEW LAWS?

Can anyone conceive that the Republican Party is willing to go on record now as being in favor of the repeal of the Reconstruction Finance Corporation Act, the Home Owners' Loan Corporation Act, the Farm Credit Administration Act, the National Securities Exchange Act, the Federal Bank Deposit Act, the Social Security Act, the Veterans' Act, the National Housing Act, the Railroad Retirement Act, the Federal Alcohol Act, the various laws improving the National Banking Act, the Bankruptcy Act, the Prohibition Act, the restrictive Immigration Act, the act to prevent profiteering in time of war, the Revenue Acts of 1934 and 1935, the act providing for the control of public-utility companies, the Kidnaping Act, the Extortion Act, the Fugitives from Justice Act, and the various acts appropriating money

for relief, as well as dozens more of other outstanding laws passed by the Seventy-third and Seventy-fourth Congresses? They are going to criticize these laws, but ask them to go on record as favoring their repeal.

It might be proper to mention at this point that while the Republicans are now assailing this legislation, which I willingly admit that I supported, the record will show that on an average over one-half of the Republicans of the House voted with the Democrats for the passage of every bill mentioned, and in some instances over 90 of the 120 Republicans and Progressives in the House supported the very laws which they are now criticizing.

I repeat that those who were appealing with tears in their eyes back in 1933 for help now condemn the legislation that was enacted that has brought them back to the point where some of them are now making more money than they ever did in history, but who are now the outstanding critics of the legislation which has proved so beneficial to them.

MILLIONS OF FARMS AND HOMES SAVED

The Roosevelt administration has not only saved millions of farms but 1,019,919 people of the country availed themselves of the Home Owners' Loan Corporation Act, borrowing $3,097,667,903 from that Corporation, thus preventing foreclosure.

We have given temporary employment to millions of our unfortunate citizens, providing them with funds to feed and clothe their families.

While no one could be more anxious to see the unemployed of the country secure work with private industry, nevertheless it may just as well be understood now as later that the unemployment situation is a national problem and must be handled by the National Government so long as it exists. Cooperation between industry and the Government is the road that leads toward recovery, and business will eventually see the wisdom of cooperating with the Government.

I do not propose to enumerate individually the many bills I have supported, but want to make it perfectly plain, and I have no apologies to offer for supporting all legislation I felt would be beneficial and would ultimately lead to recovery. I promised my constituents in the campaign of 1934 that I would follow this procedure and have carried out that promise to the letter.

Just as soon as conditions will permit, if reelected to Congress, I will be strongly in favor of repealing laws that granted extraordinary powers to the executive officials. Had it not been for the great emergency that confronted us, I never would have voted for such legislation. The Constitution places upon Members of Congress certain duties that they and not the Executive should perform, and I will favor restoring to the Congress those powers at the earliest date practicable.

THE NATIONAL DEBT

A great deal has been said in reference to an increase in the national debt. No one realizes more than I do the necessity of the Government balancing its normal Budget, and I will join with others to bring this about if returned to Congress. In regard to the national debt, however, let me say that there is no reason why anyone in the country should be greatly alarmed. While it is true the national debt has been increased, a great deal of this money will be recovered because it is in the form of loans secured by proper collateral. Several billion dollars will not be recovered, as that has been expended for relief purposes.

President Roosevelt has been charged with placing upon the backs of the citizens of this country a national debt of $35,000,000,000. Now, what are the facts? The Treasury statements show the net increase in the national debt since 1933, when President Roosevelt assumed command, is $10,800,000,000. Everyone knows how this came about. The money was used to assist the unemployed, to feed, clothe, and provide shelter for unfortunate citizens who could not secure work. Now, how about the other $25,000,000,000 they have charged to Roosevelt. Every dollar of it was owed by the Government on March 4, 1933, inherited, so to speak, from the previous administrations. President Hoover increased the national debt during his administration by billions of dollars and did not provide for a dollar of assistance to the unemployed. That money went to meet the normal expenses of the Government, because business was so bad the Government did not collect taxes sufficient to meet expenditures, and every year during the Hoover administration there was a deficit, which increased the national debt, because the Government borrowed money to meet its obligations in excess of receipts.

Our bonds have been refinanced by the present administration, saving several hundred million dollars in interest annually.

HELP TO UNEMPLOYED

When it was necessary to create the Civil Works Administration, it was likewise necessary to immediately adopt a program to put the unemployed to work or it would have been necessary to have made weekly payments to those who needed relief. It is likewise true that the projects carried on by the Civil Works Administration were not what might be classed as permanent improvements, but that cannot be said of the Public Works Administration nor the Works Progress Administration, the latter having supplemented the Civil Works Administration. Practically every dollar spent by the Public Works Administration has been for permanent improvements on such projects as new sewers, water systems, utility plants, public buildings, bridges, grade crossings, and so forth. These improvements are permanent and the money has been well spent. It provided work for the unemployed and helped business generally. We have likewise spent a great deal of money improving public highways, rivers and harbors, and erecting Government buildings, not only in Washington but throughout the United States. The money spent for this purpose is classed as liabilities and charged against the public debt.

Whenever a great corporation or a financial institution issues a financial statement you will always find among the assets the real-estate holdings as well as the equipment to offset the liabilities in part. Is there any reason why, in considering the financial statement of the Government, there should not be added to the assets of the Government the permanent improvements that have been brought about by the expenditures of public money? The construction of public buildings reduces the annual rental of the Government for housing Government activities, and while I do not have the exact figures before me, it is reasonable to say that the amount spent for permanent and lasting improvements is several billion dollars. The amount saved in rents runs into the millions annually. Many of these projects are self-liquidating—that is, the amount spent will be saved in rentals over a period of years.

SERVICE TO DISTRICT AND CONSTITUENTS

While the enactment of all laws indirectly affects a Congressman's constituents, naturally there are activities in which he can participate that are beneficial solely to the community he represents. In St. Louis a new Federal building has been constructed; a new post office is under construction; a new Public Health Service hospital and a new post-office garage have been authorized, the money appropriated, the plans are now being drawn, and bids will soon be asked for construction. While it is true these buildings are not in the district I represent, they serve the people of my district and mechanics who do reside in my district have benefited by these projects. The total amount involved in this construction work is over $10,000,000, and I feel I can say without fear of contradiction that I took the lead in advocating the authorization for the construction of these buildings, appearing before committees of Congress, securing the necessary legislation.

Every movement that I felt would be beneficial to those that I represent and to my city has received my support. All mail that has come to me has been promptly answered, and no proper appeal has reached me that I have not at least tried to comply with.

RELIEF JOBS

In regard to the Works Progress Administration, under which relief labor is employed, I have no time since its inception attempted to bring influence to bear in behalf of anyone who has appealed to me. Every letter that has left my office in reply to a request for assistance to secure employment with the Works Progress Administration has contained a paragraph that a letter from a Congressman is not and should not be sufficient to secure work where the money is paid from a relief appropriation. I have given many letters to constituents who have appealed to me to the officials, but have made it plain to those officials in numerous communications I was not endeavoring to influence them in any way and did not want politics to enter relief work. All I requested was that the applicant be considered and, if found to be entitled to recognition under the policy of the Administration, they be given work if it was available. I have never felt that it would be of benefit now or any time to the administration or to the country to permit the use of Federal relief money to further the political interests of any individual or party, and it is my purpose to adhere strictly to that policy in the future as I have in the past.

KIDNAPING AND EXTORTION ACTS

As many of my constituents are aware, I am coauthor of the Federal Kidnaping Act, introduced in the Senate by Senator Patterson and in the House by myself. I am author of the Extortion Act, which makes it a felony to use the mails to extort money under threat of violence. I am proud of the results that have been attained by the enactment of this legislation. While the Kidnaping Act is commonly referred to as the Lindbergh Act, it was introduced long before the Lindbergh baby was kidnaped, because of the numerous kidnapings that had occurred in my own community where the victim had been taken to Illinois and the local police had no power to follow. Up to the time of the passage of the Extortion Act it was not a crime to send a letter through the mail where one threatened to kidnap a child or destroy personal property unless paid certain sums of money. These laws have resulted in the confinement in the Federal penitentiary of gangsters and have practically eliminated organized crime in the Nation.

CHAIRMAN OF COMMITTEE ON EXPENDITURES

I am the only member of the Missouri delegation who is chairman of a committee in the Congress. As chairman of the Committee on Expenditures in the Executive Departments, I preside over a committee of 21 members. It is the duty of this committee to see that the money appropriated by the Congress is spent by the executive branch of the Government for the purpose for which it was appropriated.

During the Seventy-fourth Congress I have taken the lead under instructions from the committee in stopping scores of bills and have saved the Government hundreds of millions of dollars. The outstanding service of the committee was in connection with the Indian claims.

Just before the convening of the present Congress, information reached me regarding Indian claims pending before the Court of Claims. These suits had resulted from Congress passing 114 resolutions setting aside the statute of limitations and permitting Indians or their representatives to sue the Government on claims growing out of treaties, acts of Congress, and Executive orders. There was no limitation, and some of these claims grow out of treaties that were ratified as far back as 1779. After making a thorough investigation of the situation I called a meeting of the committee and had the Assistant Attorney General, Hon. Harry W. Blair, who represents the Government in the Court of Claims in these suits, as well as two assistants and representatives from the Comptroller General present. The Assistant Attorney General, Mr. Blair, stated before the committee that while all the petitions in those suits had not been filed up to that date, the suits filed amounted in claims of over three and one-quarter billion dollars. In some of the resolutions the Government was permitted to offset the claim by showing gratuities and advances that had been made to the various tribes, but in the great majority of the cases this right was not extended to the Government. The Government apparently was helpless.

CHECKED INDIAN TREASURY RAIDS

Our committee was told frankly if Congress did not act it would be impossible to estimate the amount that the Court of Claims would be required to allow the Indians as a result of these suits. The committee came to the conclusion that the only way the Treasury and the taxpayers could be protected was to have a law passed that would be retroactive and would extend to the Government the right to charge off gratuities and advances made to the tribes in all suits pending and in future suits unless the Congress specifically provided that such offsets should not be allowed. Acting under directions of the committee, I placed the matter before the Committee on Appropriations, and Chairman JAMES P. BUCHANAN, of Texas, of that committee, as well as many of his colleagues, both on the Democratic and Republican side, were not only amazed but alarmed over the situation. The suggestion of our committee was when the next deficiency bill was considered the Committee on Appropriations call the judges of the Court of Claims, the Attorney General, and the Comptroller General before them, who would confirm our statement, and then add an amendment to the deficiency bill giving the Government the right to set off the claims of the Indians by showing gratuities and advances that had been made to the tribes. The Appropriations Committee followed this procedure, and as a result we now have the law on the statute books, and while, no doubt, the Indians will recover some money from the Government, the amount will be very small in comparison with the amount of the claims.

Since that amendment was adopted several of the cases have been tried and the court allowed gratuities and advances as a set-off and rendered judgments in favor of the Government. This has resulted in individual resolutions and bills being introduced amending the original jurisdictional act which would deny the Government the right to charge off the gratuities and advances. Many of those resolutions and bills passed the Senate without debate and were favorably reported by the Committee on Indian Affairs of the House. Acting under the instructions of the committee, I have stopped the passage of the bills with the assistance of many members of my committee.

As an example, here is what happened in the last 2 days of the Congress:

The California Indian claims bill was passed, but before it was passed I insisted upon two amendments. One sentence which struck out only four lines in the bill which appeared to be perfectly harmless would have cost the Government, according to the Bureau of the Budget and the Comptroller General of the United States, $15,000,000. This was stricken out, together with an entire section which would also have cost the Government many millions of dollars, if the bill was allowed to pass in the form it passed the Senate.

A second bill called up Saturday was defeated by my objections, and that bill would have extended to the Cherokee Indians certain privileges that would have cost the Government untold millions of dollars if it had been allowed to pass.

In both cases the Court of Claims has already acted upon the matter, as well as has the Supreme Court, and they have ruled against the Indians; but if the jurisdictional acts were changed as the bills provided, a new suit would have been instituted and there would have been nothing that the judges could have done but render an opinion in favor of the Indians and against the Government.

Our committee's contention is when these suits have once been tried and acted upon by the Court of Claims and the Supreme Court they should not be allowed to be returned to the courts.

RUSSIAN SHOE CLAIM

Special attention has been given by our committee to the Private and Consent Calendars.

Throughout the last session, a day or two before omnibus claims bills were passed, I briefed for the membership of the House the important measures to be voted upon. Many bills

listed as unfair to the taxpayers were defeated and every bill the President vetoed, claims bills, had been opposed by me.

Take the so-called Russian shoe claim for $960,000 as an example. When the Congress sent that bill to the White House over my objection I sent a long letter to the Secretary of the Treasury and the Director of the Budget, calling their attention to the bill and proved beyond question by the reports of the State Department and the Comptroller General there was no moral or legal obligation to require the taxpayers to reimburse the claimant. Further I was the one who advanced the argument that the same principle was involved as was involved in the suits against the Government growing out of the revaluation of the gold dollar.

I called at the Treasury and insisted an opinion be secured from the Attorney General. This was done and was included in the report when it was submitted to the President. The President vetoed the bill for that very reason and when the House sustained that veto only four Members voted to override the veto.

I have a letter from the Secretary of the Treasury thanking me for calling his attention to this claim, and I have letters from the President and other Cabinet officers expressing their appreciation for information I had advanced to them where savings to the taxpayers could be accomplished.

RECEIVE 5,000 LETTERS A MONTH

I receive 5,000 letters a month. These letters contain requests of every character. No one who has ever written me can say I have ever made inquiry concerning their politics. I have tried to serve all, regardless of creed, color, or politics, feeling that when a Representative in Congress is elected it is his duty to serve all of his constituents. I have never asked for any reward other than the indorsement of those that I represent, and that is all I ask now. Naturally if my record meets with the approval of the people of the Thirteenth District I would appreciate their indorsement of my service.

Several days before the death of our beloved Speaker, Hon. Joseph W. Byrns, I was appointed by him a member of the select committee of the House, consisting of five members—Hon. JAMES P. BUCHANAN, of Texas, who was elected chairman; Hon. PRENTISS M. BROWN, of Michigan; Hon. J. W. WADSWORTH, Jr., of New York; and Hon. FRED R. LEHLBACH, of New Jersey—to make an investigation with a view to bringing about a reduction in governmental expenditures by the coordination and consolidation of Government agencies where there is now overlapping and duplication of work. Mr. BUCHANAN was required to return to his home, and I have been appointed acting chairman of that committee. This will prevent my return home for several weeks, as there are several conferences to be held and agreements to be reached in reference to investigations that must be made. This House committee will cooperate with a similar Senate committee and a committee appointed to represent the President.

The importance of this work cannot be underestimated. We are in hopes that it will result in large savings to the taxpayers of the country. Just as soon as possible I shall return to St. Louis, to remain until after the November election.

FORWARD WITH ROOSEVELT

Mr. SADOWSKI. Mr. Speaker, since the Democratic and Republican Parties have now met in conventions and adopted their respective platforms, it is well to give some time and study to their declarations.

The Democratic Party has always followed the sound principle that government has a dual function. It must not only furnish a sound and efficient administration and vigorously safeguard the material interests of our country but it must primarily protect and advance the social needs of our people. The Democratic Party has at all times consistently and militantly held to the ideal that the people have the right to live under honest and progressive government and to demand the safeguarding of human rights and values as well as those of property. These principles of government have been firmly embraced and closely adhered to by President Roosevelt.

These principles are likewise stoutly proclaimed in the Democratic platform of 1936 as the policy of the next Democratic administration. The Democratic Party under President Roosevelt has definitely and positively established the principle that is is the function of the Federal Government to assume responsibility for national legislation in the field of unemployment insurance and old-age pensions. We have recognized that this type of social legislation should accrue for the benefit of the people uniformly throughout the Nation.

THE REPUBLICAN PLATFORM WOULD DESTROY FEDERAL UNEMPLOYMENT INSURANCE AND FEDERAL OLD-AGE PENSIONS

The Republican platform adopted in Cleveland contains this deeply significant statement:

> We propose to encourage adoption by the States and Territories of honest and practical measures for meeting the problems of unemployment insurance. The unemployment insurance and old-age annuity sections of the present Social Security Act are unworkable.

These words serve notice to the people of the Nation that if the Republican Party gains control of our Government next November, the Nation-wide establishment of unemployment insurance will be completely destroyed. The Federal act, of course, will be repealed and there will be no chance whatsoever of any substantial number of States adopting unemployment insurance.

The political leaders of the Republican Party, when they wrote those words, knew, as do all of us, that an effective system of unemployment insurance cannot possibly be enacted save on the basis of minimum standards set by the Federal Government for the Nation as a whole.

The very men who now say, "We will encourage the adoption of unemployment insurance by the States and Territories" will be the first to oppose the adoption of unemployment insurance by any single State unless all the other States in the same industrial competitive class have the same statute.

In our own State of Michigan we have seen our Republican leaders practically sabotize Federal and State social and labor legislation. Yet these same men dare to claim that they are concerned with the welfare of the people!

This plank in the Republican platform is full of trickery, particularly so in view of the fact that the New York minimum wage act, adopted under the administration of that great Democratic Governor, Herbert H. Lehman, was declared unconstitutional by the Supreme Court. In view of this decision how can we hope to establish a broad program of social security by purely State or Territorial acts?

The problem of social security is the problem of the Federal Government.

1936 DEMOCRATIC PLATFORM

At this time let me bring to your attention the planks adopted by the Democratic convention at Philadelphia in June 1936.

We hold this truth to be self-evident—that the test of a representative government is its ability to promote the safety and happiness of the people.

We hold this truth to be self-evident—that 12 years of Republican leadership left our Nation sorely stricken in body, mind, and spirit; and that 3 years of Democratic leadership have put it back on the road to restored health and prosperity.

We hold this truth to be self-evident—that 12 years of Republican surrender to the dictatorship of a privilege supplanted by a Democratic leadership which has returned the people themselves to the places of authority, and has revived in them new faith and restored the hope which they had almost lost.

RECOVERY

We hold this truth to be self-evident—that this 3-year recovery in all the basic values of life and the reestablishment of the American way of living has been brought about by humanizing the policies of the Federal Government as they affect the personal, financial, industrial, and agricultural well-being of the American people.

We hold this truth to be self-evident—that government in a modern civilization has certain inescapable obligations to its citizens, among which are:

First. Protection of the family and the home.

Second. Establishment of a democracy of opportunity for all the people.

Third. Aid to those overtaken by disaster.

These obligations, neglected through 12 years of the old leadership, have once more been recognized by American government. Under the new leadership they will never be neglected.

PROTECTION OF HOME AND FAMILY

First. We have begun and shall continue the successful drive to rid our land of kidnapers and bandits. We shall continue to use the powers of government to end the activities of the malefactors of great wealth who defraud and exploit the people.

SAVINGS, INVESTMENTS

Second. We have safeguarded the thrift of our citizens by restraining those who would gamble with other people's savings, requiring truth in the sale of securities; by putting the brakes upon the use of credit for speculation; by outlawing the manipulation of prices in stock and commodity markets; by curbing the overweening power and unholy practices of utility-holding companies; by insuring 50,000,000 bank accounts.

OLD AGE AND SOCIAL SECURITY

Third. We have built foundations for the security of those who are faced with the hazards of unemployment and old age; for the orphaned, the crippled, and the blind. On the foundation of the Social Security Act we are determined to erect a structure of economic security for all our people, making sure that this benefit shall keep step with the ever-increasing capacity of America to provide a high standard of living for all of its citizens.

CONSUMER

Fourth. We will act to secure to the consumer fair value, honest sale, and a decreased spread between the price he pays and the price the producer receives.

RURAL POWER

Fifth. This administration has fostered power-rate yardsticks in the Tennessee Valley and in several other parts of the Nation. As a result electricity has been available to the people at a lower rate. We will continue to promote plans for rural electrification and for cheap power by means of the yardstick.

HOUSING

Sixth. We maintain that our people are entitled to decent, adequate housing at a price which they can afford. In the last 3 years the Federal Government, having saved more than 2,000,000 homes from foreclosure, has taken the first steps in our history to provide decent housing for people of meager incomes. We believe every encouragement should be given to the building of new homes by private enterprise, and that the Government should steadily extend its housing program toward the goal of adequate housing for those forced through economic necessities to live in unhealthy and slum conditions.

VETERANS

Seventh. We shall continue just treatment of our war veterans and their dependents.

AGRICULTURE

We have taken the farms off the road to ruin.

We have kept our pledge to agriculture to use all available means to raise farm incomes toward its pre-war purchasing power. The farmer is no longer suffering from 15-cent corn, 3-cent hogs, 2½-cent beef at the farm, 5-cent wool, 30-cent wheat, 5-cent cotton, and 3-cent sugar.

By Federal legislation we have reduced the farmer's indebtedness and doubled his net income. In cooperation with the States and through the farmer's own committees we are restoring the fertility of his land and checking the erosion of his soil. We are bringing electricity and good roads to his home.

We will continue to improve the soil-conservation and domestic-allotment program with payments to farmers.

We will continue a fair-minded administration of agricultural laws, quick to recognize and meet new problems and conditions. We recognize the gravity of the evils of farm tenancy, and we pledge the full cooperation of the Government in the refinancing of farm indebtedness at the lowest possible rates of interest and over a long term of years.

We favor the production of all the market will absorb, both at home and abroad, plus a reserve supply sufficient to insure fair prices to consumers; we favor judicious commodity loans on seasonal surpluses, and we favor assistance within Federal authority to enable farmers to adjust and balance production with demand at a fair profit to the farmers.

We favor encouragement of sound, practical farm cooperatives.

By the purchase and retirement of 10,000,000 acres of submarginal land and assistance to those attempting to eke out an existence upon it we have made a good beginning toward proper land use and rural inhabitation.

The farmer has been returned to the road to freedom and prosperity. We will keep him on that road.

LABOR

We have given the army of America's industrial workers something more substantial than the Republican's dinner pail full of promises. We have increased the worker's pay and shortened his hours; we have undertaken to put an end to the sweated labor of his wife and children; we have written into the law of the land his right to collective bargaining and self-organization, free from the interference of employers; we have provided Federal machinery for the peaceful settlement of labor disputes.

We will continue to protect the worker and we will guard his rights, both as wage earner and consumer, in the production and consumption of all commodities, including coal and water power and other natural resource products.

The worker has been returned to the road of freedom and prosperity. We will keep him on that road.

BUSINESS

We have taken the American businessman out of the red. We have saved his bank and given it a sounder foundation; we have extended credit; we have lowered interest rates; we have undertaken to free him from the ravages of cutthroat competition.

The American businessman has been returned to the road to freedom and prosperity. We will keep him on that road.

YOUTH

We have aided youth to stay in school; given them constructive occupation; opened the door to opportunity which 12 years of Republican neglect had closed.

Our youth have been returned to the road of freedom and prosperity. We will keep them on that road.

MONOPOLY AND ECONOMIC POWER

Monopolies and their concentration of economic power, the creation of Republican rule and privilege, continue to be the master of the producer, the exploiter of the consumer, and the enemy of the independent operator.

This is a problem challenging the unceasing effort of untrammeled public officials in every branch of the Government. We pledge vigorously and fearlessly to enforce the criminal and civil provisions of the existing antitrust laws, and to the extent that their effectiveness has been weakened by the new corporate devices or judicial construction, we propose by law to restore their efficacy in stamping out monopolistic practices and the concentration of economic power.

AID TO VICTIMS OF DISASTER

We have aided and will continue to aid those who have been visited by widespread drought and floods, and have adopted a Nation-wide flood-control policy.

UNEMPLOYMENT

We believe that unemployment is a national problem and that it is an inescapable obligation of our Government to meet it in a national way. Due to our stimulation of private business, more than 5,000,000 people have been reemployed; and we shall continue to maintain that the first objective of a program of economic security is maximum employment in private industry at adequate wages. Where business fails to

supply such employment, we believe that work at prevailing wages should be provided in cooperation with State and local governments on useful public projects, to the extent that the national wealth may be increased, the skill and energy of the worker may be utilized, his morale maintained, and the unemployed assured the opportunities to earn the necessities of life.

THE CONSTITUTION

The Republican platform proposes to meet many pressing national problems solely by action of the separate States. We know that drought, dust storms, floods, minimum wages, maximum hours, child labor and working conditions in industry, monopolistic and unfair business practices cannot be adequately handled exclusively by 48 separate State legislatures, 48 separate State administrations, and 48 separate State courts. Transactions and activities which inevitably overflow State boundaries call for both State and Federal treatment.

We have sought and will continue to seek to meet these problems through legislation within the Constitution.

If these problems cannot be effectively solved by legislation within the Constitution, we shall seek such clarifying amendment as will assure to the legislatures of the several States and to the Congress of the United States, each within its proper jurisdiction, the power to enact those laws which the State and Federal legislatures, within their respective spheres, shall find necessary, in order adequately to regulate commerce, protect public health and safety, and safeguard economic security. Thus, we propose to maintain the letter and spirit of the Constitution.

MERIT SYSTEM IN GOVERNMENT

For the protection of Government itself and promotion of its efficiency we pledge immediate extension of the merit system through the classified civil service—which was first established and fostered under Democratic auspices—to all non-policy-making positions in the Federal service.

We shall subject to the civil-service law all continuing positions which, because of the emergency, have been exempt from its operation.

CIVIL LIBERTIES

We shall continue to guard freedom of speech, press, radio, religion, and assembly which our Constitution guarantees; with equal rights to all and special privileges to none.

GOVERNMENT FINANCE

The administration has stopped deflation, restored values, and enabled business to go ahead with confidence.

When national income shrinks, Government income is imperiled. In reviving national income, we have fortified Government finance. We have raised the public credit to a position of unsurpassed security. The interest rates on Government bonds has been reduced to the lowest point in 28 years. The same Government bonds which in 1932 sold under 83 are now selling over 104.

We approve the objective of a permanently sound currency so stabilized as to prevent the former wide fluctuations in value which injured in turn producers, debtors, and property owners on the one hand and the wage earners and creditors on the other, a currency which will permit full utilization of the country's resources. We assert that today we have the soundest currency in the world.

We are determined to reduce the expenses of government. We are being aided therein by the recession in unemployment. As the requirements of relief decline and national income advances, an increasing percentage of Federal expenditures can and will be met from current revenues, secured from taxes levied in accordance with ability to pay. Our retrenchment, tax, and recovery programs thus reflect our firm determination to achieve a balanced Budget and reduction of the national debt at the earliest possible moment.

FOREIGN POLICY

In our relationship with other nations, this Government will continue to extend the policy of good neighbor. We reaffirm our opposition to war as an instrument of national policy, and declare that disputes between nations should be settled by peaceful means. We shall continue to observe a true neutrality in the disputes of others; to be prepared resolutely to resist aggression against ourselves; to work for peace and to take the profits out of war; to guard against being drawn by political commitments, international banking, or private trading into any war which may develop anywhere.

We shall continue to foster the increase in our foreign trade which has been achieved by this administration; to seek by mutual agreement lowering of those tariff barriers, quotas, and embargoes which have been raised against our exports of agricultural and industrial products; but continue as in the past to give adequate protection to our farmers and manufacturers against unfair competition or the dumping on our shores of commodities and goods produced abroad by cheap labor or subsidized by foreign governments.

EQUAL ECONOMIC OPPORTUNITY

The issue in this election is plain. The American people are called upon to choose between a Republican administration that has and would again regiment them in the service of privileged groups and a Democratic administration dedicated to the establishment of equal economic opportunity for all our people.

We have faith in the destiny of our Nation. We are sufficiently endowed with natural resources and with productive capacity to provide for all a quality of life that meets the standard of real Americanism.

Dedicated to a government of liberal American principles, we are determined to oppose equally the despotism of communism and the menace of concealed fascism.

We hold this final truth to be self-evident—that the interests, the security, and the happiness of the people of the United States of America can be perpetuated only under Democratic government as conceived by the founders of our Nation.

This platform will provide for the President a vehicle on which he may travel without fear or hesitation and with the assurance that the American people are steadfastly bound unto his strong and courageous leadership—leadership that would again bring confidence to the hearts and minds of the people and instill in them renewed courage.

This platform definitely points the way for a more prosperous, more secure, more equitable, and more satisfying and hopeful life for the generations to come.

PRESIDENT ROOSEVELT'S ACCEPTANCE SPEECH

On June 27, 1936, President Roosevelt, in his acceptance speech, said as follows:

Senator ROBINSON, members of the Democratic convention, my friends, we meet at a time of great moment to the future of the Nation. It is an occasion to be dedicated to the simple and sincere expression of an attitude toward problems, the determination of which will profoundly affect America.

I come not only as the leader of a party—not only as a candidate for high office, but as one upon whom many critical hours have imposed and still impose a grave responsibility.

For the sympathy, help, and confidence with which Americans have sustained me in my task I am grateful. For their loyalty I salute the members of our great party, in and out of official life in every part of the Union. I salute those of other parties, especially those in the Congress, who on so many occasions put partisanship aside. I thank the Governors of the several States, their legislatures, their State and local officials who participated unselfishly and regardless of party in our efforts to achieve recovery and destroy abuses. Above all, I thank the millions of Americans who have borne disaster bravely and have dared to smile through the storm.

CALLS RESCUE CONCERN OF ALL

America will not forget these recent years—will not forget that the rescue was not a mere party task—it was the concern of all of us. In our strength we rose together, rallied our energies together, applied the old rules of common sense, and together survived.

In those days we feared fear. That was why we fought fear. And today, my friends, we have won against the most dangerous of our foes—we have conquered fear.

But I cannot, with candor, tell you that all is well with the world. Clouds of suspicion, tides of ill will and intolerance gather darkly in many places. In our own land we enjoy indeed a fullness of life greater than that of most nations. But the rush of modern civilization itself has raised for us new difficulties, new problems which must be solved if we are to preserve to the United States the political and economic freedom for which Washington and Jefferson planned and fought.

Philadelphia is a good city in which to write American history. This is fitting ground on which to reaffirm the faith of our fathers; to pledge ourselves to restore to the people a wider freedom—to give to 1936 as the founders gave to 1776—an American way of life.

The very word freedom in itself and of necessity suggests freedom from some restraining power. In 1776 we sought freedom from the tryranny of a political autocracy—from the eighteenth century royalists who held special privileges from the crown. It was to perpetuate their privilege that they governed without the consent of the governed; that they denied the right of free assembly and free speech; that they restricted the worship of God; that they put the average man's property and the average man's life in pawn to the mercenaries of dynastic power—that they regimented the people.

And so it was to win freedom from the tyranny of political autocracy that the American Revolution was fought. That victory gave the business of governing into the hands of the average man, who won the right with his neighbors to make and order his own destiny through his own government. Political tyranny was wiped out at Philadelphia on July 4, 1776.

PEOPLES' LIVES REORDERED

Since that struggle, however, man's inventive genius released new forces in our land which reordered the lives of our people. The age of machinery, of railroads, of steam, and electricity; the telegraph and the radio, mass production, mass distribution—all of these combined to bring forward a new civilization and with it a new problem for those who would remain free.

For out of this modern civilization economic royalists carved new dynasties. New kingdoms were built upon concentration of control over material things. Through new uses of corporations, bank and securities, new machinery of industry and agriculture, of labor and capital—all undreamed of by the fathers—the whole structure of modern life was impressed into this royal service.

There was no place among this royalty for our many thousands of small-business men and merchants who sought to make a worthy use of the American system of initiative and profit. They were no more free than the worker or the farmer. Even honest and progressive-minded men of wealth, aware of their obligation to their generation, could never know just where they fitted into this dynastic scheme of things.

It was natural and perhaps human that the privileged princes of these new economic dynasties, thirsting for power, reached out for control over government itself. They created a new despotism and wrapped it in the robes of legal sanction. In its service new mercenaries sought to regiment the people, their labor, and their properties. And as a result the average man once more confronts the problem that faced the minuteman.

REMOTE CONTROL OVER FARMERS

The hours men and women worked, the wages they received, the conditions of their labor—these had passed beyond the control of the people, and were imposed by this new industrial dictatorship. The savings of the average family, the capital of the small-business man, the investments set aside for old age—other people's money—these were tools which the new economic royalty used to dig itself in.

Those who tilled the soil no longer reaped the rewards which were their right. The small measure of their gains was decreed by men in distant cities.

Throughout the Nation opportunity was limited by monopoly. Individual initiative was crushed in the cogs of a great machine. The field open for free business was more and more restricted. Private enterprise became too private. It became privileged enterprise, not free enterprise.

An old English judge once said: "Necessitous men are not free men. Liberty requires opportunity to make a living—a living decent according to the standard of the time, a living which gives man not only enough to live by but something to live for."

For too many of us the political equality we once had won was meaningless in the face of economic inequality. A small group had concentrated into their own hands an almost complete control over other people's property, other people's money, other people's labor, other people's lives. For too many of us life was no longer free; liberty no longer real; men could no longer follow the pursuit of happiness.

Against economic tyranny such as this, the citizen could only appeal to the organized power of government. The collapse of 1929 showed up the despotism for what it was. The election of 1932 was the people's mandate to end it. Under that mandate it is being ended.

ONE HUNDRED-PERCENT LIBERTY FOR THE PEOPLE

The royalists of the economic order have conceded that political freedom was the business of the Government, but they have maintained that economic slavery was nobody's business. They granted that the Government could protect the citizen in his right to vote, but they denied that the Government could do anything to protect the citizen in his right to work and live.

Today we stand committed to the proposition that freedom is no half-and-half affair. If the average citizen is guaranteed equal opportunity in the polling place, he must have equal opportunity in the market place.

The economic royalists complain that we seek to overthrow the institutions of America. What they really complain of is that we seek to take away their power. Our allegiance to American institutions requires the overthrow of this kind of power. In vain they seek to hide behind the flag and the Constitution. In their blindness they forget what the flag and the Constitution stand for. Now, as always, the flag and the Constitution stand for democracy, not tyranny; for freedom, not subjection; and against a dictatorship by mob rule and the overprivileged alike.

The brave and clear platform adopted by this convention, to which I heartily subscribe, sets forth that Government in a modern civilization has certain inescapable obligations to its citizens, among which are protection of the family and the home, the establishment of a democracy of opportunity, and aid to those overtaken by disaster.

But the resolute enemy within our gates is ever ready to beat down our words unless in greater courage we will fight for them.

PLEDGES FIGHT WILL CONTINUE

For more than 3 years we have fought for them. This convention in every word and deed has pledged that that fight will go on.

The defeats and victories of these years have given to us as a people a new understanding of our Government and of ourselves. Never since the early days of the New England town meeting have the affairs of government been so widely discussed and so clearly appreciated. It has been brought home to us that the only effective guide for the safety of this most worldly of worlds is moral principle.

We do not see faith, hope, and charity as unattainable ideals, but we use them as stout supports of a nation fighting the fight for freedom in a modern civilization.

Faith—in the soundness of democracy in the midst of dictatorships.

Hope—renewed because we know so well the progress we have made.

Charity—in the true spirit of that grand old word. For charity, literally translated from the original, means love, the love that understands, that does not merely share the wealth of the giver, but in true sympathy and wisdom helps men to help themselves.

We seek not merely to make government a mechanical implement, but to give it the vibrant personal character that is the embodiment of human charity.

We are poor indeed if this Nation cannot afford to lift from every recess of American life the dread fear of the unemployed that they are not needed in the world. We cannot afford to accumulate a deficit in the books of human fortitude.

In the place of the palace of privilege we seek to build a temple out of faith and hope and charity.

It is a sobering thing to be a servant of this great cause. We try in our daily work to remember that the cause belongs not to us but to the people. The standard is not in the hands of you and me alone. It is carried by America. We seek daily to profit from experience, to learn to do better as our task proceeds.

TELLS CONTRAST OF GOVERNMENTS

Governments can err, presidents do make mistakes, but the immortal Dante tells us that divine justice weighs the sins of the cold-blooded and the sins of the warm-hearted in different scales.

Better the occasional faults of a government that lives in a spirit of charity than the consistent omissions of a government frozen in the ice of its own indifference.

There is a mysterious cycle in human events. To some generations much is given. Of others much is expected. This generation of Americans has a rendezvous with destiny.

In this world of ours in other lands, there are some people, who, in times past, have lived and fought for freedom, and seem to have grown too weary to carry on the fight. They have sold their heritage of freedom for the illusion of a living. They have yielded their democracy.

I believe in my heart that only our success can stir their ancient hope. They begin to know that here in America we are waging a great war. It is not alone a war against want and destitution and economic demoralization. It is a war for the survival of democracy. We are fighting to save a great and precious form of government for ourselves and for the world.

I accept the commission you have tendered me. I join with you. I am enlisted for the duration of the war.

The President's humanity has enriched the rights of the common man. His progressive and liberal policies have brought fresh hope and determination to our young men and women, to our boys and girls.

SOCIAL UNREST MEANS GROWTH

Mr. FLETCHER. Mr. Speaker, the rising tide of intolerance in the United States is giving serious-minded Americans great concern.

The tragedy of it is that this spirit is being manifested among all classes of men and women and in every department of our national life.

It is revealed not only in the war between the classes, although there are still many who would try to have you believe there are no classes in our country. But that we do have classes is evident in the relations between men and women even of the same class group.

THE COMMON MAN COMING INTO HIS OWN

In spite of intolerance, the spirit of democracy is steadily growing. The development of this spirit is to be commended, but it carries with it certain elements which create social unrest.

This is the era of the common man.

Slowly but surely the masses are coming into their own.

No human power can stop their onward march and no divine power will.

First came the struggle for educational democracy. At one time only the leisured classes were considered worth educating.

Today it is true that not only may every boy and girl have an education, but we insist by law that they must have an education.

VICTORY FOR WOMEN

In former days the vote was limited to those who were property owners. Today, for the most part, the ballot which determines our political destiny is in the hands of every adult.

Closely related to this manifestation of political democracy is the newly acquired right of women to vote—to stand side by side with the men of the Nation in selecting our officials and in making our laws. The restlessness and discontent of women dissatisfied with things as they are is significant and encouraging.

Some men say they gave the women the right to vote; but this is not true. Women, discontented with their economic status, would have taken the right anyway, because they were entitled to it.

Wholesome social unrest is being produced by public libraries, by education, by newspapers, magazines, and publications of all kinds that bring ideas, facts, and truth to eager-minded students of our times.

If you were to visit the readers' room of our American libraries, you would discover that the young men and women who are seated at the tables are engaged in reading books on history, economics, sociology, and other serious subjects.

The readers of these books are discovering that the world is a bigger, more wonderful place than they ever dreamed it to be, and it makes them eager to know more, have more, and be more.

DESIRE FOR CULTURE

Our public schools and colleges are responsible for wholesome social unrest in that they bring knowledge, ideas, and better understanding of what life is all about, thus making people dissatisfied with their own inefficiency and out-of-dateness.

Classes and curriculum, dealing with economic subjects, are the most popular in our institutions of learning.

The graduates of these institutions are better informed as to what is going on in the world and they are learning how they may be better fitted into the world so far as their skill and knowledge are concerned.

Art galleries are also responsible for social unrest.

When men and women with imagination spend a few hours viewing the wonderful works which are displayed in our great museums and art galleries, does anyone suppose that they are the same persons when they pass out of the main entrances of these institutions? One result which follows the study of literature, music, art, and beauty, in whatever form, is to make those people fortunate enough to have these cultural experiences, dissatisfied with crude, ugly, vulgar things that make life sordid and wretched and creates in them a desire to introduce into their lives more of beauty, culture, and refinement.

All this eventually may mean shorter hours so that people may enjoy more leisure, more wages, and have more happiness in their lives.

DISCONTENT A BUSINESS ASSET

Big business, through its great advertising campaigns, is causing social unrest.

By every device of typography and art work and through the skill of the highest-priced writers in the world, business attracts attention, creates new desire, and tries to lead to action the readers of their costly magazine and newspaper advertising pages so that they may purchase the goods or the services which big business has to sell.

Business aims to make the average person forever dissatisfied with the old radio or old automobile, or his present grade of tobacco or chewing gum, ice-cream freezer, or watch, or any possession with which he has thus far been quite contented.

WE ADVANCE TOWARD IDEALISM

Strange as it may seem, the church is responsible for wholesome social unrest which, after all, means social and spiritual advancement. The church sends the finest flower of its colleges and seminaries out into mission fields at home and abroad, holding up standards of life, physical, mental, and moral, as well as spiritual, toward which the church rightly urges the masses of the people to aspire.

The church points out the low condition under which many people are compelled to live, declaring that only through the application of the Gospel, which it teaches, will they ever reach the summit of the higher and nobler life.

For creating this kind of discontent the church is greatly to be commended.

It will be seen, therefore, that through literature and education, art, and the presentation of modern, mechanized equipment, and religion, desirable social unrest is being created—the logical result of the finest idealism that the world has ever known.

Such desirable social unrest cannot and should not be retarded. It would be useless to try to do so. It involves the growth and the progress of the human race.

GOOD NEIGHBOR IDEA THE HOPE OF HUMANITY

But all this relates largely to the development of the individual.

It makes the individual richer, better, and more appreciative of the finer things of life. It creates new inspirations that lead to new aspirations and to new achievements.

But unfortunately it frequently fails to give to the individual a sense of responsibility to and for others.

The church more nearly fulfills its responsibility in this direction, but even so what religionist would insist that the social responsibility of his church is being fully or even approximately met. The great peril in America today is the lack of the neighborly spirit, as the President has repeatedly stated.

What our country needs—what every country needs—is the development of the "good neighbor" idea to which I referred in a recent speech I delivered in the House when considering legislation authorizing Federal cooperation with the States for the purpose of protecting people from the life-destroying menace of stream pollution.

In that speech I endeavored to present convincing facts in proof of the proposition that what our country needs and what every country needs is the development of the "good neighbor" idea as an antidote to selfishness, class hatred, and the destructive menace of intolerance.

Of all the great messages broadcast to the world by President Roosevelt, none outrivaled in importance that great speech President Roosevelt delivered in his home community at Hyde Park, expressing the philosophy of "the good neighbor idea."

INTOLERANCE INSPIRED BY FEAR

The rising tide of intolerance in this country, in politics, in business, in industry, and even in religion itself, is due largely to the fact that while we have grown marvelously in many other directions, we have failed dismally in developing that spirit of neighborliness to which the President refers.

When men hate each other, it is usually because they do not know each other. The French have a saying that "To know all is to forgive all." It is this ignorance of our fellowmen which causes our fear of them and it creates in our hearts a suspicion that is not justified. Fear is at the bottom of much of the intolerance that plagues the world, causes rebellion among classes and wars between nations.

THE PRICE WE PAY FOR IGNORANCE

The ignorance of labor, regarding the problems of capital and the ignorance of capital in regard to the needs of labor are types of ignorance which produce a goodly share of the present industrial situation.

The ignorance of the whole history and the great accomplishments of many religious groups is responsible for much of the misunderstanding between these groups.

The ignorance of governmental functions, motives, accomplishments, and personnel, creates unjustifiable bitterness in political life on the part of many Americans.

The ignorance of the conditions from which many of the masses are suffering and for the alleviation and cure of which conditions sincere-minded men and women are earnestly struggling, causes hatred of them by smugly comfortable and complacent people who can see in these efforts merely a gross and often a crass revolutionary movement.

LET US GET ACQUAINTED WITH ONE ANOTHER

To relieve this situation will require better acquaintance with our neighbors and the enlargement of the number of these neighbors—locally, nationally, and internationally.

This widening knowledge and acquaintance will help settle the labor problems, the racial problems, the religious problems, and the poltical problems which face America today.

To this end we should encourage freedom of speech instead of its limitation, so that we may know what is on the minds of the people. We should support the open forum where "men may shake out their hearts."

But most of all, we should know men and women in a more personal way, so that we may become acquainted with their characters, their asperations, their purposes, their plans, and their problems.

AMERICA CAN LEAD THE WAY

It was the Great Teacher Himself who once told an earnest inquirer who sought to know the "good way" that he must "love his neighbor as he loves himself." And what the inquirer asked Him: "Who then, is my neighbor?" The Teacher told him the classical story of "the Good Samaritan." To be a "good neighbor" in the sense proclaimed by President Roosevelt in his Hyde Park speech, is to be a "Good Samaritan" in every relationship with humanity, everywhere.

We have a right to be proud of our culture, our knowledge, and our accomplishments in these United States. In spite of all that the world has passed through in recent years, we are still the undisputed leader among the nations, both from the standpoint of our natural resources and from the standpoint of the perpetuation of the spirit of democracy.

No longer can we afford to misunderstand and fight one another. From now on we are compelled to know one another, understand one another, and cooperate with one another in self-defense. Our survival depends upon our capacity for mutual aid.

LIBERTY, HUMAN RIGHTS, AND THE NEW DEAL

Mr. ECKERT. Mr. Speaker, "Hold fast that which is good" is a bit of Biblical counsel that might well be heeded by the common people of the Nation during the pending campaign. The enemies of the present administration are seeking to discredit the New Deal and all its works. To this end, all manner of extravagant and baseless statements find their way into the press, on the air, and wherever the Roosevelt administration happens to be the topic of conversation.

The object, of course, is quite plain. If the New Deal can be discredited in the eyes of the voters, the chances of defeating President Roosevelt at the November election will be enhanced, and inasmuch as privilege is on the defensive, and making a last stand for its life, the mere misstatement of facts concerning the New Deal will not disturb the conscience or the slumbers of the antinew dealers.

But while this reckless disregard of truth is being exhibited, let those who toil and labor for a livelihood pause and reflect on the advice of Saint Paul.

The New Deal came into being in response to the call of the people for action and change in politics and government. It symbolizes the urge of the people for freer and better economic opportunities. It is the sign of the liberal and progressive movement in America.

The New Deal is in the making. It is not a fixed and static thing. It is a living and changing thing, unfolding and developing with the demands of the times. The legislation that was first enacted in the name of the New Deal was intended to meet a grave crisis. After the ravages of the depression were arrested, legislation of a permanent nature followed, and as the needs of the future demand additional legislation that also will be enacted in due course. The progress of the New Deal will advance or retard in exact proportion to the loyalty or disloyalty of the people. If the enemies of the New Deal succeed in disintegrating the forces back of President Roosevelt, its success will be jeopardized, the advances already made dissipated, and the cause of liberalism irreparably damaged. If, however, the masses will stand shoulder to shoulder and rally to the call of their Commander in Chief, its success is assured, and a better and brighter day for American toilers and American business will come to pass. Therefore, friends of the New Deal must hold fast to what has already been accomplished and in solid phalanx struggle on for greater achievements.

A brief survey of what has been done in the name of the New Deal discloses the great strides made by the Roosevelt administration. It will be recalled that among the first acts of Franklin D. Roosevelt after assuming the office as Chief Executive was to call the Seventy-third Congress into extraordinary session, and for a period of 100 days the Congress passed an array of emergency legislation that not only surprised but revived and stimulated the spirit of a discouraged people and restored their faith and confidence in the Government. Only brief reference can be made to the various acts passed by the Congress. The following is a list of the most important legislation:

Act of March 9, 1933: Emergency Banking Act, to provide relief in the existing national emergency in banking.

Act of March 20, 1933: Economy Act, to maintain the credit of the United States Government.

Act of March 24, 1933: Emergency Banking Act of March 9, 1933, above, amended to authorize direct loans by Federal Reserve banks to State banks and trust companies.

Act of March 31, 1933: Reforestation Act.

Act of May 12, 1933: Farm Relief Inflation Act. Title I provides for the acquisition of cotton by the Secretary of Agriculture.

Title II, entitled the "Emergency Farm Mortgage Act of 1933", provides for the issuance of bonds by Federal land banks, and so forth.

Title III authorizes the President to direct the Secretary of the Treasury to purchase and hold Treasury bills or other obligations of the United States Government from the Federal Reserve banks up to $3,000,000,000; to direct the Secretary of the Treasury to issue United States notes up to $3,000,000,000 to meet maturing Federal obligations, and so forth; by proclamation to fix the weight of the gold and silver dollar; to accept silver in payment of debts due from foreign governments.

Act of May 12, 1933: Federal Emergency Relief Act of 1933, authorizing a grant of $500,000,000 from funds of the Reconstruction Finance Corporation.

Act of May 18, 1933: Tennessee Valley Authority—Muscle Shoals—Act of 1933.

Act of May 27, 1933: Securities Act of 1933, prohibiting the sale or offering for sale in interstate commerce of any securities not registered with the Federal Trade Commission.

Joint resolution of June 5, 1933: Gold clause repeal.

Act of June 6, 1933: National Employment System Act.

Act of June 13, 1933: Home Owners' Loan Act of 1933, authorizing and directing the Federal Home Loan Bank Board to create a Home Owners' Loan Corporation, which is authorized to issue bonds up to $2,000,000,000.

Act of June 16, 1933: Glass-Steagall Banking Act of 1933. This act requires a limited insurance of deposits from a fund to which all member banks of the Federal Reserve System must contribute.

Act of June 16, 1933: National Industrial Recovery Act.

Act of June 16, 1933: Emergency Railroad Transportation Act, 1933, creating office of Federal Coordinator of Transportation.

Act of June 16, 1933: Farm Credit Act of 1933. This act directs the Governor of the Farm Credit Administration to organize 12 production credit associations from which farmers may borrow money; also 12 banks for cooperatives which are to make loans to cooperative associations for any of the purposes and subject to the conditions and limitations set forth in the Agricultural Marketing Act.

Act of January 30, 1934: Gold Reserve Act of 1934. All property rights in gold to be transferred from Federal Reserve banks, etc., to the United States; no gold to be coined, and no redemptions of currency to be made into gold.

Two billion dollars is appropriated for dealing in gold, foreign exchange, etc., by the President to stabilize the exchange value of the dollar.

Act of January 31, 1934: Federal Farm Mortgage Corporation Act. Federal Farm Mortgage Corporation created with a capital of $200,000,000, to issue bonds, purchase farm-loan bonds, make loans to Federal land banks, and invest its funds in mortgage loans made under section 32 of the Emergency Farm Mortgage Act of 1933.

Act of February 15, 1934: This act appropriates $950,000,000 additional for carrying out the Federal Emergency Relief Act of 1933 and for continuing the civil-works program.

Act of February 23, 1934: Authorizes the Farm Credit Administration to make loans to farmers during 1934 for crop production, planting, fallowing, and cultivation, and, up to $1,000,000, for feed for livestock in drought- and storm-stricken areas.

Act of March 24, 1934: Philippine Independence Act.

Act of March 28, 1934: Independent Offices Appropriation Act. Title II amends the Economy Act of March 20, 1933.

Act of April 7, 1934: Agricultural Adjustment Act amended so as to include cattle as a basic agricultural commodity.

Act of April 13, 1934: Johnson Act, prohibiting financial transactions with any foreign government in default on its obligations to the United States.

Act of April 21, 1934: Cotton Control Act.

Act of April 27, 1934: Home Owners' Loan Act of 1933 amended by guaranteeing fully and unconditionally principal as well as interest of bonds of the Corporation.

Act of May 10, 1934: Revenue Act of 1934. Under this act the normal income tax is 4 percent; the maximum surtax is 59 percent on net incomes in excess of $1,000,000; the maximum estate tax is 60 percent on net estates in excess of $10,000,000.

Act of May 21, 1934: Subsidizing of vocational education in the States and Territories by $3,000,000 for each of the next 3 fiscal years authorized.

Act of June 6, 1934: Securities Exchange Act of 1934, requiring licensing of stock exchange and registration of listed securities with a Securities and Exchange Commission.

Act of June 12, 1934: Air Mail Act, revising air-mail legislation.

Act of June 12, 1934: Reciprocal Tariff Act.

Act of June 18, 1934: To increase employment by authorizing certain appropriations.

Act of June 19, 1934: Emergency Appropriation Act, authorizing appropriation for relief.

Act of June 19, 1934: Communications Act, creating Federal Communications Commission to regulate interstate and foreign commerce in communication by wire and radio.

Act of June 19, 1934: Loans to Industries Act, authorizing Federal Reserve banks to make loans, and so forth.

Act of June 19, 1934: Silver Purchase Act, directing the Secretary of the Treasury to purchase silver on certain conditions.

Joint resolution of June 19, 1934: Authorizing the President to establish boards to investigate practices of employers and employees in controversies arising under section 7a of the National Industrial Recovery Act or which are burdening the free flow of interstate commerce, and so forth.

Act of June 21, 1934: Railway Labor Disputes Act (amending the Railway Labor Act of 1926), establishing a National Railroad Adjustment Board and a National Mediation Board to aid in the prompt settlement of disputes between railroads and their employees.

Act of June 26, 1934: Federal Credit Union Act, providing for the incorporation of Federal credit unions.

Act of June 27, 1934: National Housing Act, authorizing the President to create a Federal Housing Administration.

Act of June 27, 1934: Railroad Employees' Retirement Act, providing for the compulsory retirement of railway employees at the age of 65.

Act of June 28, 1934 (Frazier-Lemke): Farm Moratorium Act.

Act of January 31, 1935: Reconstruction Finance Corporation authorized to continue its functions until February 1, 1937.

Joint resolution of February 13, 1935: Additional appropriations. Section 2 restores full pay to Federal employees, effective April 1, 1935.

Act of February 20, 1935: Loans up to a total of $60,000,000 to farmers for crop production, and so forth.

Joint resolution of March 15, 1935: Investigation of American Telephone & Telegraph Co., and so forth, by Federal Communications Commission.

Joint resolution of April 8, 1935: Relief appropriations of $4,880,000,000 for public works, and so forth.

Act of April 27, 1935: Provisions for protection against soil erosion.

Act of June 14, 1935: Provision for distribution of sound-reproduction records for the blind.

Act of June 29, 1935: Provision for research into basic laws and principles relating to agriculture; additional support of agricultural colleges and experiment stations.

Act of July 5, 1935: National Labor Relations Act, for settlement of labor disputes.

Act of August 9, 1935: Motor Carrier Act, placing interstate and foreign motor carriers under regulatory power of Interstate Commerce Commission.

Act of August 14, 1935: Social Security Act, providing for old-age assistance, unemployment compensation, aid to dependent children, maternal and child welfare, public-health work, aid to the blind, and taxes on employers and wage earners to finance unemployment compensation.

Act of August 23, 1935: Banking Act of 1935, making numerous amendments to the Federal Reserve Act and other banking laws.

Act of August 23, 1935: Establishment of tobacco classification standards, with provision for inspection service, etc.

Act of August 26, 1935: Regulation of public-utility holding companies, including modified "death sentence" provision, which requires simplification of holding company systems by January 1, 1938.

Act of August 29, 1935: Provisions for retirement of railway employees.

Act of August 30, 1935: Guffey Act, for stabilization of bituminous coal industry.

Act of August 30, 1935: Revenue Act of 1935.

Act of August 31, 1935: Amendments to Tennessee Valley Act, giving the Tennessee Valley Authority additional power to sell electricity, etc.

Joint Resolution of August 31, 1935: Neutrality provisions, including embargo on exportation of arms, etc.

Act of January 27, 1936: Payment of adjusted-service certificates.

Act of February 11, 1936: Supplemental Appropriation Act of 1936, carrying funds for Social Security Act, and for payment on contracts under A. A. A.

Joint resolution of February 29, 1936: Extends until May 1, 1937, the embargo provisions of the neutrality resolution of 1935.

Act of February 29, 1936: Soil Conservation and Domestic Allotment Act, authorizes the Secretary of Agriculture to make benefit payments totaling $500,000,000 to farmers who take land out of production for soil-conservation purposes.

After 1938 the conservation program shall be administered by the States, aided by Federal grants.

Act of March 31, 1936: Continues the Electric Home and Farm Authority until February 1, 1937.

Act of April 3, 1936: Extends for another year the authority of the National Housing Administration to insure private financial institutions against losses on loans made for improvement of realty, etc.

Act of April 10, 1936: Authorizes increase of $97,000,000 in capital stock of Commodity Credit Corporation.

Joint resolution of April 21, 1936: Extends for a period of 2 years, i. e., until July 1, 1938, the provisions of the Federal Deposit Insurance Act (U. S. C. Supp. 12: 264 (n) (4)) authorizing the Corporation to make loans to or purchase assets of open or closed insured banks in order to reduce or avert threatened losses to the Corporation, or to facilitate merger of insured banks or sale of assets and liabilities to other insured banks.

Act of April 25, 1936: Authorizes negotiation of interstate compacts for controlling production of and commerce in flue-cured burley, fire-cured and cigar-filler binder and wrapper tobaccos.

Act of May 1, 1936: Whaling Treaty Act for effectuating the Whaling Convention of 1931.

Act of May 20, 1936: Enacts in substance the terms of Executive Order No. 7037 of May 11, 1935, under which the Rural Electrification Administration was established. Authorizes loans up to $50,000,000 a year by Reconstruction Finance Corporation to Rural Electrification Administration for 1937 and 1938 and direct appropriations of $40,000,000 for 1939–46.

Act of June 8, 1936: Additional appropriations for allotment among States in furtherance of vocational education; $12,000,000 for teachers of agricultural, home economics, and industrial subjects; $1,200,000 for distributive occupational subjects—to be matched by the States progressively, reaching 100 percent in 1947—and $1,000,000 for teacher training.

Act of June 15, 1936: Broadens the Grain Futures Act into a Commodity Exchange Act by including within its scope cotton, rice, millfeed, butter and eggs, potatoes, as well as grains. The Government is authorized to control speculation, manipulation, unreasonable price fluctuations, and cornering, by setting quantity limits on futures trading, and so forth.

Act of June 15, 1936: Authorizes $272,000,000 for carrying out modified Mississippi flood-control project.

Act of June 16, 1936: Penalizes—maximum fine $5,000—any person—including shippers, brokers, or their employees, and so forth—who (a) by false billing, and so forth, knowingly and willfully, directly or indirectly, and whether with or without the consent or connivance of the carrier or its agents, obtains transportation for property by a common carrier subject to the shipping act at less than regular rates; or (b) by false representations, and so forth, similarly obtains any refund or other payment whereby the compensation of the carrier is made less than or different from the regular rates or charges.

Act of June 16, 1936: Additional annual authorizations for roads, fiscal years 1938 and 1939, as follows: $125,000,000 for interstate highways; $14,000,000 for forest roads; $2,500,000 for roads through public lands, and so forth; $7,500,000 for roads in national parks and $10,000,000 for approach roads; $4,000,000 for roads in Indian reservations; $25,000,000 for feeder roads; $50,000,000 for elimination of grade crossings.

Act of June 19, 1936: Amends the Clayton Antitrust Act by prohibiting price discrimination tending to lessen competition or to create monopolies, allowing differential on account of differences in cost of manufacture, sale, or delivery. Prohibits discriminatory rebates or discounts for purpose of eliminating competitors.

Act of June 22, 1936: Flood Control Act—adopting and authorizing prosecution of approximately 223 enumerated projects of river and harbor improvement for flood-control and erosion-prevention purposes, with provision for future hydroelectric development. In general, the States or local agencies are to provide necessary land, pay any damages, and maintain the completed works. Cost is set at $310,000,000 for construction and $10,000,000 for examinations and surveys—not more than $50,000 to be expended in 1937.

Act of June 22, 1936: First Deficiency Appropriation Act of June 1936—carrying in title II, $1,425,000,000 for relief and work relief, as follows: Roads, $413,250,000; public buildings, $156,750,000; parks, and so forth, $156,750,000; public utilities, $171,000,000; flood control, and so forth, $128,250,000; "white-collar relief", $85,500,000; women's projects, $85,500,000; miscellaneous, $71,250,000; National Youth Administration, $71,250,000, rural rehabilitation, $85,500,000.

Act of June 22, 1936: Revenue Act of 1936 (a) increases surtaxes on individual net incomes from present maximum—$533,000 on $1,000,000 income, plus 59 percent of excess over $1,000,000—up to a new maximum of $3,591,440 on $5,000,000, plus 75 percent of excess; (b) splits up the tax on corporate incomes—8 percent on first $2,000, 11 percent on next $13,000, 13 percent on next $25,000, and 15 percent on excess over $40,000—instead of former flat 13¾ percent; (c) surtax on undistributed profits of corporations, 7 percent on first 10 percent of retained income, 12 percent on next 10 percent, 17 percent on next 20 percent, 22 percent on next 20 percent, and 27 percent of amount over 60 percent.

This brief survey of the New Deal tells the story of the achievements—though very inadequately—of the Roosevelt administration. Through it all there runs but one single purpose. The entire program is intended to arrest the devastating forces of the depression, restore faith and confidence in the Government, and pave the way for the establishment of an era of social justice. There is no trace of evil design or selfishness in the long list of legislative enactments. Which of the legislative enactments ought not to have been enacted or which ought to be repealed? Which of the list has not met some present need or aided in restoring confidence and faith in the Government?

The New Deal is glorified with true patriotism and nobility of purpose and the results are reassuring. Hope, faith, confidence have supplanted despair, fear, uncertainty. The people and the Nation, under the salutary influence of the New Deal are rapidly emerging from the slough of despond in which the American people found themselves on that eventful 4th day of March 1933. In the light of the progress of the past, the future is full of promise that the American people will steadfastly continue in the path typified by the New Deal and amplify, develop, and perfect it as the exigencies of the future demand.

A partial analysis of the New Deal enactments reveals the magnitude and comprehensive character of the program. Banking, transportation, labor, agriculture, industry, social security, housing, rural electrification, slum clearance, relief, unemployment, public utilities, power, farm credit, home owners' credit, and other items of public concern are embraced in the New Deal program. The legislation enumerated indicates the wide sweep of the program. It anticipates the objective of the New Deal which President Roosevelt has declared again and again to be that which any honest government of any country would do—try to increase the security and the happiness of the people in all occupations of life and in all parts of the country; to give them more of the good things of life; to give them a greater distribution, not only of wealth in the narrow terms but of wealth in the wider terms; to give them places to go in the summertime—recreation; to give them assurance that they are not going to starve in their old age; to give honest business a chance to go ahead and to make a reasonable profit and to give everyone a chance to make a living. This in the President's own words is the task ahead. The achievement of this objective in its fullness, means a long and weary struggle, a struggle that cannot stop short of the abolition of legal privilege. Privilege is an attribute of aristocracy and has no place in a democracy, which Lincoln defined as "A government of the people, by the people, and for the people."

Woodrow Wilson said:

The reason that America was set up so that she might be different from all the nations of the world is this: That the strong could not put the weak to the wall; that the strong could not prevent the weak from entering the race. America stands for opportunity. America stands for a free field and no favors.

This implies an America free from privilege. The true purpose of the founders of the American Republic has never been achieved, for at no time in the history of our country have the people enjoyed "a free field and no favors." There have always been the few who enjoyed favors at the expense of the many. These favors are legal privileges and constitute the instruments by which the possessors thereof exploit the masses.

Until the New Deal is amplified, developed, and perfected so that the America of Woodrow Wilson, wherein private privilege in all its ramifications is destroyed, the mission of the New Deal will not be fulfilled. For the ultimate objective is to bring into force and effect the doctrine of "Equal rights to all, special privileges to none."

The word is being sedulously spread abroad that the New Deal is an invasion of liberty. This propaganda emanates mainly from the privileged few. That of itself is ominous, yet it ought to put the people on inquiry, for liberty is a coveted right. It has been the quest of man from time immemorial and man is still in pursuit. The goal has not yet been attained, notwithstanding the fact that those who assail the New Deal as an encroachment of liberty, assume that America is a land of full and complete liberty. Be not deceived! Neither in America nor any other land has there been that recognition of human rights upon which liberty in its true sense is predicated. We in America, in the early days of the Republic, enjoyed a larger degree of liberty than any other people of modern times, but with the monopolization of the natural resources that came with the settlement and development of the Republic, the open door of equal economic opportunity gradually closed and the liberty that was once enjoyed vanished.

Then again, there are those who, though most bitter in their denunciations, sound the praises of liberty, but the liberty which they invoke is the liberty to exploit the producers of wealth. "O Liberty! Liberty! How many crimes are committed in thy name?" They would have us believe that if the New Deal were discarded, liberty's beneficent rays would shine upon us in all its glory. Dismiss the thought. The New Deal is not invading the substantial liberty of the American people. The liberty that was America's declined with the close of our public domain. As long as land was to be had for the mere asking America enjoyed a high degree of freedom. The moment, however, that the last acre of free land passed out of the picture, the glory of America's freedom began to fade, until today the economic freedom enjoyed by the great mass of our people is to beg, beseech, and implore the lords of privilege for a chance to earn a living. This is not the liberty in which the Nation was conceived, nor the freedom for which the fathers fought, but the liberty in which it was conceived and for which the fathers fought must be restored if popular government is to endure.

We hold these truths to be self-evident: that all men are created equal; that they are endowed by their creator with certain unalienable rights; that among these are life, liberty, and the pursuit of happiness.

To assure these rights to the people of America is in its deeper aspect the meaning and mission of the New Deal.

Hold fast that which is good.

THE BONUS—TAXATION—AND THE TARIFF

Mr. BACHARACH. Mr. Speaker, in addition to attending the sessions of the House, attending to departmental matters for constituents, and answering a large volume of correspondence, a Congressman's time is to a very great extent taken up by his committee work.

For the past 19 years I have been a member of the important Ways and Means Committee, which considers all tax and tariff legislation, in addition to many other matters which incidentally affect the revenue. During the session just closed, the committee has been occupied with the consideration of several major bills and a great number of minor bills.

PAYMENT OF THE BONUS

The first major bill considered by the committee was that providing for the immediate payment of the soldiers' bonus. It will be recalled that last year Congress passed a bill providing for payment of the bonus which was vetoed by the President. While the House voted to override the veto, it was sustained in the Senate, and the bill failed of enactment.

This year another bonus bill was passed providing for a different method of payment. It was also vetoed by the President, but this time both the Senate and House overrode the veto, and the bill became a law. I voted in favor of the legislation when it was before the House and also voted to override the veto.

REVENUE ACT OF 1936

Another major piece of legislation considered during the past session was the so-called Revenue Act of 1936, which was passed by the subservient New Deal Congress in response to the President's request. Along with my Republican colleagues in the House, I opposed this measure.

As originally proposed by the President, the new law would have repealed all existing taxes on corporations and substituted a graduated penalty tax based solely on the earnings not distributed to stockholders. While the House passed a bill in substantial conformity with the President's plan the Senate refused to accept it, and as a final compromise it was agreed to retain the present corporate taxes at slightly lower rates and superimpose a modified penalty tax on amounts not distributed to stockholders.

While ostensibly for revenue-raising purposes the new tax law is actually aimed at forcing the distribution of corporate earnings without respect to the financial needs of the corporation. It therefore constitutes a direct and unwarranted interference with business by substituting Government dictation for sound discretion in the management of the fiscal affairs of a corporation. At the same time, by penalizing and discouraging the accumulation of reserves for bad times, the new law threatens the very stability of business, and with it the stability of employment and investments, as well as the Federal revenue. Financially weak corporations which must repair their capital structure are penalized, while large, well-financed corporations which are so situated as to declare out all their earnings may escape the penalty tax altogether. This is not only oppressive and unjust to corporations which are struggling to stay on their feet but it creates unfair competitive conditions between different corporations in the same line of business.

The new law even penalizes the payment of debts by imposing the penalty tax on amounts reserved for that purpose. It discourages rehabilitation and expansion by penalizing amounts retained for these purposes. This will result in retarding recovery and reemployment.

Many other objections to the new law could be cited. It is universally opposed by business and is advocated by no one of experience or ability in the field of taxation. It is a product of the "brain trust", none of whom have ever had to meet a Saturday-night pay roll, and constitutes another ill-advised step in the administration's program of regimentation. Every unemployed man, every man who wants to keep his job, every investor, and everyone interested in recovery and business stability should urge its speedy repeal.

THE LIQUOR TAX ADMINISTRATION ACT

A third major piece of legislation considered by the Ways and Means Committee was the so-called Liquor Tax Admintration Act, which makes certain changes in the administrative provisions of the laws relating to the collection of liquor taxes. In addition it provides a 50-percent reduction in the existing internal-revenue taxes on wines, which will be of great benefit to the grape industry of New Jersey. This same act also makes an independent agency out of the Federal Alcohol Administration, which is now under the Treasury Department.

At the last session of Congress, when similar legislation was under consideration, an effort was made to amend the liquor laws so as to permit so-called "bulk sales" in barrels. Over my bitter opposition, this amendment was passed in the House, but we were able to have it eliminated in the Senate. Had bulk sales in barrels been permitted, it would have resulted in serious injury to the glass-bottle industry in south Jersey and other States.

TARIFF REDUCTIONS UNDER THE NEW DEAL

While no tariff legislation has been enacted during the past session, I wish to say a few words about the trade treaties negotiated by the President under the Reciprocal Trade Agreements Act of 1934, which was enacted by the New Deal Congress over solid Republican opposition.

Some 14 trade treaties have thus far been negotiated, and many more are in the process of negotiation. Those negotiated up to the present time and their effective dates are as follows:

Cuba, September 3, 1934.
Belgium, May 1, 1935.
Haiti, June 3, 1935.
Sweden, August 5, 1935.
Brazil, January 1, 1936.
Canada, January 1, 1936.
Netherlands, February 1, 1936.
Switzerland, February 15, 1936.
Honduras, March 2, 1936.
Colombia, May 20, 1936.
Guatemala, June 15, 1936.
France, June 15, 1936.
Nicaragua—not yet ratified by Nicaragua.
Finland—not yet ratified by Finland.

It is to be noted that two of the treaties have not yet been ratified by the countries concerned. A number of the treaties now in effect were subject to ratification by the foreign country before becoming effective. So far as our own Congress is concerned, however, it has no opportunity to approve or reject the treaties. They are not even approved by the Senate, as required by the Constitution.

The treaties are negotiated in secret with representatives of foreign countries. A small group of impractical theorists in the State Department sit down with these foreign representatives to decide upon the tariff concessions to be made by each country. American producers are not even given a hearing with respect to the proposed treaty once the terms have been agreed upon. The first time they have any definite knowledge of its provisions is after it has been concluded and announced by the President. Under this method of procedure, foreign countries are given an opportunity to help decide what our tariff rates are to be, while American producers and the United States Congress are not even given a look-in.

The Cuban treaty is the only one of the 14 that is strictly bilateral—that is, where the concessions made are extended only to the countries signatory to the treaty. In the case of the other 13 the duty concessions which we extend to one country in return for supposedly reciprocal concessions from it are gratuitously extended to all other countries, Germany alone excepted, without requiring them to give us any concessions in return. Thus the effect of a treaty is just the same as if Congress had passed a law reducing the duties on the products concerned with respect to imports from all countries. This "good neighbor" policy on the part of the New Deal is one of the reasons why the trade-treaty program is resulting in such a disadvantage to American producers. The New Deal is surrendering our home market to foreign competition, but is not gaining much in the way of foreign markets for our surpluses. Every time a treaty is negotiated we get a small market for some of our products in one country, but surrender our market for certain products to the whole world. That is the kind of "Simple Simon" foreign trades the New Deal is making. Not only are our foreign-market advantages limited to the one country with whom we negotiate a treaty, but our ability to take advantage of the concessions extended depends upon whether our exporters can undersell the rest of the world. So far as the home market is concerned, our producers are already having a difficult enough time meeting foreign competition without having the tariff rates reduced still further.

Let us see to what extent the New Deal has reduced tariff duties under some of the treaties negotiated to date. I shall refer principally to those items in which my own State of New Jersey is vitally interested.

Under the Cuban treaty, reductions of up to 50 percent were made in the duties on the following products among others: Lima beans, potatoes, tomatoes, cucumbers, eggplant, okra, peppers, squash, honey, jellies, fish, and numerous other commodities. These reductions applied only to imports from Cuba and in the case of the vegetables named only during the winter season.

Under the 13 other treaties, reductions of up to 50 percent, applying to commerce from all countries except Germany, were made in the duties on hundreds of products, including the following:

Belgian treaty: Cement, glass (silica) sand, plate glass, sheet glass, laminated glass, various iron and steel products, asbestos building materials, and whiting.

Swedish treaty: Various iron and steel products, various manufactures of iron and steel such as saws, pliers, files, and so forth, calculating machines, vacuum cleaners, and safety matches.

Canadian treaty: Cream, Cheddar cheese, poultry, fish, canned razor clams, apples, strawberries, blueberries, cherries, seed potatoes, and turnips.

Netherlands treaty: Edam cheese, pickled onions, gin, and cordage.

Switzerland treaty: Dyes, certain machinery, Swiss cheese, certain cotton and silk cloths, knit underwear of cotton, wool, silk, rayon, machine embroideries, and lace handkerchiefs.

French treaty: Certain articles of carbon and graphite, perfume bottles, watch crystals, cast-iron pipe, Roquefort cheese, mushrooms, wines, silk and rayon fabrics, certain cotton and silk apparel, laces, and wool-knit fabrics.

I want to emphasize that these are only a few of the hundreds of items affected by the various treaties which have been negotiated. To give a complete list would take up many pages.

Just as an example of how the reductions in duty adversely affect our American producers, let me cite the case of glass or silica sand, the duty on which was reduced under the Belgian treaty from $2 to $1 per ton. Imports in 1934 were 21,889 tons, all of which came from Belgium. In 1935, with the Belgian treaty in effect for 8 months, imports rose to 39,546 tons. Doubtless they will rise still further during the present year. Every additional ton imported from abroad means that much less of our own consumed. By reducing the duty on glass sand, the New Deal has struck a blow at one of the important industries of my own district. A great deal of glass sand is found in the southern portion of New Jersey.

The reductions made in the duties on various agricultural commodities have had a most detrimental effect upon the producers of my district. For example, imports of tomatoes have jumped from 55,000,000 pounds in 1934 to 79,000,000 pounds in 1935.

As the trade treaties gradually come into operation, foreign competition on all fronts will continue to increase. New Jersey poultry raisers were given a blow by the administration by virtue of the 40-percent reduction in the duty on dressed poultry and the 50-percent reduction in the duty on live poultry under the Canadian treaty. This reduction has been in effect since the 1st day of January of this year.

The cement industry has also been adversely affected by New Deal trade treaties. This is strikingly shown in the increase in imports from 1934 to 1935. In 1934 imports were around 94,000,000 pounds. In 1935 they rose to 232,000,000 pounds, an increase of 138,000,000 pounds under the stimulus of the 25-percent reduction in duty under the Belgian treaty. The domestic industry can thank the New Deal for depriving them of the home market to this extent.

The New Weal tries to justify its trade-treaty program on the theory that by hurting some American industries it

benefits others by providing increased export markets for them. Even if this result were being accomplished, I could not agree with a philosophy which denies equal opportunity to domestic producers. But what makes matters worse is that after striking down certain of our industries the New Deal has failed to provide corresponding increases in the foreign markets of other domestic industries.

The failure of the New Deal program is best illustrated by a comparison of the increase in imports and exports from 1934 to 1935. Imports increased 24 percent, but exports only increased 7 percent. Our favorable balance of trade shrank from $478,000,000 in 1934 to only $235,000,000 in 1935. In the first 5 months of the present year our favorable balance of trade disappeared altogether, with imports of $972,000,000 and exports of only $969,000,000.

While some few industries may have been benefited by the trade treaties as a result of increased exports, the general effect on the country as a whole has been adverse. We have surrendered more than we have gained, and as time goes on the ratio of losses to gains increases. When the trade-treaty legislation was enacted it was said that it was necessary to restore our foreign trade, even though at that time it was rapidly increasing from the low point of 1932.

Our foreign trade has continued to increase, even with countries with whom no treaties are in effect. It would therefore appear that the New Deal is giving away our home market unnecessarily.

It is said that we must buy abroad if we wish to sell abroad. This may be true, but we do not have to buy those things which we can and do produce at home. There are plenty of things which we must buy that do not come in competition with the products of our own people. Already two-thirds of our imports come in free of duty, and if we must bargain with foreign countries to secure additional markets, let us bargain with the free list, rather than with the dutiable list. We can force other countries to give fair treatment to our products by threatening the imposition of penalty duties on products now enjoying free entry into our market.

TARIFF PLANK OF REPUBLICAN PLATFORM OF 1936

I shall close these remarks by quoting the tariff plank in the Republican platform of 1936, with which I am in complete accord. It follows:

Tariff

Nearly 60 percent of all imports into the United States are now free of duty. The other 40 percent of imports compete directly with the product of our industry. We would keep on the free list all products not grown or produced in the United States in commercial quantities.

As to all commodities that commercially compete with our farms, our forests, our mines, our fisheries, our oil wells, our labor, and our industries, sufficient protection should be maintained at all times to defend the American farmer and the American wage earner from the destructive competition emanating from the subsidies of foreign governments and the imports from low-wage and depreciated-currency countries.

We will repeal the present reciprocal trade agreement law. It is futile and dangerous. Its effect on agriculture and industry has been destructive. Its continuation would work to the detriment of the wage earner and the farmer.

We will restore the principle of the flexible tariff in order to meet changing economic conditions here and abroad and broaden by careful definition the powers of the Tariff Commission in order to extend this policy along nonpartisan lines.

We will adjust tariffs with a view to promoting international trade, the stabilization of currencies, and the attainment of a proper balance between agriculture and industry.

We condemn the secret negotiation of reciprocal-trade treaties without public hearing or legislative approval.

THE ROOSEVELT NEW DEAL AND THE COLORED CITIZEN

Mr. QUINN. Mr. Speaker, President Roosevelt in a recent speech said:

There are none of us who do not hope that our children get a better break than we had. * * * We want them to have an opportunity for profitable character building—decent, wholesome living—good work and good play.

This statement is exemplary of the inclusiveness of the spirit and practice of the Roosevelt New Deal administration.

June 26, 1935, by Executive Order 7036, the President created the National Youth Administration. August 1, 1935, Mrs. Mary McLeod Bethune, of Daytona, Fla., for many years one of the leading educators of the colored race, and Dr. Mordecai W. Johnson, president of Howard University, Washington, D. C., were appointed as members of the N. Y. A. national advisory committee by the President.

April 29, 1936, in the drawing room of the White House from 9 p. m. until nearly midnight, President Roosevelt sat down with the members of the N. Y. A. national advisory committee to review at first hand the phenomenal progress made to date in this new social endeavor.

Aubrey Williams, the inspired genius and executive secretary of the N. Y. A., presented each member of the committee to the President. In her turn Mrs. Bethune recited the accomplishments of the colored youth as reflected in the statistical records of the organization, which were in brief as follows:

Twenty-eight colored leaders are members of the State N. Y. A. advisory committees, North and South. An equal number of colored assistant State directors and trained college men and women of the colored race are filling high executive positions in New York, Pennsylvania, Florida, Virginia, Kentucky, Illinois, Tennessee, Indiana, Ohio, Missouri, Michigan, Kansas, Georgia, Colorado, California, and Texas, which State programs have had the largest participation of young colored men and women.

The National Youth Administration is helping approximately 26,000 colored youth to continue in school through payments for part-time work under supervision of school authorities. These young people range in age from 16 to 25. There are approximately 5,000 of these colored students in the undergraduate class and 70 graduate college students in both the strictly Negro institutions and the leading universities. The average monthly rate per college student is $15, while the graduate students receive from $25 to $30 monthly. Those students of high-school class are being paid a maximum of $6 per month.

Of the $50,000,000 expended by the N. Y. A. organization during the past year, it is conservatively estimated that the financial benefits to the colored youth of the Nation has been proportionate to their population ratio and particular needs.

Mrs. Franklin Delano Roosevelt, addressing a group of colored educators under the auspices of the national conference to discuss Fundamentals in the Education of Negroes, at Washington, D. C., on May 9, 1936, said:

I noticed in the papers this morning the figures given of the cost in certain States per capita for education of a colored child and of a white child, and I could not help but think as I read that item how stupid we are in some ways, for of course in any democracy the one important thing is to see as far as possible that every child receives at least the best education that that child is able to assimilate. * * * I feel that while we have been fortunate in this country in having many fine men and women interested in the education of the Negro race, we have also been slow, many of us who are of the white race, in realizing how important to our race, that you should have the best educational advantages.

I believe that the Negro race has tremendous gifts to bring to this country in the way of artistic development. I think things come by nature to many of them that we have to acquire, such as an appreciation of art and of music and of rhythm, which we really have to gain very often through education. I think that those things should be utilized for the good of the whole Nation, that you should be allowed to make your greatest contribution along the lines that you want and that give you joy. And, therefore, I am very happy to see this conference, and I have the hope that out of it will come a realization not only to you who are here, but to all the people throughout the country who may be listening in today and who may later come in contact with those of you who are here, that we as a democracy in these times must be able to grasp our problems, must have sufficient general education to know not only what our difficulties are but what the Government is trying to do to help us meet those difficulties. Without that ability in our people and without the willingness to sacrifice on the part of the people as a whole, in order that the younger generation may develop this ability, I think we have harder times ahead of us than we have had in the past. I think the day of selfishness is over; the day of really working together has come, and we must learn to work together, all of us, regardless of race, or creed, or color; we must wipe out, wherever we find it, any feeling that grows up of intolerance, of belief that any one group can go ahead alone. We go ahead together, or we go down together, and so may you profit now and for the future by all that you do in this conference.

Dr. Ambrose Caliver, former dean of Fisk University, sponsor of the above-mentioned conference and specialist in Negro education, United States Office of Education, Department of the Interior, was subsequently loaned to the Federal Emergency Relief Administration. He recommends the appointment to Administrator Harry L. Hopkins of James A. Atkins, as full-time assistant to direct the field activities of the emergency education program, adult education, nursery schools, and workers' education camps for colored men and women.

It is important to note here that recent surveys reveal that the educational facilities, length of school term, and salaries of colored teachers in the South have been advanced more than 30 percent since the Federal Government stepped into this program and the advent of the Roosevelt New Deal.

The physical equipment and health benefits to the colored race and the Nation as the result of the erection of new school buildings, playgrounds, swimming pools, gymnasiums, auditoriums, and recreation centers under the P. W. A., F. E. R. A., and W. P. A. programs are incalculable to present and future generations. Millions of dollars in wages have come to colored workmen and great stimulus has been given to the heavy industries and business has picked up generally through purchases of materials by the Government for this emergency construction. In production plants, steel mills, and factories thousands of negroes have again been gainfully employed.

It is estimated that nearly 30,000 otherwise unemployed colored school teachers have been given work in all parts of the country. Better salaries, especially in the South, have been reported. It should be noted that the minimum salary rate approved by Administrator Hopkins for all W. P. A. workers has meant payment of a much higher scale of wages for the hundreds of thousands of colored persons on State and Federal projects. The largest number of colored citizens have been employed under the Federal Government's emergency public-works program in capacities commensurate with their specialized training than heretofore in private industry.

Hundreds of research technicians, administrative officials, supervisors, skilled workmen, foremen, and other white-collar workers of the Negro race have had equal opportunity under the Roosevelt administration.

Nearly $2,000,000 was specially earmarked by President Roosevelt for surveys on the occupational opportunities for Negroes, State vocational and educational aid, and a Nation-wide household workers' project to train the tens of thousands of persons now on relief for gainful employment. Colored instructors and personnel workers, men and women, have been employed to prosecute this important job of training and placing competent household workers.

Reflecting the general improvement in conditions throughout the country among colored people is the statement of Dr. J. E. Walker, president of a life-insurance company of Memphis, Tenn. Practically all of the business of the company is among colored people in Mississippi, Arkansas, Louisiana, Texas, and Tennessee. The company suffered the usual loss of business during the dark days prior to 1932. In 1933 officials were forced to borrow from the Reconstruction Finance Corporation to continue in business. Early in 1932 Dr. Walker reports, it was found necessary to take over a number of farms on which the company held mortgages. Things were dark, indeed. But to quote Dr. Walker:

> Better conditions were reflected shortly after the beginning of the A. A. A. program and have continued to improve. In 1934, in fact, our business was better than in any year of the existence of our company. In March 1935 we were able to pay our loan to the R. F. C. due to payments made by colored farmers on their indebtedness.

C. C. Spaulding, president of the North Carolina Mutual Insurance Co., and Harry A. Pace, president of the Supreme Liberty Life Insurance Co. of Illinois, and F. B. Ransom, head of the Mme. C. J. Walker Manufacturing Co., of Indianapolis, Ind., are other Negro leaders who have reported improved business conditions during the past 3 years.

In a recent letter received by Robert Fechner, Director of the Emergency Conservation Work, John L. Webb, Hot Springs, Ark., grand master of the Free and Accepted Masons, jurisdiction of Mississippi, wrote:

> Mr. Roosevelt is going to be very hard for anybody to beat, because of the fine service he has rendered. He has done more for the Negroes than any other President of the past 10 years or more, and because of his enlarged program, helping the youth in the N. Y. A., in the C. C. C., and the other departments, I am looking for him to be reelected by a large majority.

John R. Hawkins, secretary and treasurer of the African Methodist Episcopal Church, in reporting receipts before the thirtieth general conference in New York City, May 6, 1936, indicated that church dollar money throughout the connection had increased approximately $350,000 in the past quadrennium.

Marion Anderson, of Philadelphia; Etta Moten, of Chicago, the great leading colored contraltos; and Mme. Lillian Evanti, of Washington, the leading colored coloratura, have all been honored by the President and Mrs. Roosevelt and their guests at the White House.

The paintings of Sam Brown, of Philadelphia, have elicited special public citation by the first lady.

Housing conferences have been attended by Mrs. Roosevelt at Howard University and Miner Teachers College. Colored women representatives of Greek letter sororities have been invited to conferences at 1600 Pennsylvania Avenue.

One of the Easter dresses of Mrs. Roosevelt was the prize-winning design of a colored New York high-school girl.

Mrs. Roosevelt, like the President, has given new meaning to the creed of service to all mankind regardless of race or color.

In the Post Office Department, which gives permanent employment to the largest number of colored workers in the United States classified civil service, notable progress has been made under Postmaster General James A. Farley, both in status and working conditions. Hundreds of additional colored eligibles have secured permanent appointments and received promotions in the service. St. Louis, Philadelphia, Pittsburgh, and New York now have colored branch managers. Postmaster General Farley appointed Sydney M. Jackson, secretary of the Colored Employees Postal Alliance, as special clerk at large in the Post Office Department at Washington, D. C.

The Civilian Conservation Corps was established by President Roosevelt on April 5, 1933. On the same day Robert Fechner was named director.

The purpose of Emergency Conservation Work—the C. C. C.—is to relieve acute conditions of distress and unemployment in the United States and to provide for the restoration of the country's natural resources and the advancement of an orderly program of useful public works.

Civilian Conservation Corps enrollees are selected on a State-quota basis by the Labor Department from the public-relief rolls. Veterans are selected by the Veterans' Bureau.

From the beginning of the C. C. C., colored youths have shared in the program. At the peak strength of the C. C. C., reached in August 1935, there were 506,000 young men and war veterans enrolled. Of this number, approximately 50,000 were colored.

Today there are approximately 350,000 men in the Civilian Conservation Corps. Of this number, 35,000 are colored enrollees, selected from every State in the Union. They are engaged on numerous conservation projects which are of present and future benefit to our country. At present there are 37 colored C. C. C. companies engaged in soil-conservation projects. Other colored companies are carrying on reforestation and forest-protection work, recreational development, levee, drainage, flood control, and other projects. Millions of dollars have been saved for the country by the conservation activities of the Civilian Conservation Corps. About 2,500 colored enrollees are assigned to C. C. C. projects in the State of Texas.

Approximately $700,000 is sent back home to their parents and dependents by colored C. C. C. enrollees each month out of their earnings. At the time they enter the corps these young men arrange to send approximately five-sixths of their

monthly cash allowances directly to their families. The C. C. C. enrollees receive a basic cash allowance of $30 a month board and keep. This means that approximately $25 a month is allotted home by each enrollee. This money has been of great assistance to the dependent families of the boys. Often these C. C. C. men are the chief breadwinners for their families. The enrollees' ability to help support their dependents increases their self-respect and their pride of accomplishment.

Mindful of the health of these colored boys, medical officers from the United States Army Reserve Corps have been assigned to look after their physical well-being. Fourteen colored medical officers are now on active duty at C. C. C. camps throughout the country. Each company is provided with a first-aid building, company hospital, or dispensary, with a medical officer in charge. Orderlies are appointed from among the enrollees.

The United States Office of Education has acted in an advisory capacity to the War Department in working out an educational and recreational program. Each company has an educational adviser who develops a program suited to the individual needs of each camp. College graduates are appointed to fill these positions. Many enrollees who were illiterate have been taught to read and write in classes offered by the C. C. C. camps. There are today 132 colored men serving the C. C. C. camps as educational advisers, according to Edgar G. Brown, special assistant to the Director of the E. C. W. organization. Most of the educational work is carried on at the camp. Arrangements are often made, however, for enrollees to carry on additional school work in public-school evening classes in nearby cities. The camp educational programs offer instruction in carpentry, shorthand, typing, forestry, auto mechanics, landscaping, and numerous other vocational subjects. While attendance at classes is voluntary, approximately 75 percent of the enrollees attend. Classes in first aid, safety, morale, guidance, leadership, and hygiene have been well attended. While at work C. C. C. enrollees are given practical instruction on the job by the project superintendent and the technical staff.

Baseball and soft-ball diamonds, tennis courts, and basketball courts have been laid out to provide recreational facilities at the camps. Some of the camps have produced championship teams in baseball and other sports. Current movies, health education films, lectures on geography, conservation, history, and other topics, and plays are included in the camp educational and entertainment program. Trips to nearby museums and other points of interest are frequently scheduled.

Eight colored chaplains of the United States Army Reserve Corps direct the religious activities in a number of the colored camps. They are aided by ministers from nearby communities.

Through the experience and training received in the C. C. C., boys learn how to live together and work together amicably. Experience and training afforded by the C. C. C. has helped many boys to secure employment. The specialized knowledge gained by filling such positions as mess sergeant, company clerk, assistant educational adviser, leaders, store clerk and manager, foreman, and first-aid men has proved valuable to these enrollees in the Civilian Conservation Corps. At present regular employment is given to 1,200 colored cooks and 300 colored typists in the C. C. C.

In Boston, March 29 of this year, Dr. Robert C. Weaver, Negro adviser to the Secretary of the Interior, Hon. Harold L. Ickes, also Administrator of Federal Emergency Public Works, gave a departmental estimate of $25,000,000 expended under the Federal Government in cooperation with local communities through P. W. A. loans and grants for the erection of 215 colored elementary and high-school buildings. This program added 1,165 new educational classrooms and accommodations for approximately 50,000 colored students.

In Jefferson Davis and Lee Counties, Miss., $135,000 was expended under the New Deal administration for colored schools.

In Missouri an estimated expenditure of $2,000,000 for a new colored high school and repairs on 13 existing structures resulted from P. W. A. financial aid.

In Baltimore, Md., a half million was granted by P. W. A. officials in Washington for school buildings to serve colored students. A like sum was made available for completion of the Wendell Phillips High School in Chicago, Ill.

A $3,000,000 school-building program was made possible by P. W. A. funds in the State of Texas to increase the educational facilities for colored children.

Howard University has received $5,000,000 from the Public Works Administration in loans and grants for the Frederick Douglass Hall, new library and dormitories, and the Freedmen's Hospital.

The new city hospital sought for the past decade by colored citizens of St. Louis, Mo., has been completed through P. W. A. financial support.

The veterans' hospital in Tuskegee and the Joseph B. Knowles Home for the Aged in Nashville, Tenn., have likewise been provided with new additions and repairs through the P. W. A. program of the Roosevelt New Deal administration.

Out of a total of 40 low-cost housing project managers assembled in Washington by the P. W. A. Housing Division, 14 were colored men and women. They were recommended by local advisory housing committees composed of leaders in welfare work of both races. Cleveland, Nashville, Atlanta, New York, Detroit, Indianapolis, Washington, and other cities will benefit by these large-scale slum-clearance projects under the P. W. A. housing program. Colored architects and builders and consultants have had a conspicuous part in drafting and the prosecution of the program in all its ramifications. Dewey R. Jones, associate advisor to Dr. Weaver; Hilyard Robinson, of Howard University, a noted architect; and John Langford, well-known colored builder, have been in the forefront of the program. In the legal division of P. W. A., Theopolus Mann, a colored lawyer of Chicago, has made an enviable record. John Lewis Wilson, another colored architect, served as associate architect on the Harlem housing project of New York. This particular model received honorable mention in the leading technical journals of the country.

In the building of these Federal slum-clearance projects during the past year, close to 30 percent of the wages for skilled and unskilled labor has gone to colored workmen, a sum estimated at close to a half million dollars, as a result of the strict adherence to the letter and spirit of the congressional amendment and Presidential rules and regulations specifically stating there was to be no discrimination on these jobs because of race or color. In many cases it was necessary to grant colored workmen temporary "union" cards in order to permit their immediate employment on these P. W. A. projects. In following through on these contracts the office of the Adviser on Negro Affairs and P. W. A. authorities had working agreements with all private contractors which permitted check-ups made in the field monthly. This rigid departmental policy has resulted in a most satisfactory participation of colored labor in every section of the country.

Employment opportunities for colored workers have been initiated also by the Interior Department and the Tennessee Valley Authority on the large Federal power-development projects, such as Grand Coulee Dam, Boulder Dam, and T. V. A.

Reports received by H. A. Hunt, Negro assistant to the Governor of the Farm Credit Adiministration indicate not only colored farmers are receiving this important Federal service, but that they are paying back and meeting their obligations promptly and fully. It is important also to note that, without exception, the annual conference of the local and State associations are attended by the farmers in the South of both races. The local borrowers from the F. C. A. automatically become members of the association.

Credit unions under the jurisdiction of the Farm Credit Administration not only appeal to rural communities but also to urban sections, and here, too, the participation of colored citizens in such group organizations as the railway clerks, waiters, school teachers, and so forth, are general, and many colored officers are represented on the governing boards of these organizations in all sections of the country. Nothing

could be more revealing as to the forces at work for mutual understanding and progress under the Roosevelt New Deal than the unanimous confirmation by the Senate of the colored Presidential appointees: Hon. William J. Thompkins, Kansas City, Mo., for recorder of deeds of the District of Columbia; Hon. Lester Walton, of New York, as Minister to Liberia; and Hon. Armond W. Scott for judge of the municipal court, District of Columbia, were among this number. It is significant also to note that the other two colored lawyers serving as municipal court judges in the United States, Hon. James Watson and Hon. Charles Toney, of New York City, were elected as a result of the law signed by President Roosevelt during his tenure of office as Governor of New York State, which created two judicial districts in Harlem. This law, though passed several times by the New York Legislature, had, up to this time, always met with executive veto, both at the hands of a Democratic and Republican Governor.

The allocation of $100,000 to the Negro division of the Department of Commerce for an exhibit and building of Negro progress in Dallas, Tex., headed by Hon. Eugene Kinckle Jones, executive secretary of the National Urban League and chairman of the Texas Negro Centennial Committee; by Vice President Garner, Secretary Roper, Secretary Perkins, Secretary Wallace, members of the President's Cabinet, and the others of the Texas Centennial Commission, is evidence of the Federal Government's plan and program of equal representation. The other members of the Texas Centennial Committee headed by Mr. Jones are Robert L. Vann, Dr. F. D. Patterson, Mrs. Sadie Alexander, Dr. M. O. Bousfield, William Banks, and Jesse O. Thomas, general manager, and Maceo Smith, assistant general manager.

The recent conference held in Washington of colored leaders in field and extension work headed by T. Y. Campbell of Tuskegee and J. B. Pierce of Hampton Institute, under the Department of Agriculture, called by Director C. A. Cobb, of the Cotton Allotment and Soil Conservation, is indicative of the liberal policy of the Roosevelt administration in its efforts to treat intelligently, fairly, and scientifically the problems of all alike engaged in the great farming industry of the country, North and South.

Charles Hall, specialist in Negro statistics, United States Bureau of the Census, Department of Commerce, pointed out in a recent speech at the Cheyney Normal School of Pennsylvania that despite a decrease of 35,570 colored owners of farm property in the South from 1920 to 1930, in this same section during the past few years there has been an increase of 4,046 colored farm owners, bringing the total to 186,065 colored farm owners in 1935. It is estimated by Mr. Hall that approximately 25,000 colored retail merchants do an annual gross business of $101,000,000, giving direct employment to about 40,000 colored men and women.

Joseph H. B. Evans, administrative assistant in the Rural Resettlement Administration under Dr. Guy Tugwell, on leave at President Roosevelt's special request, from Columbia University for another year, in a review of the activities of this department of the New Deal administration before the Capitol Club of Washington, revealed an interesting picture. Mr. Evans is a colored leader, long active in the business development of colored people in the North and South. He received his Phi Beta Kappa Key at Michigan University at the age of 20 in 1914.

There are, according to Mr. Evans, more than a hundred colored employes in the R. A. office in Washington, 30 percent of them are on technical and white-collar jobs.

Charles S. Duke, of Chicago, a Harvard graduate and a colored architect and engineer, is the R. A. progress engineer who is directing the Newport News, Va., project of a hundred and fifty homes for colored farmers of that section. This rural resettlement community will be ready for occupancy in the fall. Joseph H. Rousseau, a colored general contractor has a force of nearly 250 colored skilled and unskilled workmen engaged at the present time on the construction work.

President Roosevelt declared at the outset of his administration:

> In the field of world policy I would dedicate this Nation to the policy of the good neighbor—the neighbor who resolutely respects himself and, because he does so, respects the rights of others.

That this policy has been inclusive of all nations on the basis of equality is attested by the removal of the marines from Haiti and the recognition of this sister republic's independence by the Roosevelt administration after the visit of President Stenio Vincent to the White House in 1934. Cuba, Puerto Rico, and the Virgin Islands, too, have felt the beneficence of the good-neighbor policy of the Roosevelt administration.

The consummation of the Philippine Islands' independence during the past year is likewise noteworthy.

President Roosevelt has stated further:

> * * * The people of America and the Government of those people intend and expect to remain at peace with the world.

President Roosevelt is the living embodiment and spirit of an American concerned for spiritual ascendency and power. In a recent Sunday evening appeal over the ether waves he pictured the glorious salvation of a people who are building a heaven on earth; he said:

> You have come through the threshold of a new era in which your churches and the other churches recognize and stand ready to lead in a new war of peace—the war for social justice.
>
> If I were asked to state the great objective which church and state are both demanding for the sake of every man and woman and child in this country, I would say that that great objective is "a more abundant life."
>
> Yet I do not look upon these United States as a finished product. We are still in the making. The vision of the early days still requires the same qualities of faith in God and man for its fulfillment.
>
> No greater thing could come to our land today than revival of the spirit of religion—a revival that would sweep through the homes of the Nation and stir the hearts of men and women of all faiths to a reassertion of their belief in God and their dedication to His will for themselves and their world. I doubt if there is any problem—social, political, or economic—that would not melt away under the fire of such a spiritual awakening. At our neighbor's fireside we may find new fuel for the fires of faith at our own hearthside.
>
> The social objective, I should say, remains just what it was, which is to do what any honest government of any country would do—to try to increase the security and happiness of a larger number of people in all occupations of life and in all parts of the country; to give them more of the good things of life; to give them a greater distribution, not only of wealth in the narrow terms but of wealth in the wider terms; to give them places to go in the summertime, recreation; to give them assurance that they are not going to starve in their old age; to give honest business a chance to go ahead and make a reasonable profit; and to give everyone a chance to earn a living. (President Roosevelt, June 7, 1935.)

The following news story was published in Negro newspapers throughout the country following the Democratic national convention in Philadelphia, June 23–27, 1936.

DEMOCRATIC FIRSTS

1. First to institute Negro Press Conference.
2. First to seat a Negro woman as a regular delegate to a major-party convention.
3. First to seat a Negro in the general press box.
4. First to open convention with invocation by Negro.
5. First time in history to seat 10 delegates and 22 alternates (Negro).
6. First time a Negro addressed a convention (Congressman MITCHELL of Illinois).

JUSTICE FOR THE NEGRO

Mr. FENERTY. Mr. Speaker, the final session of this Congress has come to a close and there still remain in the hands of the Judiciary Committee no less than 33 bills against lynching, not one of which has become law at this session, or, indeed, will at any time while the Democratic Party is in control of the National Government.

Having introduced one of these antilynching bills myself, I find it difficult to understand the persistent unwillingness of the Democratic Party to do justice to the people of a great race. In a Nation which is admittedly the land of the free a party calling itself "Democratic" makes no secret of its hostility to granting freedom in its complete sense to many millions of Negro Americans. It is a deep blot upon the honor of America that lynching is thus not only permitted to continue but apparently given the stamp of approval by the political party which dominates our Southern States.

This attitude was evident at the Democratic convention in Philadelphia, when Democratic leaders strategically retreated whenever they were asked what they intended to do about the

evil of lynching. As Chesly Manly stated in the Chicago Daily Tribune for June 27:

> Democratic leaders at the convention here have exuded a spirit of racial tolerance and brotherly love, particularly the eminent Jeffersonians from New York, Pennsylvania, and Illinois, where the colored vote is worth going after, but when you ask them about a constitutional amendment to permit Federal antilynching legislation they become extremely preoccupied with the business of running the convention. * * *
>
> The Senator gasped as if stunned by the question, and, upon regaining his composure, declared:
>
> "I'm not going to say anything about that now—not till this convention is over. There's plenty of time for that!"
>
> There was a note of finality in the Senator's voice which indicated plainly that it would be futile to pursue the matter.
>
> The beaming Jim Farley, Postmaster General, national chairman, and New York State chairman of his party, was sitting over in a box, talking garrulously about the incredible majority by which President Roosevelt would be reelected. But when approached on the subject of antilynching legislation he had no time for meditation and no disposition to talk. He explained apologetically that the stupendous task of running a convention left little time for thoughts of legislative policy, remarked he might make some comment later and suggested "seeing some of the boys."
>
> The solicitude of the Democratic Party for the colored vote and the almost religious zeal with which the leaders make their professions of humanitarian liberalism have been exemplified not only at this convention but in the New Deal Senate of the Seventy-fourth Congress, when the Wagner-Costigan antilynching bill was filibustered to prenatal death on the calendar.

As far as I can remember, Mr. Speaker, the only time that such a measure passed this House was upon the recommendation of a Republican President, Warren G. Harding, to a Republican Congress. At that time, of the 234 Republicans, 221 voted for the antilynching bill, while of the 155 Democrats, only 8 voted for justice to the Negro. And yet the Democratic Party professes to be liberal.

At the present time there are 315 Democrats and only 103 Republicans in the House of Representatives, and there are 70 Democrats and only 23 Republicans in the Senate. On the Committee on the Judiciary, which has the antilynching bills under consideration, there are 18 Democrats and only 7 Republicans. It is, therefore, obvious that if the Democratic Party were as friendly to the Negro as some of its spokesmen pretend this salutary legislation, which would so effectively safeguard the Negro people, would not be buried in committee.

There is only one thing that today prevents justice to the Negro by the passage of an antilynching bill, and that is the determined and unreasonable opposition of leaders in the Democratic Party. I have been amazed lately to hear Democratic speakers insult the Negro by saying that he can be bought by a Democratic dole or an empty Democratic political promise. The Democrats who assert this have a very poor conception of the honor of the Negro. Go among these people whose skin wears a darker shade than ours only because their fathers labored under a hotter sun, and ask them if they can be purchased by Democratic bribery, and your question will receive an unmistakable answer. Ask them whether they owe their freedom to a Democrat or to the great-souled Abraham Lincoln. Ask them if today they are permitted to vote in the Democratic States in the South, as they can in the Republican States of the North. Ask them if, in the Southern Democratic States, they have the rights to which their citizenship should entitle them—the right to serve on a jury, the right to protection against a bloodthirsty mob, the right of equal opportunity and justice under the law, and the hundreds of other rights which have been denied to the Negro by the Democratic Party for three-quarters of a century. Ask them who it was who wrote into the Constitution the amendments which guaranteed freedom to the Negroes and gave them the right to vote.

When Democratic leaders today impudently intimate that the Negro can be bought by a Democratic dole, they dishonestly imply that the Negro is forgetful of the sacrifices of his fathers. They insult the intelligence of the Negro people by insinuating that our colored citizens have forgotten the blood which Democratic hands have shed in the lynching murders of the South. The crack of the whip, the cry of the child torn from the mother's breast, the agonizing prayers in the huts of bondage, the terrifying sight of a bullet-ridden body hanging indistinct in the moonlight from the limb of a tree by the roadside, have seared the Negro heart so deeply that this heartless Democratic injustice will not go unremembered.

For the Democrats to say that Negroes are an inferior people is false and slanderous. Today Negroes own 700,000 homes and 20,000 farms, and they operate an additional 700,000 farms as renters and tenants throughout the United States. They own more than 22,000,000 acres of land, an area larger than the five States of New Hampshire, Vermont, Massachusetts, Connecticut, and Rhode Island. It is estimated that they have an aggregate wealth of over $2,000,000,000. Thousands are employed in skilled labor; the Negro professional men and women have amazingly increased from 34,000 in 1890 to 135,000 in 1930. There are 70,000 business enterprises conducted by Negroes in over 200 different lines. In 1930 there were 51 Negro banks doing an average business of $75,000,000. In the United States there are 68 towns and many villages and settlements populated and governed entirely by Negroes. In spite of unjust discrimination, in spite of hampering traditions from the cruelty of slave days, in spite of the recent unfairness of the N. R. A. codes in the South, where wage differentials were sought in favor of white labor for the same work in the same occupations, in spite of restricted opportunities, the progress of the Negro race is remarkable and impressive. In the arts and the sciences, in literature and medicine and law, the Negro people have so enriched culture and human thought that their contribution cannot be over-estimated. Like slavery, the curse of lynching places its stigma not upon the enslaved, but upon the oppressor. While lynching is a terrible ordeal for the victim, it is much worse for the mobs of white men who stultify their natures by gloating over fiendish and inhuman torture. The danger of lynching is not so much to the injury of the unfortunates who are thus murdered, as in the effect on the social institutions which permit these nauseous carnivals of intolerance, cruelty, and crime. As the eminent Booker T. Washington succinctly and significantly stated, "You cannot hold a Negro in the gutter, unless some white man stays in the gutter to hold him there."

I, therefore, urge upon the Members of Congress, Mr. Speaker, that they give greater attention to the question of justice to this persecuted people. Abraham Lincoln once said that the Nation could not exist half slave and half free. It is equally true that no nation can progress when one political party, the Republican, is attempting to go forward with the Negro, while, at the same time, another party, the Democratic, is seeking to hold the Negro back.

In spite of Democratic opposition, there are some of us who will not be silent concerning the wrongs of an injured people. America must face the problem of lynching without further delay. Convinced of the soundness and justice of this cause, I intend to lend my voice and my efforts to its accomplishment. Let it not again be said of America, as was once uttered by a great American, when he contemplated the existence of slavery in the land:

> I tremble for my country when I reflect that God is just!

KERR BILL AND PALMISANO RESOLUTION

Mr. DICKSTEIN. Mr. Speaker, under the general permission granted to all Members to extend their remarks in the RECORD I desire to quote, as inherent parts of my remarks, some very essential resolutions and some important endorsements favorable to the Kerr-Coolidge deportation bill and to the Palmisano stay-of-deportation resolution, and to briefly comment upon the failure of either of these important measures to be passed by the House during the closing days of this session of Congress.

Mr. Speaker, I wish to address myself to the peculiar situation which presented itself to Congress on the eve of its adjournment with reference to the so-called Kerr-Coolidge bill—S. 2969 and H. R. 8163—which is so close to my heart because of its beneficial features, to deport undesirable aliens and to relieve the hardship desirable aliens will suffer if the provisions of this bill are not enacted into law.

On June 18 last the Honorable Daniel W. MacCormack, Commissioner of the Immigration and Naturalization Service,

addressed a letter to the Speaker of the House, which reads as follows:

JUNE 18, 1936.

Hon. WILLIAM B. BANKHEAD,
House of Representatives, Washington, D. C.

MY DEAR MR. BANKHEAD: May I set before you the situation which will result if there is adverse action or if there is no action before the adjournment of Congress on the Kerr-Coolidge bill (S. 2969 and H. R. 8163), which has been approved by the President, the Secretary of State, the Attorney General, and the Secretary of Labor.

(1) More than 3,000 aliens of good character will be separated from their families and deported.

They will leave behind more than 7,000 members of their immediate families, including more than 5,000 American citizens—wives and children—who will for the most part become public charges.

(2) Every month's delay in strengthening the present law means that more than 500 alien criminals and illegal entries escape deportation.

At least 15,000 criminals and illegal entries have escaped during more than 2 years the passage of this legislation has been delayed. If there is no action in the present Congress, this number will probably have reached 20,000 or more before legislation can be introduced and enacted in the next session.

If, however, corrective legislation is enacted at this session, we will be able to avoid a mass deportation which will be an outrage to our civilization and a scandal and disgrace to America in the eyes of the world. We will also be able to deport more than three times as many alien criminals as can be deported under the present law.

Very sincerely yours,

D. W. MACCORMACK, *Commissioner.*

A partial list of organizations which have endorsed the bill are the following:

American Bar Association.
American Citizenship League, Pittsburgh, Pa.
American Federation of Labor.
American Friends Committee.
Association of the Bar of the City of New York.
Board of Social Service of the Episcopal Diocese of Newark, N. J.
Committee of Fifty for Social Action in the Passaic (N. J.) Valley.
Department of Social Service of the Episcopal Diocese of Albany, N. Y.
Federal Council of the Churches of Christ in America.
Federation of Hungarian Churches and Societies of Los Angeles, Calif.
Foreign Language Information Service.
Immigrants Protective League.
Indiana State Senate.

International Migration Service.
National Council of Jewish Women.
National Catholic Welfare Conference.
National Crime Commission.
National Institute of Immigrant Welfare.
National League for American Citizenship.
Northwest International Anti-Crime Conference (Washington, Oregon, California, Idaho, and Montana).
Norwegian-American Civic Committee.
Oregon League of Women Voters.
Polish Association of America.
Second Baptist and First Methodist Churches of Edmeston, N. Y.
Southeastern Michigan Association of Chiefs of Police.
Southeastern Missouri Council of Churches.
State of Illinois Committee on Citizenship and Naturalization.
Toledo Federation of Women's Clubs.
Travelers Aid Society.
United German Societies of Greater New York.
Washington, Iowa, City Ministerial Association.
Young Women's Christian Association, National Board.

The National Catholic Welfare Conference, representing the Catholic bishops and clergy of the United States, has endorsed the bill, and more than 2,200 of the leading Protestant bishops and clergy of the country have likewise given it their approval.

Special resolutions in support of the bill were passed by the American Bar Association and the National Association of Chiefs of Police. These resolutions read as follows:

AMERICAN BAR ASSOCIATION

At a meeting of the executive committee of the American Bar Association held at Washington, D. C., on May 6–9, 1935, upon motion, duly carried, the following resolution was adopted, with the understanding that the bill was to be amended so as to provide for an interdepartmental committee or board composed of representatives of the Departments of State, Justice, and Labor to pass upon cases involving extraordinary hardships:

"*Resolved,* That the executive committee of the American Bar Association favors the enactment into law of H. R. 6795, introduced in the Seventy-fourth Congress by Congressman KERR, of North Carolina, which is intended to increase the classes of undesirable aliens, particularly criminals, subject to deportation; to strengthen the Government's authority to effect deportations; and permit alleviation of certain extraordinary hardships such as separation of families or enforced termination of long-established residence in cases of aliens of good character."

Resolution adopted at the Forty-second Annual Convention of the International Association of Chiefs of Police, Ambassador Hotel, Atlantic City, N. J., July 11, 1935

RESOLUTION REGARDING DEPORTATION OF ALIENS

Whereas the Immigration and Naturalization Service of the United States Department of Labor has been for the past 2 years engaged in an intensive study of the deportation laws and their enforcement; and

Whereas the results of this study reveal that it is imperative to give the Department of Labor powers that it now lacks, and badly needs, for the apprehension of aliens who have entered the country illegally; to make possible the deportation of many alien criminals who cannot be reached under existing laws; and to authorize the Secretary of Labor to exercise limited discretionary power in certain deportation cases, in which extreme hardship to individuals, often including American-born wives and children, is not justified or compensated by any corresponding public advantage; and

Whereas bill H. R. 8163, introduced by Congressman KERR and referred to the Committee on Immigration and Naturalization, provides for the foregoing recommendations, and renders violators of State narcotic laws subject to deportation in the same manner as violators of Federal narcotic statutes; and further provides for the deportation of any alien who has been convicted in the United States within 5 years, of the institution of deportation proceedings against him of a crime involving moral turpitude, even if the alien is not sentenced to imprisonment, as required under existing law, and if the deportation of the alien who has been convicted in the United States within 5 years of the institution of deportation proceedings against him of a crime involving moral turpitude, even if the alien is not sentenced to imprisonment, as required under existing law, and if the deportation of the alien who has been convicted in the United States within 5 years of the institution of deportation proceedings against him of the crime of possessing or carrying any concealed or dangerous weapon, if the deportation of such alien is in the public interest; and

Whereas the members of this association consider the above proposals necessary for the welfare and protection of the people of the United States: Now, therefore, be it

Resolved, That the International Association of Chiefs of Police requests the Congress of the United States to enact the provisions of bill H. R. 8163, and that the secretary of the association send a copy of this resolution to the chairman of the Committee on Immigration and Naturalization.

National organizations not mentioning the Kerr-Coolidge bill but urging immediate action on the alien problem are the Chamber of Commerce of the United States, the General Federation of Women's Clubs, and the executive committee of the American Legion. Resolutions by these organizations read as follows:

Resolutions adopted at Twenty-fourth Annual Meeting, Chamber of Commerce of the United States, Washington, D. C., April 28–30, 1936

CRIME AND DEPORTATION

Definite action should be taken to free the country of alien criminals. There should be immediate extension of provisions of law for deportation to include all classes of criminal aliens, convicted within 5 years of any crime involving moral turpitude, even if there was not sentence of imprisonment, aliens violating State narcotic laws, alien smugglers, and aliens convicted of possessing or carrying concealed or dangerous weapons.

On the other hand, there should be such amendment to existing law as to prevent deportation from being visited suddenly upon law-abiding aliens who have been resident in the United States for many years. There should be provision which would allow such aliens, upon a proper showing of their good character and useful lives, to remain. Any such provision, however, should contain such limitations that it may not be utilized upon behalf of any alien Communist, anarchist, criminal, or member of the immoral classes.

The General Federation of Women's Clubs, which includes more than 14,000 women's organizations throughout the country, and has a membership of more than 2,000,000, at the annual council meeting on April 30, 1936, passed the following resolution:

"That the General Federation of Women's Clubs petition the Congress of the United States to pass legislation during the present session, which shall strengthen the existing laws relating to the deportation of criminal aliens, making it mandatory that those aliens shall be deported who have been convicted of violating the narcotic laws, State or Federal statutes; of illegal smuggling of aliens into this country, or who shall have been convicted of crimes importing moral turpitude carrying with it a sentence of imprisonment of a year or more, as well as those known to be habitual criminals."

Executive committee of the American Legion, meeting at Indianapolis, May 4, 1936

RESOLUTION ON IMMIGRATION LEGISLATION

Whereas there are pending before Congress different measures dealing with the subject of immigration; and

Whereas numerous amendments have been proposed to the pending measures by Congressmen and Senators of divergent views; and

Whereas the matter of tightening our immigration restrictions and securing stricter and more efficacious enforcement of immigration law has been at a standstill through several sessions of Congress by reason of the widely divergent views of Congressmen and Senators and the diversion of strength among opposing groups; and

Whereas it appears certain the stalemate will continue and no beneficial immigration legislation will be obtained at this session of Congress if the American Legion continues to insist upon the passage of legislation embodying the full program endorsed at the St. Louis national convention; and

Whereas it appears that urgently needed restrictions and enforcement measures can be obtained if the American Legion yields in part and urges a compromise; and

Whereas the Americanism commission has reached the conclusions above recited, after hearing the subject discussed at length by E. J. Shaughnessy, Deputy Commissioner of Immigration and Naturalization, Department of Labor, the national commander, and the national legislative director: Now, therefore, be it

Resolved, That the national Americanism commission recommends to the national executive committee that the legislative director of the American Legion be authorized and directed to endeavor to secure at this session of Congress the passage of an immigration act embodying so much of the program endorsed at the St. Louis convention as will not bar immediate passage, and which act, in his judgment, will effect a substantial betterment of existing law.

So it will be seen that public organizations of importance and consequence, representative bodies of the American people throughout the country and press generally have fully, completely, and generously endorsed this bill.

The reason for such universal support is simple.

The bill, if enacted, would not have added one single undesirable alien to our present alien population; on the contrary, the provisions of the bill would have resulted in the deportation from this country of many aliens not deportable under present law who are a menace to our communities. Furthermore, this bill would afford needed relief to law-abiding aliens in this country whose only offense is that they are here in technical violation of some statutory provision of our immigration laws with no evidence of any criminal activities. Unless the relief afforded by this bill is enacted into law, these aliens in many cases will be forced to separate from their homes and their kindred, and for no good reason their American families will be thrown as new burdens on our relief agencies.

Changes and amendments to the bill were suggested from time to time by persons and organizations opposed to the provisions of the bill as it was originally reported from committees to both Houses of Congress. I was willing to accept all offered amendments, providing only that the primary purposes of the bill were carried into effective law; but in spite of my willingness to cooperate, efforts to have this legislation enacted was not successful.

I have no doubt about the outcome if the House had been given an opportunity to act on the reported bill; and if the Committee on Rules had been more cooperative, the Kerr-Coolidge bill would have been passed by the House before the adjournment of Congress.

However, something should have been done by the House leaders to permit the House to consider and pass the joint resolution (H. J. Res. 632), which was temporary legislation.

The gentleman from Maryland [Mr. PALMISANO] on June 16, 1936, introduced this House joint resolution as a temporary law, in the event the Kerr-Coolidge bill could not be enacted before adjournment. The text of House Joint Resolution 632, as introduced, reads as follows:

Whereas, under existing provisions of the immigration laws, there is no statutory requirement that aliens found to be subject to deportation shall be immediately deported by the Secretary of Labor forthwith upon determination that the facts in any case justify deportation pursuant to law; and

Whereas, having knowledge of this implied discretion as to the date upon which actual deportation shall be effective, the Commissioner of Immigration and Naturalization, with the approval of the Secretary of Labor, has heretofore delayed the execution of deportation orders against approximately 2,860 aliens of the noncriminal classes whose deportations have been ordered on grounds of technical violations of the immigration laws rather than on grounds involving violations of law for which penalties in addition to and more severe than deportation is provided by statute; and

Whereas the continued delay of actual deportation in cases of such noncriminal aliens has been heretofore predicated upon requests for such delayed action made upon the Commissioner of Immigration and Naturalization and upon the Secretary of Labor (1) by committee resolution adopted by the House Committee on

Immigration and Naturalization, which appeared in the CONGRESSIONAL RECORD of House proceedings on June 18, 1934; and (2) by House resolution adopted by the House of Representatives as shown in the CONGRESSIONAL RECORD of House proceedings on August 23, 1935; and

Whereas the Commissioner of Immigration and Naturalization has officially stated that the actual deportation of the aliens involved in this group of approximately 2,860 cases would thereby create immediate and unusual hardship within fireside families established, probably causing native-born American children and other citizen fireside relatives to be left behind in this country without adequate means of support and objects of public and private charitable support and that the number of such native-born American children and other citizen fireside dependent relatives likely to be left behind is over twice the number of these noncriminal aliens whose actual deportations have been thus delayed; and

Whereas a primary reason for the exercise of the above referred to implied authority to delay the actual deportation heretofore ordered in these cases has been the humane desire of the Commissioner of Immigration and Naturalization to obviate, if possible, the added hardship of permanent separation of these noncriminal aliens of good moral character from the citizen members of their fireside family established in the United States, which would be the result in many cases if the alien member of the family is actually deported, until Congress has been advised of the situation and had concluded its consideration of remedial legislative measures; and

Whereas legislative measures proposed by the Department of Labor and the Immigration and Naturalization Service calculated, when enacted, to provide authority for administrative extension of permanent relief in such noncriminal alien deportation cases, within certain defined limitations, have received favorable consideration by, and have been reported from, both the House Committee on Immigration and Naturalization and the Senate Committee on Immigration; and

Whereas Congress has not concluded orderly consideration of these favorably reported measures just referred to and there probably will be insufficient time for final legislative action thereon prior to the sine-die adjournment of the Seventy-fourth Congress; and

Whereas the Commissioner of Immigration and Naturalization and the Secretary of Labor should have some effective expression from this Congress, regarding the further delay of actual deportations of these cases and similar hardship cases or regarding the immediate execution of the orders for deportation in such cases, for their official guidance during the period following final adjournment of this Congress and the convening of the next Congress: Therefore be it

Resolved, etc., That the Secretary of Labor be, and hereby is, authorized to stay the execution of orders for deportation, upon the recommendation of the Commissioner of Immigration and Naturalization, until April 1, 1937, of aliens in the following general groups in cases where deportation has heretofore been ordered or hereafter ordered and stayed pursuant to this resolution:

(a) The group of aliens, numbering approximately 2,860, whose deportation has heretofore been delayed and in whose cases the records have been transmitted to the House of Representatives under date of January 15, 1936, and referred to in the printed House Document No. 392 of the Seventy-fourth Congress, second session: *Provided*, That any alien in this group shall be deported forthwith if the Commissioner of Immigration and Naturalization hereafter finds, upon further examination, that the facts in the case of such alien do not justify further delay of actual deportation;

(b) The group of aliens, approximately 150 in number, who have heretofore been recorded as lawfully admitted to the United States and some of whom have proceeded toward naturalization, in whose cases deportation has been ordered, held in abeyance, or is likely to be ordered and held in abeyance, on grounds predicated upon an opinion by the Attorney General of the United States issued subsequent to the admission of such aliens to the United States which held that an offense, to which it has been interpreted these aliens may have been guilty participants, should be considered as within the purview of "Crimes involving moral turpitude, namely, perjury or forgery." Approximately 50 or 60 private bills for the relief of aliens in this group have been introduced in the House, but consideration of them has not been concluded by the House Committee on Immigration and Naturalization; and

(c) An additional group of aliens, which may be hereafter segregated in the records of the Immigration and Naturalization Service, in whose cases deportation may be hereafter ordered "solely" on the grounds that any such alien "Is in the United States in violation of the immigration law in that he or she entered the United States without inspection or when not in possession of an unexpired valid immigration visa", whenever an examination of the facts of any such case convinces the Commissioner of Immigration and Naturalization that the immediate deportation of such alien would operate an unusual hardship upon citizen members of an established American family who are dependent, in part or wholly, upon the alien found subject to deportation.

On June 18, 1936, the committee amended this resolution by striking out the "whereas" clauses of the preamble and reported the resolution to simply provide for relief until April 1, 1937, to the aliens mentioned in this resolution.

After the committee had reported this resolution the American Federation of Labor through its president, William Green, sent a letter to the gentleman from Massachusetts [Mr. CONNERY], which reads as follows:

AMERICAN FEDERATION OF LABOR,
Washington, D. C., June 20, 1936.

Hon. WILLIAM P. CONNERY,
Member, House of Representatives,
House Office Building, Washington, D. C.

MY DEAR CONGRESSMAN: I am writing to advise you that the American Federation of Labor endorses and approves the adoption of a joint resolution by Congress providing for a stay in the execution of deportation proceedings in hardship cases until an opportunity is extended to enact remedial legislation dealing with this particular matter at the next session of Congress.

It is my opinion that not only for humanitarian, but in addition, for practical purposes the joint resolution providing for a stay in deportation proceedings in the classified hardship cases which have been reported to Congress should be adopted before Congress adjourns.

Very sincerely yours,

W. GREEN,
President, American Federation of Labor.

However, we were confronted with a practical situation. The Congress was coming to a close, and no legislation could be passed during the concluding days of the session unless a special rule was provided for the consideration of a bill, or permission was granted to suspend the rules for the purpose of passage of a bill. Even then consideration of a bill under either a rule or suspension of the rules did not mean passage.

The Speaker definitely told me that he had been informed that the resolution was highly controversial, having no chance for passage, and therefore he would not recognize me for any suspension of the rules. My only recourse, therefore, was to appeal for assistance to the Committee on Rules and ask them to report out a special rule for the consideration of either the bill or the resolution; but the Committee on Rules, for some reason or other, would not cooperate with me.

It was perfectly clear on the floor of the House that such a rule would have been supported by a majority of the Members of the House and that, upon the adoption of the rule, either the bill or the joint resolution would have been passed without any trouble and with a minimum of debate.

Where the idea originated that this bill, and especially that this resolution, was controversial legislation and could not be passed is beyond me. I can see absolutely no logical basis for such a contention; but, even admitting the allegation, that is no just reason for denying the bill or resolution proper consideration on the floor of the House.

On the other hand, the bill had the backing of the country and of responsible organizations throughout the United States; the resolution, as temporary legislation, was supported by many of the opponents of the bill, and was specifically endorsed by the American Federation of Labor. I am satisfied that either the bill or the resolution would have been supported by more than the usual number of the active and alert Members of the House had either been given the right-of-way for consideration.

The peculiar thing about this alleged so-called controversial character of this legislation becomes more apparent when the record of the closing days of Congress is studied. The Speaker did recognize some Members for suspension of the rules on bills which proved so controversial that they were defeated, and, furthermore, the Committee on Rules did report out special rules for the consideration of bills which, when considered under the rule, were almost defeated. In some instances a bill was first defeated under suspension of the rules, then a special rule was reported out, and the bill was passed after considerable controversy and debate.

Some instances of these unusual procedures are as follows:

On June 19, 1936, the Speaker recognized a Member for the purpose of moving suspension of the rules and passage of the bill H. R. 8555. That bill has been for over a year a very controversial measure in both Houses of Congress. The record vote on the motion to suspend and pass was lost by a vote of 118 to 83, 16 less than the required two-thirds favorable vote. However, on June 20, 1936, the Com-

mittee on Rules reported out a special rule for the consideration of this defeated bill, and when a vote was taken on the resolution for a rule the House adopted the resolution, but the resolution was so worded that the adoption of the resolution actually passed the bill without further debate or chance for any amendments to the bill.

On June 20, 1936, the Speaker recognized a Member for the purpose of moving suspension of the rules and passage of the bill H. R. 12445, relating to the Blue Ridge Parkway in Virginia and North Carolina. The principle of this bill was rejected by the House earlier in the session, when a similar bill under the same title was stricken from the Consent Calendar on May 4, 1936. On the motion to suspend the rules and pass H. R. 12445, the House rejected the bill by the vote of 175 for and 125 against, or 25 votes less than the required two-thirds. Within an hour the Committee on Rules submitted a special rule, which cut off all further debate on the bill and in every way expedited final passage of the already defeated measure. Only a majority vote was required to pass the resolution for the rule and only a majority vote was required, under the rules, to pass the bill. On the vote on the resolution for a rule, 146 Members voted for the rule and 139 voted against the rule. On the vote under the rule to pass the bill there were 145 votes for passage and 131 votes against passage, so that the bill was passed by only 7 more than the required majority.

Recognition was granted by the Speaker on June 20, 1936, for motions to suspend the rules and pass four other bills. Two of these were passed, but the other two proved to be so controversial that the vote to suspend and pass in the case of one bill was 61 for and 170 against; in the case of the other bill was 36 for and 125 against.

Another instance is the bill S. 3107. This bill was refused passage by the House on June 1, 1936, when it was reached on the Consent Calendar. When recognition was given on June 20, 1936, for suspension and passage, the House passed the bill by the small vote of 100 for passage and 44 against, or only 4 votes more than the required two-thirds vote. Incidentally, it is interesting to note that this bill was pocket vetoed on June 29, 1936.

One of the bills for which suspension was asked was a measure granting certain retirement privileges to William H. Moran, Chief of the Secret Service Division of the Treasury Department. This proved very controversial and was defeated by a vote of 36 for passage and 125 against.

Another of the bills defeated, after recognition had been granted on the last day to suspend the rules and pass the bill, was a Senate bill to provide for the survey of a part of the Clark Fork of the Columbia River. This developed such a controversy that the vote was 61 for passage with 170 against passage.

So there is apparent reason to believe that the controversial character of these bills I have just referred to did not prevent the Speaker and the Committee on Rules from arranging for the consideration of those bills under either suspension of the rules or under a special rule reported from the Rules Committee, and in some cases both suspensions and a special rule.

I cannot understand upon what premise the Speaker and the Rules Committee refused to give bills so important as the Kerr-Coolidge bill and the Palmisano resolution at least an equal status to that given the bills of minor significance or private or local importance for which they granted suspension of the rules and special rules.

I have excellent reasons to believe that during the course of the last day of the session, June 20, 1936, the Speaker and the Committee on Rules were advised that the passage of the Palmisano joint resolution by the House before final adjournment was much desired by the President and also by the Secretary of Labor. Notwithstanding these facts, the Speaker and the Rules Committee did not cooperate with me to expedite consideration and passage of that resolution, which was a necessary temporary measure in no way amending or changing any of our immigration laws.

That resolution simply would have prevented unusual hardship and inhuman punishment upon American-citizen wives and children in all parts of the Nation, whose fathers and husbands will now be in danger of immediate deportation. The relief provided was only for a period ending April 1, 1937. Something should have been done about this temporary relief measure.

In conclusion, let me repeat that the Speaker had definitely informed me that he would not recognize me for any suspensions and that the Committee on Rules would not cooperate with me on the granting of any special rules either on the Kerr bill or the Palmisano resolution.

I am confident if such a special rule had been given me, on either the bill or the resolution, the adoption of the rule would have been supported by almost all of the Members of the House and that upon the adoption of the rule either the resolution or the bill would have received considerably more than the majority favorable vote then required for passage by the House.

Therefore, let me say that in spite of my effort to cooperate in every way and notwithstanding my great desire to have this legislation enacted, I cannot help but lay the blame upon the leadership of the House of Representatives for permitting the Kerr bill and the Palmisano resolution to die with the sine die adjournment of Congress without even giving the House membership the right to consider them, on their merits, on the floor of the House.

It is very embarrassing for me to be forced into a position where I have to complain about the effectiveness of our House leadership, and I am very sorry to see the good, which would have followed the enactment of the Kerr-Coolidge bill or the Palmisano resolution, fall by the wayside simply because of improper management in the House during the concluding week of the Congress, after 2 years of constructive effort to secure a satisfactory bill.

Something very drastic will have to be done to avoid any future recurrences of similar situations and put an end to this useless bickering for favored consideration by the House in the closing days of a session, of insignificant measures or measures of local or private importance, by Members who will not raise a finger or give proper cooperation to pass general legislation of real significance and benefit to the people of all sections of the United States.

REPUBLICAN CONVENTION AND PLATFORM

Mr. SABATH. Mr. Speaker, it is regretted that, after the splendid acclaim given to the minority leader [Mr. SNELL] when he was presented with the gavel to be used by him in the Republican convention, such ill fortune should befall him as happened to the gentleman on the other side of the Capitol [Senator STEIWER], both of whom, I fully appreciate, endeavored, with the best of intentions, to bolster their repudiated party. Instead of offering our congratulations we are obliged to extend our sympathy.

The offspring of the hasty marriage of the reactionaries and the few misguided progressives is a two-faced baby, in all likelihood due to too many doctors taking part in bringing that offspring to life, all of whom, we learn, including Dr. Hoover and Dr. BORAH, were going in opposite directions. This, naturally, unnerved both of these keynoters, neither of whom should be held responsible, and who are, as I have stated, entitled to our condolence and sympathy. No doubt they must have believed that their newly created brain trust would devise ways and means to enable them to successfully ride elephants in opposite directions. Furthermore, there was reason to believe that it would not have been thought necessary to "crib" from the Democratic platforms of 1912 and 1932. But as it is, the only thing of value in the liberty-appealing Republican document has been "lifted" from the Democratic platforms. It is on a par with the great artificial demand that was heard in the Cleveland auditorium—"We want Hoover", and the Hoover assertion that "the people must fight to regain liberty."

Republican delegates were asked by the erstwhile head of the defunct Republican Party whether they would "for expediency's sake also offer will-o'-the-wisps which beguile the people? Or have you determined to enter into a holy crusade for liberty which shall determine the future and perpetuity of a nation of free men?" The great former leader, Mr. Hoover, told us that "fundamental American

liberties are at stake." The charge is that the great Democratic Party has beguiled and is beguiling the people. When he speaks of fundamental American liberties being at stake we assume that he means benevolent liberties. Benevolent liberties are at stake, admittedly. By whom are they jeopardized, I ask? The whole trouble from Mr. Hoover's viewpoint is the substitution on March 4, 1933, of benevolent liberties for the 12-year-old malevolent liberties of the Republican Party, which includes all the racketeers, all the plunderers, all the blood-sucking termites, all the bloated tax dodgers, all the oppressors of the humbler masses, all the tariff beneficiaries, from Wall Street to San Francisco, and from Portland, Maine, to Brownsville, Tex.

The restraint by law of Wall Street vipers from continuing to impoverish our good and worthy citizens is the restraint and abridgment of liberty to which Mr. Hoover refers; and the reenthronement of those dastardly liberties under the influence of the Republican Party is the thing that rests nearest to dear Herbie's altruistic heart. Of what stuff is this erstwhile leader of the defunct Republican Party made? Herbert Hoover of London and Johannesburg! How did Herbert Hoover meet the pleading of World War veterans for bread when they assembled in Washington about 4 years ago? Why, sirs, with real bullets and tear gas. Did he then, I ask, consider the guaranteed liberty of those men; did he consider the right of those American citizens, those worthy ex-soldiers, to peacefully assemble and petition their Government for remedial action? Or was he too busy listening to the suave pleadings of Wall Street emissaries?

That is not all. There is another shocking and condemnable parallel.

About 5 years ago the Congress, after certain States had declared themselves financially impotent, provided approximately $62,000,000 for drought-stricken areas. This money was entrusted to Herbert Hoover and his Secretary of Agriculture. What then happened causes blood to boil in men of humane sentiments. Why, this great engineer, this present-day self-designated humanitarian, ruled that livestock might be fed with this relief money while deserving, destitute citizens of England, Ark., and elsewhere in that stricken area would be allowed to starve. That was the personal attitude of the man who now pleads for salvation of fundamental liberties. That man's cruel attitude in that particular respect did not change until the late Senator from Arkansas and the present majority leader of the Senate centered upon him a most humane, logical, and devastating fire.

What was the attitude of this self-same Republican spokesman in relation to a guaranty of bank deposits when he was at the helm and willing, earnest, deserving men and women were falling on all sides victims of the most abominable banking system the world had ever seen? Responsibility for inaction in that catastrophe rests upon his own head, because the Democratic House told him it would cooperate thoroughly in the framing of any bank-deposit guaranty he might recommend. Still he did nothing. It was not in him to act for the salvation of thrifty and deserving citizens in the face of large and unconscionable rewards; rewards akin to the spoils of pirates, for big business and big finance, which rewards meant larger contributions to the Republican war chest. Then it was that the nefarious liberties of American financiers must be preserved.

It must be evident to anybody that there is a well-laid plan, yes, conspiracy, on the part of these predatory interests, especially the officials of these selfish, soulless corporations, and the malevolent banking fraternity, to regain control of American business and finance through politics. These blatant racketeers of darkest hue are not grateful for being rescued from the results of their own inexcusable iniquities, and content to leave sound government in able and promising hands; they want to regain political power and wipe from our statutes every vestige of law that restrains the hands of these Beelzebubs raised for the injury of their humbler fellow citizens. Place this gang of repulsive apostates again in control of our Government and it would wipe from the statutes every law destined to wrest by taxation from it a just burden of government.

This gang of shameless buccaneers would jettison every piece of social legislation and leave the humble and defenseless, without hope, to slowly starve to death.

This gang of ruthless malefactors would place upon statute books tax laws through which a high-salaried lawyer could with his client ride without retardation, just as the richest man in America escaped all income-tax payment a few years ago under a Republican-made tax law by hiring a well-known apostate lawyer whose ability as a circumventer of income-tax laws caused him to be adopted politically by such evasionists.

Place this diabolical wrecking crew again in charge of our Government and it would junk the securities act and unload again upon innocent and worthy American investors 50 billions of securities, one-half of which would not be worth the paper upon which they were written.

Notwithstanding the fact that the Republican convention was well oiled, at the direction of Oilman Landon, it did not function so smoothly as was anticipated. The absence of Mr. Sinclair, Albert Fall, and Blackmere was not conducive to complete success. As it was, too much oil finally got into the carburetors of that once mighty machine, judging by the unusual exhausts and backfires. But those backfires are as nothing contrasted to the one big backfire we shall hear next November.

Among the delegates of stellar magnitude was our old friend Charlie Dawes—Gen. Charlie Dawes—who rendered such conspicuous "combatant" service on the field of Flanders. And this man was not a corporal in the uniform of a general. He was not a midget sitting in the seat of a mighty. Such a great contribution to allied success resulted in Charlie being chosen as the first generalissimo of the Bureau of the Budget, where his success was instantaneous, enduring, and much appreciated. In that big job he was a worthy assistant to the "greatest" Secretary of the Treasury since Hamilton—Mr. Mellon. What a smooth-working team! What great, hopeful, permanent results for a country leavened with mediocrity!

But Charlie took that job for a temporary tenure, until the perfect machinery could be set in motion and steadied; then he was to further bless our Government, which was suffering from a dearth of talent of really high order, by being persuaded to temporarily forsake private banking and return to the service of his Government as a member of the Reconstruction Finance Corporation. From that superb service, the General received his highest and proudest title—90-Million-Dollar Charlie. The General, a modern Cincinnatus, showed his altruism and patriotism by ostensibly quitting the Central Republic Trust of Chicago and returning to the service of his country. The only objection is that Charlie served—the Central Republic Trust—too well; and when he found the call of private business so urgent and commanding that he had to yield, the treasury of the R. F. C. found itself emptied of 90 million dollars. Of course, nobody who really knows the General would associate his patriotic service with an improper loan; nevertheless, our Treasury is to this good day short about 48 million of that 90 million.

Only a casual perusal of the Republican Party's platform shows it contains certain Democratic planks of 1912 and 1932. The Republican platform is a promise to take over the New Deal, as it stands today, and to administer it more economically and more efficiently. There is no fight with President Roosevelt over the purposes of any of the essential features of the New Deal as at present conducted. The fight is over methods.

That platform uses the very words of Bryan, who was by the restrained Republicans of that day called a demagog and a danger to the Republic. The Republican plank regarding enforcement of criminal laws, as well as civil laws, against monopolies and trusts, swings back to wordage virtually identical with the Democratic platform of 24 years ago. Senator Borah admits that he copied these planks almost verbatim from Democratic platforms. In every paragraph of that platform they have left their indelible marks.

It is a two-faced monster, a hybrid, one face smiling upon agriculture, labor, and legitimate business; the other winking at the racketeers of Wall Street, the big tax dodgers,

the tariff barons, the oil gang of plunderers and their ilk. It is a despicable monster propelled by reptilian blood of subzero temperature, but it is destined to fool few who can do only superficial thinking.

Herbert Hoover allied himself with certain men of ill character and for 4 long and devastating years sold and helped to sell millions of dollars of worthless and watered stock. Then, suddenly, he decided that liquidation, however painful and destructive, must take its unrestrained course. Then when the fury of withering storm came upon us, he and his coadjutors, named Mellon, Morgan, Whitney, and Mills, sought storm cellars.

Now, when safe and sound laws enacted by a wise Democratic program have alleviated and in most cases completely relieved the suffering born of Republican misrule, when wise Democratic legislation has decreased unemployment by 8 million and increased wages; has rehabilitated legitimate business by from 50 to 300 percent; when prices for farm products have increased from 100 to 200 percent; when our Government revenues have increased by about 100 percent; when bank deposits and building-and-loan associations have been made safe; these miscreants are brazenly emerging from storm cellars to set themselves up as carping, unjustified, repudiated, accursed, abominable critics of the safe and sound achievements of the Roosevelt administration.

I will now insert a statement by the Securities and Exchange Commission of salaries paid to these arch critics of the Roosevelt administration. The statement is illustrative rather than exhaustive, as some of the offending tycoons are not included. Many of these men draw unconscionable bonuses and other money from other companies and corporations with which they are at least nominally connected, to say nothing of dividends and interest they receive on stocks and bonds acquired dubiously, sometimes as presents. Most of these men drawing these unreasonable salaries and hidden bonuses do not devote their time and ingenuity to managing these institutions, but most of them, especially those connected with the Liberty League, devote their time to dealing and conniving with Wall Street brokers and members of the stock exchange, to the injury of legitimate business and worthy stockholders and security holders. As an additional excuse for drawing these unconscionably high salaries they have themselves elected "chairmen of the general boards." A euphemistic title, I say! The statement in question follows:

TABLE 1.—*Total remuneration of officers and directors receiving annually $50,000 or more. Selection limited to domestic corporations with assets of $50,000,000 or greater and having securities permanently registered on national securities exchanges*

Name of company and official	Capacity	Remuneration
Allied Stores Corporation:		
B. Earl Puckett	President and director	$73,147
Richard Mitton	Chairman and director of registrant; officer of 1 subsidiary.	50,235
American Express Co., F. P. Small	President and director	68,665
American Rolling Mill Co.:		
George M. Verity	Chairman and director	63,000
Charles R. Hook	President, general manager, and director.	54,000
American Smelting & Refining Co.:		
Francis H. Brownell	Chairman and director of registrant; president of 1 subsidiary.	100,000
H. G. Guess	Vice president and director	70,000
Simon Guggenheim	President and director	50,000
American Sugar Refining Co., Earl D. Babst.	Chairman and director	77,160
American Telephone & Telegraph Co.:		
W. S. Gifford	President and director	206,250
C. P. Cooper	Vice president and director	74,250
C. M. Bracelen	Vice president and general counsel	61,875
B. Gherardi	Vice president and chief engineer	61,875
H. D. Pillsbury	President and director of 1 subsidiary.	55,008
Leonard H. Kinnard	Chairman and director of 1 subsidiary.	55,000
American Tobacco Co.:		
George W. Hill	President and director	137,043
James E. Lipscomb, Jr	Director and president of 1 subsidiary.	100,000
Vincent Riggio	Vice president and director	60,000
Charles F. Nelley	do	60,000

Repeating, this statement is not complete, as some of the biggest men are not included; nor does the statement show all the salaries, bonuses, rake-offs, and so forth these men receive.

It is perfectly obvious that many of the men shown on this list are behind the Liberty League and other such organizations formed solely to disparage, besmirch, and unjustifiably assail the Democratic administration and the fair name of President Roosevelt. These are the men who cry for "restoration of fundamental American liberties" when they mean liberty to plunder, debase, and strengthen the monopolistic grip and control, to enable them to a still greater degree enslave the humble wage earners and destroy the small, independent merchants and manufacturers.

There is a continual chorus of complaints from these plunderers when we contemplate a tax bill that would justifiably affect these unconscionable and unwarranted salaries and bonuses only. What an altruistic sentiment these men adopt, what crocodile tears they shed, in the face of a tax bill, for farmers and wage earners! They allege that this proposed tax will necessarily fall heaviest upon the farmers and the wage earners. Did anybody anywhere ever hear of one of this gang having a really unselfish thought for a farmer or a wage earner? Emphatically, no.

The speeches nominating the President contain additional information to accurately acquaint our countrymen with the vile, conniving, unworthy, dastardly efforts of these predatory interests to belittle and defeat the laudable aims and purposes of President Roosevelt.

STRIKES

The "mighty" chieftains of the once proud and powerful, but now inert, Republican Party complain about the number of strikes we have. In lifting American labor from the near thraldom into which it had been with studied cruelty submerged by late corrupt Republican misrule and shilly-shallyness to promote sundry reprehensible interests, notably the United States Steel Corporation, the great Democratic Party of Roosevelt enacted more beneficial labor and social legislation than all the Republican administrations combined. There were few strikes under Republican misrule simply because American labor was largely unemployed and cowed to the point of abject slavery, and the few who were employed received only wages the men of big business dictated, without regard for actual needs. With this new freedom, it is but natural that labor should try to properly rehabilitate itself.

The Democratic Party favors collective bargaining, as does the Republican Party at least vocally, and to that end the Democrats enacted the Wagner-Connery bill. The Democratic Party favors protection of women and children in industry and legislative failure to effect this result rests upon the Supreme Court.

COLORED

As regards the colored race, it is obviously unfair to charge the "liberal-minded" Republican leaders with not evincing due consideration for the colored race, because they did consider members of the colored race when they excluded them from the Republican convention and thereby saved them from the cruel and unmerited punishment inflicted upon the white office-seekers and paid applauders who were by their prospects and terms of employment compelled to remain.

Seriously, if any fair man wants to learn the attitude of the Democratic Party toward the colored race, let him read from the pen of the able colored Representative in Congress of the colored race, his enlightened interpretation of that attitude.

MAURY MAVERICK: HIS RECORD

Mr. MAVERICK. Mr. Speaker, all Congressmen are likely to have opponents. I have two. One of them is greatly increasing the purchasing power of my district by large expenditures of money. An advertisement appeared in San Antonio newspapers; three of which cost this candidate nearly $1,000. I estimate that he has either contracted for or has paid for advertising and other matters more than $15,000 and to use some good old-style English "that ain't a drop in the bucket."

In these highly expensive advertisements, with their rambling, disconnected inanities, which utterly fail to disclose just what this opponent is for or against, I do find something of value—namely, subheads. These subheads of his, duly identified by quotation marks, I propose to use as the basis of my comments.

He says in the first paragraph of his tiresome advertisement, "No selfish desire prompted me to hold office in the past." This is not altogether a new or original statement for an aspirant to make in seeking office, but to this it can only be said that he was elected to the office of district attorney, made an inconspicuous record, and resigned before his term was up. How do we know that he will not do the same thing again? Previously he did it on account of the pressure of business, and from what I understand business may increase at any time and pressure may get him out again, when he will move to Oklahoma to take care of his interests.

But to use these headlines of his I will give direct quotations from other sources which concern me—and some comments from myself. Bear in mind that the subheads are his and not mine, but the statements thereunder concern me.

"AN EARNEST DESIRE TO SERVE"

President Roosevelt:

My good friend, MAURY MAVERICK.

Public Opinion (San Antonio publication):

MAURY MAVERICK should be returned to Congress.

The Nation:

The emergence of a group of first-term Congressmen enthusiastically progressive, including MAVERICK, of Texas, has been the happiest event of the present Congress.

The services of the Congressman from Bexar County have been and will continue to be at the command of any citizen. No red tape must be cut in order to secure his attention for any matter that concerns the county or any of its citizens.

"ADVOCATE OF PEACE"

Washington Merry Go Round (one of the most widely read of the Washington newspaper features):

The Congressman of the year: MAURY MAVERICK, of Texas. Because of his consistent campaign for freedom of speech, freedom of the press, and to keep this country out of war.

Heywood Broun (internationally known writer and economic observer):

Mr. MAVERICK's fight for a stringent American neutrality policy undoubtedly played an important part in the enactment of the present neutrality legislation.

Christendom, scholarly quarterly review of Christian bodies, and greatest publication of its kind in the world, says that in the United States of America, MAURY MAVERICK, of Texas:

is fast winning his right to the designation "Public Friend No. 1."

Oswald Garrison Villard (one of the outstanding liberals of America):

MAVERICK is one of the best and most courageous Congressmen in America.

Rodney Dutcher (famed Scripps-Howard columnist):

It was the red-hot indignation of certain Members, conspicuously Senator HOMER BONE, of Washington, and Representative MAURY MAVERICK, of Texas, which impressed and infected others to the extent of wrecking a neat plan to bury the proposals designed to keep us out of war.

The record shows that MAVERICK has consistently supported all legislation designed to promote good will between our Nation and those of the other people of the earth.

"FOR ADEQUATE DEFENSE"

The Secretary of War in a letter to MAVERICK said:

The War Department appreciates your deep interest in the Army and your efforts in its behalf. The results obtained are best evidenced by the sums of money expended by and for the Army in and near San Antonio, to the lasting good not only of the national defense but of the community as well.

Hospital at Fort Sam Houston: MAVERICK got it.

Improvements at Fort Sam Houston to the extent of approximately $2,000,000: MAVERICK got them.

Increase in Army (THOMASON, of Texas, bill): MAVERICK voted for it and increases in Army personnel will go on for the next 12 months.

Air Service: MAVERICK will be appointed to the Subcommittee of Aviation, most important for San Antonio, next year. No new Congressman can get on this committee.

Congressman LISTER HILL, new Chairman of the Military Affairs Committee of which MAVERICK is a ranking member, said:

This will place you (MAVERICK) in a fine strategic position for service to your district and for service to the whole country.

My record in Congress is the best evidence.

"FRIEND OF AGRICULTURE"

Voted for all constructive agricultural legislation.

Had Agriculture Department give special attention to Bexar County and southwest Texas.

Cooperated in fruit-fly extermination.

Brought Under Secretary of Agriculture, Hon. Rex. Tugwell, for personal inspection of agricultural situation in southwest Texas and Mexico.

Have received special consideration from Resettlement Administration in working for adjustment of agricultural problems.

Served on important committees, such as Southern Policy Committee, and with other Texas Congressman and Senators for passage of Bankhead Tenant Act which will be of extreme benefit to Texas.

Now working on Texas soil-conservation plan, which has been discussed with President Roosevelt personally. When the plan is finally placed in operation it will be of tremendous benefit to Texas farmers in the conservation and reclamation of rich farming lands. Such conservation measures are vital also to city life—San Antonio more than any. Included in this work is the matter of flood control, vital to the Nation—and this district. The administration is especially interested in such plans.

"RESTORE PEOPLE'S BUYING POWER"

This statement of my opponent is so completely at variance with the caption that it is hard to tell what he means. Such cliches are used as "Labor cannot prosper when industry cannot prosper", and so forth; "Labor and capital should march side-by-side", and so on and so on, and a meaningless rigmarole of long and tiresome sentences.

Concerning MAVERICK:

Voted for all intelligent labor legislation protective of women, children, and all people in general.

Supported measures designed to guard the rights of the laborer as both a wage earner and a consumer.

Supported movements to aid youth in securing education through National Youth Administration and through the Civilian Conservation Corps.

Kept in close contact with local, State, and national labor leaders on legislation in Congress affecting labor.

Have consistently been a friend of the worker, favoring decent pay and bearable working conditions.

Social-security legislation: Voted for it and believe it should be extended and improved.

Of course we all want to increase purchasing power. The people who back my opponent favor the sales tax, are opposed to all progressive legislation which would benefit the people of the United States, are connected with "hot oil" racketeers; (there is no reason why an honest oil man should not vote for me); and an aggregation of neo-Liberty Leaguers and such as think they can get rich by making everybody else poor.

"TO WORK FOR BEXAR COUNTY"

This has been covered reasonably well under other subheads. "To work for Bexar County" is not merely to wangle "pork barrel" legislation, but I think it well recognized that I have obtained for Bexar County its just deserts. I have voted for legislation beneficial to the Nation as a whole and it must be remembered that Bexar County is a part of the Nation.

New York Post: "He (MAVERICK) is a man who is not afraid to speak his mind."

Baltimore Sun: "Too bad there aren't more like him (MAVERICK) in Congress."

CONGRESSIONAL RECORD: "Over 700 newspapers throughout the country commented favorably on his (MAVERICK's) fight for civil, religious, and academic liberties."

New York Herald Tribune, conservative Republican and bitter anti-Roosevelt paper: "Representative MAVERICK is to be congratulated on his stand in reference to civil and religious liberties."

MY OWN SUBHEAD

I stand upon my record as a Congressman who already represents his people and does his duty, and ask the voters of Bexar County, "Why exchange a Congressman of known and proven ability for one who has yet to prove himself capable of representing you in the national legislative body?"

A CORRECTION

Mr. COCHRAN. Mr. Speaker, on page 10799 of the CONGRESSIONAL RECORD, under the heading of Unwise Legislation, my friend, Hon. ROBERT F. RICH, of Pennsylvania, has an extension of remarks which refers to the passage of two resolutions reported by the Committee on Accounts.

Mr. RICH has been very vigilant in watching legislation, and his contributions during the Seventy-fourth Congress toward preventing the passage of bills that would be a charge upon the Treasury is to be commended. It so happens we are members of the same committee, and we have cooperated in preventing the passage of unwise legislation. In this instance it is evident Mr. RICH did not have all the facts before him. In the third paragraph of his remarks he states that the resolution provided for increases for the six official reporters of debates of $640 per year each. The fact of the matter is the salaries of the official reporters of debates remained the same; no suggestion was ever made for a change, but the bill did provide for an increase of $260 per year for the six transcribers of the official reporters. The original resolution provided for an increase of $660 per year for the transcribers but was amended in committee and was reduced to $260 per year, and it was specifically provided by amendment the increases should not be in force during the vacation period but should start with the opening of the Seventy-fifth Congress.

The salaries with the increases granted by the committee to the official transcribers, who are experts, is not in excess of the amount paid to the senior transcribers in Government departments under the Classification Act. That was ascertained by the committee before acting on the resolution.

The man who has served for a number of years as assistant to the clerk at the Speaker's desk, who keeps the accounts and assembles all the copy for the CONGRESSIONAL RECORD, has been carried on the rolls as a janitor at $1,440 per year. The committee felt this was unfair in view of the important duties to which he is assigned and did abolish the position of janitor paying $1,440 per year and provided for an assistant clerk at a salary of $2,000 per year.

This amount is much less than is paid to the clerk in the Senate doing similar work.

In regard to House Resolution 518, which abolished the position of janitor to the stenographers of committees, and created the position of clerk at an annual rate of pay at $3,360, it can be said that the man holding this position was formerly an official reporter retired on account of defective hearing and he now reads the proof of over 100,000 pages of copy and assembles it as well as keeps all records for the official committee stenographers. The reason that this resolution was passed is that several members of the Appropriations Committee advised the Committee on Accounts that there should be at least one, if not two, additional committee stenographers. The senior committee stenographers appeared before the accounts committee and stated that there would be no necessity for creating two new positions paying $7,500 per year or even one provided the committee would abolish the position of janitor paying $1,440 and create the office of clerk, paying $3,360 per year. The former committee stenographer holding the position referred to being married, was going to seek another place. The senior stenographers advised the committee that if he could be retained, then he would continue to do the assembling work as well as read the proof, which would give them several additional hours a day to serve committees as they would be relieved from that work and could immediately return to the committees after preparing their notes.

When you take into consideration that this man is supervising the work of all of the stenographers serving at times as many as 20 House committees in a day, as well as reading the proof, surely a salary of $3,360 per annum is not excessive. The fact is that the committee saved money by abolishing the position of janitor and creating the position of clerk, because it was not required to provide for two additional reporters, as was suggested by some members of the Committee on Appropriations.

I might also say specific provisions were made in this resolution, as amended, so as to provide that the increases cannot go into effect during the vacation period, but will start when Congress assembles next January. The committee stenographers who this clerk serves and the clerk do work during the vacation period, because those stenographers are required to serve special committees of Congress and also take the hearings of the Appropriations Committee, which start many weeks before Congress convenes so that appropriation bills will be ready when the Congress assembles.

I feel sure that my good friend, Mr. RICH, would not have made the statement he did in his extension of remarks if he would have seen the amended resolutions as they came from the Committee on Accounts or had attended the hearings before the committee.

Before considering these resolutions the Accounts Committee appointed a subcommittee composed of Representative JOSEPH STARNES, of Alabama, Democrat, and Representative DONALD H. MCLEAN, of New Jersey, Republican, to make a thorough investigation and report to the committee. Their investigation covered a period of several weeks and it was on the basis of their report that the committee acted. I might further say that the Accounts Committee did not take favorable action on the resolutions referred to until they had been approved by the Speaker, the majority leader, as well as the minority leader. No committee of the House has been more careful in protecting the taxpayers than has the Committee on Accounts.

This committee, of which I have been a member for 9 years, withstood the demands for additional stationery allowances, clerical hire, and the creation of new positions for the House, and has always held down just as far as possible the expenses of special committees. It is an agency of the House, and when the House passes a resolution providing for an investigation its Members feel it is mandatory to provide reasonable expenditures, but it carefully examines all vouchers and is continually protecting the contingent fund. The committee also abolished the payment of all special bonuses, which had been going on for many years, effecting a saving of thousands of dollars annually by its action.

FARM RELIEF UNDER NEW DEAL

Mr. WOLVERTON. Mr. Speaker, there has been no subject before Congress in recent years that has claimed more attention, provoked more discussion, brought forth more promises, produced more proposals, and with respect to which less has been accomplished than that of relief for agriculture.

All sorts of fantastic schemes have been brought forward as a "cure-all." Some have been tried with disastrous results; some so inherently weak were discarded without trial; some were abandoned because of an aroused resentment upon the part of both the consumer and producer; some were outlawed by the Supreme Court; and yet, unabashed, unafraid, and with assurance, new theories and policies are continually advanced with the thought that at last has been found the long-sought solution of all agricultural ills.

It is needless to say that as a result of all this confusion of ideas and variety of remedies, with consequent failure, there has been growing an ever-increasing sense of discouragement and hopelessness among our American farmers.

It is not strange that they should begin to lose confidence. The very policies that are inaugurated are frequently sufficient in themselves to create this condition.

For instance, at this present session of Congress the administration pushed through, over Republican opposition, an authorization of seven gigantic irrigation projects in seven different States, with an ultimate cost to the taxpayers of this country of approximately one and a half billion dollars. The effect of this New Deal policy will be to add about 5,000,000 acres of new irrigated land, in the arid States of the West, to the already overabundant supply of tillable farm lands now available for productive cultivation. It is estimated that the 5,000,000 acres of irrigated land which is hereby created will produce the equivalent of 15,000,000 acres of good nonirrigated land, thereby displacing such lands now in use or creating a surplus of production.

Why does the New Deal, under the direction and leadership of Secretary of Agriculture Henry Wallace, Dr. Rexford Tugwell, and Mordecai Ezekiel, claim that our farmers are producing too much in the agricultural field, and thereupon inaugurate a reduction-of-production program that takes approximately 40,000,000 acres out of use, at a cost of millions of dollars in benefits paid, and, at the same time, press forward irrigation projects to bring new land into production, at an additional cost of one and one-half billion dollars? There can be no satisfactory answer given to this question. The fact is that the two policies are diametrically opposed. There is no way to justify the existence of both at the same time. Either one or the other is wrong and should be discarded. The tax burden is increased and the farmer further depressed by the use of these two conflicting policies at the same time. It is time for common sense to find expression.

Another instance of the detrimental effect upon our farmers resulting from conflicting New Deal policies, both in effect at the same time, is that of permitting importation of agricultural products from abroad when farm acreage is reduced at home to prevent surplus, create scarcity, and increase

prices. It is perfectly apparent that if there is need to import then there is no need to restrict. This is likewise a case where both policies cannot be right. Either one or the other is wrong and should be discarded.

It is almost unbelievable that when our American farmers, in accordance with a governmental policy, produce less cattle, corn, hogs, wheat, rye, barley, butter, and other farm crops in order to cut down the surplus, the present administration literally invited foreign farmers to increase their cheap foreign production of the same products and to ship them to the United States and sell them in the American market in direct competition with domestic production.

The amazing increase of importations of agricultural products from foreign countries, as a result of New Deal policies, has reached such alarming proportions as to cause serious concern to thoughtful persons who realize the disastrous effect on American agriculture that will result if the policies are not changed or the importations checked.

The following table, taken from official Government figures, showing a comparison of imports of farm products for the year 1935, as compared with the year of 1932, before the present administration adopted the policy of scarcity of farm products, presents a condition that justifies the fear of the future that now exists:

		1932 imports	1935 imports
Corn	bushels	347,627	43,242,296
Oats	do	58,786	10,106,903
Wheat	do	10,026,320	27,438,870
Barley, malt	pounds	52,532,636	320,622,537

These figures clearly indicate that the American market is being flooded with cheaply produced foreign farm commodities which have taken just that much of the home market from our own farmers.

The value of imported competitive farm products in 1935 was approximately $750,000,000. All of those products could have been produced in this country by American farmers and laborers. Therefore, it was a loss to that extent to our farmers that should not have occurred. It could have been avoided had not the administration been so intent, under the leadership of Secretary of State Hull and Secretary of Agriculture Henry S. Wallace, in encouraging the spirit of internationalism at the expense of our own people.

Furthermore, in addition to the loss of $750,000,000 representing the value of products actually displaced by foreign commodities it has been estimated by reliable authorities that the farmers in this country were compelled to suffer a further loss of $2,000,000,000 by way of lower prices for their products as a result of the large competitive foreign imports for 1935.

Explanations and excuses have been offered by administration officers for this unfortunate state of affairs. The fact, however, remains that 40,000,000 acres of American farm land were taken out of production by a New Deal policy, and the food that could and would have been produced and sold in America was in fact produced on foreign soil and permitted to be imported into this country by another New Deal policy in competition with our own farm products.

If our farmers are to cut their acreage and reduce production on the theory that we are producing too much, then they should at least have the benefit of the home market without the competition of foreign-grown foodstuffs.

The strange results attained under the New Deal policies are still further emphasized when we consider the effect of the farm policy, which reduces American production and substitutes foreign, with respect to the question of employment. This has been the great problem that has blocked recovery.

The seriousness of the situation can be seen when it is realized that notwithstanding the present administration has expended more than $24,000,000,000 in the last 3 years—more money than it cost to run the entire Government of the United States from the Presidency of George Washington to that of Woodrow Wilson—yet there are between five and six million families on relief, representing an aggregate in excess of 20,000,000 persons, and, according to the estimate of the American Federation of Labor, approximately 12,500,000 unemployed.

One of the main reasons for this condition is the fact that jobs and work which should have been performed by American labor were given to the cheap labor of other countries, and the goods there produced shipped into America under New Deal policies that permitted the same to come into competition with American-made goods.

An analysis of the agricultural products imported into this country in 1935 from foreign countries will disclose that from 2,500,000 to 3,000,000 persons could have been employed in the United States in the production and processing of the imported commodities if the same had been produced here. Thus, pay checks from the consumers of America went into foreign lands to pay foreign workers, and unemployed farm hands in this country were driven in many cases to join the relief rolls.

Prominent labor leaders have stated that if it were not for the importation of cheaply produced competitive manufactured products now coming into this country from abroad there could be gainfully employed in private industry nearly 3,000,000 persons who are now out of work and on relief. Thus, New Deal policies, upon the basis of these estimates, are directly responsible for a total of 6,000,000 Americans who would have work if the New Deal would save the home market for American farmers and laboring men.

In conclusion, I wish to give some figures taken from official records that will show a most interesting situation and still further emphasize the inconsistencies of New Deal policies. I have frequently said that when the administration speaks in terms of agricultural relief, in most cases, in practical application, it relates to Western and Southern States, and seldom, if ever, contemplates our Eastern States. Nothing can more surely and quickly demonstrate this fact than the following table, which shows the amount paid by the States that are named for processing taxes during the fiscal year ending June 30, 1935, the amount received in return, and the amount received for each dollar contributed.

State	Amount paid	Amount received	Amount received for each dollar contributed
Maine	$1,254,029.35	$3,758.00	$0.003
Massachusetts	19,874,136.95	895,575.09	.05
Rhode Island	2,262,519.65	5,172.11	.002
New Hampshire	1,559,178.48	50,367.35	.03
New Jersey	4,167,098.19	391,753.03	.09
New York	58,852,770.85	389,134.71	.007
Pennsylvania	18,600,912.60	1,895,644.51	.10
Arkansas	294,105.86	12,476,618.18	42.42
Mississippi	619,272.96	12,677,153.71	20.48
New Mexico	112,915.68	1,624,104.51	14.38
Oklahoma	4,085,494.07	21,416,880.37	5.24
Texas	13,149,698.73	46,074,292.61	3.50
North Dakota	937,186.22	18,038,317.62	19.25
South Dakota	395,565.58	19,140,063.41	48.39
Idaho	612,181.02	5,718,503.90	9.34
Nebraska	5,042,113.13	37,104,619.69	7.36
Wyoming	212,821.62	1,585,733.84	7.45
Iowa	20,629,504.23	68,137,227.74	3.30

It is perfectly apparent that what American agriculture needs is a permanent, well-considered, and thoughtful program, based upon study and experience, instead of temporary, makeshift, or vote-catching proposals that cannot result in the permanent rehabilitation of agriculture.

NEW DEAL APPROPRIATIONS

Mr. BOLTON. Mr. Speaker, back in March 1933, at the time his administration took office, President Roosevelt in a message to Congress said:

> Too often in recent history liberal governments have been wrecked on the rocks of loose fiscal policy.

This was before the New Deal embarked upon a dangerous fiscal policy which has grown more and more loose.

If my memory serves me correctly, it was Patrick Henry who said, "I know of no way of judging the future but by the past." These few words present a very effective indictment of the present administration.

Who would have believed in 1932 that the Presidential candidate who promised to consolidate departments and bureaus, abolish useless commissions and offices, and eliminate extravagance in order to accomplish a saving of not less than 25 percent in the cost of Federal Government, to balance the Budget, and to stop the deficits could in less than 4 years have left a record representing the very opposite of those promises?

The people cannot become too familiar with the promises made. The New Deal must be judged by the manner in which New Deal pledges have been consistently ignored. Either they were not made in good faith or they were completely forgotten in the lust for power and theoretical experimentation.

The four sessions of the Seventy-third and Seventy-fourth Congresses representing, roughly speaking, the term of the President, have appropriated in excess of $39,000,000,000, including appropriations through the Reconstruction Finance Corporation.

The Democratic platform of 1932, accepted 100 percent by the President, contained the following plank:

> We advocate an immediate and drastic reduction of governmental expenditures by abolishing useless commissions and offices, consolidating departments and bureaus, and eliminating extravagance * * *.

In accepting his nomination for President, Candidate Roosevelt used the following language:

> We must abolish useless offices * * * we must merge. We must consolidate subdivisions of government and * * * give up luxuries which we can no longer afford * * *. I propose * * * that government of all kinds, big and little, be made solvent and that the example be set by the President of the United States and his Cabinet.

His promise at Columbus on August 20, 1932, was:

> I shall share the complaint against regimentation * * *. I dislike it not only when it is carried on by an informal group amounting to an economic government of the United States, but when it is done by the Government of the United States itself.

And in Sioux City, September 29, 1932, he stated:

> I propose to analyze the economic increase in the growth of bureaucracy. We are attempting too many functions.

A trail of consistently definite and unequivocal pledges was left on the subject up to the time he took the oath of office. Thereafter we find rather than a reduction of Government bureaus and commissions an astounding increase in the number of new Federal agencies, due entirely to the establishment of alphabetical arrangements by legislation insisted upon by the Chief Executive.

No one knows exactly how many new agencies have been created, but the number runs well over 100. This brought what officials of the National Federation of Federal Employees choose to call political manipulation of the Federal service by rapacious spoilsmen. I shall only take time here to quote the following from the biennial report of the president of that federation, to which I call your particular attention:

> Not within the memory of anyone now living has the merit structure in the Federal service been so beset by attacks, open and covert. * * * By congressional enactment and by Executive order, positions by the thousands have been placed in a political category. Political influence in permanent establishments has not only been permitted, but in numerous instances has been a requisite.

The number of employees on the Federal pay roll has increased from 563,000 on March 1, 1933, to 810,418 as of April 30 of this year. This figure does not include 35,000 contract workers in the Postal Service or the personnel of such organizations as the Civilian Conservation Corps. The increase represents almost entirely the political appointees placed on the roll under the supervision of Postmaster General Farley. To substantiate this statement it can be said that as a matter of fact the number of employees under classified civil service is several thousand less than the number employed at the end of the previous administration, with the total number of employees increased nearly 300,000. The proportion of civil-service employees to the total number on the Federal pay roll today is 63.3 percent as compared with 80.1 percent during the previous administration. It is clear that not only all of the increase is represented by political appointments, but the spoils system even has eaten into the number under classified civil service.

On the subject of reduction in costs in government, the plank in the 1932 Democratic platform read:

> We advocate an immediate and drastic reduction of governmental expenditures * * * to accomplish a saving of not less than 25 percent in the cost of Federal Government. * * *

With the rest of the platform of his party, the present occupant of the White House accepted this solemn pledge 100 percent. He took occasion to say at Pittsburgh on October 19, 1932:

> I shall carry out the plain precept of our party, which is to reduce the cost of the current Federal Government operations by 25 percent.
>
> Of course that means a complete realinement of the unprecedented bureaucracy that has assembled in Washington in the past 4 years.
>
> I am no stranger to Washington. I knew it at first hand during the administration of Theodore Roosevelt and William Howard Taft. I served in Washington for seven and a half years under the Wilson administration. I have some familiarity with the psychology of the administration of the National Government.

What action was intended, or at least what the people of this country had a right to expect, was entirely clear. But what has actually taken place?

The administration's method of giving out information is at times confusing and misleading. As a result, one not officially connected with Washington would have to possess an intimate knowledge of governmental activities in order to fully appreciate the enormous funds appropriated during the Seventy-third and Seventy-fourth Congresses.

Immediately upon taking office, the President made his first and only gesture toward reducing expenditures. I refer to the Economy Act of March 1933. It was not many weeks after before it became evident that this was but a shallow attempt to fool the public because there was immediately launched a series of expensive experiments, so much so that those who had conscientiously supported the economy bill began to realize that they had been mistaken in taking the President seriously. The tables appearing at the end of these remarks demonstrate clearly the policy of the administration to constantly recommend enormous increases rather than make any attempt at reducing expenditures. Attention is called to the fact that not only has there been made available to the present administration the $39,600,000,000 appropriated by the four sessions of the Seventy-third and Seventy-fourth Congresses upon the demand of the President but

the last session of the Seventy-second Congress had passed appropriation measures for the first fiscal year under the New Deal, beginning July 1, 1933, totaling $1,879,000,000. This makes a total of appropriations available for expenditures during the 4 fiscal years of approximately $41,500,000,000.

Do you realize that if one dollar had been laid away every minute of every day and every night from the beginning of the year 1 to January 1, 1936, there would have been on the latter date $1,300,404,000? In other words, just a little more than a billion dollars in 1,936 years at the rate of a dollar a minute. As a comparison, note that the present administration is spending at the rate of $10,000 per minute.

Roger Babson, noted economist, has made the following comment:

> If every dollar spent were being matched by a dollar in tax revenues, I would not be alarmed. If this were so, the voters would soon take care of the spending problem.

The American people are showing signs of awaking to the situation, because they realize that this spending on the part of the New Deal means that every penny spent must be raised by taxation, whether by direct or indirect measures. It is a well-known fact that the tax measure just passed is only another attempt to give the impression that this is the end of higher taxation. On the contrary, present taxes levied are inadequate, and the next session will demonstrate the need for larger income by taxation, simply because the country cannot continue to live on borrowed money and at the same time maintain national credit; or, far better, the people will demand at the coming election a reduction in expenditures to bring the cost of the Federal Government within revenues.

On the question of Budget balancing the 1932 Democratic platform speaks for the party as follows:

> We favor maintenance of the national credit by a Federal Budget annually balanced on the basis of accurate executive estimates within revenues, raised by a system of taxation levied on the principle of ability to pay.

This is part of the covenant with the people to be faithfully kept accepted 100 percent by Candidate Roosevelt.

Is it necessary to recall that in his Budget message of January 3, 1934, the President said:

> It is my belief that, so far as we can make estimates with our present knowledge, the Government should seek to hold the total debt within this amount. Furthermore, the Government during the balance of this calendar year should plan to bring its 1936 expenditures, including recovery and relief, within the revenues expected in the fiscal year 1936.

That the Budget message of January 3, 1935, stated:

> • • • it is evident that we have not yet reached a point at which a complete balance of the Budget can be obtained. I am, however, submitting to the Congress a budget for the fiscal year 1936 which balances except for expenditures to give work to the unemployed. If this budget receives the approval of the Congress, the country will henceforth have the assurance that, with the single exception of this item, every current expenditure of whatever nature will be fully covered by our estimates of current receipts.

In the Budget message of January 3, 1936, there was the same optimistic note, but Treasury statements show that receipts for the fiscal year just ended were $4,763,000,000 short of the expenditures.

We have had many words and numerous promises but no results.

When decrying the deficit of a little over a billion dollars in 1932, Candidate Roosevelt did not realize the possibilities under President Roosevelt.

The annual report of the Secretary of the Treasury is authority for the statement that the deficit at the end of the fiscal year 1934 was $3,965,991,685; at the end of the fiscal year 1935 the Treasury faced another deficit of $3,082,128,643; and the fiscal year ending June 30, 1936, brought a further deficit of $4,763,841,642. Simple addition tells us that the total of deficits for the first 3 full years under the New Deal total nearly $12,000,000,000. This is not all reflected in the public debt as yet, due to the fact that there is to be some refinancing at this time and it is natural for the debt to lag behind the deficits. However, the national debt has increased from $20,934,728,350 on March 1, 1933, to nearly $34,000,000,000 at the present time. Treasury statements show $6,000,000,000 of recovery and relief funds still unexpended. We are told most of this has been obligated. That means ultimately it will practically all be reflected in the deficits and a continued increase in the public debt, so the prediction of a $40,000,000,000 debt is a mere matter of arithmetic.

The following table sets forth the appropriations of the two New Deal Congresses and the general appropriation bills passed during the second session of the Seventy-second Congress for the first year of the New Deal. It must be remembered that practically all of these funds were appropriated upon the recommendation and the insistence of President Roosevelt. He has taken full responsibility, and in fact has demanded such broad powers that in the expenditure of huge sums made available to him, he is acting in a legislative capacity, as well as an administrative. He has far more authority than any wartime President ever was given.

[1] Passed last session 72d Cong. for fiscal year 1934.
[2] Agricultural Appropriation Act, $173,565,606, plus $440,000,000 for Soil Conservation and Domestic Allotment Act (A. A. A.) carried in Independent Offices Act and shown in later tables under "New agencies."
[3] In later tables $972,323 apportioned in 1933; $22,275 in 1934.
[4] In later tables $755,720 apportioned in 1933; $2,326,910 in 1934.
[5] Plus $500,000,000 from Reconstruction Finance Corporation and $380,000,000 reappropriated.
[6] Eliminating processing taxes and collections under Tobacco Act from Budget estimates and adding $509,175,000 carried in appropriation acts.

Appropriations through the Reconstruction Finance Corporation

	Seventy-third Congress		Seventy-fourth Congress	
	First session	Second session	First session	Second session
Farm Relief Act, 1933 (Public, No. 10):				
Loans to—				
Joint stock land banks $100,000,000				
Farmers 200,000,000				
Drainage and irrigation districts 50,000,000				
Advances to reclamation projects 5,000,000				
	$355,000,000			
Unemployment relief (Public, No. 15, 73d Cong.)	500,000,000			
Securities Act, 1933, Corporation of Foreign Security Holders (Public, No. 22, 73d Cong.)	75,000			
Loans to insurance companies (Public, No. 35, 73d Cong.)	50,000,000			
Home Owners' Loan Act, 1933, capital stock of corporation (Public, No. 43, 73d Cong.)	200,000,000			
Increased authorization (Public, No. 84, 73d Cong.)		$850,000,000		
Deficiency and Supplemental Appropriation Act, 1934 and 1935 (Public, No. 412, 73d Cong.):				
Public Works Administration $500,000,000				
Purchase of securities held by Public Works Administration 250,000,000				
		750,000,000		
Loans to industry (Public, No. 417, 73d Cong.)		300,000,000		
National Housing Act, excluding unlimited and indefinite authority (Public, No. 479, 73d Cong.)		10,000,000		
Work relief (Public Res. No. 11, 74th Cong.)			$500,000,000	
Loans to national mortgage associations (Public, No. 1, 74th Cong.)			100,000,000	
Increase in loans to insurance companies (Public, No. 1, 74th Cong.)			25,000,000	
Public Works Administration (Public, No. 739, 74th Cong.)				$300,000,000
Commodity Credit Corporation, purchase of capital stock (Public, No. 489, 74th Cong.)				97,000,000
Flood control loans (Public, No. 525, 74th Cong.)				50,000,000
Total	1,105,075,000	1,910,000,000	625,000,000	447,000,000

The items below, acknowledged by Treasury statements as contingent obligations of the Government, are not included in any of the accompanying tables, nor is the total of contingent obligations used elsewhere. Admittedly, some of the items will be the basis for future appropriations. If they were included the total appropriations and contingent obligations would be well over $50,000,000,000, without the indefinite items.

Contingent obligations guaranteed by the Government as issued (not included as appropriations)

Guaranty of farm-loan bonds (Public, No. 88, 73d Cong.)	$2,000,000,000
Guaranty of interest on farm-loan bonds (Public, No. 88, 73d Cong.)	?
Guaranty of home-loan bonds (Public, No. 178, 73d Cong.)	2,000,000,000
Guaranty of interest on home-loan bonds (Public, No. 178, 73d Cong.)	?
Repairs on mortgaged property covered by home-loan bonds (Public, No. 178, 73d Cong.)	200,000,000
Increase in authority of Home Owners' Loan Corporation to issue bonds (Public, No. 479, 73d Cong.), also guaranteed as to principal and interest	1,000,000,000
National Housing Act (Public, No. 479, 73d Cong.):	
Insurance on present mortgages	1,000,000,000
Insurance on new mortgages to be issued	1,000,000,000
Guaranty of interest on these mortgages	?
Guaranty of National Mortgage Association bonds	?
Guaranty of interest on National Mortgage Association bonds	?
Additional for repairs on mortgaged property	100,000,000
Insurance of financial institutions	200,000,000
Replacement of P. W. A. funds for which authorization has been given to divert to emergency purposes (Public, No. 412, 73d Cong.)	?
Increase in authority of Home Owners' Loan Corporation to issue bonds, also guaranteed as to principal and interest (Public, No. 76, 74th Cong.)	1,750,000,000
Additional for repairs on mortgaged property (Public, No. 76, 74th Cong.)	100,000,000
Tennessee Valley Act (Public, No. 412, 74th Cong.)	50,000,000
	9,400,000,000

A glance at the above table and those following, which are in more detail, will answer any claim to the fulfillment of the promises to eliminate bureaucracy. A better understanding can be had by examining the tables hereafter inserted, particularly those covering independent offices and new agencies.

Of course, the pledge to reduce the cost of government 25 percent was not taken seriously by the administration from the beginning. In some departments, notably Agriculture, Interior, Navy, Treasury, and War, activities involving Federal aid for highways, construction of reclamation projects, ships, public buildings, rivers and harbors, and flood-control projects have been taken care of in increased amounts out of recovery and relief funds. But even this misleading attempt to show a saving in the Regular Establishment has failed because, with appropriations for these projects transferred from the general Budget to the emergency Budget, total appropriations for the regular establishment still show substantial increases. Eliminating the appropriations for soldiers' bonus and the new A. A. A., the general appropriation measures passed at the session just closed total $3,282,000,000, an increase of more than 20 percent, or $500,000,000 over the previous year. The Budget cannot be balanced under the policy of increased spending and unlimited experimentation which forms the nucleus of the New Deal program.

How long can this continue if we are to maintain national credit? The conduct of our fiscal affairs forms the basis of national credit, and there is a limit. The people are the stockholders of the Government. They furnish the capital through taxation. They pay the full bill, and it is up to them to elect officers to run their governmental business on a sound basis. Deficits are net losses which mean added borrowings to increase the national debt, a debt which is the obligation of the people themselves, and which the people eventually must pay.

If we own a little store or business establishment, we do not retain a manager who continually is on a spending spree and reporting losses, and who is repeatedly borrowing from the bank on our credit. If we did, the bank would soon tell us we have no more credit, and foreclosure would follow with complete loss of the enterprise.

Our Federal Government is a large business and should be operated within its income, and not on deficits which are borrowed funds. We need a manager who does not have a spending fever and who, having ability to manage our business of government, will proceed to save the country from costly theory and impractical experiments.

Summary of regular, deficiency, and special appropriations

	Fiscal year 1933 appropriations	Fiscal year 1934		Fiscal year 1935		Fiscal year 1936		Fiscal year 1937	
		Appropriations	Public works allotments	Appropriations	Supplemental appropriations	Appropriations	Work-relief appropriations	Appropriations	Relief and work-relief appropriations
Agriculture	$306,673,811	$142,209,091	$566,040,887	$154,102,711	$644,500,000	$136,632,756	$800,000,000	[3] $182,199,279	$413,250,000

War	458,067,930	349,840,749	362,352,928	317,506,700		433,108,914	136,693,169	583,698,556	128,250,000
Total, regular, deficiency, and special	3,549,234,519	4,057,800,334	2,531,798,090	7,649,298,983	1,808,270,000	4,003,387,050	4,000,000,000	[3] 7,219,891,610	1,425,000,000
Non-Federal and other allotments not carried in departmental tables			768,201,910						
Total, public works			[4] 3,300,000,000						
Permanent and indefinite	1,285,191,028	1,397,977,695		2,304,784,450		2,200,101,127		2,139,664,970	
Add public works, supplemental and work relief		3,300,000,000		1,808,270,000		4,000,000,000		1,425,000,000	
Grand total	4,834,425,547	[5] 8,755,778,029		11,762,353,433		10,203,488,177		[3] 10,784,556,580	

[1] Does not include $3,300,000,000 public-works appropriation covered in next column.
[2] Appropriation of $440,000,000 carried in Independent Offices Act for Soil Conservation and Domestic Allotment Act. In this and following tables it is omitted in Independent Offices and included in Agricultural Adjustment Administration under New Agencies.
[3] In addition to this sum there are reappropriations totaling $73,792,786.
[4] This total could be shown under Public Works Administration in new agencies, but is broken down by departmental allocations instead.
[5] Includes $2,150 (Second Deficiency, 1933), not shown in previous table; does not include items (Third Deficiency, 1933, and Fourth Deficiency, 1933), apportioned to 1933. (See footnotes 2 and 3 of previous table).

Deficiency appropriations:									
First deficiency, 1933	1,000,173								
Second deficiency, 1933	1,590								
Third deficiency, 1933	29								
Fourth deficiency, 1933	354	42,000,000							
Deficiency, 1934 and 1935				481,038					
First deficiency, 1935						2,370,943			
Second deficiency, 1935						9,103,830			
Supplemental, 1936								8,264,979	
First deficiency and supplemental, 1936 and 1937								118,694	
Special acts:									
Emergency Relief and Construction Act (Public, No. 302, 72d Cong.):									
Highway-aid system	120,000,000								
Forest roads	5,000,000								
Forest improvements	5,000,000								
Crop production loan (Public Res. No. 16, 73d Cong.)				40,000,000					
Eradication of cattle diseases (Public Res. No. 27, 73d Cong.)				50,000,000					
Control of chinch bugs (Public Res. No. 30, 73d Cong.)				1,000,000					
Grasshopper control (Public Res. No. 127, 74th Cong.)								250,000	
Total, regular, deficiency, and special	306,673,811	142,209,091	566,040,887	154,102,711	644,500,000	136,632,756	800,000,000	[6] 182,199,279	413,250,000
Permanent and indefinite	11,211,571	10,303,116		840,280,600		578,452,596		[7] 117,654,497	
Add public works, supplemental, and work relief		566,040,887		644,500,000		800,000,000		413,250,000	
Grand total	317,885,382	718,553,094		1,638,883,311		1,515,085,352		[6] 713,103,776	

[1] Bureaus of Entomology and Plant Quarantine have been consolidated.

[2] Includes:

Public roads	$400,000,000
Public-land highways	5,015,000
Drought-relief highways	7,431,000
Administrative fund	250,000
Total	412,696,000

[3] Includes:

Public roads	100,000,000
Highway Act, Nov. 9, 1921, to remain available	10,000,000
Federal reservation roads	2,500,000
National park roads	5,000,000
Indian reservation roads	2,000,000
Total	119,500,000

In addition $100,000,000 is appropriated for 1936, and $100,000,000 for 1937, the latter amount to be matched by the States.

[4] Highways and grade crossings.

[5] Created by consolidation and transfer of agencies from Interior and other Departments.

[6] $440,000,000 appropriation in Independent Offices Act for soil conservation, shown under new agencies, not included.

[7] Processing taxes deducted from permanent appropriations account, Supreme Court decision.

[60] Carried in Public Works Administration report of May 7, 1934, under War Department.

[61] In addition there are reappropriations totaling $2,845,925.

[62] Engineer Corps:

Flood control	$69,187,000
Rivers and harbors	179,741,208
Seacoast defense	7,000,000
Total	255,928,208

[63] Actually allocated as of Aug. 28, 1935.

LEGISLATION FOR ALASKA

Mr. DIMOND. Mr. Speaker, this session of Congress is now drawing to a close. I feel impelled, before final adjournment, to express to the Members of Congress, both my colleagues in the House and the Members of the Senate, my deep sense of obligation for the uniform courtesy and consideration which I have received from all, and the aid that has been extended to me as the representative of the people of Alaska. The generally careful and sympathetic attention given to Alaskan matters is proved by the volume of legislation particularly concerning Alaska which has been enacted by Congress in the past 3 years.

It is scarcely necessary to say that all of the measures which I introduced and advocated for the benefit of Alaska were not passed by Congress. Indeed some of the most important of them failed of report by committee and so never came to the floor of the House for action, but I realize that some of these measures were highly controversial and that with the burden of other affairs put upon them, Members of Congress have not the time to devote intimate detailed study to the merits of every bill which is introduced. When we realize that during the present Congress more than 13,000 bills were introduced in the House and nearly 4,800 in the Senate, it is apparent that only measures which are deemed most important may be adequately considered. Therefore, Mr. Speaker, it is with some degree of modest pride that I am able to report that during the Seventy-third and Seventy-fourth Congresses, 57 individual bills have been passed and

approved specially relating to Alaska or for the benefit of the citizens thereof and this does not include the extremely large number of general bills which directly affect the well-being of the people of the Territory.

Of course, it would not have been possible to secure the enactment of these bills without the cordial and sympathetic cooperation of the Members of both Houses and for that cooperation and for the treatment I have received here I am profoundly grateful, and I am sure that the people whom I have the honor to represent feel a like measure of gratitude.

In order to show more in detail what has been done for Alaska by the special legislation for the Territory enacted since March 4, 1933, I shall refer briefly to the several individual measures so enacted.

Public, No. 128, Seventy-third Congress, approved March 26, 1934, fixing the date for holding elections of a Delegate from Alaska to the House of Representatives and of members of the Legislature of Alaska; fixing the date on which the Legislature of Alaska shall hereafter meet; prescribing the personnel of the Territorial canvassing board, defining its duties, and for other purposes.

This act is of real importance to the Territory. It provides that general elections in the Territory shall be held on the second Tuesday in September in the year 1934 and on the second Tuesday in September every second year thereafter, and it further provides that the sessions of the legislature of the Territory shall convene on the second Monday in January in the year 1935 and the second Monday in January every second year thereafter. The holding of sessions of the legislature in January and February and early March rather than in March and April and extending over into early May greatly serves the convenience of the members who are chosen for the legislature and generally meets the convenience of the people of Alaska. This act contains further provisions with respect to the official actions of the canvassing board and also embraces the following provision materially enlarging the authority of the Alaska Territorial Legislature, to wit:

> That the Legislature of the Territory of Alaska shall have the power from time to time as the need therefor may arise, to change the date of general elections in the said Territory, including the date of election of a Delegate from the Territory of Alaska to the House of Representatives and of the members of the Territorial Legislature, and that the Legislature of the Territory of Alaska shall also have the power by law to change from time to time the personnel of the canvassing board, the dates of its meetings, and may prescribe its duties.

From the foregoing it will be seen that the Alaska Legislature now has power to change the date of elections and also has authority to change from time to time the personnel of the canvassing board, the dates of its meetings, and may prescribe its duties.

Public, No. 134, Seventy-third Congress, approved March 27, 1934, granting abandoned public buildings and grounds at Sitka, Alaska, to the Territory of Alaska, and for other purposes.

The people of Alaska, through the Territorial Legislature, had expressed their approval of the construction of a new Pioneers' Home at Sitka. The old home and the land on which it was situated belonged to the Federal Government. Before the new home was built it became necessary to secure a transfer of the Government property to the Territory of Alaska, and that object was accomplished by the act above mentioned. The act contains a provision to the effect that the Territory shall never sell or otherwise dispose of any part of said property and that if the same shall ever be abandoned for the uses therein declared, namely, a home for the aged, sick, and infirm pioneers and residents of the Territory, the premises shall revert to the United States.

Upon the passage and approval of the act the Territory, with the aid of funds furnished by the Public Works Administration, constructed a really fine and modern home for the pioneers at Sitka and all of it is now Territorial property.

Public, No. 158, Seventy-third Congress, approved April 13, 1934, to repeal an act of Congress entitled "An act to prohibit the manufacture or sale of alcoholic liquors in the Territory of Alaska, and for other purposes", approved February 14, 1917, and for other purposes.

This act is more than an act for the repeal of the prohibition laws concerning intoxicating liquor. It is another act conferring larger legislative powers upon the Alaska Territorial Legislature. The prohibition laws were repealed, and the Alaska Territorial Legislature was granted full authority to legislate concerning the sale, disposal, and use of intoxicating liquor.

Public, No. 166, Seventy-third Congress, approved April 16, 1934, to amend sections 3 and 4 of an act of Congress entitled "An act for the protection and regulation of the fisheries of Alaska", approved June 26, 1906, as amended by the act of Congress approved June 6, 1924, and for other purposes.

The purpose of this act was to permit the actual bona-fide residents along the Yukon and Kuskokwim Rivers to take king salmon from said rivers for commercial purposes. Under the act the fishing is limited to inhabitants and the act provides that no person shall be deemed a bona-fide permanent inhabitant of said rivers who has not resided thereon or within 50 miles thereof for a period of over 1 year. The fishing rights are granted to both native and white inhabitants. Under this act limited catches of king salmon have been packed on both rivers during the past 2 years. Last fall a large cannery was planned to be operated at the mouth of the Yukon River during 1936 and thereafter, but I believed that such an extensive operation would deprive the natives of the upper river of fish, and therefore I opposed the plan and it was finally abandoned.

Public, No. 173, Seventy-third Congress, approved April 25, 1934, to authorize the incorporated city of Juneau, Alaska, to undertake certain municipal public works, including regrading and paving of streets and sidewalks, installation of sewer and water pipes, bridge construction and replacement, construction of concrete bulkheads, and construction of refuse incinerator, and for such purposes, to issue bonds in any sum not exceeding $103,000.

Under the provisions of this act the city of Juneau made application to the Public Works Administration for a loan and grant. The application was approved and the public works described in the act were constructed. This was one of the first public-works projects put into construction in the Territory of Alaska.

Public, No. 174, Seventy-third Congress, approved April 25, 1934, to authorize the incorporated city of Skagway, Alaska, to construct, reconstruct, replace, and install a water-distribution system and for such purpose to issue bonds in any sum not exceeding $40,000.

The water system of the city of Skagway, prior to the passage of this act, was in very poor condition. Under circumstances existing in 1934 it seemed impossible for the city of Skagway to borrow sufficient money from private sources to reconstruct its water-supply system. Through the passage of this act a loan and grant was made to the city of Skagway by the Public Works Administration and so the water system was entirely rebuilt and the city now has a fine system. The passage of this act and the construction done thereunder exemplify the very large value of the Public Works Administration to many of the municipal corporations of Alaska as well as to the Territory as a whole.

Public, No. 175, Seventy-third Congress, approved April 25, 1934, to authorize the incorporated town of Wrangell, Alaska, to undertake certain municipal public works, including construction, reconstruction, enlargement, extension, and improvements of its water-supply system; construction of a retaining wall and to backfill behind same to make a permanent street; and construction, reconstruction, enlargement, extension, and improvements to sewers, and for such purposes to issue bonds in any sum not exceeding $51,000.

The city of Wrangell under the act above mentioned has rebuilt its water-supply system and undertaken other public improvements greatly to the advantage of the people of the city. But for the passage of this act and the aid given

by the Public Works Administration the city would still be faced with an inadequate water supply.

Private, No. 75, Seventy-third Congress, approved April 26, 1934, to authorize the waiver or remission of certain coal-lease rentals, and for other purposes.

This act authorized the Secretary of the Interior to waive or remit all rentals due the United States and charged against the Alaska Matanuska Coal Co. during the period the company was out of possession and prevented from operating a coal mine which it held under lease from the Government, because the same was in the hands of a receiver appointed by the United States Court for the District of Alaska.

Public, No. 196, Seventy-third Congress, approved May 3, 1934, to authorize the sale of land and houses at Anchorage, Alaska.

The United States Government, through the Alaska Railroad, owned a number of dwelling houses at Anchorage, Alaska, which were rented to employees of the railroad. While the rents were not high, the employees frequently made improvements but could not be compensated therefor nor could they be given any assurance that the lease of these homes would be permanent. It was deemed better to sell the houses to those who occupied them and hence the act was passed. In operation it has worked well and has enabled a number of the employees of the railroad to own their own homes.

Public, No. 200, Seventy-third Congress, approved May 4, 1934, to repeal an act of Congress entitled "An act to modify and amend the mining laws in their application to the Territory of Alaska, and for other purposes", approved August 1, 1912.

By act of Congress approved August 1, 1912, and an amendatory act approved March 3, 1925, special provisions were made with respect to the location and holding of placer-mining claims in Alaska. Most of the people of Alaska believed that any such laws should be enacted by the Territorial legislature rather than by Congress, thus increasing the scope of the self-governing powers of the people of the Territory. Accordingly, the act above referred to was passed repealing the special act of August 1, 1912, and the amendatory act. The act so passed contained a provision that it should take effect 30 days subsequent to the date of convening of the first regular session of the Alaska Territorial Legislature held after the passage of the act. Within that time the Alaska Legislature enacted a law governing the location and holding of placer-mining claims in the Territory.

Public, No. 210, Seventy-third Congress, approved May 7, 1934, granting citizenship to the Metlakahtla Indians of Alaska.

This act needs little explanation. Under the general law it was not possible for the Metlakahtla Indians who were born in Canada to become citizens of the United States. Without exception they were very anxious to become citizens and exercise the rights thereof. Hence I introduced a bill for this purpose and it was duly enacted into law. The act contains a provision that the granting of citizenship to the Indians should not in any manner affect the rights, individual or collective, of the Indians to any property.

Public, No. 260, Seventy-third Congress, approved May 26, 1934, to amend section 10 of the act entitled "An act extending the homestead laws and providing for right-of-way for railroads in the District of Alaska, and for other purposes", approved May 14, 1898, as amended.

The enactment of this measure filled a long-felt need of some more simple form of securing small homesteads in the Territory. It provides in substance that any citizen of the United States after occupying land of the character described as a homestead or headquarters, in a habitable house, not less than 5 months each year for 3 years, may purchase such tract not exceeding 5 acres without any showing as to employment or business upon the payment of $2.50 an acre, and that the surveys thereof shall be made without expense to the applicant.

Public, No. 292, Seventy-third Congress, approved June 6, 1934, to amend an act entitled "An act to provide for the leasing of coal lands in the Territory of Alaska, and for other purposes."

By the passage of this measure the laws of Alaska concerning the payment of acreage rentals on Government coal lands were made identical with the laws existing elsewhere in the United States. The act provides that in the event the Secretary of the Interior shall direct or assent to the suspension of operation or production of coal under any coal lease the acreage rental shall be likewise suspended.

Private, No. 214, Seventy-third Congress, approved June 8, 1934, for making compensation to the estate of Nellie Lamson.

Under this act $325 was paid by the Government to Frank A. Lamson, administrator of the estate of Nellie Lamson, of Lower Tonsina, deceased, as compensation for the loss of 19 foxes which were killed as the result of dynamite blasting on the homestead of Nellie Lamson by employees of the Alaska Road Commission on May 2, 1931.

Public, No. 372, Seventy-third Congress, approved June 16, 1934, to repeal certain laws providing for the protection of sea lions in Alaska waters.

Prior to the passage of this act sea lions in Alaska waters were protected. They caused great damage both in consumption of salmon and in destruction of seines. Accordingly the act was passed to repeal the laws providing for the protection of sea lions and granting the Secretary of Commerce power to prescribe regulations in order to prevent the total extinction of sea lions.

Public, No. 388, Seventy-third Congress, approved June 18, 1934, authorizing the control of floods in the Salmon River, Alaska.

Salmon River flows through the town of Hyder, and in years past floods of the river have caused serious damage in the town. The act mentioned authorizes an appropriation of $53,000 for the control of the floods. This act was the only act of that nature which passed Congress during the first session of the Seventy-third Congress. After its passage I presented the matter to the Public Works Administration and that administration allotted the money and the work was undertaken and completed. The Territory contributed $7,000 for the project. As a result of the work done the town of Hyder should be safe from floods for many years to come.

Public, No. 399, Seventy-third Congress, approved June 18, 1934, to authorize the incorporated town of Douglas City, Alaska, to undertake certain municipal public works, including construction, reconstruction, enlargement, extension, and improvements of its water-supply system; and construction, reconstruction, enlargement, extension, and improvements to sewers, and for such purposes to issue bonds in any sum not exceeding $40,000.

By the passage of this act the Public Works Administration was enabled to make a loan and grant to the city of Douglas, Alaska, of $40,000, with which the water-supply system of the city was reconstructed and improved. But for the passage of the act and the aid of the Public Works Administration the project could not have been undertaken.

Public, No. 401, Seventy-third Congress, approved June 18, 1934, to authorize the incorporated town of Fairbanks, Alaska, to undertake certain municipal public works, including construction, reconstruction, and extension of sidewalks; construction, reconstruction, and extension of sewers, and construction of a combined city-hall and fire-department building, and for such purposes to issue bonds in any sum not exceeding $50,000.

This is an act authorizing the city of Fairbanks to incur bonded indebtedness. Again, the Public Works Administration made the usual loan and grant, of which 70 percent was in the form of a loan bearing 4-percent interest and 30 percent an outright grant, for the construction of municipal improvements. The work has been completed and is satisfactory in every respect.

Private, No. 387, Seventy-third Congress, approved June 26, 1934, for the relief of Erik Nylin.

Erik Nylin, while in the employ of the Bureau of Indian Affairs, suffered severe injury at Elim, Alaska. As a result of such injuries he became crippled for life. Unfortunately, through lack of knowledge of law, he failed to make application in time to the United States Compensation Commission. This act permitted him to do so, and he is now receiving the compensation to which he is entitled.

The foregoing embraces all of the special acts affecting only Alaska which were passed and approved during the Seventy-third Congress. The following were enacted by the Seventy-fourth Congress and approved:

Private, No. 34, Seventy-fourth Congress, approved May 10, 1935, for the relief of C. H. Hoogendorn.

This act makes an appropriation of $1,500 to C. H. Hoogendorn, of Petersburg, Alaska, in full settlement of his claims against the Government of the United States for the loss of the gas boat *Comrade* while under charter by the Department of Agriculture. The loss occurred some years ago, and finally the act for the relief of Mr. Hoogendorn was passed.

Public, No. 59, Seventy-fourth Congress, approved May 15, 1935, to authorize the city of Ketchikan, Alaska, to issue bonds in any sum not to exceed $1,000,000 for the purpose of acquiring the electric light and power, water, and telephone properties of the Citizens' Light, Power & Water Co., and to finance and operate the same, and validating the preliminary proceedings with respect thereto, and for other purposes.

By act of Congress approved July 3, 1930, the city of Ketchikan was authorized to issue bonds in any sum not exceeding $1,000,000 for the purpose of acquiring certain public-utilities properties situated in the city of Ketchikan, embracing particularly the electric-light plant. The city, under the provisions of this act, sought to purchase the public-utilities properties but before the transfer could be consummated the company endeavored by legal action to enjoin the purchase, the action being based upon some alleged defects and insufficiencies in the act of July 3, 1930, and in the proceedings thereunder. In order to permit the city to acquire and operate these very valuable public-utility properties it became necessary to pass the act above mentioned validating all things done under the act of 1930, and further defining and clarifying the provisions of that act. It seems clear that the city would never have been able to take over the public utilities of Ketchikan unless this last act had been passed. Upon the passage of this act the suit brought to enjoin the transfer was abandoned, the city took over the public-utility properties and is operating them in successful fashion, just another example of the great good that can be accomplished for the benefit of the citizens of any community through the acquisition and operation of its public utilities.

Public, No. 63, Seventy-fourth Congress, approved May 20, 1935, concerning the incorporated town of Seward, Territory of Alaska.

By this act the town of Seward, Alaska, was authorized to issue bonds and apply for grants for the construction of a municipal electric system. Under the provisions of this act loan and grant in the total sum of $166,000 have been made to the city by the Public Works Administration for the purpose of constructing the electric system authorized by the act.

Public, No. 70, Seventy-fourth Congress, approved May 24, 1935, to amend section 5296 of the Revised Statutes of the United States.

The purpose of this act is to bring Alaska within the benefits of section 5296 of the Revised Statutes of the United States, commonly known as the poor-convicts law. Under that law persons imprisoned for failure to pay fine or costs may, after serving 30 days of the term of such imprisonment, make affidavit of inability to pay the fine or costs and thereupon be released. Prior to the passage of this act it was held that section 5296 did not extend to Alaska. The whole tendency of modern thought opposes imprisonment for debt, and to imprison one for nonpayment of fine or costs because he is poor is really an imprisonment for debt. While the passage of the act was opposed upon the ground that fines imposed by the courts of Alaska would not be as readily collected unless the persons upon whom the fines were imposed were threatened with imprisonment for nonpayment, Congress enacted the law and it was approved by the President.

Public, No. 71, Seventy-fourth Congress, approved May 24, 1935, to ratify and confirm the corporate existence of the city of Nome, Alaska, and to authorize it to undertake certain municipal public works, including the construction, reconstruction, enlargement, extension, and improvement of its sewers and drains, fire-fighting system, streets and alleys, sidewalks, curbs and gutters, and a municipal building, and for such purposes to issue bonds in any sum not exceeding $100,000.

As is well known, the city of Nome, Alaska, suffered a disastrous fire in the fall of 1934. Practically the entire business section of the city, including all public buildings, was destroyed. In order to rehabilitate the city it became necessary to secure funds without delay. Accordingly this act was passed authorizing the city to issue bonds in any sum not exceeding $100,000 for public improvements of several kinds. The Public Works Administration advanced the money and the sum has now all been expended to the great benefit and advantage of the city.

In addition to the foregoing it may be of interest to note that immediately after the fire the Federal Emergency Relief Administration advanced $50,000 for relief and placed the same in the hands of the Governor for expenditure. In fact the embers were not cold when the Governor had the money and it was actually expended under the direction of a committee of the citizens of Nome. All reports available indicate that all money, both the $50,000 furnished by the Federal Emergency Relief Administration and the $100,000 furnished by the Public Works Administration, was wisely and economically expended and went a long way to relieve the people of Nome from the effects of the fire, although most of them suffered very severe losses.

Public, No. 78, Seventy-fourth Congress, approved May 28, 1935, to authorize the incorporated town of Petersburg, Alaska, to undertake certain municipal public works, including the filling, grading, and paving of streets and sidewalks, the construction and improvement of sewers, and construction of necessary bridges and viaducts in connection with the same, and for such purposes to issue bonds in any sum not exceeding $35,000.

This is another municipal-bond bill passed in order to permit the city of Petersburg, Alaska, to avail itself of the benefits granted through the Public Works Administration. The amount of the loan so authorized was $35,000, the proceeds of both loan and grant to be used generally for construction and improvement of streets, and so forth.

Public, No. 79, Seventy-fourth Congress, approved May 28, 1935, to authorize the incorporated town of Valdez, Alaska, to construct a public-school building and for such purpose to issue bonds in any sum not exceeding $30,000, and to authorize said town to accept grants of money to aid it in financing any public works.

For many years the town of Valdez, Alaska, has needed a new public-school building, but no funds could be obtained for such construction. Upon the passage of this act the Public Works Administration made an adequate loan and grant, the amount of the loan being limited to $30,000, and the construction of the school building is now going forward, another instance where a necessary public improvement could not have been undertaken without the passage of an act of Congress and the assistance furnished by the Public Works Administration.

Private, No. 81, Seventy-fourth Congress, approved June 14, 1935, to confer jurisdiction upon the Court of Claims to hear, determine, and render judgment upon the claim, or claims, of Duke E. Stubbs and Elizabeth S. Stubbs, both of McKinley Park, Alaska.

Mr. and Mrs. D. E. Stubbs were engaged in the business of raising silver foxes near McKinley Park when an act of Congress was passed enlarging the park so as to surround

their fox ranch. As a result they were obliged to sell off all their foxes and move away, thus losing largely the benefit of their investment. By this act they are authorized to bring suit in the Court of Claims for the recovery of the loss so sustained. The suit has been commenced, and it is expected that trial will be had and decision rendered within a few months from date.

Public, No. 86, Seventy-fourth Congress, approved May 31, 1935, to amend section 128 of the Judicial Code, as amended.

The United States Judicial Code was largely amended in 1925. The amendments then made provided for appeal of criminal cases from the District Courts of the United States to the Circuit Courts of Appeal, but as to Alaska, appeals in criminal cases were limited to such cases wherein the Constitution or a statute or treaty of the United States or any authority exercised thereunder were involved, or where the offense charged was punishable by imprisonment for a term exceeding 1 year or by death, and in all habeas-corpus proceedings. Under this law one convicted of a misdemeanor in the District Court of Alaska could not appeal to the Circuit Court of Appeals. This was unjust and out of harmony with the law governing the other United States courts. So the act above mentioned was passed providing for appeals from the District Court of Alaska in all criminal cases.

Private, No. 90, Seventy-fourth Congress, approved June 17, 1935, for the relief of John E. Click.

John E. Click was employed by the Bureau of Indian Affairs in Seattle, Wash. He was ordered to go to Alaska and given assurance that his transportation would be paid. In fact, it was paid, but the Comptroller General refused to approve the voucher and ordered Mr. Click to reimburse the Government. Under all the circumstances it was clear that he should not be obliged to so reimburse the Government and by the passage of this act he is released from all liability in that respect. The amount of the claim was $261.82.

Public, No. 152, Seventy-fourth Congress, approved June 19, 1935, authorizing the Tlingit and Haida Indians of Alaska to bring suit in the United States Court of Claims, and conferring jurisdiction upon said court to hear, examine, adjudicate, and enter judgment upon any and all claims which said Indians may have, or claim to have, against the United States, and for other purposes.

This is one of the most important bills for Alaska enacted in many years. It authorizes the Tlingit and Haida Indians to bring suit in the Court of Claims for recovery of compensation for the property rights of which they have been deprived. While the bill met with some opposition in Congress, it was finally passed and duly approved. Preparations are now being made for the institution and trial of the suit so authorized.

Public, No. 189, Seventy-fourth Congress, approved July 1, 1935, authorizing a preliminary examination of the Tanana River and Chena Slough, Alaska.

The floods which occur in Chena Slough flowing between Fairbanks and Garden Island do much damage. The bank in one place is being washed away and it is feared that buildings may be destroyed. This bill authorizes a preliminary examination so that protective work may be eventually undertaken and the town of Fairbanks and Garden Island preserved from the ravages of the floodwaters of the slough.

Public, No. 211, Seventy-fourth Congress, approved July 19, 1935, to authorize the conveyance of certain lands in Nome, Alaska.

The city of Nome as originally laid out was very irregular in shape; the streets were narrow and crooked. When the fire occurred in 1934, the citizens unanimously decided that it would be advisable in rebuilding the city to straighten the streets and make them much wider. Accordingly, all of the property was transferred to a trustee and then reallotted. This bill makes changes in the lands owned by the Federal Government, granting some to the city of Nome so, as now laid out, the city properties are in much better shape and the buildings constructed thereon more easily protected against fire.

Public, No. 235, Seventy-fourth Congress, approved August 3, 1935, to authorize the incorporated city of Anchorage, Alaska, to construct a municipal building and purchase and install a modern telephone exchange, and for such purposes to issue bonds in any sum not exceeding $75,000; and to authorize said city to accept grants of money to aid it in financing any public works.

This bill is adequately described in the title. Application was made to the Public Works Administration for a grant and loan, but afterwards the application for the loan was withdrawn and the bonds of the city were sold locally. However, the Public Works Administration made the usual grant and the building is now under construction.

Public, No. 297, Seventy-fourth Congress, approved August 21, 1935, to authorize the incorporated town of Cordova, Alaska, to construct, reconstruct, enlarge, extend, improve, renew, and repair certain municipal public structures, utilities, works, and improvements, and for such purposes to issue bonds in any amount not exceeding $50,000, and for other purposes.

This bill also is sufficiently described by title. The Public Works Administration made the usual loan and grant and the work is now under way.

Public, No. 317, Seventy-fourth Congress, approved August 24, 1935, to authorize the Postmaster General to contract for air-mail service in Alaska.

This act is important by reason of the extension of air transportation, and particularly of air-mail service in Alaska. The act is an amendment of an act of Congress passed many years ago authorizing the Postmaster General to provide for difficult or emergency mail service in Alaska. The new part of the law reads as follows:

> and he (the Postmaster General) is authorized, in his discretion, to contract, after advertisement in accordance with law, for the carriage of all classes of mail within the Territory of Alaska, by airplane, payment therefor to be made from the appropriation for star-route service in Alaska.

It was by reason of the passage of this act that the Bureau of the Budget approved an estimate of a sum in excess of $242,000 for additional air-mail service in Alaska for the current fiscal year. Although approved by the Budget, the House of Representatives struck out the increased amount. At the time the bill was under consideration I offered an amendment to restore the full amount, but upon division the amendment was voted down. I then went to the Senate and had the item incorporated in the bill in the Senate, but when the bill went to conference the increased amount desired was again lost. When the deficiency bill was under consideration, the Senate, upon my request, again inserted the item, but in conference it was again stricken. However, I feel confident that the Members of Congress now understand the situation more clearly and that at the coming session of Congress in January a substantial sum will be granted for improved service of mail by air in the Territory.

Public, No. 345, Seventy-fourth Congress, approved August 26, 1935, relative to the proposed survey, location, and construction of a highway to connect the northwestern part of continental United States with British Columbia, Yukon Territory, and the Territory of Alaska.

Under this act the President is requested to negotiate and enter into an agreement or agreements between the Governments of the United States and the Dominion of Canada for the survey, location, and construction of what is commonly known as the International Highway through British Columbia and Yukon Territory into Alaska, to connect with the Richardson Highway, and in cooperation with the Government of the Dominion of Canada to cause a survey or surveys to be made to determine the most practicable route for such highway, as well as specifications and estimates of the probable cost thereof and plans for financing its construction and maintenance. Further provisions of the act authorize the President, upon the conclusion of the negotiations and the execution of the agreement or agreements, to designate such existing agency of the Government of the United States as he may select for this purpose, or such officials or agency as he

may specially appoint or create, to carry on the work of survey and location thereof after such route shall have been determined. As originally introduced, the bill authorized an appropriation to construct that part of the highway which lies in the Territory of Alaska, but during course of passage in Congress the authorization for an appropriation was stricken out upon the objection of the Director of the Budget. Negotiations with the Canadian authorities are now going on and it is expected that a plan will be in shape to present to Congress at the coming session in January.

Private, No. 303, Seventy-fourth Congress, approved August 26, 1935, for the relief of Joe Reno.

Joe Reno, a resident of Anchorage, Alaska, signed a bond for the admission of an alien to the United States, guaranteeing that she would depart from the United States within a specified time. Before the period for departure arrived the alien died, but the fact of her death was not discovered until many months later. In the meantime the bond was forfeited and the money was deposited in the Treasury of the United States. Clearly Mr. Reno was not liable on the bond, because the alien had died before the time of departure arrived. By this act Mr. Reno was reimbursed for the amount he so paid, namely, $500. The bond was forfeited in 1921, but Congress had never before taken any action upon the several bills which had been introduced for Mr. Reno's relief.

Public, No. 334, Seventy-fourth Congress, approved August 26, 1935, to reenact section 463 of the act of Congress entitled "An act to define and punish crime in the District of Alaska and to provide a code of criminal procedure for said district", approved March 3, 1899, and for other purposes.

This bill is aptly described in its title. By error in drafting a certain provision of the act concerning the collection of Federal taxes in Alaska, section 463, above referred to, was repealed and so the reenactment of such section, while probably not necessary, became advisable.

Public, No. 465, Seventy-fourth Congress, approved March 2, 1936, to authorize the incorporated city of Skagway, Alaska, to undertake certain municipal public works, and for such purpose to issue bonds in any sum not exceeding $12,000, and for other purposes.

By the provisions of Public, No. 174, Seventy-third Congress, mentioned previously, the city of Skagway was authorized to issue bonds for any sum not exceeding $40,000 for reconstruction and repair of its water supply system. Only $30,000 of the bonds so authorized weer actually issued, and $2,000 of the issue was promptly called and retired, leaving $28,000 outstanding. By the provisions of Public, No. 465, Seventy-fourth Congress, the city was authorized to issue an additional $12,000 in bonds for street improvements with the provision that the total bond issue of the city under this act and prior acts of Congress should not exceed $40,000.

Public, No. 483, Seventy-fourth Congress, approved March 21, 1936, to extend the facilities of the Public Health Service to seamen on Government vessels not in the Military or Naval Establishments.

By this act the facilities of the Public Health Service have been extended to seamen on Government vessels not in the Military or Naval Establishments. All seamen in the Merchant Marine are entitled to the Public Health Service but those benefits have in the past been denied to seamen on the Forest Service vessels, the Bureau of Indian Affairs vessels, and some other Government vessels in Alaska and elsewhere. Under this act those formerly excluded from the benefits of the Public Health Service are taken care of, which is only fair and just.

Private, No. 452, Seventy-fourth Congress, approved April 10, 1936, for the relief of Thomas F. Gardiner.

Thomas F. Gardiner is a respected old-time resident of Dillingham, Alaska. Some years ago he entered into a contract for the transportation of one of the superintendents of the Bureau of Education from Kanatak to Bristol Bay. Owing to unavoidable delays the superintendent left Kanatak before Mr. Gardiner arrived. Thereupon, the Comptroller General refused to pay the account. After much correspondence with the Comptroller General, he finally recommended to Congress the passage of a bill granting to Mr. Gardiner $200.50. Accordingly I introduced a bill to that effect and it was passed in due course. In my judgment, Mr. Gardiner was clearly entitled to a substantially larger sum but we were obliged to accept $200.50 since it seemed hopeless to secure the passage of a bill for a larger amount.

Public, No. 538, Seventy-fourth Congress, approved May 1, 1936: To extend certain provisions of the act approved June 18, 1934, commonly known as the Wheeler-Howard Act (Public Law No. 383, 73d Cong., 48 Stat. 984), to the Territory of Alaska, to provide for the designation of Indian reservations in Alaska, and for other purposes.

Under the provisions of the Wheeler-Howard Act, which was approved June 18, 1934, economic aid is authorized to be given to the Indians of the United States to assist them in establishing cooperative enterprises for their own benefit and welfare. Through an inadvertent error made in conference between the House and Senate, Alaska was not included within certain provisions of the act. The measure above mentioned brings Alaska fully within the benefits of the Wheeler-Howard Act, and it seems bound to result in very large benefits to the Indians and Eskimos of the Territory. At the present time it is estimated that approximately $600,000 will be available for the natives of Alaska to be used in cooperative business enterprises. The Bureau of Indian Affairs is now preparing to set up an organization in Alaska for the administration of the act.

Private, No. 488, Seventy-fourth Congress, approved May 4, 1936, for the relief of Edith H. Miller.

This bill is similar to Private, No. 90, Seventy-fourth Congress, above described. Arthur H. Miller, now deceased, was in the employ of the Bureau of Indian Affairs, and it was agreed that the transportation expense should be paid when he was ordered to Alaska. The Comptroller General refused to pay the account in the sum of $127.64. By this act, Mrs. Miller, the widow and sole heir at law of her deceased husband, has been paid the amount involved.

Private, No. 507, Seventy-fourth Congress, approved May 5, 1936, for the relief of Archie P. McLane and Hans Peter Jensen.

Archie P. McLane and Hans Peter Jensen, of Kasilof, Alaska, were sureties on the bond of a postmaster. The postmaster died and another person acted as postmaster for about 8 months thereafter without any formal appointment. Mr. McLane and Mr. Jensen paid the postmaster's compensation, but the Comptroller General refused to approve it. Accordingly they were obliged to pay the amount, $143.55, into the Treasury. This act reimburses them in that sum, since the Government really had the benefit of the service of the acting postmaster and he was entitled to the compensation which he received.

Private, No. 526, Seventy-fourth Congress, approved May 6, 1936, for the relief of Anchorage Commercial Co., Inc.

The Anchorage Commercial Co., Inc., sold merchandise to the Bureau of Indian Affairs for use at Eklutna, Alaska. Some defect occurred in the preparation of the vouchers and so the Comptroller General refused to approve the account. It therefore became necessary to introduce and have passed the act above mentioned which appropriated for payment to the company the sum of $307.21.

Public, No. 569, Seventy-fourth Congress, approved May 6, 1936, to authorize a survey of Lowell Creek, Alaska, to determine what, if any, modification should be made in the existing project for the control of its floods.

Lowell Creek is a steep mountain stream which flows through the town of Seward, Alaska. Some years ago a large flume was built to carry the waters of the stream through the town and thus avoid damage to the property of the town during flood periods. In the fall of 1935 a disastrous flood occurred, the flume became clogged, and the flood waters did much damage. The electric light plant which serves the town was flooded and was out of commission for several days. It now appears that some other

method will have to be found for disposal of the flood waters of the stream. The act above mentioned authorizes a survey to determine what method should be adopted to protect the town of Seward from the Lowell Creek floods, the survey to be made under the supervision of the Secretary of War.

Public, No. 572, Seventy-fourth Congress, approved May 6, 1936, authorizing a preliminary examination of the Matanuska River in the vicinity of Matanuska, Alaska.

This is another flood-control project. A survey has been authorized with a view eventually of taking whatever measures are necessary to prevent damage through the floods of the Matanuska River.

Private, No. 575, Seventy-fourth Congress, approved May 21, 1936, for the relief of Holy Cross Mission Hospital.

Several years ago a man taking mail from the Alaska Railroad steamship *Nenana*, on the Yukon River, was injured. The master of the ship took him to Holy Cross Mission Hospital. The Comptroller General refused to approve payment of the account, and therefore it became necessary to secure passage of the act to pay to the hospital the sum of $50, the amount of the bill.

Public, No. 626, Seventy-fourth Congress, approved May 28, 1936, to authorize municipal corporations in the Territory of Alaska to incur bonded indebtedness, and for other purposes.

This act embodies another measure of self-government for Alaska, since it authorizes municipal corporations in the Territory to incur bonded indebtedness without securing in each case an authorizing act of Congress. Under the provisions of the act any municipal corporation may incur bonded indebtedness not to exceed 10 percent of the aggregate taxable value of the real and personal property of the city.

Private, No. 646, Seventy-fourth Congress, approved June 20, 1936, for the relief of Frank A. Boyle.

Frank A. Boyle, of Juneau, Alaska, while holding the office of United States commissioner at that place a number of years ago, sustained serious injuries in the course of his employment. The act above mentioned appropriates in full compensation for such injuries the sum of $2,500.

Private, No. 683, Seventy-fourth Congress, approved June 24, 1936, for the relief of May Wynne Lamb.

During the influenza epidemic in Alaska in 1918, Dr. Frank W. Lamb, who was employed by the Bureau of Education, Department of the Interior, was requested by Governor Riggs to visit the lower Yukon and give whatever relief was possible to the natives of that place. Dr. Lamb unhesitatingly complied with the request and did render fine service for aid of the natives, but he, himself, contracted the influenza while serving them and after a few days' illness died. Since he occupied the position of an "officer of the United States" and not that of an "employee of the United States" his widow was held not entitled to compensation under the Employees Compensation Act. Accordingly, I introduced a bill which, if passed as written, would have given Mrs. Lamb the benefits of the Employees Compensation Act. The House Claims Committee deemed that the passage of the bill as written would establish a bad policy, and so the bill was amended in committee and provided for the payment to Mrs. Lamb as compensation for the death of her husband the sum of $5,000. In this form the bill passed both House and Senate, and was approved by the President.

Private, No. 698, Seventy-fourth Congress, approved June 24, 1936, for the relief of the estate of Hans Ditmanson, deceased.

Hans Ditmanson was postmaster at Gulkana, Alaska, and, while occupying that office, died. The work was carried on by his assistant for some time before a new postmaster was appointed. The Comptroller General refused to approve payment of the account for the service performed between the date of the death of Mr. Ditmanson and the appointment of his successor. Accordingly, the passage of this act was necessary, reimbursing the estate in the amount involved, namely, $99.73.

Private, No. 699, Seventy-fourth Congress, approved June 24, 1936, for the relief of the estate of Henry Copple, deceased.

This is another act to grant payment for services rendered between the date of the death of one postmaster and the date of the appointment of his successor; the amount involved being $215.02, and the post office, Kotzebue, Alaska.

Private, No. 700, Seventy-fourth Congress, approved June 24, 1936, for the relief of the estate of Fred Wilkins, deceased.

This act is similar to the two last above mentioned and grants compensation for the services of an acting postmaster between the time of the death of the postmaster of Richardson, Alaska, Fred Wilkins, deceased, and the date of the appointment of his successor, the amount being $121.38.

Public, No. 725, Seventy-fourth Congress, approved June 20, 1936, to extend the benefits of the Adams Act, the Purnell Act, and the Capper-Ketcham Act to the Territory of Alaska, and for other purposes.

This act extends to the Territory of Alaska the benefits of two agricultural-experiment station acts and one agricultural-extension act. These acts, as originally passed, embraced the 48 States only. Later special laws were enacted extending the benefits, first, to the Territory of Hawaii and, later, to Puerto Rico. Alaska was left out. Public, 725, grants Alaska a fair share of the benefits now enjoyed by the 48 States, Hawaii, and Puerto Rico. The act was passed too late in the session to secure an appropriation for the fiscal year ending June 30, 1937, but under the act there is authorized for the year ending June 30, 1938, an appropriation of $12,500. These authorizations increase from year to year until for the year 1947 and for each year thereafter Alaska may receive a total annual appropriation of $37,500 for agricultural-experiment station work, and after the year 1940 a total appropriation of $10,000 for agricultural-extension work. The enactment of this law has long been sought, but it was not until the closing days of the present session that it was passed.

Public, No. 750, Seventy-fourth Congress, approved June 22, 1936, to permit mining within the Glacier Bay National Monument.

Glacier Bay National Monument was created by an Executive order made by President Coolidge some years ago. Under the Executive order prospecting and mining were forbidden within the boundaries of the monument. Joe Ibach, and possibly others, had located claims prior to the making of the Executive order and those claims were valid, but it was found impracticable to work them in view of the restrictions set up by the creation of the monument. This act provides that in the area within the Glacier Bay National Monument in Alaska, or as it may hereafter be extended, all mineral deposits of the classes and kinds now subject to location, entry, and patent under the mining laws of the United States shall be, exclusive of the land containing them, subject to disposal under such laws, with right of occupation and use of so much of the surface of the land as may be required for all purposes reasonably incident to the mining or removal of the minerals and under such general regulations as may be prescribed by the Secretary of the Interior.

Public, No. 836, Seventy-fourth Congress, approved June 29, 1936, for the retirement of employees of the Alaska Railroad, Territory of Alaska, who are citizens of the United States.

This, the final law affecting Alaska passed at the Seventy-fourth Congress, provides retirement for the employees of the Alaska Railroad. In the past, with the exception of a very few who had civil-service status, the employees of the Alaska Railroad enjoyed no retirement benefits whatever, being in that respect under a disadvantage as compared with many others of the employees of the United States. The act in question grants to the employees of the Alaska Railroad the same retirement benefits that have been granted to the employees of the United States on the Panama Railroad and generally in the Canal Zone. In fact the act passed for Alaska is almost a word for word copy of the Canal Zone Act, having only such changes made therein as are necessary to apply the provisions of the Canal Zone

Act to the Alaska Railroad. The benefits granted by the Canal Zone Act are somewhat more generous than those granted by the Civil Service Retirement Act. However, in order to secure passage of the act it was necessary to follow the recommendations of the Secretary of the Interior and the Acting Director of the Bureau of the Budget, who advised that the clerical employees of the railroad be granted the benefits of the Civil Service Retirement Act rather than those of the Canal Zone Retirement Act.

It seems probable that the clerical employees of the railroad will be brought within the classified civil service at a comparatively early date. At all events, it was necessary either to follow the recommendations of the Secretary of the Interior and the Bureau of the Budget or else give up all attempts to secure the passage of any retirement act for the Alaska Railroad employees. By passage of this act a number of the older employees of the railroad who have worked on the railroad from the early days of its construction will be able to retire, and thus employment may be given to a corresponding number of other persons. The act embodies a carefully worked out system for retirement. It applies to those who have worked at least 15 years on the Alaska Railroad. The retirement age is fixed at 62 years. Under the civil-service retirement system the operating employees of the railroad would not reach retirement age until 65. An employee of the Alaska Railroad who has reached the age of 62 years and who has worked 30 years on the railroad would be entitled to an annuity of $1,125 a year plus such annuity as would be purchased with his own contribution of 5 percent of his earnings over the same period, plus also the sum of $36 multiplied by the number of years he worked on the Alaska Railroad during the construction period between 1914 and 1923.

Another feature of this act which is likely to be highly beneficial is the provision of section 1 which grants proportionate benefits to part-time workers on the railroad, thus taking care of those who work year after year but are employed only for 4 or 5 months a year. No such provision was embodied in the Canal Zone Act since there was no necesity for it for workers in the Canal Zone, but in Alaska, where so much of the work is seasonal, it was deemed necessary to make adequate provision for seasonal as well as year-round workers.

This concludes the list of acts passed especially for Alaska and the people thereof since March 4, 1933, but it does not include many general laws applying to the whole United States but of much benefit to the people of Alaska. For example, several years ago I introduced a bill calling for the establishment of an Army air base in the Territory. This bill and other similar bills for the establishment of bases in other parts of the United States were considered by the House Committee on Military Affairs, and I appeared before that committee and made a statement with reference to the vital importance of the establishment of an air base in Alaska and the situation of Alaska with respect to the problems of national defense. As a result of the hearing, what is known as the Wilcox Act was finally passed. This act provides for the establishment of six air bases in various parts of the United States, including one in Alaska. The real importance of what was done for Alaska along this line was exemplified by recent appointment by the Secretary of War of three officers to make a detailed survey of the proposed air base in Alaska. From estimates formerly made, it seems likely that the cost of the establishment of this base will be in the neighborhood of $9,000,000, and that at least 100 airplanes of various types will be stationed continuously in Alaska, and the Army pilots will be assigned to service there so as to give all of them experience in flying in the Territory.

The bill providing for annual leave for employees of the United States also is of definite benefit to the employees of the Government who reside in Alaska, particularly those on the Alaska Railroad. I appeared before the Civil Service Committee of the House having charge of the bill. The bill was so phrased as to cover all the Government employees in Alaska, including the employees of the Alaska Railroad as well as Government employees who work in the United States proper. Before the passage of this act many of the employees of the Alaska Railroad were held not entitled to any annual leave whatever.

The list could be extended almost indefinitely—for example, the people of Alaska have had the benefits of the Federal Deposit Insurance Act, probably the most outstanding achievement for the safety of bank depositors accomplished in our generation. As the act was originally passed, Alaska was omitted, but I was able to secure on the floor of the House an amendment including Alaska within the benefits of the act. The benefits of the Federal Housing Act and of the Home Owners' Loan Act were also extended to Alaska, though the latter appeared to be of little aid to the people of the Territory.

In discussing a number of the bills listed above, mention was made of the Public Works Administration. The National Industrial Recovery Act, containing the Public Works section, applied to Alaska as well as to other parts of the United States. Under the Public Works Administration, Alaska has been very materially benefited through the construction of roads, airfields, and other types of public works. The Public Works Administration has allotted to public-works projects in Alaska to date the total sum of $4,463,233, most of which has been expended, and the remainder will be expended before June 30, 1937. In addition to these funds, $998,973 has been allotted to the Territory with the primary object of providing relief to the unemployed.

Alaska, and particularly that part lying along the Alaska Railroad in the vicinity of Anchorage, has also very materially benefited through the establishment of the farm colony in the Matanuska Valley. This is important in and of itself and because, through the establishment of this colony, the road connecting the Matanuska Valley with Anchorage is now nearing completion. This road has been on the construction program for many years and some work was done upon it, but until the setting up of the colony at Matanuska it had not been possible to get sufficient funds to complete the entire road. In the summer of 1935, F. E. R. A. funds in the sum of $671,500 were allotted for road building in the Matanuska Valley and between Anchorage and Matanuska. It now seems probable that additional sums will be allotted for road work in the same region during the summer of 1937, particularly to connect up the farms in the Matanuska Valley section.

Since Alaska contains approximately 35,000 miles of coast line and is entirely dependent upon sea-borne traffic for its commercial and economic existence, I asked for and obtained membership on the House Committee on Rivers and Harbors and there found most attentive consideration for Alaska ocean transportation problems. The 1935 Rivers and Harbors Act authorized appropriations for all of the river and harbor projects in Alaska which had theretofore been examined and approved by the Chief of Engineers of the War Department. Under the rules of the committee no project will be considered unless and until it has been examined and approved by the Chief of Engineers. The passage of a recent appropriation act which carries an appropriation for rivers and harbors enabled the War Department to undertake the construction of the harbor projects at Petersburg, costing $94,000; at Wrangell, costing $56,000; and at Nome, where the expense is approximately $40,000, as well as the removal of rocks in the rapids of the Egegik River, the cost of which is estimated at $5,000. It now seems probable that the remaining approved projects for Alaska, namely, Cordova Harbor, $295,000; Seward Harbor, $85,000; Dry Pass, $79,000; and Sitka Harbor, $67,350, will be put into construction next year, though no definite assurance can be given to that effect. Kodiak Harbor is also in line for improvement, at an estimated cost of $77,000, if the proposed cold-storage plant is constructed. The 1935 River and Harbor Act also provided for surveys of the following harbors of Alaska: Bethel Harbor, Douglas Harbor, Haines Harbor, Juneau Harbor, Kake Harbor, Metlakatla Harbor, ship canal across Prince of Wales Island, Sitka Harbor, Unalaska Harbor, Valdez Harbor, Skagway Harbor, and Homer Harbor on Kachemak Bay. The surveys of these harbors will be com-

pleted during the present summer, and such of them as are approved by the Chief of Engineers will thus be in line for incorporation in the next river and harbor act authorizing their construction.

The act to provide for the further development of vocational education in the several States and Territories, approved on June 8, 1936, also deserves special mention because of the definite benefits that it extends to Alaska. It authorizes appropriation of funds and allotment of the same among the States and Territories for development of training in agriculture, home economics, and trade and industrial subjects. The money to be allotted for the three general classifications named, according to the proportion of the farm population, the rural population, and the nonfarm population of the State or Territory bears to the total farm, rural, and nonfarm population of the United States. Because of the proportionately small population of Alaska, the funds authorized through this method of allotment would not be sufficient to have any real effect realized therefrom. However, to offset this situation which would face the thinly populated States and Territories, the act makes definite authorization for appropriations totaling not less than $80,000 per year of Federal funds for each State or Territory, and this amount will require matching by only $30,000 by the State or Territory.

Let me repeat, Mr. Speaker, that I am under the deepest obligation to all of the Members of this body, not only for the courteous treatment which I have personally received at their hands, but also for their careful attention to the requirements of the Territory of Alaska. Not always did they see Alaska needs through my eyes, but at least I always felt certain that what Alaska asked for received careful thought in spite of the pressure of other legislative matters requiring attention of the Members.

CROP INSURANCE FOR FARMERS

Mr. WOLVERTON. Mr. Speaker, there is no one engaged in any other industry who faces such uncertainty in his effort to make a livelihood as the farmer.

From the time seed is placed in the ground until the crop is gathered there is no assurance what may result. It may be abundance. It may be destruction. Sunshine and rain may follow each other with such proper relationship as to produce a bountiful return or failure of either or an abundance of either may bring irretrievable loss. It may be lightning, storm, hail, wind, or pest that in a few hours will bring destruction and loss to months of labor.

Surely some provision should be made through a governmental agency to provide some degree of help. The businessman in any other line of industry can procure through private agencies insurance at reasonable rates that will guarantee and save him against loss from any of the sources I have mentioned, but for the farmer all possibility of insurance against crop loss from these or other natural causes is impossible except at prohibitive rates and in many cases is not procurable at any price.

Having in mind how frequently losses of this character are experienced, and the consequent financial distress felt for years afterward, it seems to me that in all the effort that is being put forth to help the farmer some thought should be given to this form of relief.

Information published by the Department of Agriculture shows that the damage to wheat covering a period of 10 years amounted to a yearly reduction of 31 percent of what would have been the normal yield. The same situation could be shown to exist likewise with other staple crops. There is no other business that expects any such loss of production each year.

If conditions are to be improved, consideration must be given to those who face destitution and possible bankruptcy as a result of losing an entire year's production. If a farmer possessed insurance against sudden loss, then when it did occur there would be an immediate recompense instead of a piling up of unpaid interest and other overhead expense that would hang as a burden requiring years of effort before it could be removed.

I am in accord with the plan proposed in Senate bill 4626, introduced in the closing days of this session of Congress. It provides for the formation of a Federal Crop Insurance Corporation. The corporation would have the power to sell policies of insurance on any growing crop of an agricultural commodity to the operator or owner of the farm on which the crops are produced. Such policies of insurance would, under the provisions of the bill, insure against unforeseen and extraordinary events not the result of misfeasance or nonfeasance causing losses to the insured. Such hazards as fire, hail, floods, severe drought, early and late freezes, and the like, would be included. The Federal Government could, if empowered by law to do so, work out an adequate and complete program of protection for American farmers.

I am strongly of the opinion that a plan of crop insurance could be made possible for all farmers of the United States that would give them security never before known, at a low cost, if legislation is passed that will enable the Federal Government to do so. With the experiences of the past farmers can readily recognize the advantage of such a program. Not only would it afford security against loss, but it would also make possible loans from bankers upon growing crops that in many cases are now impossible to obtain.

I realize that the plan is something new and for that reason the procurement of such legislation will not be easy. However, I believe it possible of attainment, provided, the farmers of our Nation individually and through farm organizations indicate an insistent desire for the establishment of such a plan. Encouragement is given to me in this thought because of the inclusion of a plank in the Republican platform recently adopted at Cleveland, Ohio, reading as follows:

> We propose to give every reasonable assistance to producers in areas suffering from temporary disaster, so that they may regain and maintain a self-supporting status.

It is the duty of all political parties to give to the farmers of America every possible assistance, by legislation or otherwise, to the end that they may have security of price level for commodities that will insure a fair profit above cost of production, and, in addition thereto a Federal program of crop insurance to lessen the adverse results of natural hazards. The accomplishment of these purposes would do much to procure for the American farmer that measure of security and prosperity to which he is entitled.

UNEMPLOYMENT PROBLEM STILL UNSOLVED—RECOVERY DELAYED—NEW POLICIES NECESSARY

Mr. WOLVERTON. Mr. Speaker, the problem of unemployment still remains as the most serious obstacle to recovery. It is my opinion that it will never be solved until private industry is able once again to provide jobs.

For 3 years the present administration has battled with the problem. It has tried by every conceivable kind of public works to accomplish the purpose. Billons of dollars have been expended by the Government through C. W. A., C. C. C., W. P. A., P. W. A., and all the regular and emergency agencies of Government, but without any appreciable success. These governmental agencies and activities were started merely as emergency measures. They were intended to be only temporary—a sort of pump-priming proposition to get private industry started. In this they have failed utterly. What is the cause? What is a remedy?

The failure of these different efforts to respond or produce the results that had been intended is most disappointing. I am not one of those partisans who can glory in an opportunity to criticize or complain about the shortcomings or failure of an opposing political party in its administration of governmental affairs in times such as these. Conditions are too serious. There are too many of our people, Republicans and Democrats alike, who are in distress, and there is no need for me to take any small or petty view of the situation. I am always hopeful when I express any criticism that it will be constructive in character. I am conscious that when the sun of prosperity shines again, it will shine

alike on Republicans and Democrats and every other type and kind of political thought that may exist. It is therefore a problem in the solution of which we are all vitally interested regardless of our particular party affiliation.

That the situation is serious can readily be seen from the fact that, today, according to an estimate based upon a survey made by the American Federation of Labor there are approximately 12,500,000 unemployed persons in this country, who are able and willing to work. This only represents a reduction of less than a million after 3 years of effort and the expenditure of eight and one-half billion dollars, and, giving full credit to several hundred thousand employed by the Government agencies and projects already mentioned. There are between five and six million families on relief, more than 20,000,000 people. According to some authorities there are more people on relief now than 3 years ago.

It is impossible for the Government to extend its activities sufficiently to give employment to all those now unemployed. In fact, it is becoming increasingly difficult to provide sufficient worth-while projects to keep the present number employed. Furthermore, it is no permanent remedy for unemployment. It was never intended to be such. Unfortunately, when such type of work is completed there is at the present time no other place for the released worker to go except back into the ranks of the unemployed and the relief line.

It is likewise apparent by this time that such projects which do not provide work at the prevailing rate of wage do not aid recovery. The rate of wage paid on W. P. A. projects, which differs in various localities, is in no case sufficient to create real purchasing power. It is hardly sufficient to provide the actual necessities of life. At the best it only provides a hand-to-mouth existence. Such a condition is highly unsatisfactory. So long as the wage paid does not provide anything beyond life's bare necessities, it does not create purchasing power for those things or goods which in their manufacture require the labor of men. Hence, it is no aid to recovery.

I should like also to mention another feature of Government work projects which is becoming increasingly objectionable. I refer to the policy that is pursued in some instances of giving recognition for work only to those who are favorably identified with a particular political party. In many cases, active participation in promoting the success of that political party is required. Refusal to do so has meant dismissal upon one pretext or another.

I am not one who will object to recognition being given to loyal party workers in filling offices that come within the regular functions of government, but I do object to any political party or its representatives taking advantage of a person who is in need and on relief, with a dependent family, and make that individual affiliate with a political party not of his own choosing before work with which to provide bread for a hungry family will be provided.

President Roosevelt recently said, "We need freedom from economic control." The conditions I have referred to as existing in many Government-supervised projects indicate that we need freedom from political control. Such a condition is bad for America. It is indefensible. It is trading bread for votes. It is playing politics with human misery. That it does exist cannot be denied. Any political party that will be a part of such a dastardly scheme deserves the severest condemnation.

Time and again the unwilling victims of this political tyranny have expressed in private their resentment of such practices and the political party responsible for its perpetration. Time and again, while giving "lip service" to their political overlords, they have denied within their heart the right to be so driven, and with all such there is a firm resolve to assert their right of freemen when they enter the election booth and cast their ballot. In the fulfillment of this intention everyone is entitled to have the encouragement and support of honest citizens who think in terms of what is best for America.

It being apparent and generally acknowledged that the present work-relief projects are not a permanent or satisfactory solution of our unemployment problem, I should like to make a few suggestions that I am confident would result, at least, in a partial solution by supplying jobs of a permanent character at worth-while wages.

In the first place, millions of unemployed could be put back to work today in industry and agriculture if the present administration would permit our farmers and laboring men to enjoy the full benefits of the American market. This country is the best market in the world. The unemployed millions of industrial workers and farmers who are barely able to eke out a living under present conditions are under normal conditions the best potential customers for manufactured and farm products produced in this country. Unemployment will continue to increase and agricultural distress become more aggravated so long as the New Deal pursues the policy of giving our American markets to foreign farmers and cheap foreign labor. We cannot compete with foreign countries in production, for the reason that wages paid to labor in foreign countries are so much below that paid for similar work in this country, and because the standards of living are lower in foreign countries.

Prominent labor leaders have stated that if it were not for the importation of cheaply produced foreign-manufactured products now coming into this country from abroad there could be gainfully employed in private industry nearly 3,000,000 persons who are now out of work and on relief.

An analysis of the agricultural products imported into this country in 1935 from foreign countries will disclose that from 2,500,000 to 3,000,000 persons could have been employed in the United States in the production and processing of the imported farm commodities if the same had been produced here.

Thus, New Deal policies upon the basis of these estimates are directly responsible for a total of approximately 6,000,000 Americans who would have work if we change our policy and save the home market for our American farmers and laboring men.

I will next refer briefly to the great benefits that would result in promoting employment if the Government would start upon an extensive housing and slum-clearance program. For 2 years I, with others, have advocated the adoption of such a plan. It seemed for a while that the Wagner-Ellenbogen bill would be passed at this session of Congress. But, at the last moment, it was not included in the President's "must" list of legislation and was consequently left unacted upon. I can assure you it was a great disappointment to many of us who had given the subject careful study over a period of years, and believe it holds the solution of putting several million unemployed building-trades workers, and others indirectly affected, back to work at their regular jobs.

Recovery cannot advance any further unless we have substantial recovery in the building industry. President Green of the American Federation of Labor has estimated that about 85 percent of the building-trades workers are unemployed, affecting 5,000,000, who depend directly or indirectly upon such industry. Carpenters, bricklayers, electricians, mechanics, and other skilled workers look for jobs in vain. Material-supply houses are ready and willing to go, but some unseen hand or influence withholds the necessary word.

Time and again the administration has announced it was ready to proceed. Millions of dollars have been appropriated first to one agency and then to another. Each started out with high hopes and great intentions. But, in each case activity soon dwindles down and gives place to inactivity. What little that has been accomplished is but a drop in the bucket. It has neither helped to provide housing, slum clearance, or employment for the unemployed on any worthwhile scale.

We need now not only courage to formulate new policies but equal courage to discard some already adopted and found to be deficient. We must seek permanent remedies

for unemployment. We have experimented long enough. It is a time for action. The morale of the unemployed working man has held up under the strain of this economic depression in a most remarkable manner. It should not be carried to a point where it will weaken. His fortitude and courage should be rewarded. New policies and aggressive action should supplant those found by experience to be deficient.

PUBLIC WELFARE

Mr. DUNN of Pennsylvania. Mr. Speaker, according to the statistics of the American Federation of Labor and other statistical organizations there are approximately 12,000,000 people unemployed in the United States today. There is not any necessity for this deplorable situation. The Federal Government should, without any hesitation, start a program of construction. All the slum districts and poorhouses in the United States and its possessions should be eradicated.

The Government should construct at least 5,000,000 homes, and these homes should be made of fireproof material, and should be sold or rented at a reasonable cost.

The Government should provide adequate pensions for the aged, widows with dependent children, disabled veterans, and all those who, because of a physical disability, are unable to obtain employment.

We should adopt the 5-day, 6-hour working week and every person should receive adequate compensation for their services no matter what kind of work he or she is compelled to do.

Sweatshops should be entirely eliminated.

Boys and girls should not be compelled to go to work until they have attained the age of at least 16 years.

Every boy and girl desirous of obtaining a high-school, college, or university education should be assisted by the Government if they are unable to pay for their education.

The Government should construct schools, hospitals, highways, tunnels, bridges, disposal plants, reservoirs, dams, canals, and other necessary projects. The reservoirs, canals, and dams should be used for the prevention of floods, droughts, dust storms, forest fires, and for other purposes.

Our rivers and streams should not be polluted with debris which is injurious to the health of the people.

The Government should own and control all public utilities and natural resources. Of course the Government should not confiscate these properties, but should purchase them.

No person should be deprived of water, gas, electric power, or other necessities if they are unemployed or for any other just reason. Dangerous places on the highways and grade crossings should be eliminated.

We should have uniform lighting systems and traffic regulations throughout the country.

All banking institutions should be nationalized. The people's money in the banks should be guaranteed. Only Congress should have the right to coin and regulate the value of money.

All chain-gang systems should be abolished. Dungeons in prisons should be disposed of and the inhuman treatment of prison inmates should be discontinued. Jails and prisons should always be kept in a sanitary condition.

The laws governing our people should be national and not State.

State senates and also the United States Senate should be abolished because they are unessential. When the Supreme Court of the United States declares that a law is unconstitutional, a two-thirds vote of the Members of Congress should be required to decide the question involved.

Appropriations should also be made for reforestation, soil erosion, airports, parks, playgrounds, development of our natural resources, the saving of the farm lands, and also for the development of medical, surgical, dental, biological, astronomical, geological, and all other arts and sciences which will promote the welfare and happiness of mankind.

The money which would be appropriated to carry out the construction program herein mentioned would be returned to the Government with interest.

End poverty in the United States.

MY REPORT TO THE PEOPLE OF THE THIRD CONGRESSIONAL DISTRICT OF NEBRASKA

Mr. STEFAN. Mr. Speaker, on January 3, 1935, pursuant to the mandate of the people of the Third Congressional District of Nebraska, given at the ballot box, I stood on the floor of this House and took the oath to well and faithfully discharge the duties of a Representative in Congress for the term ending January 3, 1937. It was a very happy occasion for me when I thus entered into this field of service for my fellow citizens, and I freely express my gratitude for the honor bestowed upon me. I deeply appreciate the responsibilities and obligations of the trust that my people have placed in me.

Now that the second and final session of the Seventy-fourth Congress is nearing its close, I feel it my duty to stand on this same floor and report to my people on the work that I have done as their Representative in Congress. Let me begin by acknowledging the considerate cooperation of my people. I fully realize that the record would not be complete if it neglected to give grateful recognition of the advice, the counsel, the support, and interest of my constituents. I have welcomed and shall continue to welcome the thoughtful aid of my constituents in the discharge of my duties.

Since I have come to Congress, I have furnished my district with a newspaper column, in an effort to keep the people continuously informed of what is taking place in their Nation's Capital. Every citizen is entitled to know what is going on in his Capital, and I thank those editors who cooperated in passing this material on to their readers.

Before a bill is considered by the House of Representatives, it is first introduced and then referred to the committee having jurisdiction over the subject matter. There are about 50 standing committees of the House of Representatives that initially handle all proposed legislation. These committees study the bills referred to them, and bills reported to the House from committees are placed on the appropriate House calendar for consideration.

I am a member of three committees in the House of Representatives—namely, the Committee on Education, the Committee on Insular Affairs, and the Committee on Public Buildings and Grounds.

In my work as a member of the House Committee on Education, I secured help for our Nebraska school system. I helped secure appropriations for vocational training, and through several speeches, called attention to the help needed by those ready to pursue their education in colleges. I likewise fought for keeping the real schools, the rural and town schools, open.

From a report of the United States Office of Education, I learned that a number of large factories are moving their facilities to the Southern States, chiefly because of their desire for an abundant supply of cheap labor. In these factories, workers are trained on production without pay for 6 to 12 weeks, and then transferred to the pay roll at learners' wages. The goods manufactured in this manner are then sold on the open market, coming into direct competition with other manufactured goods paying standard wages. I learned that the superintendents of the factories and foremen have been appointed as teachers and paid at the expense of the taxpayer. And, in addition to all this, the good name of the public school was used to cloak such schemes for commercial gain. After learning about this practice, I offered the following amendment to the Deen Bill, H. R. 12120: "A bill to provide for the further development of vocational education":

SEC. 6. No part of the appropriations herein authorized shall be expended in industrial-plant training programs, except such industrial-plant training be bona-fide vocational training and not a device to utilize the services of vocational trainees for private profit.

My amendment was unanimously accepted by the members of the Committee on Education, was incorporated in the bill, and is now a part of the act approved June 8, 1936.

The purpose of this section is to protect the taxpayers' money from use in the promotion and maintenance of sweatshops.

As a member of the House Committee on Public Buildings and Grounds, I succeeded in blocking a move by contractors and builders to alter the Nation's Capitol Building, thus saving over $3,000,000 to the taxpayers of the United States.

Likewise, as a member of this important committee, I was successful in stopping the destruction of historic buildings and the removal of historic trees, with resultant preservation of valuable historic architecture for present-day Americans.

On April 8, 1936, I sponsored the planting of a white-pine tree on the Capitol Grounds, in memory of the late J. Sterling Morton, the father of Arbor Day, former Secretary of Agriculture, and distinguished Nebraskan.

As a member of the House Committee on Insular Affairs, I assisted in stopping an effort on the part of foreign importers to remove the 3-cent excise tax on coconut oil coming into our country from our offshore islands. This tax removal, if successful, would have meant a loss of over $245,000,000 to the American farmer and producer.

When I discovered that blackstrap molasses was being imported into the United States and blended into alcohol, I fought against this cheap importation, which was coming into competition with the product of our American grain farmer, who, in the days preceding prohibition repeal, had been promised the market for his grain in the manufacture of alcohol. Accordingly, I introduced H. R. 10933, a bill making it unlawful to sell certain spirits containing alcohol produced from materials other than cereal grains, and for other purposes, and so forth. This bill was accorded a hearing by a subcommittee of the Committee on the Judiciary in the House and succeeded in making a favorable impression upon the membership of the subcommittee.

As a member of the Insular Affairs Committee, I, along with other Members of the House and Senate, was selected to go to the Philippine Islands to attend the inauguration of the new Commonwealth, and while there was made an honorary colonel in the Philippine Volunteers. While in the islands your Congressman was the single member of the official party to place flowers on the graves of Americans who are buried there.

During this trip to the Philippines, China, Japan, and Hawaii I made a careful study of labor conditions in these foreign countries, with the result that on my return to the United States, and during the second session of the Seventy-fourth Congress, I made addresses on the floor of the House against the cheaply made foreign goods which, when imported into the United States, come into direct competition with American-made products.

During my term in the House of Representatives I was a member of the prairie States farm group, composed of Members from the farming States. As part of my work in this group I labored for a lower rate of interest for farmers and was the first signer of the petition to force the Frazier-Lemke farm-mortgage refinance bill to debate and vote under the discharge rule of the House.

As a member of this group I was selected chairman of the subcommittee which worked on cereal-grain protection and I became the author of the cereal-grain bill.

During the Seventy-fourth Congress I consistently fought against all useless expenditures in an effort to safeguard the taxpayers' money.

By a speech on the floor regarding the importation of foreign products and resultant curtailment of consumption of domestic commodities, I brought to the attention of the House the importance of Nebraska as one of the chief hay-producing and hay-marketing areas of the world.

During the first session of the Seventy-fourth Congress I was the first of the Nebraska House delegation to make a speech on the floor of the House of Representatives, and was several times called upon by the national broadcasting chains to address the radio world.

Also, during the first session, your Congressman introduced the idea of installing a loud-speaking system in the House Chamber, that the proceedings of the House might be more easily heard and understood by visitors and Members alike.

Due to the fact that I thought the Army and Navy were costing the taxpayers too much money during peacetime, I suggested that administration of the Army and the Navy be combined for economy and for the sake of efficiency. On account of that suggestion, I received the commendation of President Nicholas Murray Butler, of Columbia University.

I have been opposed to the patronage system of employment now used in the post offices of the United States and, therefore, with Senator NORRIS, of Nebraska, I introduced a bill in the House to take the post offices out of politics and to place the Post Office Department upon a basis of efficiency and economy.

Not only was I opposed to the patronage system being used in post-office employment but also in appointments of cadets and midshipmen in the United States Military and Naval Academies. Therefore, I made all my appointments to these two schools following competitive civil-service examination, based on the merits of the candidates regardless of party politics.

I was placed on a committee to work out a program for farm-to-market roads. I was associated with Congressman BERT LORD, the father of the idea, and with him and the rest of the committee I personally interviewed President Roosevelt and other high officials, with the result that for the first time some of the relief money was brought to the rural areas and many millions of dollars were spent in actual farm-to-market road work.

This resulted eventually in placing farm-to-market roads as a permanent feature of the Federal highway system administered by the Bureau of Public Roads with authorization for direct, specific appropriations in lieu of merely administrative allocations from lump-sum emergency appropriations.

Until appropriations for the permanent set-up become available, another idea developed by this committee is being followed, to wit, that farm-to-market road improvement shall be a part of the relief program, financed out of emergency relief appropriations.

Your Congressman succeeded in securing additional funds for Nebraska works projects to keep unemployed men busy on meritorious projects, such as, for instance, the river revetment project at Niobrara, Nebr.

I fought against the hog processing taxes on the ground that the producer was paying the bill. My arguments met with the favor of farmers and many in the Department of Agriculture, but the powerful interests succeeded in keeping the $2.25 per 100 pounds processing tax on hogs for the duration of the A. A. A.

In the interest of the Nebraska farmer, I introduced a bill to allow debt-burdened farmers to repay their feed and seed loans, bushel for bushel, in kind.

One of my first acts after coming to Congress was to introduce a bill directing the appointment of a commission by the President to make a study of the "farm dollar" to the end that there might be discovery of the material factors contributing to the disparity between the prices commanded by agricultural commodities and the prices of commodities which must be purchased from the proceeds of the sales of agricultural commodities, with resultant impairment of the purchasing power of the so-called "farm dollar", and recommendation of curative steps.

I have assisted in legislation which carries the consent of the United States to the construction, operation, and maintenance of bridges across the Missouri River at Niobrara, South Sioux City, and Decatur.

I have introduced bills for the relief and assistance of the Indians resident in the district, and my service to them has been both legislative and departmental.

I thank the people of the Third District of Nebraska for their kindness in allowing me to serve as their Representative in the Congress of the United States. I have endeavored to please my constituents by working hard, earnestly,

and honestly, to render fair and impartial service to everyone regardless of partisanship. Likewise, regardless of partisanship, I voted for those measures which, in my opinion, would benefit Nebraska people, and against those things would I felt would have a different result.

A MESSAGE TO YOUNG VOTERS

Mr. WOLVERTON. Mr. Speaker, there has never been a time in our history as a Nation when it was more necessary for young men and women to study and give serious consideration to the conflicting forces striving to fix and determine our present and future policies of government.

The intensity of effort as well as the fundamental theories of government that are under discussion challenge attention. No young man or woman can afford to treat lightly the seriousness of the issues involved. To do so would show a lack of interest or concern as to the kind of government under which it will be necessary for them to live in the years that are ahead.

There are some individuals who express fear for the future. I am not one of such. I have an abiding faith in the conscience and good sense of our citizenship. My confidence is increased as I consider the fine type of intelligent young men and women who are coming into political activity.

Political parties use every endeavor to attract the attention of the young voter; they seek to interest them in the party welfare and gain their support for party principles and candidates. It is well that they should do so. Party virility is increased by the new ideas, independence, and aggressiveness so characteristic of youth.

As a result of the depressing conditions that have existed for the last few years, it is not hard to realize that many a young man and woman will ask: Is it all worth while? What is the use?

They see distress, failure, discouragement, dissatisfaction; an unparalleled economic condition resulting in paralysis of business, finance, industry, and agriculture, creating widespread unemployment, destitution, and need. Again they say, What has the future for us? My answer is: Today, as I look into the future, I can see a new order of things. The present may be dark and discouraging, but the light will break as surely as the rising run comes to us after a night of darkness. The spirit of America is not dead. It lives and will rise again to a new and more glorious day. But we must have the vision that will enable us to recognize that new conditions create new obligations and the necessity for the application of new and different policies of government. We must have not only the vision as to the necessity but also the courage to do things which a few years ago would have been unthought of because contrary to accepted theories of what is a proper field of governmental activity. Nor should we be deterred from this course through fear that to depart from what has been to what should be is in any way detrimental to our well-being as a nation. New conditions require new remedies.

Constitutional objections, made by some, to increased activities by the Federal Government in promoting the welfare of our people, overlook the fact the Constitution is a living, not dead, instrument of government. It has survived because the interpretation of its powers and restrictions has been wisely considered in the light of changing conditions.

The intent and purpose of the framers of the Constitution to confer wide power in the effort to form a more perfect Union is made clear and emphatic by the broad and strong language used in the preamble to the Constitution. It says:

> We, the people of the United States, in order to form a more perfect Union, establish justice, insure domestic tranquillity, provide for the common defense, promote the general welfare, and secure the blessings of liberty to ourselves and our posterity, do ordain and establish this Constitution for the United States of America.

These words are fraught with meaning. They constitute the master phrase of the Constitution. They represent the ideals and the dominating thought of the framers of the Constitution as to the fundamental purposes of our Government. All that follows in the several provisions of the Constitution as adopted gathers importance as means to accomplish the aims and purposes set forth in the words of the preamble.

Well, planning "to promote the general welfare" is not new in America. The greatest plan for social well-being that the world has ever known is the Constitution of the United States, and America's first "brain trust" was that little group of 55 men who put that plan on paper. When they signed that document of experiment they joined the immortals.

A few words about these illustrious men might be appropriately spoken at this time when "brains" and "youth" are subject to attack by those who are interested in the maintenance of the old order of things. Of those 55 men, 24, or nearly half, were college graduates, several with highest honors—truly a remarkable record when we consider the conditions prevailing when they were in their "teens" and "twenties"—more than a century and a half ago; 6 of their number were, had been, or were to become college professors, 3 college presidents, and 7 founders or trustees of colleges.

And then, as to their age, we think of them as old men of grave demeanor, venerable with experience and wisdom. But what are the facts? Only 13 of the 55 had passed their fiftieth birthday; 22, or nearly half, were under 40; Madison, the "Father of the Constitution", was 36; Hamilton was 30; 1 of the Nation's fathers had reached the ripe old age of 26; and 3 more were tottering around in their "twenties."

These men, averaging 43 years young, wrote the Constitution of the United States. These young men when they wrote the Constitution deliberately "planned" to meet a great emergency. We must do the same. Our struggle today is not to overthrow their work. It is to keep their work from being overthrown. It is to redefine and recapture the benefits and liberties they intended to guarantee in perpetuity to every American. Today we are at one of the great turning points in human affairs. We are experiencing a travail of soul in our struggle to "establish justice" and "promote the general welfare", but America will triumph, and with the victory will come a more genuine sense of justice, a greater recognition of rights of individuals, a more certain guarantee of opportunity for all, a new order that will make for the youth of today a future filled with possibility of achievement.

Young men and women face the future with a responsibility resting upon them to give their best endeavor to promote the future welfare of their country.

Active participation in public affairs is the duty of all. How can this obligation be most effectively fulfilled—by acting singly and alone or in unison with others?

The division of the American people into political parties is the result of many years of trial and experiment in government. Experience has proved that two parties are necessary for good government.

Political parties were created not by law but by necessity. Some method of ascertaining the will of the majority on important governmental policies had to be found. Thus parties came into existence as the instrumentality by which the people could express their conviction on declared principles and programs.

For more than a century our Government has been carried on by party machinery. Ours is a government of parties.

Some individuals pride themselves on independence of party obligations, yet thoughtful consideration of what party solidarity has accomplished for the general welfare, which could not have been accomplished by independence of party action, is not only a sufficient justification for our American system of party government but also a clarion call to the young men and women to identify themselves with party activity.

No student of the history of the different political parties in America can help but be impressed with the record of the Republican Party.

For 56 years out of the seventy-five-odd years of its existence it has controlled and directed the destiny of our Nation. During this period only 3 Democrats have been elected President while 11 Republicans have filled that office. Truly, it may be said that the history of the development of the United States, since the Civil War, has been synonymous

with the history of the Republican Party and its accomplishments.

During this long period of service issues have frequently arisen that vitally affected the welfare of our Nation. Conditions were ever changing, the welfare of our people demanding new policies to meet the ever-progressing movement of a great Nation as it forged ahead to become the most outstanding Nation in the world. The Republican Party faced each new issue with courage, fortitude, and intelligence, and solved each upon the theory that the welfare of our people must ever be paramount.

It was in the spirit of service to "human rights" above "property rights" that the Republican Party was born, and that made possible the freedom of all within our borders regardless of race, color, or previous condition of servitude, and that guaranteed the right of suffrage to all.

It was recognition of the "public interest" as above "private property rights" that through the Republican Party found expression in the Sherman Antitrust Act, the Clayton Act, the Hepburn Act, the Mann-Elkins Act, the Interstate Commerce Act, the Transportation Act, and numerous other acts supplementing the original acts for the purpose of bringing great aggregations of wealth under governmental control in the interest of the public welfare.

It was recognition of fundamental principles promoting the general welfare that brought forth, through Republican activity, the income-tax amendment to the Constitution, the amendment providing for the direct election of United States Senators, and the submission of the child-labor amendment to the States for ratification.

It was likewise under Republican leadership that joined the waters of the Atlantic and the Pacific by the cutting through of the Panama Canal—one of the greatest single steps of progress ever taken in the history of the world.

In the promotion of world-wide peace, this Nation, under Republican Party leaders, has taken the lead among the nations of the world. The names of Hay, Root, and Kellogg will ever be outstanding for the fine, high quality of service they rendered to the cause of international peace.

In warding off foreign encroachments in this hemisphere, avoiding entanglements in foreign politics, expanding commerce, maintaining a high standard of living by protecting American industry, agriculture, and labor, building up the Navy and the merchant marine, improving waterways and harbors, restraining monopolies, cultivating pan-American friendship, limiting naval armament, establishing the Federal Budget, protecting workers from an influx of unskilled foreign labor, refusing to cancel foreign debts, renouncing war, promoting treaties to insure world peace, reducing the public debt, keeping the Government out of business, and in all other policies, both domestic and foreign, the Republican Party has constantly aimed to advance the interests of the United States and to provide for the welfare of its people.

While the Republican Party was in no way responsible for the present depression, yet as soon as the depression fell upon the country the Republican President secured an agreement between capital and labor to maintain the standard of living. Next he launched the country on an extensive construction of public buildings, and thereafter prevented further immigration by an Executive order; organized a national committee to relieve unemployment; prevented an international financial collapse through the moratorium; organized a credit corporation to strengthen banking institutions; provided financial help for industry, railroads, and banks by the creation of the Reconstruction Finance Corporation; increased credit facilities by liberalizing the laws affecting the Federal Reserve System; recommended measures to relieve depositors in closed banks, also home-mortgage bank system to aid home owners; aided the farmers through extended mortgage loans and additional funds for livestock and seed planting; and established the national credit by the decision to balance the Budget through increased revenue and drastic governmental economies.

These are not all of the accomplishments of the Republican Party during its history, but they form ample proof of the splendid leadership of the Republican Party in national affairs.

The Republican Party is the party of the future as well as the party of the past. As it was dedicated at birth to "human rights", as it remained true to that ideal of government in the past, so in the changing scene of today it will be true to its original purposes and give expression thereof in the attitude it assumes toward present issues and the policies it recommends as a solution of our economic distress. It is the party through which young men and women can find the greatest opportunities for making progress as public leaders. As it dominated the past, so it challenges the future and calls to its colors with an irresistible appeal the young men and women of America.

BADGERING THE SCHOOL TEACHER

Mr. KELLER. Mr. Speaker, on the 17th of June came the news in all the newspapers of Washington City that Representative THOMAS L. BLANTON, of Texas, had sent out a questionnaire to all the 2,900 school teachers of the District of Columbia, involving their religious beliefs, their academic freedom, and casting suspicion on their loyalty as American citizens.

Even with knowledge of the shameful Blanton "red rider", it was difficult for me to believe such a proceeding as this had actually taken place. I waited until the second day, only to find the newspaper reports fully confirmed, and Mr. BLANTON admitting he had actually written and sent out the questionnaire. Thereupon, I presented the following resolution and asked that it be considered as privileged under the rules of the House:

Whereas the gentleman from Texas [Mr. BLANTON] has directed a letter to each and every school teacher in the District of Columbia seeking certain information, of which the following is an exact copy:

THOMAS L. BLANTON, Member of
17th District Texas Committee on Appropriations
Secretaries:
Louise Kennedy Marx.
Ruby Saylore Whipkey.

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D. C., June 15, 1936.

As chairman of the subcommittee handling the District appropriation bill, to obviate a hearing and to save you the time and inconvenience of coming before us in person, I request that you kindly give us the following information, filled in by you in the blank spaces provided therefore, and signing same, and return promptly in the inclosed addressed envelope, requiring no postage, namely:

Please state: Your present position? _____. School? _____. Salary? _____.

Do you believe in any of the doctrines of communism? _____; if so, which? _____. Do you approve of communism being given any favor or support in the schools? _____.

Do you believe there is a God? _____. Do you believe in some form of religion? _____.

Are you a subscriber to the Social Frontier? _____. Were you asked to subscribe? _____. If so, state by whom? _____.

Are you a member of the N. E. A.? _____. Since when? _____. Who suggested joining? _____.

Have you a copy of Conclusions and Recommendations? _____. Have you read same? _____.

Have you a copy of Counts' Dare the School Build a New Social Order? _____. Have you read same? _____. Do you approve of same? _____. Do you approve of Dr. George S. Counts' writings? _____. Do you approve of Dr. Charles A. Beard's writings? _____. Have you been to Russia? _____. Did you attend school there? _____.

Have you read Boy and Girl Tramps of America by Thomas Mineham? _____. Do you approve it? _____. Are you in favor of high-school girls reading it? _____. Would you read it aloud? _____.

Have you read Made in Russia? ____. Do you approve of it? ____.

Do you approve of Scholastic as a school magazine for high-school students? _____. Do you know why the school committee's recommendation to eliminate it from the Washington public schools has been held up? _____. If so, why? _____.

Very truly yours,

(Signed) THOMAS L. BLANTON.

My answers above are correct:

_____ Position _____
Address _____

Whereas this was done as chairman of the subcommittee handling the District appropriation bill; and

Whereas a franked envelope requiring no postage was inserted in the letter for the purpose of the teacher's reply; and

Whereas the use of the language "to obviate a hearing and to save you the time and inconvenience of coming before us in

person, I request that you kindly give us the following information" would lead the recipient to believe that a failure to answer the questionnaire would result in the issuance of a subpena hauling the teacher before the subcommittee handling the District appropriation bill; and

Whereas this constitutes a thinly veiled threat that a subpena might be issued; and

Whereas the subcommittee does not have authority to force the attendance of anybody at a hearing; and

Whereas the action of the gentleman from Texas [Mr. BLANTON] in directing this letter to the teachers in the aforementioned manner might lead some to believe that the subcommittee and the House of Representatives were joining with the gentleman from Texas [Mr. BLANTON] in demanding this information in this threatening manner; and

Whereas the spread of this belief might tend to greatly lessen the dignity of the House of Representatives and violate the integrity of this House by assuming an authority which had not been delegated to him: Therefore be it

Resolved, That the House deplores the action of the gentleman from Texas [Mr. BLANTON], which was not authorized by the House of Representatives nor by any competent agency thereof, and that his action shall not be construed as being an act authorized by the House of Representatives nor any competent agency thereof.

The resolution was read, and, upon objection of a Member that the motion was not privileged, the Speaker sustained the objection. No discussion of the matter was possible, and the House denied the opportunity of uttering a protest against this outrage.

This resolution is, in fact, a very mild protest, in view of the offense committed by this outrageous questionnaire. Had the gentleman from Texas wanted to do the considerate thing, he would readily have admitted his mistake, corrected it by an apology, and wiped the matter out. Unfortunately, he did not see it that way, regardless of the opinion of the House or of the public sentiment concerning his acts.

Let us note that Mr. BLANTON sent this questionnaire on his official congressional paper. It was sent in a franked envelope, and a franked self-addressed envelope for return of the questionnaire was enclosed, and attention of the school teachers called to that fact. Thus it had every outward appearance of being an official act and was intended to convey that impression to the teachers. Now read the statement preceding the questions and note that Mr. BLANTON stresses the fact that he is chairman of the subcommittee handling the District appropriation bill. Bear in mind that the District bill carries the money to pay the salaries of the school teachers of the whole District of Columbia.

The implication is clear. Next, note the concealed threat "to save you the time and inconvenience of coming before us in person." In short, the implication to the teacher must have been: Unless you fill out this questionnaire about your religious beliefs, your right to teach boys and girls under you the plain facts of history, the political tendencies and developments of our times, unless you shrive yourself of the suspicions of Mr. BLANTON, of Texas, of any and all knowledge of Russia or the political ideas of the Russian people, your salary and your right to teach school in the District of Columbia will be placed in jeopardy. If you do not answer the questions in a way satisfactory to Mr. BLANTON, you will be hauled before an inquisition that will subject you to 'suspicion of treason'."

I have no quarrel with the head hunters of the Communist variety whom the recent controversy has paraded before you. Personally, I have always questioned the results of their tactics, inasmuch as it seems to me that suppression or persecution of a political belief, whatever that belief may be, always results in more benefit than harm to the movement. The gentleman from Minnesota [Mr. CHRISTIANSON] has discussed that question with fine intelligence, and if you did not hear him, I invite you to read his remarks in the RECORD of June 18, 1936, Seventy-fourth Congress, on page 9980.

I have in my district in the great State of Illinois one of the largest teachers' colleges in the country where annually approximately 2,000 young men and women enroll to prepare themselves as teachers. Their interest in the problems of the past as well as those of the present is ardent, genuine, and admirable. Their ability to study, to learn, and to teach, when they have acceptably completed their work, has never been questioned. Certainly no one in an official position with the authority granted him by his position has ever attempted an inquisition, indictment, or suppression of them. We in southern Illinois would not stand for that. I have taught school. I have known many hundred school teachers personally. I never knew one in my life whose patriotism was not at least equal to that of the gentleman from Texas [Mr. BLANTON].

One of my greatest regrets is that I have been unable to do more toward giving the school teachers of Illinois a great reward for the noble sacrifice many of them have made the last few years in order to keep the schools open for every girl and boy in our State. If you gentlemen have not had occasion to look into this chapter of the story of our national life the last few years, I invite you to do so. It will warm your hearts with admiration for a body of public servants who have never been given the reward that society rightfully owes them.

My interest in the schools and the teachers of my own State has naturally led me to observe with admiration the modern, and highly efficient school system we have here in the District of Columbia. To me that is something in which every Member of Congress who shares any pride in national education ought to rejoice. The Congress has full legislative authority over the District of Columbia, including the schools, and under the many years of encouragement of this body, this magnificent school system has been developed. Up to last year no Member of Congress has ever had the hardihood to interfere with it.

This policy of trustfulness and helpfulness is in keeping with the best traditions of our great country. Thomas Jefferson set out very simply the vital fact that a democratic republic can succeed only in proportion to the scope and extent which general intelligence is developed through the universal education of its citizens. This is peculiarly true because in a republic every public policy must be expressed through political action. The educators of America clearly understood from the beginning that only through academic freedom can the highest state of mental development be attained and the greatest usefulness given expression. The whole search after truth must depend on untrammeled freedom of the men and women who carry it on. Science could not have grown into the tremendous usefulness it has attained without the greatest possible freedom of its teachers and students. Out of this thought the school systems of our States has grown throughout the 150 years of our national existence. The colleges and universities which have grown into such great importance in serving the country have from the start very properly and very consistently insisted on the entire freedom of their teachers. The poorest paid, but greatest and most vital of all professions is teaching school. We must keep it free as it always has been.

I have at no time engaged in personal criticism. I do not now, but to pass over without protest a mistake so vital as this questionnaire which the gentleman from Texas presumed to send out would have meant to condone the act, would have been to stultify myself personally, and would be a failure on my part to fulfill the duty which I owe to the great office I have the honor to hold. To permit the further exercise of an espionage already begun would in the end destroy the spirit of this great corps of 3,000 highly trained, broadly educated, thoroughly prepared builders of youth in the District of Columbia. I cannot join the few friends of Mr. BLANTON in believing he is in any wise infallible. Nor can I agree with them that having done some good, he should be permitted to do much harm without just criticism. It would be the very worst thing we can do to sit supinely by and permit any man in this body to embarrass the public school system of the District of Columbia, whatever may be his motive—whether, indeed, any motive beyond misguided interest could prompt such action.

Let me repeat that the public-school system of Washington is recognized as one of the best in the world. It is properly so held, and whatever is done here by the Congress is reflected in the school systems of our many States. And

what we do as the sponsors of this great school system will be noted as the attitude of the United States Government toward education in its broadest sense. So far the Congress has wisely left the building of this school system to the teachers, to the educators, to the thinkers. This has been done throughout the Nation as well as in the District of Columbia.

There is, indeed, and, in fact, no possible excuse for the sending out of this thoroughly vicious questionnaire—whatever be the motive. Not one of the three gentlemen who so praised the author of it for a moment ever implied that Mr. BLANTON had any authority for doing such a thing—that he had any power to carry out his threat; that he in anywise represented this House. He knew and they knew that he had no authority, no power, no mandate from the House. He knew and they knew it was a presumption seldom equaled in public or private life. If you remove from consideration the psychological red herring now being exercised overtime by all our perspiring politicians—that of communism—not a single one of this trio would dare to justify his act. It is the world-old game of justifying one folly by charging a worse one. They overlook the fact that the questionnaire itself grossly outrages the third paragraph of article VI of the Constitution, which says:

> But no religious test shall ever be required as a qualification to any office or public trust under the United States.

Now, let us repeat some of these questions—set them out alone—and see how they look.

> Do you believe there is a God? Do you believe in some form of religion?

Read those two questions over again. Read the third paragraph of article VI of the Constitution again. Ask yourself if that is not a religious test, what would constitute a religious test? It may occur to you to wonder why a Congressman should have the effrontery to attempt to require a religious test here in this twentieth century. Let me call to your attention the question Congresswoman NORTON asked Mr. FISH, of New York. I quote from the RECORD:

> Mrs. NORTON. I just want to ask one question. Has the gentleman any evidence that communism has ever been taught in the schools of the District of Columbia?
> Mr. FISH. Absolutely none whatever.

In short, no one charges, no one ever has charged, no one can truthfully charge that there is, or ever has been any teacher in the District of Columbia teaching communism to his pupils.

The whole questionnaire has as its basis nothing more substantial than the suspicion in Mr. BLANTON's mind that some teacher might be teaching communism. And he accepts the naive conclusion that if such there be that the BLANTON questionnaire will bring forth the culprit.

Equally unfortunate are the questions about the political beliefs of the teachers. Mr. BLANTON seems to glory in showing his own great knowledge of the bad books and bad magazines of alleged communistic lore. He furnishes a list that will naturally stir the curiosity of most normal-minded boys and girls.

This whole situation in this questionnaire is but the culmination of the "red rider", which has continued to disgrace this Congress for the past year. The school teachers of the District of Columbia are compelled by law to sign this statement each month before they can draw their salaries:

> I, _____, a teacher of the District of Columbia schools, hereby state that I have knowledge of the provision appearing in the act of Congress approved June 14, 1935 (Public, No. 138), as follows:
> "That hereafter no part of any appropriation for the public schools shall be available for the payment of the salary of any person teaching or advocating communism."
> and further state, without reservation and for the purpose of obtaining payment of salary otherwise due me, that I did not at any time during the period _____ to _____, 193__, in any school of the District of Columbia, or elsewhere, teach or advocate communism.

This is known as the "red rider." It was sponsored as an amendment to an appropriation bill by this same Mr. BLANTON. It is charged that this was put into the appropriation bill "when nobody was looking." Be that as it may, it is certainly true that Mr. BLANTON, through the use of dilatory parliamentary tactics, has prevented the consideration of a bill to repeal that infamous provision. He and his cooperatives are aware that when that question comes before the Congress this "red rider" will be wiped off the statute books. Only through the misuse of the rules of the House has consideration of it and a vote on that question been prevented.

To show the idiocy of such a law it is only necessary to point out that if a teacher of current events should call the attention of his class to the fact that the Government of Russia, in an attempt to get away from the mistakes which communism has so far made—it is now proposing a constitution somewhat along the lines of our own—it would be questionable, at least, whether that teacher could draw his salary the next month. If that teacher should then proceed to instruct his class that all democratic government should, and usually does, grow out of the experience of the people governed, as Thomas Jefferson so well pointed out should be the case, and should the teacher express the opinion that the great Russian people would likely in due course work out their own salvation, even though it might not be exactly like our own, that teacher would lose another month's salary for teaching communism.

To students of politics, as all Americans should be—and outside the District of Columbia are—political intolerance is as deadly to political progress as is religious intolerance to growth of religion. Here is a censorship already established "over the mind of man", over academic freedom of the school teachers of the District of Columbia, the fruit of BLANTON's "red rider." He now seeks a religious censorship through his most obnoxious questionnaire.

The "red rider" implies a suspicion that the teachers of the District of Columbia are teaching communism. It is an insult to the character and American patriotism of these men and women. It is a disgrace to the Congress that this "red rider" has not been repealed at this the first session of Congress after its questionable method of enactment. It insults the integrity of the members of every board of school directors and board of education in our land. The wisdom and patriotism of these unpaid thousands of public-spirited men and women have contributed largely to the success of the greatest school system in the world. They have not needed and would not have tolerated the interference of the politicians of the country in the building of this Nation into the best-educated people on earth.

This is the center of the Nation educationally. The question involved in the Blanton questionnaire and in the Blanton "red rider" is a national question. It involves the freedom from political influence over the schools of the whole country. It involves the academic freedom of all educational institutions. It reaches out and touches every teacher in every school in the United States. Both the "red rider" and the Blanton questionnaire should be known to and considered by every teacher and educator, every man and woman with a progressive mind, who knows what academic freedom has done for the world.

I am interested in only one thing insofar as the conduct of the gentleman from Texas is concerned. That is, he shall not, with my consent or acquiescence, place the school teachers of the District of Columbia on trial without at least producing a warrant to justify his actions.

I serve notice on Mr. BLANTON that the "red rider" must go, and that there shall be no more "questionnaires."

I serve notice on Mr. BLANTON and any supporters he may have, that any attempt to continue the present political interference in the schools of the District of Columbia, or to extend that influence, will meet with every possible resistance of which I am capable.

He shall not insinuate a charge against the teachers or members of the school board without stating it clearly, so its truthfulness may be put to the test.

He shall not establish any inquisition before which to bring any school teacher, without the full authority of this House legally granted.

He shall not be permitted to further bluff and bulldoze the teachers under the pretense that his membership in this body gives him any right, power, or authority further to persecute them, without denunciation of his pretension on the floor of this House.

He shall not apply any religious test without challenge of his right or any man's right to do that thing forbidden by the Constitution.

THE NEW DEAL AND ITS ALTERNATIVE—RESTORATION, RELIEF, AND RECOVERY VERSUS REFORM AND CHAOS

Mr. SNELL. Mr. Speaker, when the gavel falls today upon this session, it marks the end of the Seventy-fourth Congress and the last of the New Deal sessions, four in all.

The people of this country will now have before them for approval or disapproval the strange, fantastic perversion of their Government, known as the New Deal.

They will be called upon in November to pass judgment upon what has been done and what is proposed to be done under the New Deal. A mere recapitulation of the outstanding features of the New Deal would fill a large volume. I shall not attempt this recapitulation.

But it is my duty, as I see it, to point out to my countrymen the dangers that await them in case the Government of the United States is perverted further by New Deal objectives and theories. In order to throw light upon the future we must consider what has been done and undone, and what is unmistakably intended.

First and foremost, let us bear in mind the situation that confronted this country when the New Deal became the rule of government, and what remedies the New Dealers attempted to apply. Let us separate, if we can, genuine efforts from false political propaganda. Let us make allowance for unforeseen contingencies which forced changes of policy and made campaign pledges worthless. Let us follow the course of the New Deal through these four eventful sessions to the present hour, so that we can make an accurate forecast of what is to come, based upon what has been done and what is declared to be the coming New Deal program.

In a single word, the United States in 1933 was suffering from the consequences of the World War, which threw the whole world into acute distress. Ten million active men had been killed and additional millions disabled. More than $250,000,000,000 of the wealth of nations had been destroyed. Normal relations were disrupted and commerce ruined.

All patriotic Americans deemed it necessary to stand by President Roosevelt in taking heroic measures to lift the United States out of the depression. Like other Members of Congress, I was proud to sink partisanship and support the President. With practical unanimity, although with rising doubts, Congress enacted the laws desired. You all know what these laws were.

The two chief objectives were relief and recovery. Relief was twofold—relief of unemployment and relief of agriculture.

Unfortunately for the New Deal, and unfortunately for the prestige of Congress as a maker of laws, the two ambitious projects adopted for recovery of industry and relief of agriculture were declared unconstitutional and invalid. But in the meantime the people of the United States—the individual millions—were busily at work extricating themselves, and the country as a whole went forward. Industry seemed to do better after escaping from the rigors of the N. I. R. A., and agriculture suffered no setback when the A. A. A. was scrapped.

Early in the New Deal history we discovered that the President of the United States was not satisfied with attempting to accomplish relief and recovery. He adopted strange theories of "reform", originating God knows where, and aimed at God knows what. Mixed in with these reform projects was an insatiable lust for power. It was difficult to determine whether reform or power was the chief objective. No doubt the President believed that the reforms he had in mind could not be accomplished unless he was granted unprecedented power. At any rate, he demanded practically unlimited power, and in order to obtain it he employed tactics which destroyed the confidence of many men in Congress who had theretofore supported him.

As the New Deal program unfolded it was seen that the lust for power, the determination to effect vast experimental "reforms", and discreditable political methods (including debauchery of the civil service) were accompanied by astounding absence of any sense of responsibility for the safeguarding of public money against waste, extravagance, and graft.

The solemn decisions and warnings of the Supreme Court, responsible under God for faithful enforcement of the Constitution ordained by the people as their supreme law—supreme over Presidents, Congresses, and courts—were flouted and derided by New Dealers. The country was dismayed by the unmistakable purpose of the President to execute his program of experimental "reforms" in spite of these decisions and warnings. He sent bills to Congress which were intended to circumvent the Constitution and the Supreme Court; and the obedient majority passed these bills over the protest of those who now saw all too clearly the deadly consequences that would follow adoption of the President's program.

Along with the passage of these disloyal and destructive laws came renewed demands for stupendous sums of money, to be spent at the discretion of the President, ostensibly for relief and recovery, but actually to carry forward his mysterious program of "reforms." Congress handed over the purse of the Nation to Franklin D. Roosevelt.

Now we have reached the time for judgment—the day of reckoning is nearly at hand.

What do we find? We find that most of the important New Deal laws have been thrown upon the ash heap. We find a sinister and vindictive determination to punish all American industry under the pretense of punishing malefactors. We find a fixed purpose to fasten experimental "reforms" upon the people at a time when they are struggling to get upon their feet. We find them staggering under a crushing load of debt and taxes at the very time when all their energies are spent in trying to recover, when their resources are low and their businesses deranged by unwise laws and threats of direct competition by the Government itself. We find billions spent without reducing the number of the unemployed or putting into effect any plan for employing them except by further spending of public money. We find decision after decision by the lower courts, based upon Supreme Court decrees, all pointing to the inevitable invalidation of laws which the New Deal is vainly attempting to execute.

In a nutshell, we find the American people heroically striving to recover, and that their greatest handicap and most dangerous antagonist is the New Deal government, which professes to be trying to aid them.

The people need certainty of values in their daily transactions and commitments. They are struggling against the uncertainty of values. No one knows what the dollar will be worth tomorrow. Who dares to make a long-term contract which would furnish employment for men now maintained by public money?

The people need certainty in the honest transaction of their business—certainty against Government competition and arbitrary bureaucratic interference with honest trade.

The people need certainty in Government policy. They have enough to do now, without being subjected to experiments that would involve added taxes and changes in their system of living and doing business.

The people need certainty as to the absorption of the unemployed by normally operating industry, agriculture, and commerce. They are given uncertainty.

The people need certainty—reasonable certainty—as to the taxes they must pay. They are not only given uncertainty, but are under notice that debts, taxes, and deficits will go higher in order to finance the mysterious "reforms" that are planned by the New Deal.

The people need certainty against disastrous foreign competition in their own market. They have uncertainty and growing competition that injures industry, labor, and agriculture.

The people need certainty and stability in government. They have uncertainty and instability, manifested by persistent attempts to evade the Constitution and plain declarations that the Constitution must be upset if necessary to accomplish experimental reforms.

The sublime paradox of the New Deal, the crowning triumph of absurdity, is that both the promises and the acts that broke the promises were made in the name of the public welfare. The promise of economy and the frenzied squandering of billions—both for the public welfare. The promise of sound money and the adulteration of the dollar—both for the public welfare. The promise of adherence to the civil service and the filling of tens of thousands of jobs by political hirelings—both for the public welfare. The promise of lopping off useless agencies and the creation of more than 40 larger and more extravagant ones—both for the public welfare. The promise of a breathing spell for bedeviled American industry and the declaration of war to the knife—both for the public welfare. The promise of obedience to the Constitution and the frantic appeal to Congress to disregard the Constitution—both for the public welfare. The promise that $4,880,000,000 would restore employment, and the demand for $1,500,000,000 more, with no decrease in unemployment—both for the public welfare. The promise that there would be no new taxes, and the new law imposing $800,000,000 in taxes—both for the public welfare.

Is it any wonder that industry has failed to employ more men while it held its breath, wondering what would happen next? Is it any wonder that the people have been bewildered by the wild gyrations of their government? The only certainty that the people have had during this paroxysm has been the certainty that any promise made would be broken. By discounting administration promises 100 percent in advance some men have got near the truth and the facts.

There it stands, sir, the record of the New Deal. In all the annals of our country, there is no parallel to the wreckage piled up by the New Deal—the wreckage of invalid laws; the wreckage of financial and economic stability; the wreckage of Federal finances; the wreckage of futile efforts to abolish unemployment; the wreckage of public and private confidence in the President's promises and pledges; the wreckage of protection against the waves of pauper-labor imports that drive down the American standard of living; the wreckage of individual and teamwork enterprise, destroyed by bureaucracy armed with usurped power.

On this gigantic pile of wreckage it is proposed that we shall plan and build for the next 4 years. What a foundation upon which to build the hopes and labors of the American people.

Apologists of the New Deal ask: "What alternative do you propose? How could the Republican Party do any better?"

The reply is to be found in the Republican platform and the Republican candidate for President of the United States. The platform declares and the candidate personifies the Republican program in one word: "Restoration."

First of all, we would restore the stability of the Government by removing all danger of subverting or violating the Constitution. We would restore the people's confidence in their Government by stabilizing its finances, abolishing extravagance and graft, reducing its expenditures, and avoiding new and costly experiments. We would reassure every honest businessman that he will be unmolested by the Government, by crooked competitors, or by foreign monopolists of his market. We would restore confidence in the independence of Congress, to the end that fair and wise laws shall be enacted that will encourage industry, agriculture, and labor to recover and prosper. We would restore confidence in the Presidency by squaring performance with promises. We would restore confidence in the minds of millions who combine their efforts in honest teamwork by organizing and operating corporations.

It was teamwork that won the independence of the United States. It was teamwork that established the Union. It was teamwork that devised and ordained the Constitution. It was teamwork that saved the Union. It was teamwork that won the War with Spain and the World War.

By restoring the security of honest men honestly cooperating through corporations, labor unions, farm co-operatives or otherwise, the Republican Party would restore employment and prosperity.

As against the program of the New Deal, which arraigns one set of citizens against another and the Government dictating to all, the Republican Party proposes to restore the simple and practical rule of cooperation between the Government and the people. By the teamwork of Government and people, all striving for restoration of confidence, stability, and prosperity, the havoc wrought by the New Deal can be wiped away, the trend toward ruin stopped, and the threat of new wrecks removed.

That, sir, is the alternative offered by the Republican Party.

LANDON OR ROOSEVELT IN 1936?

Mr. ENGEL. Mr. Speaker, the Republican and New Deal conventions are over. Landon and Knox are the candidates of the Republican Party, and Roosevelt and Garner are the candidates of the Democratic Party. Both platforms have been adopted. The Republican Party boasts of the most progressive candidate and platform in its history since the days of Theodore Roosevelt.

The Democratic platform was necessarily a defense of the administration policies as followed during the last 3½ years and of its abandonment of the platform of 1932, upon which the President was elected. We now look forward toward the election, and political prophets are beginning to predict results. These predictions are usually biased and influenced by the desire of the person making them to have his party win. He tries to instill confidence into the adherents of his party by making his party's chances to win look as favorable, and the opposite party's chances look as unfavorable, as possible. He knows that lack of confidence means lack of morale, and lack of morale is always a great factor in determining who gets the most votes.

Occasionally political landslides occur. Politicians and those who have failed to keep in touch with public sentiment are surprised. The people themselves and those who have analyzed before the election the forces that have brought about the landslide are not surprised. They knew what was likely to happen.

Let us analyze the forces that brought about the Democratic landslide of 1932. Let us take a political inventory of those forces as they existed in 1932. Let us see whether there is enough change in sentiment to affect the results and whether anything has occurred to bring back to the folds of the Republican Party the millions of voters who, for some cause or another, deserted that party and joined what they thought was the Democratic Party but what proved to be a New Deal party. Let us determine from the facts what forces the Republican Party has in 1936 that it did not have in 1932 and try to reach some conclusion based upon these facts.

LEADERSHIP

The first factor in any campaign is leadership. Without casting any reflection on the quality of past leadership, the Republican Party will have in the coming campaign in John Hamilton the most dynamic and forceful leader it has had in recent years. Mr. James Farley, the New Deal leader, had everything pretty much his own way during the past 2 or 3 years. He kept saying things about the Republican Party and its leadership, and not much was said in reply. When the new chairman, Mr. Hamilton, took the helm Mr. Farley began his usual broadcasting of political wahoo and immediately attacked the red-headed leader of the Republican Party. When the old Tammany cluck got through with the brown leghorn game rooster from Topeka, he found his feathers scattered far and wide; found himself ready for the bathtub as far as bareness was concerned, and does not know yet just what happened to him. Already we hear New Dealers who formerly praised Farley criticize him. They say that, like the proverbial parrot, "he talks too much." So far as leadership is concerned, even the new dealers admit that Hamilton is just a little too much for Farley.

VETERAN VOTE

There are 4,000,000 World War veterans in the United States. These veterans, together with their wives, fathers, mothers, sisters, and brothers, have a potential voting power of from eight to ten million votes. In 1932 they were extremely antagonistic toward Mr. Hoover and the Republican Party. Hoover had vetoed their pet measure, the bonus bill. Justly or unjustly, he was accused of having driven their comrades, the bonus marchers, out of Washington with tear gas and bayonet. During the 1932 campaign, if you wanted to get into an argument without support from anyone, all you had to do was to go to a veterans' clubroom and start to defend Mr. Hoover and the Republican Party, and the fight was on. This group of voters constituted a force which in itself was able to and did bring about Democratic victory in 1932—a force that can in itself bring about Republican victory in 1936.

Where does the veteran group as a class stand in the campaign of 1936? On the one side, we have Mr. Roosevelt twice vetoing the bonus. Time and again Mr. Roosevelt used language, and especially in his veto messages, which was highly antagonistic toward the veteran. This was particularly noticeable and uncalled for in his message when he finally signed the bill restoring the pensions of the Spanish-American War veterans. Not only is he being charged with vetoing the bonus but he is being charged with having taken $600,000,000 a year out of the disabled veteran on the plea of economy and then spending extravagantly and wastefully twenty or thirty billions of dollars. The veteran is peeved, to say the least. Go to any veterans' clubroom today and try to defend Mr. Roosevelt. Chances are 10 to 1 that some veteran whose pension was cut will leap to his feet and give you a mouthful to carry away. And what has the Republican Party to offer for 1936? On the Republican side the veteran is given his first opportunity of voting for a comrade and veteran for the Presidency of the United States. Not only has he a chance to cast his vote for a comrade for President but he also has his opportunity of casting a vote for a comrade for Vice President. Between Roosevelt and Landon there can be no doubt where these potential eight or ten million votes are going. Landon will carry the veteran vote by a tremendous majority.

And how about the thousands of Spanish War Veterans? They still feel that Roosevelt owes them the pension he took away from them by the economy bill. On the Republican side is Knox, a Rough Rider, who followed Teddy Roosevelt in going over the top at San Juan Hill. The Spanish War veteran will go unanimously for Landon and Knox.

NEWSPAPER SUPPORT

In 1932 it is estimated that the Democratic Party and Roosevelt had the support of 67 percent of the newspaper circulation. Today it is estimated that from 75 to 80 percent of the newspaper circulations, particularly in the Northern and pivotal States, are against Roosevelt and the New Deal party. A great many of these newspapers have been hammering the administration and its policies from day to day and from month to month during the past 2 years. This force cannot be ignored. It is a power in creating and crystallizing public sentiment. No man has ever been elected to the Presidency on any ticket in the face of such tremendous opposition on the part of the public press and no man ever will.

PUBLIC-UTILITY STOCKHOLDERS

Three million public-utility stockholders have been and are being told daily that the President is creating unfair competition in the power field, and that such unfair competition will ultimately destroy their investments. In hundreds of thousands of cases, this means their bread and butter. They see the T. V. A. and other power dams being built with public moneys, 50 percent of which is charged to flood control, national defense, and what not and not charged against the investment. The other 50 percent is borrowed at the low rate of interest made possible by Government credit. They see these public dams operating tax free without paying their share of the burden of public taxation. The property the Government purchases is taken from the tax roll, reducing the valuation of the taxing unit, and increasing the rate and therefore increasing the amount the other taxpayers of that tax unit have to pay.

On the other side, when they get their balance sheets from their company, they find that they have to furnish 100 percent of the capital, pay commercial rates of interest on all moneys borrowed through bonds or preferred stock, and are expected to pay dividends to their stockholders. They see the tax item year after year showing the tremendous amount paid in taxes to township, county, school district, village, State, and other public treasuries. These 3,000,000 stockholders know that their company cannot exist in the face of this sort of competition and that, if it continues, their investment will and must ultimately be destroyed. The law of self-preservation makes them cast their vote against the New Deal and for the Republican Party. These 3,000,000 stockholders with wives, husbands, brothers, sisters, fathers, mothers, and so forth, constitute another potential 6,000,000 votes. They are scattered, as a rule, through the pivotal States of the North, whereas those supporting the President's power policies are, as a rule, either in the Democratic States of the South, through the Tennessee Valley area, or in the Western States where the electoral votes per State are small. Where can these investors go for protection except to the Republican Party?

THE BUSINESSMAN

In 1932 the Republican Party could not raise a wooden nickel in most of the cities from the American businessman. Why, had not Roosevelt charged the party and Hoover with extravagance? Did not he promise business a 25-percent reduction in governmental expense and accordingly a 25-percent reduction in taxes? Did not Roosevelt say the depression was caused by high taxes, waste, and extravagance of the Republican Party and its leadership? Did not he say that the large public debt and a failure to balance the Budget meant bankruptcy and ruin? The Republican Party could not raise enough money to pay the postage in a reasonably effective Presidential campaign. And what does that same businessman say today? He has been taxed, retaxed, and taxed again. The public debt has climbed to unprecedented heights. Every session of Congress since the present administration took the helm has passed a tax bill on top of the last tax bill. Perhaps the most alarming of all is the bill passed by the present Congress which forces the distribution of surpluses.

You remember the Biblical story about the famine in Egypt; about the dream of Pharaoh of the seven lean kine and seven fat kine, of the 7 years of surpluses followed by 7 years of starvation? You remember the policy followed by Pharaoh on the advice of Joseph in filling the granaries during the fat years so they might eat during the lean years. The business heads of American corporations in the past have followed the advice of Joseph. During the fat years prior to 1929 the wise businessman filled his financial granary with surpluses. During the lean years since 1929 he fed his stockholders and employees out of those financial granaries. It is estimated that 50 percent of the dividends paid by corporations to stockholders, big and small, have been paid out of the surpluses placed in the financial granaries during the prosperous years. The automobile industry today is leading the way back to recovery in spite of desperate handicaps, such as the recent tax bill, with moneys placed in the surplus during the fat years. General Motors alone is spending $50,000,000 this year for new plants and equipment out of the surpluses set aside during those years. Two thousand employees will be placed at work in one city in Michigan where work is needed most by the building of a new factory. According to the report of the Secretary of Labor, we spent $2,000,000,000 in 1934, employing 500,000 men in a public-works program. In other words, it costs $4,000 to keep one unemployed person at work 1 year. If this be true, then it would take $8,000,000 to keep these 2,000 people employed in a public-works program each year. All this is being done by

General Motors with money placed in its financial granaries during the fat years, to be drawn out during the starvation years.

What would have happened had the present tax bill, which will soon become law, and which takes 42 percent from surpluses, been in force and effect during the past 15 years. The American businessman knows that there would have been no surplus. The financial granary would have been empty. We would have wasted our substance during prosperous years to starve during lean years. The American businessman knows all of this. He knows what the principles of sound business are. He knows the advice of Joseph to Pharoah was sound and the policy of the present administration in destroying and making impossible the filling of the financial granaries during fat years to be used during lean years will mean bankruptcy and ruin. He knows that the first lean year and the first substantial loss of his company will mean insolvency unless there is a surplus to offset that loss. Go down the street and ask the average businessman what he thinks of the present administration. The answer you will receive universally over the Nation is the same. "Four years more of this", he tells you, "and there won't be any more business." "If there is any business, the Government and not the owner of the business will run it." One of the biggest assets of the Democratic Party in 1932 was the businessman, big and small. Fear and the law of self-preservation has driven him into the ranks of the Republican Party. He will be found there working desperately for Republican victory because Republican victory is his only chance of self-preservation.

THE FARMER

After 3½ years chasing will-o'-the-wisps the farmer is beginning to realize that no policy based upon a philosophy of scarcity is sound. The recent Soil Conservation Act is conceded by administration officials to be merely an attempt to carry out the unsound policies of the unconstitutional A. A. A. The administration farm policy reads something like this: "We are going to raise $400,000,000 (one-half of the amount raised by the recent tax bill) to pay the farmer for taking out of production 50,000,000 acres of land. By doing so we are eliminating farm-crop surplus and increasing the price the farmer received. The farmer, having more money, will buy more of the city's manufactured goods, thereby creating more employment." All of this sounds good until we begin to ask: "What are you going to do with the men who plowed, harrowed, planted, cultivated, and harvested these 50,000,000 acres of land that now will not be plowed, harrowed, cultivated, and harvested? What are you going to do with the man who worked in the warehouses that stored the crop harvested on these 50,000,000 acres of land? What about the railroad men employed in transporting this crop to markets in the cities and the thousands of men who found employment in the distribution of this crop?"

Have not you created more unemployment on the farmer's end than you have created employment on the manufacturer's end of the production line? Undoubtedly this accounts at least in part for the fact that after 3½ years of boondoggling and of spending the most tremendous sums in the history of the country we have still eleven or twelve million men on the unemployed lists, a number which is larger than when Mr. Hoover went out of office 3½ years ago. The farmer is beginning to realize all of this.

Four years ago he would not believe, and you could not convince him, that Mr. Wallace, the Secretary of Agriculture, meant what he said in his pamphlet, "America Must Choose."

He refused to believe that the time would or could come in free America when, as Mr. Wallace said, "Every plowed field will have a license nailed to a post." Today he is willing to believe that will be done which has at least in part already been done. He has been conservative as a rule. The mortgage he has been struggling to pay and the interest he has been compelled to pay for years make him realize as no other citizen realizes that this gigantic public debt must be paid. Not only must that debt be paid but the annual interest must be paid with money earned by the sweat of some taxpayer's brow. While he is scraping and saving pennies to enable him to pay his yearly taxes and interest on his mortgage, he sees all around him extravagance and waste. Men are being paid wages far above the wages he can pay on his farm. He tries to employ help only to find that no one will help him, and when they do, they ask the same wages the Government pays with his tax money but which he cannot pay. They will not leave Government employment with short hours and large wages to work for him at long hours with such pay as he can afford. As one relief worker put it recently, "Why should I get up at 5 o'clock in the morning, milk your cows, work 10 hours, then milk some more cows and do more chores, when I can work 40 hours a week for the Government and get more money?" Four years ago the farmer would not listen to the Republican Party when he was told that the depression was world-wide. Today he listens. Furthermore the northern Republican farmer is at heart a tariff protectionist. It was the Republican tariff policy that kept him in the ranks of that party for years. Today he sees himself placed in competition with cheap foreign labor by the reciprocal tariff policy of the administration. On the one hand, he is being told by the administration that he will not be hurt; on the other, he sees millions of dollars of competitive farm products coming into the country and knows that he is being hurt. With a western liberal candidate who understands the farm problems as few men do the Republican Party will get its share of the farm vote in America.

THIRD PARTY MOVEMENT

Four years ago Father Coughlin was supporting Mr. Roosevelt and the Democratic Party. Sunday after Sunday his voice was heard over the air by millions. "Roosevelt or Ruin" was his thundering battle cry week after week as he attacked Mr. Hoover and the Republican Party and supported Mr. Roosevelt and the Democratic Party. Today those same listeners hear that same voice thundering over the air, "Roosevelt and Ruin." His attack on the Republican Party has been lost in his attack on Mr. Roosevelt and the New Deal Party. The third party is his party. His followers will come from the ranks of the Democratic Party of 4 years ago because that is where they were 4 years ago. The Republican Party cannot lose support it did not have. A prominent man, Democratic Member of Congress, recently stated in my presence that it would mean 50,000 votes in his district alone. If, he stated, Father Coughlin opposed Mr. Roosevelt and the Democratic Party in the coming election it would mean defeat. While the third party may not elect many of its members to office it will in many instances hold that balance of power which means election or defeat to old-party candidates. The Father Coughlin adherents, having added their support to the Democratic Party 4 years ago, that support must be deducted from the strength of the Democratic Party of 4 years ago, regardless as to where it goes.

DISSENTION WITHIN THE DEMOCRATIC PARTY

Those who study politics do not minimize the strength of Governor Smith, Bainbridge Colby, and others who walked out of the Democratic Party. The real Jeffersonian Democrats are dissatisfied to say the least. A remark one hears repeatedly is that this is not the Democratic Party but the New Deal Party which is in power. This is not a democratic but a socialistic form of government we have. Some will stand aside, say and do nothing, hoping for but not daring to do anything to bring about the defeat of Mr. Roosevelt. This feeling is particularly evident in the Democratic South. The doctrine of State rights is a religion with the South. They see that doctrine cast aside and see the New Deal Party doing everything possible to bring about a strong centralized government. They know that this means an abandonment of the cherished States' rights doctrine over which the Civil War was fought.

One must indeed be blind to say that this will not affect results and especially in New York with its 47 electoral votes.

PROHIBITION

In 1932 prohibition was a fundamental issue. Hundreds of thousands of Republican voters cast their vote for Mr. Roosevelt and the Democratic Party because they were not satisfied with the Republican plank on that issue. Today the issue is settled. That voter is satisfied and will without doubt be found back in the ranks of his old party.

CANDIDATES AND PLATFORM

The Republican Party is going into this campaign with the most progressive platform under the most progressive leadership in its history since the days of Theodore Roosevelt. That platform and leadership ought to satisfy the most progressive Republican. Knox followed Teddy Roosevelt not only over San Juan Hill, but he followed him through the Progressive campaign of 1912. Landon has demonstrated his progressive leadership in the part he took in writing the most progressive platform in the history of the party.

RESULTS OF THE ELECTION

A careful and close analysis of the forces that are responsible for victory and defeat point in no uncertain terms to a Republican landslide in 1936. The politician will claim victory for his side because he tries to instill confidence in his followers, and lack of confidence means defeat. The analyst, considering cold facts, will not be surprised at the outcome when he considers the facts. To verify this a recent Washington press dispatch carried the confidential report of Emil Hurja, who has been the New Deal administration's political analyst. He has been Farley's chief statistician and first assistant. Naturally his report would be as optimistic as possible to satisfy his chief, and yet, according to the Hurja report, the New Dealers can lay claim legitimately to only 222 electoral votes, which is 44 less than enough to insure reelection of the national ticket. The press report says that Hurja's figures would have created something less than the sensation they did had he not in the past been so uniformly correct.

In addition to the 222 electoral votes he is now claiming, Hurja has itemized approximately 100 more votes, by States, out of which he reports the New Dealers have an even chance of gaining the necessary 44 for victory. The 222 votes claimed as certain for Roosevelt by Hurja include 113 votes in the solid southern block. Hurja's list of doubtful States from which it is hoped the New Dealers will be able to gather in 44 votes, include California, Minnesota, Maryland, Oklahoma, Missouri, Wisconsin, Tennessee, West Virginia, and Iowa. Taking Hurja's figures and estimates, and giving the Democratic Party the 222 votes plus an even break in 100 doubtful electoral votes, which would be 50 votes, then according to Hurja's own figures Roosevelt would be elected by six electoral votes. Certainly not a vote which would justify Mr. Farley's recent utterances as to the number of States they will carry. However, when this estimate was made the third party was not in the field. With Mr. Lemke, from North Dakota, running it will be conceded that both North and South Dakota will either be carried by Mr. Lemke and the new party or the split in the Roosevelt ranks will throw those two States into the ranks of the Republican Party. Among the States with the larger number of electoral votes to which Hurja at this time makes no claims save to list them as "bad news" for Farley are: New York, 47 votes; Massachusetts, 17; Michigan, 19; Ohio, 26; and Pennsylvania, 36.

When you take into consideration the fact that the Hurja report is based upon election returns and figures obtained prior to the nomination of Landon and Knox, and the adoption of the most progressive platform in the history of the Republican Party; when you take into consideration the further fact that the veteran vote could not have been considered in those reports, his analysis, which practically predicts defeat for the administration, must be considered exceptionally optimistic.

CONCLUSION

Can Roosevelt be elected?

First. With eight to ten millions of veteran votes as a class against him, including the Spanish-American War veterans.

Second. With 80 percent of the newspaper circulation opposed to him.

Third. With three to six millions of public-utility stockholder votes opposed to him.

Fourth. With the businessman against him.

Fifth. Without the solid support of the farmer the Nation over.

Sixth. With the opposition of Father Coughlin and the new third party, who were for him 4 years ago.

Seventh. With dissension within his own party and with the opposition or half-hearted support of men like Governor Smith, Governor Ely, Bainbridge Colby, and many more leaders, all of whom, with the possible exception of Governor Smith, supported him in 1932.

Eighth. With prohibition not an issue.

Can he win against the most dynamic leadership, with the most progressive platform and candidates since the days of Theodore Roosevelt?

The answer is an emphatic "no." The political analyst will say that the above means an overwhelming defeat for the New Deal party and a landslide back to the Republican Party in 1936.

My prediction is that there will be an exodus of New Dealers out of Washington next January like the children of Israel leaving Egypt, and they will not be on their way to the promised land.

THE COLORED CITIZEN ADVANCES UNDER THE ROOSEVELT NEW DEAL ADMINISTRATION

Mr. COCHRAN. Mr. Speaker, the New Deal administration's recognition for the past 3½ years of a large number of distinguished colored citizens by appointment to positions of trust and importance in the Federal Government at Washington has demonstrated beyond question that merit and not color has been the rule of President Roosevelt, the members of the Cabinet, and the Congress.

Under the last national Republican administration there were only six Negro citizens who held positions of a superior nature in the Federal Government, through either Presidential or Cabinet officer's appointment, to wit: Municipal Judge James A. Cobb; Hon. Arthur G. Froe, recorder of deeds; Attorney Perry W. Howard, Department of Justice; Attorney William Houston, Post Office Department; William Jackson, Department of Commerce; and Karl Phillips, conciliator in the Department of Labor.

The official record reveals more than 40 outstanding places to which colored citizens have been appointed by the Roosevelt New Deal in order that they, too, might have a place at the head of the table in determining the policies of the present administration in its unprecedented plan and program for social justice and security to all alike, regardless of race, creed, or color.

These persons and the positions now held by them in the Federal Government are alphabetically listed below:

Allen, L. R., statistician, Works Progress Administration.

Anderson, Anthony H., junior engineer, Rural Resettlement Administration, Newport News, Va.

Atkins, James A., field assistant, Educational Department, Works Progress Administration.

Bethune, Mrs. Mary McLeod, director, Colored Activities, National Youth Administration.

Bond, Max, supervisor of recreation and training, Tennessee Valley Authority, Wheeler Dam, Ala.

Bailey, Walter T., architect, participating in a Chicago housing project.

Brown, Edgar G., C. C. C. adviser on Negro affairs, and special assistant to the director of Emergency Conservation Work.

Clarke, Thomas H. R., deputy recorder of deeds, District of Columbia.

Davis, John A., research assistant, Department of Labor.

Duke, Charles S., planning engineer, Rural Resettlement Administration.

Edwards, Mrs. Thyra J., assistant to rehousing supervisor, P. W. A., Chicago.

Evans, Joseph H. B., adviser on Negro affairs and administrative assistant to the Rural Resettlement Administration.

Ferguson, Arthur, junior engineer, Inspection Division, Public Works Administration.
Gammon, John, R. R. A. community and project manager.
Hall, Charles E., specialist in Negro statistics, Department of Commerce.
Hamilton, Bertram, special assistant to the Attorney General, Department of Justice.
Harsh, F. W., Jr., land purchaser, Chicago Housing Project, Public Works Administration.
Hastie, William H., assistant solicitor, Department of the Interior.
Houchins, Joseph R., assistant business specialist of Negro Affairs Division, Department of Commerce.
Hubert, Giles A., project analyst, R. R. A. (Summer leave of absence to study cooperatives in Europe.)
Hunt, Henry A., assistant to the Governor, Farm Credit Administration.
Jackson, Sydney M., Special Chief Clerk at Large, Post Office Department.
Jones, Dewey R., associate adviser on Negro affairs, Department of the Interior.
Jones, Eugene Kinckle, adviser on Negro affairs, Department of Commerce.
King, Dr. Louis E., junior historian, National Park Service, Gettysburg, Pa., C. C. C. Camps.
Mann, Theophilus M., legal staff, Public Works Administration Regional Office, Chicago, Ill.
McKissack & McKissack (architectural firm), Consultants, Nashville Housing Project (Tennessee).
McNeill, William C., R. R. A. Junior Engineer.
Melby, John A., architectural draftsman, Department of the Interior.
Millender, LeRoy (St. Louis), foreman Rural Resettlement Administration.
Moron, Alonzo, Commissioner of Public Welfare, Virgin Islands.
Oxley, Lawrence A., chief, Division of Negro Labor, Department of Labor.
Prescott, J. Parker, associate supervisor in management branch, P. W. A. Housing.
Reed, R. R. (Chicago, Ill.), assistant executive secretary, Code Authority for Funeral Industry.
Reid, Ira DeA., director Negro white-collar survey, W. P. A. (Administration Department of the Interior).
Reid, Orleanis, Jr., field planner, R. R. A.
Roberts, Lewis R., community project manager, R. R. A., Bricks, N. C.
Robinson, Hilyard R., architect, Department of the Interior.
Scott, Hon. Ormand J., judge of the Municipal Court of the District of Columbia, Presidential appointment, confirmed by the United States Senate unanimously.
Smith, Alfred E., Federal Emergency Relief Administration, administrative assistant Works Progress Administration.
Smith, C. V., resident engineer in charge, R. R. A., Newport News, Va.
Stanton, Robert, R. R. A. Field Service.
Tandy, Vertner R., consultant to Robinson, Williams & Porter (architectural firm), Langston Terrace Project, Washington, D. C.
Thorne, Frank, rehousing assistant, Housing Division, Public Works Administration.
Thornton, William F., assistant engineer, R. R. A., Washington, D. C.
Thompkins, Dr. William J., recorder of deeds of the District of Columbia. Presidential appointment, confirmed by the United States Senate.
Vaughn, Ralph, architectural draftsman, Resettlement Administration, Department of Agriculture.
Wilkes, Charles, community project manager, R. R. A., Mound Bayou, Miss.
Wilson, John, one of principal architects, New York City housing project.
Weaver, Dr. Robert C., adviser on Negro affairs, Department of the Interior.
Williston, O. M., landscape architect, Langston Terrace Project, Washington, D. C.

This list does not include 132 colored educational advisers in the C. C. C. in more than 30 States of the Union, colored case workers, administrative assistants in the W. P. A., P. W. A., N. Y. A., and A. A. A. in the States, nor secretarial, stenographical, clerical, or subclerical appointments (of which there have been several hundred colored) in the Federal Government at Washington, D C., during the Roosevelt New Deal administration.

Something of the character, participation, and success of these New Deal policies are graphically reflected in the figures below of the Civilian Conservation Corps popularly known as the C. C. C., as to what the Civilian Conservation Corps is doing for colored youth under the emergency-conservation work.

Approximately 35,000 young colored men and war veterans, one-tenth of the total C. C. C. enrollment, are engaged on work projects throughout the country; $700,000 a month is allotted by colored C. C. C. boys to their parents and dependents back home; 150,000 colored C. C. C. boys have served in the corps and many have gained from 7 to 15 pounds in weight during the past 3 years; 132 colored college graduates are serving C. C. C. camps as educational advisers; 25 colored Medical Reserve officers and chaplains of the United States Reserve Corps are on active duty in the Nation's C. C. C. camps; 300 colored typists are assigned to C. C. C. headquarters of the commanding officers and supervisory forces; 1,200 colored cooks are steadily employed in C. C. C. mess halls; 10,000 colored C. C. C. enrollees in the past 3 years have completed courses in first-aid through cooperation of the emergency conservation work and the National Red Cross.

To summarize the report of Mrs. Bethune, director, colored activities, to the President on the National Youth Administration, we find 28 colored leaders are members of the State N. Y. A. advisory committees, North and South. An equal number of colored assistant State directors and trained college men and women of the colored race are filling high executive positions in New York, Pennsylvania, Florida, Virginia, Kentucky, Illinois, Tennessee, Indiana, Ohio, Missouri, Georgia, Colorado, California, and Texas; which State programs have had the largest participation of young colored men and women.

The National Youth Administration is helping approximately 26,000 colored youth to continue in school through payments for part-time work under supervision of school authorities. These young people range in age from 16 to 25. There are approximately 5,000 of these colored students in the undergradute class and 70 graduate college students in both the strictly Negro institutions and the leading universities. The average monthly rate per college student is $15, while the graduate students receive from $25 to $30 monthly. Those students of high-school classes are being paid a maximum of $6 per month.

Of the $50,000,000 expended by the N. Y. A. organization during the past year, it is conservatively estimated that the financial benefits to the colored youth is about one-tenth of the amount set aside.

It is important to note here that recent surveys reveal that the educational facilities, length of school term, and salaries of colored teachers in the South have been advanced more than 30 percent since the Federal Government stepped into this program and the advent of the Roosevelt New Deal.

The physical equipment and health benefits to the colored race and the Nation as a result of the erection of new school buildings, playgrounds, swimming pools, gymnasiums, auditoriums, and recreation centers under the P. W. A., F. E. R. A., and W. P. A. programs are incalculable to present and future generations. Millions of dollars in wages have come to colored workmen and great stimulus has been given to the heavy industries and business has picked up generally through purchases of materials by the Government for this emergency construction. In production plants, steel mills, and factories, thousands of Negroes have again been gainfully employed.

It is estimated that nearly 30,000 otherwise unemployed colored school teachers have been given work in all parts of the country. Better salaries in the South, as well as the North, have been reported. It should be noted that the minimum salary rate approved by Administrator Hopkins for all W. P. A. workers has meant payment of a much higher scale of wages for the hundreds of thousands of colored persons on State and Federal projects. A far larger number of colored citizens have been employed under the Federal Government's emergency public-works program in capacities commensurate with their specialized training than heretofore in private industry.

Hundreds of research technicians, administrative officials, supervisors, skilled workmen, foremen, and other white-collar workers of the Negro race have had equal opportunity under the Roosevelt administration.

Nearly $2,000,000 was specially earmarked by President Roosevelt for surveys on the occupational opportunities for Negroes, State vocational and educational aid, and a Nation-wide household workers' project to train the tens of thousands of persons on relief for gainful employment. Colored instructors and personnel workers, men and women, have been employed to prosecute this important job of training and placing competent household workers.

While projects beneficial to Negroes have been adopted in many States, I make special mention of an estimated expenditure of $2,000,000 for a new colored high school and repairs and additions on 13 existing structures through the form of grants and Federal aid by the Public Works Administration in my own State, Missouri. This, of course, was only the Government's share, the State and cities adding a much larger amount to the total cost of the improvements.

The new city hospital in St. Louis sought for the past decade by colored citizens of St. Louis, my home city, has been completed through Public Works Administration financial support.

Reports received by H. A. Hunt, Negro assistant to the Governor of the Farm Credit Administration, indicate not only colored farmers are receiving this important Federal service but that they are paying back and meeting their obligations promptly and fully. It is important, also, to note that without exception the annual conference of the local and State associations are attended by the farmers in the South of both races. The local borrowers from the F. C. A. automatically become members of the association.

Credit unions under the jurisdiction of the Farm Credit Administration, not only appeal to rural communities but also to urban sections, and here, too, the participation of colored citizens in such group organizations as the railway clerks, waiters, school teachers, et cetera, are general, and many colored officers are represented on the governing boards of these organizations in all sections of the country.

It should be apparent to all that this brief summary shows beyond question that the Roosevelt administration has done more for the Negro in 3½ years than the Republican Party did since its inception. The Negroes of this country will not be misled by the efforts of Republicans to misrepresent the unprecedented recognition of the Negro during the present administration.

PRESERVE THE CONSTITUTION—A DEFENSE OF TRADITIONAL AMERICAN LIBERTY AND INDIVIDUAL OPPORTUNITY BY THE MAYOR OF PHILADELPHIA

Mr. FENERTY. Mr. Speaker in extending a welcome to the delegates and visitors attending the Democratic convention in Philadelphia, our old historic city displayed the true cordiality and hospitality that have become synonymous with the name of Philadelphia. Without a trace of partisan feeling, the people of the city, a vast majority of whom are Republicans, did all in their power to make comfortable and happy the visit of the Democratic sojourners in our midst.

Following a dinner tendered to the Governors of the States by the City Administration, a celebration was held at Independence Hall, the birthplace of the world's grandest political documents, the Declaration of Independence and the Constitution of the United States, where the mayor of the city, the Honorable S. Davis Wilson, delivered an address emphasizing the sacredness of the Constitution under which America has grown great, and urging upon his hearers the necessity in these distressful days of preserving those eternal principles of constitutional liberty to which it gives eloquent expression, and which are now so insidiously assailed as outworn and old-fashioned from so many un-American sources. In this, while the mayor vigorously and without political bias enunciated principles that are inseparable from those of the Republican Party which elected him, he was also as a Republican mayor expressing his adherence to doctrines that are likewise essentially and eminently American. Although Philadelphia is enthusiastically devoted to its Republicanism, I feel that many of the Democrats visiting us would also like to retain the text of the address to which the mayor of Philadelphia gave utterance on that occasion, and it therefore follows in its completeness.

ADDRESS OF MAYOR S. DAVIS WILSON, OF PHILADELPHIA, AT THE RECEPTION TO THE GOVERNORS OF THE 48 STATES, CABINET MINISTERS, SENATORS, AND MEN OF NATIONAL LEADERSHIP, PRECEDING THE OPENING OF THE DEMOCRATIC NATIONAL CONVENTION AND HELD IN INDEPENDENCE HALL WITH A NATION-WIDE BROADCAST, MONDAY EVENING, JUNE 22, 1936

My fellow countrymen, where, with greater force, with greater meaning, or with more genuine fervor could Americans participate in an assemblage of such distinguished Governors and National leaders than in this hallowed spot, Independence Hall? In a world held in the grip of doubt and confusion because of the conflicts of the day, we of America should pause for a moment and be deeply conscious within our very souls of the freedom and the liberty inherent in the fabric of our great Nation, the early concepts of which first saw the light of day at this very spot upon which I now stand.

In the complicated industrial, economic, and governmental affairs of our country today, strong and often violent differences of opinion are disturbing our minds. It is gratifying and a source of the highest hope that at the very root of these differences with respect to matters of policy and philosophy of government the motivation behind those who are for and against the vital issues of the day, is a jealousy and a zeal for that trusted freedom and liberty of action which have always represented the foundation stone of American greatness. The spectacle of great nations across the sea, struggling under aged rivalries and hatreds, points the way for America. Here in Independence Hall the courage and the vision of the founders of the Republic charted out the course of a free Nation, destined for all that we have become.

In the midst of our struggle for a return to economic security and material well-being, let us not be unaware of the blessings that our system of government and our mode of life continue to sustain. Let us ever be vigilant to protect our institutions and our basic system of government so that whether it is given over into the hands of one party or of another party, we shall not swerve from tried and true precepts which have stood the test of time and marked the growth and the wealth of the greatest Nation on earth.

I am happy to receive the Governors of most of the States of our Union here at the shrine of liberty. No man enters and gazes upon this ancient bell, sanctified with the sacrifices and the bloodshed of those who died that we might live and grow, without becoming deeply aware of his part in the pattern of this great country. It seems to me that the very circumstances of this occasion reflect more eloquently than any word could express the wondrous consummation of the dreams of men, of the pioneers who braved this forest to chart out a course which generations have followed.

Here on this hallowed spot, against the power and the domination of a crowned head of Europe, a little handful of great men announced their defiance of a rule that would deny them freedom. With a wisdom that has remained the marvel of man, they framed the greatest document ever conceived—the Constitution of the United States. Through years of struggle that witnessed stalwart courage, dauntless enterprise, and endless sacrifice, we come to the present moment when, through the wonder of science, it is made possible for all practical purposes to bring to this gathering, by the turn of a simple dial, the millions of men and women who constitute America.

I am moved to look upon this momentous occasion as one great all-inclusive meeting; one great outpouring of the hearts of 120,000,000 of people who must soon determine in which direction our Government must follow. In my mind's eye I see that awesome army facing America's most prized possession, our cherished Liberty Bell. The principles announced at the early town meetings in this city, where liberty was founded, tonight find their modern counterpart in the listening millions who await the sound that will go forth to you from this precious bell.

It is a happy augury that we are upon the eve of the one hundred and fiftieth anniversary of the adoption of the Constitution in Philadelphia. This is a preliminary celebration of that event. The actual celebration of the one hundred and fiftieth anniversary of the adoption of our Constitution will occur next year, in 1937, and the principal celebration will be held in Philadelphia, here—in the very room in which we now stand, for it was in this sacred chamber that the Constitution of the United States was proposed and debated, and here it was adopted.

We of Philadelphia are very proud, in a reverent way, of the possession of the historic treasures which are bound up in and around this room and Independence Hall, but we are not selfish about it. There is so much that is awe-inspiring in the never-to-be-forgotten events which occurred here, which excites our deepest feelings of reverence and profound sentiments of humility, that there is no room for so narrow and base a thought as selfishness in the hearts of any true Philadelphian who is first and foremost a true American. We feel, therefore, that in the possession of Independence Hall, the Liberty Bell, and the many other shrines connected with the launching of our great Nation we are but trustees for all Americans the country over.

It is with this thought in mind that I propose a national committee to carry out our great constitutional anniversary celebration next year to be made up of people from one end of America

to the other, throughout its length and breadth, who desire to have a part in the Philadelphia celebration of the one hundred and fiftieth anniversary of the adoption of the Constitution of the United States.

To that end I here and now cordially invite all who may be within sound of my voice in this Nation-wide broadcast to write to me, addressing me at Independence Hall, Philadelphia, and by so doing you will become a member of this national committee, so that the great constitutional anniversary celebration in Philadelphia in 1937 shall in truth be one in which the people of the whole country shall participate and all patriotic Americans have an active part.

The event is one the importance of which I cannot too strongly stress. It will mark the gratitude of Americans of today to the founders of our Nation for that great charter of a free people and the formation of a new idea in Government under which our Nation has grown and thrived as has no other in the whole history of the world. From a pioneering adventure of a few hundred men and women of intrepid courage and dominating determination who landed on a foreign shore inhabited by suspicious and unfriendly savages, landed in inhospitable primitive forests without any other means of shelter or of sustenance than they themselves should provide, we have grown in the short space of two centuries to a Nation unexcelled by any other in history.

Then, when the enterprise and thrift of these hardy pioneers, meeting and overcoming terrifying obstacles and opposition, had expanded the population along the eastern seaboard to several hundred thousand who were housed as comfortably and adequately as any in the Europe of that day; when business and commerce had been founded and built up, with budding institutions of learning and culture, and when men of professional status and genius equal to any then existing in the world had come to be a part of our life, the meanness and cupidity of a foreign government sought to check and control us to its profit and our loss.

It was at this critical juncture that the issue arose, whether to submit and curtail our national existence, to curb our expansion and submerge our national individuality and culture; or, to fight for independence and a right to develop along our own lines as a free people. These patriotic founders accepted the challenge and fought the War of the Revolution to a successful conclusion. Then they sat down in the peace they had won to form the Government under which they and their descendants should live.

The inspired wisdom of the patriotic men and the time gave birth to the Constitution of the United States, admired and commended, even studied and copied, by the statesmen of the world from that day to this.

Under this charter we have become a foremost power in the affairs of the world; a people approaching two hundred million in population and constituting a Nation of wealth, of material, artistic, scientific, cultural, commercial, industrial, and maritime development and achievement which have not been exceeded by any people in recorded history.

The Government under which we have attained this remarkable result is charted in that Constitution. The precepts which have made it possible for a young nation to progress and go forward to the extraordinary achievements the United States of America has to its credit in the short period of 150 years of endeavor were conceived by the writers of the Constitution and are embodied in that great instrument. These are precepts of government which assuredly have stood the test of time, and equally assuredly they are precepts to which all true Americans will adhere with loyal fervor to the end of time.

We wish all people well, including those of foreign nations, and we derive no satisfaction from the misfortunes of other friendly peoples. Yet we cannot fail to observe that the United States is one of the few countries of the world in which its original form of government has survived in the titanic political, social, and economic upheavals which have followed the World War. Here democracy sits enthroned upon foundations firm and secure. Let nothing undermine or uproot those foundations.

To have sustained for a century and a half the incalculable progress, to have attained the enlightenment in so short a time with which America has been blessed under the Constitution, is indeed the occasion for celebration. We are not without our troubles, of course, but it could only have been by Divine guidance that this great charter of liberty was framed. We find Europe threatened with war; we find millions upon millions of people dominated by dictatorships and suffering from exploitation, with its resultant waste and poverty. As I gaze upon this old bronze bell, strong, incorruptible, eternal, I see in it a symbol of the power and the sturdy strength of a people destined for still higher and greater things.

In the tapping of this bell, its voice and its ancient message must echo into the home of every citizen of this country and imbue him and inspire him with a consciousness of his public duty, of the necessity for realizing the part he must play in the future of our Nation. Yes, it might well echo its eternal message around the world, leaving in its path the same vision and strength that it has held for my fellow Americans for over 150 years. Its first ringing marked the deliverance of an entire people into freedom. It is like some permanent sentinel that has stood through the years. There is in it a stolid reminder of how temporal we are and how inevitable it and its great symbolic truth will go on and on and on.

Let us then breathe in again tonight the spirit of this historic bell; let us rededicate ourselves to eternal warfare against all enemies of our Government; let us reaffirm our determination to carry out the duty which falls upon every American citizen—to guard this unique Government of ours and its basic principles.

We are only passing figures. We have no exclusive rights in the common heritage of liberty endowed to us from this very spot. We are merely trustees; we have merely borrowed for a little while the privileges and licenses that America extends to those who live within her borders. Indeed, more than a license and a privilege; a guarantee of full liberty of action, to worship God in one's own way, to live and breathe and have one's being as a free man. In the last analysis these are the treasures of life. From them can be and have been developed all that modern life has to offer. The danger has always been and always will be that we hold such priceless things too lightly. Before this great dedication ends let there be a reaffirmance of our allegiance to this bell, to this hallowed spot, to those principles marking a new epoch in our national affairs. With the tapping of this priceless heirloom of liberty, my last fervent hope is that a new and powerful consciousness of national unity shall enfold us all, leading us, under Divine guidance, into complete fulfillment.

THE INVINCIBLE JEW

Mr. FENERTY. Mr. Speaker, under leave to extend my remarks, I include the following copy of an address to be delivered by me under the auspices of the Jewish War Veterans of the United States, from Philadelphia, over the stations of the National Broadcasting System on July 4, 1936.

THE INVINCIBLE JEW

My fellow citizens, it is with genuine happiness that I have accepted the cordial invitation of my war comrades, the Jewish War Veterans of the United States, to speak to the people of the Nation concerning the tremendous part that those of Jewish blood have played in the drama of American independence and of world progress. And it is eminently fitting that this message should go forth across mountain and river and prairie from this historic city whose Liberty Bell still enshrines in letters of bronze the injunction of Leviticus: "Proclaim liberty throughout the land and to all the inhabitants thereof."

For liberty is a word that is sacred to every human heart. It is the shibboleth of nations, the magic call from the angel's trumpet of resurrection, a ray of God's own uncreated light penetrating the shadows of this vale of darkness. Only he who has felt the lash of oppression can justly evaluate the blessings of that freedom without which all labor becomes painful, all bread is bitter, all drink becomes gall. Ask him upon whose brain tyranny has forged a shackle, upon whose tongue dictatorship has placed a bridle, upon whose ambition paternalism has set restraining bonds, and he will tell you that, under God, freedom is the sweetest word that the lips can utter or the thoughts contain.

It is not surprising, then, that the race which has contended with the idolatry and luxury of ancient dynasties, and through war, captivity, and reproach, has preserved for us the writings of Moses and David, the recitations of Job and the mingled wailings and thunderings and jubilant anticipations of Isaiah, Jeremiah, and the Prophets, should naturally be imbued with the very spirit of freedom and loftiest patriotism.

From the deepest recesses of Jewish history we hear voices raised in a patriotic ardor and triumphant fervor that vie in brightness with the song of Deborah and move across the heartstrings with the majestic sweep with which the hosannahs of Moses and of Miriam announced for generations yet to be the first national independence of a delivered people. Indeed, the lyric piping of the shepherd's reed upon the hilltops of the Holy Land, the joyous outburst of the music of youth and maidens as they danced in the Palestinian fields, the swelling octaves of full-hearted gratitude for the Divine bounty of the harvest—all resound with the love of Israel for freedom and for freedom's God.

It is impossible to exaggerate the effect on human liberty and on progressive action and cultural thought of the Jewish contribution as evidenced merely by the Hebrew Bible itself. For it is a truism to state that Genesis stands as the fountainhead of the literature of the world. The earliest writings that compete with it in antiquity are those recovered by recent research from the dust of Ninevah and the tombs of Egypt, but neither the Euphrates nor the Nile has given to us anything that can compare in manifold value or in spiritual grandeur with the Hebrew relic which affords us glimpses of ancient life more than a thousand years before Herodotus, the father of history, was born—and these are corroborated by every advance of knowledge from extraneous and collateral sources. And, in the history disclosed by Genesis, there is nothing of the pompous inscriptions of equal antiquity left in Egypt or in Babylon, but rather is it the ordinary, everyday life of the people, the sunshine and shadow of human hopes and fears, of loves and aspirations, the flesh and blood of beings who differ in no essential from ourselves, though separated from our time by the lapse of 40 centuries.

The essential unity of all history in its recognition of patriotic service is made manifest through the explorations of science, imparting newer dignity and value to discovery and crowning with fresh endorsement the historical records which form so great a portion of the Hebrew Bible. The treasures written into the Scriptures become ever more precious with each new modern identification of lost cities, characters, and customs, with deciphered hieroglyphics, papyri, and exhumed ruins, for the civilized world cannot separate its accepted conception of the history and dignity of man from the narrative, the philosophy, and the development of Biblical records. That which the most brilliant of statesmen, philanthropists, and poets have found to be an inexhaustible source of material from which to guide men to better living and a more exalted patriotism cannot be ignored in a proper expression of national life or individual sacrifice.

For through all the pagan centuries of tyranny and terror, of decadence and loathsome worship of a thousand marble deities, the Jew alone adhered to the doctrine of one Supreme God. Contrasted with the inane and frequently vicious beliefs of the heathen world, the religion of the Jew shone in indescribable splendor like a burst of sunshine illuming the clouds of a storm-swept sky above a sea of blood.

It was this faith in God which enabled Israel meekly to bear that persecution which is the badge of the race. Survey the centuries that have gone, explore the dark caverns of pagan ignorance where, ever ready to strike, lurked the coiled serpents of intolerance, cruelty, and crime, and you will find hatred and persecution of the invincible Jew. Because, 30 centuries ago, he scorned to abandon his belief in God, he was made the victim of the vilest fanatacism. For this was he driven captive into the land of Egypt. For this were his cities destroyed, his temples demolished, his altars desecrated, his garb defiled, his wounded butchered, his dead mangled. For this was his country devastated by Syrian and Babylonian despots and the lands of his bondage strewn with the whitening bones of his slaughtered children. But through it all, the Jew clung faithfully and lovingly to the horns of his altar, cherished his synagogue, and worshiped Jehovah, the God of his fathers. Through the oppressions of Egypt, the wanderings in the desert, the life in Canaan, the noblest ideas of liberty found a home in the pages of Scripture and these fostered the spirit of national independence which rendered the household of Israel, though often overpowered, indissoluble, and unconquerable.

Today the custodian of the Alexandrian library is mute and his records vanished. The names of the Pharaohs and of Titus have been effaced from the most enduring of marble and live only in the researches of historical scholarship, but the heroism and patriotism of Moses, of Joshua, of Deborah, and David have survived Babylon and Nineveh and Egypt and imperial Rome, as examples for all times and races that fidelity to country and to God embraces in its purest exercise every principle that can make a people great among the nations of the earth.

And when, into the Stygian darkness and slavery that covered the ancient world, there burst the radiance of Christianity, with its gospel of peace and love for our neighbor, and be this remembered by every Christian who today hears my voice, it was the purest and loveliest of Jewish maidens, the rose of Sharon, the lily of Israel, who became the mother of the founder of Christianity and the light of the teaching of the gentle Nazarene was caused to shine first upon the homeland of the Jew.

Enslaved upon the reedy banks of the Nile, the Jew returned centuries later to dominate the land of the pyramids. Led captive into Babylon, he broke his chains to sit in the councils of Cyrus. A mere wanderer in Spain, he became its financial overlord. A sojourner in France, he reached the pinnacles of learning and industrial supremacy. A social outcast in England, he achieved such distinction that even British oppression was compelled to reverse its historic proscriptive policy and admit him to complete rights as a subject of the Empire.

So, from land to land and from age to age, Israel, the graybeard of the nations, has moved on with the Sepher Torah in his arms. He has wandered over deserts and traversed oceans, he has been seared by the fires of hate and beaten by the storms of persecution, but as often as his weary heart and bleeding feet caused him to falter on his thorny road, the radiance of the Torah filled his soul with hope and reinvigoration.

But it remained for our America to accord to the Jewish people the most splendid of opportunity, the most extensive of individual freedom, America, the most luminous illustration in all history of unselfish devotion to the downtrodden and oppressed and forgotten of every nation and of every clime.

For here was opened a new and brilliant chapter in the annals of the Tribe of Judah. And how radiant with splendor is that story of Jewish patriotism and valor in America, let history answer. Let history tell you today of the men of Jewish blood who pledged their lives to the infant republic in those early days when Hayim Solomon, a Polish Jew, contributed to Robert Morris the amazing sum of $300,000 for the cause of Washington and American freedom.

In our second war with England, as in the conquest of Mexico—that land which today denies spiritual and academic liberty to Jew and to Christian—Jewish names are inscribed in characters of living light, while in the Civil War, there were no fewer than 7,000 men of Jewish origin in the ranks of the Blue and the Gray.

So, too, when the battleship *Maine* sank in the Harbor of Habana, 15 Jewish sailors perished at their posts in the tropical waters, while 2,500 of their coreligionists saw valiant service in the brief conflict which made America a power in international affairs.

It was, however, the fires of the World War which became the giant crucible in which were tested the loyalty and devotion of the Jew to the land of liberty. Nearly 200,000 Jewish boys, with 10,000 Jewish officers in Army and Navy, were enrolled in that mighty American military power which saved the allied nations from an otherwise inevitable defeat. Eleven hundred of these were cited for conspicuous courage on the field of battle, 11,000 suffered wounds for their country; over 3,000 young Jewish men fell among the poppies of Flanders and on the trampled hillsides of France, and today, among the white crosses row on row, that mark the untimely harvest fields of war, there is wrought in beautiful and eternal stone the six-pointed star of David as mute testimony to the shining sacrifice of those sons of Israel who loved America better than their own lives.

So, on this day of lofty purpose, we pause amidst our labors and duties and cares to pay tribute to the men of Jewish faith who with their blood have imparted a richer crimson to the glorious stripes of the unsullied banner of liberty and woven into its very fabric that instinctive passion for freedom that has illuminated the soul of Israel from the dawn of the race; and, mindful of these, our own American dead, how much more exalted must become the sense of triumph with which American Jews celebrate the feast of Passover in commemoration of the deliverance of their fathers from the bondage of Egypt. Remembering our own struggle for freedom against alien misrule, how much more radiant in Jewish homes in America must be the glow of victory with which, in a spirit of dedication, are enkindled the festive and increasing lights of the feast of Chanukah, recalling the Maccabean champions of liberty; and, realizing that it is only through love for our Nation's Constitution and courts, for our laws and traditional ideals, that our America can retain her enviable position as the refuge of the persecuted and enslaved, how much deeper must be the sense of Pentecostal reverence with which is observed the feast of Shovuoth in memory of the time when the law was entrusted to Israel to preserve for generations yet unborn.

It is in this spirit that I, as a gentile, have gladly joined with the Jewish War Veterans of the United States to recall on this holy day the memory of those who have gone before us with the light of liberty, and who, like Jacob with the angel, have striven and have prevailed.

Within your hearts, men and women of America, I call upon you today to keep burning, like a Shekinah, the fire of love for our American land. Upon the doorposts of the Nation, I conjure you to set, like the Mezuzah, the indelible seal of the God who molds the character of nations and whose sustaining Providence alone can keep peoples happy, peaceful, and secure. From the gates of the temple of American liberty send forth today the clarion sound of the Shofar that all may be alert to the dangers that now confront freedom in America and the world, as we here, in this birthplace of American Independence, in a spirit of joyous memory and hopeful prophecy, devotedly consecrate ourselves anew to America's mighty and imperishable destiny in the sacred realization that

"The glory of the present is to make the future free,
To love our land for what she is, and what she is to be."

ADJOURNMENT SINE DIE

Mr. O'CONNOR. Mr. Speaker, I move that the House do now adjourn sine die.

The motion was agreed to; accordingly (at 12 o'clock midnight) the House adjourned sine die.

ENROLLED BILL SIGNED SUBSEQUENT TO ADJOURNMENT

The Committee on Enrolled Bills, subsequent to adjournment, reported that that committee had examined and found truly enrolled a bill of the House of the following title, which was signed by the Speaker on July 9, 1936, pursuant to House Concurrent Resolution 54:

H. R. 8875. An act to clarify section 104 of the Revised Statutes (U. S. C., title II, sec. 194).

BILLS AND JOINT RESOLUTION PRESENTED TO THE PRESIDENT

The Committee on Enrolled Bills, subsequent to adjournment, on the following dates presented to the President of the United States, for his approval, bills and a joint resolution of the following titles:

On June 22, 1936:

H. R. 2335. An act for the relief of Cora Akins;

H. R. 3777. An act for the relief of the Herald Publishing Co.;

H. R. 3866. An act to confer jurisdiction upon the Court of Claims to hear, determine, and render judgment upon the claim of Emanuel Bratses;

H. R. 6719. An act to amend the Canal Zone Code;

H. R. 7736. An act to provide for the establishment of the Whitman National Monument;

H. R. 8107. An act to authorize the striking of an appropriate medal in commemoration of the one hundredth anniversary of the founding of the city of Shreveport, La., and the opening of the Red River of the West to navigation;

H. R. 9191. An act for the relief of dependents of James B. Kiley;

H. R. 11688. An act providing for a change in the design of the 50-cent pieces authorized to be coined in commemoration of the one hundredth anniversary of the admission of the State of Arkansas into the Union;

H. R. 12257. An act to extend the jurisdiction of the United States Court for China to offenses committed on the high seas;

H. R. 12324. An act to amend section 723 (a) of the Revenue Act of 1932, as amended;

H. R. 12395. An act to provide revenue, equalize taxation, and for other purposes;

H. R. 12410. An act to amend section 8 of the act entitled "An act to establish a National Archives of the United States Government, and for other purposes", approved June 19, 1934;

H. R. 12455. An act to provide for the administration and maintenance of the Blue Ridge Parkway, in the States of Virginia and North Carolina, by the Secretary of the Interior, and for other purposes; and

H. R. 12876. An act to waive any exclusive jurisdiction over premises of resettlement or rural-rehabilitation projects; to authorize payments to States, political subdivisions, and local taxing units in lieu of taxes on such premises; and for other purposes.

On June 23, 1936:

H. R. 6773. An act to provide for an investigation to determine whether the water rights of the United States have been violated in the Clear Lake watershed, California, and for other purposes;

H. R. 8555. An act to develop a strong American merchant marine, to promote the commerce of the United States, to aid national defense, and for other purposes;

H. R. 10094. An act to amend the act entitled "An act to stop injury to the public grazing lands by preventing overgrazing and soil deterioration; to provide for their orderly use, improvement, and development; to stabilize the livestock industry dependent upon the public range; and for other purposes", approved June 28, 1934 (48 Stat. 1269);

H. R. 12458. An act authorizing a preliminary examination of the Intracoastal Waterway throughout Broward County, Fla.;
